Thomas A. Schweich

Missouri State Auditor

2011 ANNUAL REPORT

Office of The Missouri State Auditor

December 2011

Report No. 2011-123

http://auditor.mo.gov

A MESSAGE FROM THE STATE AUDITOR

The Citizens of Missouri
The Honorable Jay Nixon
The Missouri General Assembly

Following, please find the State Auditor's office annual report of the 123 reports issued, 166 bonds registered, and 117 initiative petitions received in 2011.

During 2011, this office helped identify more than a dozen instances of theft and misuse of public monies, totaling over $700,000 and leading to criminal charges against the individuals alleged to have embezzled the funds. We uncovered wasted resources and violations of law and policy in several state agencies, municipal courts and other political subdivisions.

We released the Fiscal Year 2010 Statewide Single Audit, which required over 27,000 hours to audit $13.46 billion in federal funds spent on major programs by state agencies. We activated this office's first ever rapid response team to address enrollment and attendance report tampering at a public elementary school and conducted audits of the Department of Revenue contract license offices for the first time in the history of this office.

The Auditor's Swift Assessment Program rapid response team and the Auditor's Follow-up Team to Effect Recommendations have, I believe, improved accountability in Missouri government.

As my first year in office concludes, I want to thank the professional and dedicated employees of the State Auditor's office who continue to serve the citizens of Missouri by improving government efficiency and accountability. I look forward to another productive year.

Very truly yours,

Thomas A. Schweich

OVERVIEW OF THE MISSOURI STATE AUDITOR'S OFFICE

Missouri State Auditor Thomas A. Schweich

DUTIES OF THE STATE AUDITOR

The Missouri Constitution and the Missouri Revised Statutes give the Missouri State Auditor the authority to establish appropriate systems of accounting for all public officials of the state and to audit all state agencies; boards and commissions; the state court system; school districts; counties that do not have a county auditor; and other political subdivisions, upon petition by the voters of those subdivisions.

All audits are conducted in an impartial, nonpartisan manner, in accordance with government auditing standards issued by the United States Government Accountability Office. State auditors adhere to the rigorous standards of the auditing profession and exercise the highest levels of integrity and ethics. Audit findings and recommendations are based upon reliable evidence, free from preconceived notions and the influence of personal opinions.

AUDITS PERFORMED

Audits of state and local government are performed by the State Auditor's office.

1) State Government Audits: The State Auditor conducts audits of state agencies, programs, and activities; boards and commissions; statewide elected officials; the General Assembly; the judiciary; the state's financial statements; and federal awards expended by the state. The State Auditor may also conduct audits of Department of Revenue contract license offices.

2) Local Government Audits: For counties that do not have a county auditor, the State Auditor is required to conduct an audit at least once every four years. The State Auditor also conducts an audit in a county collector's office after a vacancy occurs. In addition, the State Auditor conducts audits of Transportation Development Districts and may conduct audits of school districts.

   Qualified voters of a political subdivision, such as cities, school districts, water districts, etc., may request an audit through the petition process.[1]

For a complete listing of audits released in 2011, please see page 20.

[1] The number of verified signatures required for a petition audit is determined by the following table from RSMO §29.230:

No. of Votes in Last Election for Governor	The Greater of	
	Percent	Minimum
Below 1,000	25% of **registered** voters	-----
1,000 to 4,999	15% of actual votes	200
5,000 to 49,999	10% of actual votes	750
50,000 or more	5% of actual votes	5,000

FISCAL NOTES

The State Auditor's office is responsible for assessing the fiscal impact of initiative petitions proposing constitutional or statutory changes that citizens file with the Secretary of State. The fiscal note and fiscal note summary for each petition states the initiative's estimated costs or savings, if any, to state and local governmental entities. Once the Secretary of State certifies the official ballot title, summary statement of the measure, and the fiscal note summary, an initiative petition can be circulated publicly for signatures. Proposals that obtain the required number of signatures within statutory time limits will be voted on by the public at the next statewide General Election.[2]

The office is also responsible for assessing the fiscal impact for Missouri General Assembly adopted joint resolutions proposing constitutional amendments or bills without a fiscal note summary, which are to be referred to a public vote. The fiscal note and fiscal note summary for each joint resolution or bill states the measure's estimated costs or savings, if any, to state and local governmental entities.

During 2011, the State Auditor's office received notification to prepare fiscal notes and fiscal note summaries for 117 initiative petitions or joint resolutions. For a complete listing of initiative petitions received by the State Auditor's office in 2011, please see page 31.

BOND REGISTRATION

The State Auditor's office is responsible for reviewing and registering general obligation bonds issued by political subdivisions in Missouri to ensure those bonds comply with both state law and the conditions of the

[2] Petitions proposing amendments to the constitution require signatures of 8 percent of the legal voters in each of two-thirds of the congressional districts in the state, and petitions proposing laws must be signed by 5 percent of such voters.

contracts under which the bonds were issued. For a complete listing of bonds registered in 2011 with the State Auditor's office, please see page 25.

REVIEW OF PROPERTY TAX RATES

State law requires the Missouri State Auditor annually to certify all taxing jurisdictions throughout Missouri as to their compliance with state law and the tax limitation provisions of Missouri's Constitution, Article X, Sections 16-24, commonly known as the Hancock Amendment. The State Auditor's office property tax rate report states whether a taxing jurisdiction has met its obligation to set an overall tax rate at a level approved by voters and within the limits set by Missouri law. The Review of 2011 Property Tax Rates is Report No. 2011-118 and is available on our website.

NOTE: The State Auditor's office does not have the authority to reduce the tax rate of any taxing jurisdiction. Additionally, the State Auditor's office has no authority to determine or review individual tax assessments. Chapter 138, RSMo, governs the appeals process for assessed valuations as they pertain to individual taxpayers.

STATEMENTS AND TESTIMONY

The State Auditor is often called upon to advise the governor, legislature, and citizens on matters pertaining to state government operations.

Auditor Schweich frequently testifies before Missouri legislative committees regarding audits undertaken by his office. This year he testified before the House Appropriations Committee on Health, Mental Health, and Social Services regarding certain findings in the 2010 Statewide Single Audit.

NEW INITIATIVES WITHIN THE OFFICE

Shortly after taking office, Auditor Schweich started the Auditor's Swift Assessment Program (ASAP) to rapidly respond to credible allegations of waste, fraud, or abuse of public monies. ASAP is only activated if there is reason to believe evidence may be destroyed and the ASAP guidelines are met. This year, ASAP was activated to audit allegations of enrollment and attendance report tampering at a public elementary school, and its findings are contained in Report No. 2011-066.

Auditor Schweich also formed the Auditor's Follow-up Team to Effect Recommendations (AFTER). Every finding in an audit report is followed by a recommendation to bring the entity into compliance with the law and accepted accounting practices and to improve government accountability, transparency and efficiency. Ninety days after an audit with findings requiring immediate management attention is released, AFTER returns and reports on whether the entity has implemented the applicable audit recommendations.

In order to facilitate transparency and increase accountability, Auditor Schweich also instituted the Citizens Summary and a rating scale. The Citizens Summary provides readers with a short, plain language summary of each audit, and the rating scale rates the audited entity as Excellent, Good, Fair or Poor, so readers can tell at a glance how the entity is performing overall in the audited areas.

During 2011, we redesigned the State Auditor's office website at http://auditor.mo.gov. The website contains a wealth of information and many helpful links. All audit reports issued and bonds registered with the office from 1999 to present and all initiative petitions received by the office from 2003 to present are available on the website. Reports are searchable, listed chronologically, and categorized by subject and by region. The website also includes news releases, employment opportunities, and links for information on petition audits, federal stimulus monies tracking, political subdivision financial reporting, and various forms.

2011 AUDIT HIGHLIGHTS

ELECTED OFFICIALS

The State Auditor is required by state law to conduct audits of the offices of other statewide elected officials. In 2011, the State Auditor's office released reports related to the Office of the State Treasurer; the Office of Attorney General, Medicaid Fraud Control Unit; the Office of the Lieutenant Governor; and the Office of the Governor. Summaries of these reports follow.

Office of the State Treasurer

The audit of the Office of the State Treasurer discovered that a former employee was paid $15,791 for two months' work as a Transition Specialist after resigning his position as Deputy State Treasurer. The former employee reported eight hours per day of work on his timesheet during this time period, but minimal documentation existed to support the work for which he was compensated. This was the only audit finding, and, overall, the Office of the State Treasurer received a rating of **Good**.

(Report No. 2011-026)

Office of the Attorney General, Medicaid Fraud Control Unit

The audit of the Office of Attorney General, Medicaid Fraud Control Unit contained no audit findings. The Medicaid Fraud Control Unit received one of only two **Excellent** performance ratings given in 2011.

(Report No. 2011-037)

Office of the Lieutenant Governor, Lodging Reimbursement

The Deputy State Auditor released a report regarding the Lieutenant Governor's reimbursement of in-state lodging expenses. Lieutenant Governor Kinder reimbursed the state for in-state lodging expenses it had

incurred on his behalf. The State Auditor's office reviewed this amount and determined that another $1,888.63 was owed to meet the Lieutenant Governor's stated objective of reimbursing all in-state lodging expenses incurred on his behalf. Given the limited nature of this review, no rating was assigned.

(Report No. 2011-031)

Office of the Governor, Letter Report on Withholds

During the regularly-scheduled audit of the Office of the Governor, the State Auditor's office discovered that Governor Nixon's Office of Administration lacked any accounting support for its announced withholds of over $170 million in appropriated funds for fiscal year 2012. Moreover, the withholds were announced before the start of the fiscal year, which appeared to exceed the Governor's constitutional and statutory authority. The State Auditor issued a letter report recommending that the Governor work with the General Assembly to clarify and/or address the issues. The Governor declined to take such action, and the matter is currently pending before the court. Given the limited nature of this report, no rating was assigned.

(Report No. 2011-043)

EDUCATION

The State Auditor's office conducted various audits related to education during 2011. Some of these audits were based upon statutory authority or obligation, while others arose through the petition process. Summaries of several education-related audits follow.

Department of Higher Education, Separation and Retention Contracts of University Officials

The State Auditor released an audit of the Department of Higher Education, Separation and Retention Contracts of University Officials. The audit considered the employment contracts of the four chancellors of the University of Missouri campuses and the nine presidents of the other Missouri public 4 year universities. The audit identified five agreements which may not comply with state law and/or may not be in the best interest of the university. Missouri state law forbids public officials from receiving any compensation for work which has already been performed. Bonuses and severance packages are two examples of such prohibited payments.

Missouri Southern State University agreed to pay its then-president, Dr. Julio S. Leon, a lump sum of $168,518 upon his resignation after 38 years of employment, 25 of which were as president, and gave him the option to teach part-time as the highest paid professor. Northwest Missouri State University entered an employment agreement with its then-president, Dr. Dean L. Hubbard, who served as president for 25 years, which entitled him to a year's pay ($224,762) for the year after he resigned, and entitled him and his spouse to health and accident insurance for 2 years after he resigned. Harris Stowe State University entered a contract with its then-president, Dr. Henry Givens, Jr., who had served as president for 30 years, under which he would work as an advisor for two years at $70,000 per year and receive lifetime medical, dental, vision, long-term care and life insurance.

After 5 years of her presidency, Truman State University entered a separation agreement with its then-president, Dr. Barbara B. Dixon, which entitled her to receive a salary of $205,050 to serve as a consultant for 1 year after her resignation to document her thoughts and recommendations regarding cost-saving measures. She was entitled to receive an additional $10,000 at the end of the year if she performed satisfactorily and to receive an additional 6 months of insurance. After 5 years as president of Missouri State University, Dr. Michael T. Nietzel resigned and, in accordance with his contract, became the highest paid tenured professor in the Department of Psychology at an annual salary of $160,423. His contract also entitled him to be paid $80,211 for a semester of leave,

during which time he served as an unpaid advisor to Governor Nixon on higher education matters. Due to the limited objective of this audit, no overall rating was provided.

(Report No. 2011-055)

Northwest Missouri State University

An audit of Northwest Missouri State University (NWMSU) discovered it had not solicited competitive bids or proposals for auxiliary services for years and had extended and amended its existing contracts in exchange for approximately $1.5 million in donations or other payments to fund a stadium renovation. The university also failed to properly monitor its food services and facilities management contracts. The university and its foundation made substantial payments and provided other benefits to its former president for the year after his resignation, which may have been in violation of the Missouri Constitution's prohibition against additional compensation for public officials.

NWMSU subsidized over $3.3 million of the not-for-profit Northwest Foundation's operating costs, in apparent violation of the Missouri Constitution. The university also lacked documentation to support its room and board charges. In addition, the audit recommended that NWMSU assess the continued viability of programs which operate at a loss and its continued ownership of real property for which it has no current plans and the university's airplane. In addition, NWMSU should improve its internal controls over cash receipts, capital asset management, and computer security. The university received an overall rating of **Fair**.

(Report No. 2011-047)

St. Louis Public School District, Patrick Henry Downtown Academy, Enrollment and Attendance Recording and Reporting

The State Auditor activated the Auditor's Swift Assessment Program (ASAP) in 2011, for the first rapid audit response in the history of the office. In response to credible allegations of enrollment and attendance report tampering, and in light of a substantiated risk that potential evidence was

being destroyed, ASAP undertook an assessment of enrollment and attendance recording and reporting at Patrick Henry Downtown Academy (Patrick Henry). After ASAP conducted several interviews and took steps to preserve the available documentation, the State Auditor determined the allegations had merit and directed the audit staff to conduct a comprehensive audit of the issue.

The audit found numerous discrepancies between the manual attendance records completed by teachers and the official attendance records submitted to the state electronically by the school's office personnel. A school employee testified under oath that the school principal directed her to alter attendance data when entering it into the electronic system. The overwhelming impact of these discrepancies was to inflate attendance, thereby increasing funding and attendance percentages. The audit noted that district policy requires each teacher to enter attendance data in the electronic system personally, but this policy was not followed or enforced at Patrick Henry. The audit also noted that the district-wide Student Information System did not adequately limit or electronically track when or by whom changes are made in the system, leaving data subject to unauthorized or erroneous changes. Because of the nature of this rapid response audit, no overall rating was provided.

(Report No. 2011-066)

Lathrop R-II School District

The State Auditor's office audited the Lathrop R-II School District pursuant to a duly-executed petition request. The only audit finding was the school district failed to adequately monitor its diesel fuel usage. The school district's bus services contractor uses the school district's fuel tank, and the school district should track the fuel usage to ensure all of its fuel is used to benefit the school district. The overall rating was **Good**.

(Report No. 2011-025)

Kansas City 33 School District

The State Auditor released an audit of the Kansas City 33 School District (KCSD) which found that the school district did not always competitively bid or effectively monitor contracts and lacked adequate documentation to support nearly $4 million in expenditures for student incentives and food and meals. The audit recommended the KCSD maintain a complete list of surplus property and explore means to dispose of surplus property and reduce utility costs at closed schools.

The audit identified weaknesses in the KCSD's accounting controls which enabled the former principal of Lincoln College Preparatory Academy to make $58,000 in unauthorized disbursements and withdrawals, for which she is currently awaiting trial. The audit recommended the KCSD improve its compliance with the Sunshine law and establish formal written textbook policies and procedures. The audit also cautioned that the KCSD should continue to monitor its financial condition. Overall, the audit rated the KCSD **Fair**.

(Report No. 2011-082)

COURTS

In 2011, the State Auditor conducted several audits of various municipal courts and audited the Missouri Court of Appeals, Southern District. The State Auditor has the discretion to audit courts as he deems advisable and, generally, will audit the local municipal court when an audit petition is received. Below are summaries of several court audit reports.

Missouri Court of Appeals, Southern District

The State Auditor noted that the Missouri Court of Appeals, Southern District, has no supervisory review of payroll duties, most employees are not required to complete timesheets, and leave records are not adequately documented. One employee had been overpaid by more than $2,000, and another employee's leave balance was short eight days. The audit found that receipting and depositing procedures should be improved, and a

physical inventory of the law library's assets should be performed. Overall, in the areas audited, the performance was **Good**.

(Report No. 2011-007)

Seventh Judicial Circuit, City of North Kansas City Municipal Division

The State Auditor identified no findings during the audit of the Seventh Judicial Circuit, City of North Kansas City Municipal Division. The court received one of only two **Excellent** ratings given in 2011.

(Report No. 2011-033)

Fortieth Judicial Circuit, City of Lanagan Municipal Division

The State Auditor identified at least $521 in missing funds during the audit of the Fortieth Judicial Circuit, City of Lanagan Municipal Division, and, because certain records could not be located, it is possible additional monies are missing. City officials should work with law enforcement regarding the missing funds and records. The audit identified significant weaknesses in accounting controls and procedures, which increase the risk of theft or misuse of funds. The court lacked adequate procedures for collecting monies due on tickets and could be owed thousands of dollars in unpaid fines. The audit also found inadequate procedures related to case dispositions, license suspensions and ticket accountability. The overall performance of the court, in the areas audited, was **Poor**.

(Report No. 2011-012)

STATE AGENCIES

The State Auditor conducted various audits of state agencies in 2011, including audits of entire departments, audits of divisions within a department, and audits of certain functions, such as security controls or administrative functions, within a given department or

division. Summaries of a few such audits are provided below.

Department of Public Safety, Missouri State Water Patrol

The State Auditor released an audit of the Department of Public Safety, Missouri State Water Patrol (MSWP). Effective January 1, 2011, the MSWP was eliminated, and its powers and duties were transferred to the Missouri State Highway Patrol (MSHP), Water Patrol Division. The audit discovered over $3,000 in missing boater education fees, which weaknesses in internal controls allowed to go undetected, and a former MSWP clerk was charged with felony stealing. The audit also uncovered 28 boats worth $250,000 sitting unused in a warehouse with no clear plans for their future use or disposal. Finally, the audit revealed that, instead of the $3 million savings the transfer was promised to bring to the state, the transfer will actually cost the state an additional $900,000 per year, primarily due to increased retirement and health care costs. The MSWP received an audit rating of **Fair**.

(Report No. 2011-060)

Missouri Health and Educational Facilities Authority

An audit of the Missouri Health and Educational Facilities Authority (MOHEFA) found that MOHEFA did not have compliant travel policies and did not adequately control travel costs for its board members, employees, or contractors, and some reimbursed expenses exceeded state guidelines. Some expenditures did not appear prudent or necessary. MOHEFA had not modified its rate structure since 2007 and collected almost $1 million in annual service fees in fiscal year 2010, giving it a fund balance of over $10 million with limited plans for its use. The audit also recommended that MOHEFA adopt a procurement policy and solicit competitive bids or proposals for goods and services. Overall, MOHEFA was rated **Good**.

(Report No. 2011-054)

Department of Insurance, Financial Institutions and Professional Registrations, Division of Finance

Although the State Auditor was not given access to most financial institution examination records at the time of the Department of Insurance, Financial Institutions and Professional Registrations, Division of Finance (DOF) audit, a review of the records provided revealed several instances of noncompliance. The DOF was late performing association examinations 47% of the time. DOF employees failed to document that they completed all required procedures, had supervisors review completed examinations and used the most current version of the examination program when reviewing banks which closed between March 2008 and April 2010. In addition, the audit discovered that, in the 3 years ended June 30, 2010, the DOF collected $1,546,000 more from banks than necessary to cover actual costs. The DOF had no documentation that it had reviewed the overhead rates it charges associations and trusts to cover personnel costs. In the completed areas of the audit, the overall performance of the DOF was rated **Fair**.

(Report No. 2011-017)

Missouri Department of Conservation

An audit of the Missouri Department of Conservation (MDC) found that the MDC had spent over $1.23 million to reintroduce just 39 elk into Missouri, despite having budgeted only $411,185 to reintroduce 150 elk. The MDC spent three times more than planned to reintroduce less than a quarter of the number of elk planned. In addition, the MDC executive staff and commission discussed the elk restoration project in closed sessions, which was not allowed by the Sunshine Law. The audit also found the MDC lacked current area management plans for the majority of applicable conservation areas and accesses, a failing which was also noted in our prior audit of the MDC. The audit also recommended the MDC improve its internal controls over procurement cards and questioned the MDC's sole source procurement to a retired former employee whereby he will receive at least $155,000 to write a book about Missouri rivers and streams. The overall performance in the areas audited was rated **Good**.

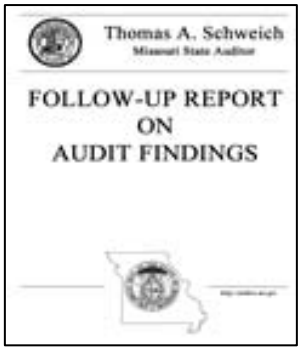
(Report No. 2011-120)

CONTRACT LICENSE OFFICES

The State Auditor conducted audits of ten contract license offices: Aurora; Columbia; Downtown (St. Louis); Imperial; Kansas City-Fletcher Daniels Building; Paris; Princeton; Raytown; South Fremont (Springfield); and Willow Springs. We rated nine of the offices **Good** and rated the Princeton office **Fair**. Several of the offices need to improve their accounting controls and procedures and their handling of prepayment void transactions.

(Report Nos. 2011-094 to 2011-103)

FOLLOW-UP



For the first time in the office's history, the State Auditor began dispatching a team, the Auditor's Follow-up Team to Effect Recommendations (AFTER), 90 days after an audit to assess whether recommendations for findings requiring immediate management attention have been implemented. The State Auditor issued five follow-up audit reports in 2011. Below is a summary of one such report.

City of Neosho, Follow-up

The State Auditor issued a petition audit report of the City of Neosho in July (Report No. 2011-036) and rated the city **Poor**. AFTER assessed the city's implementation of 13 findings requiring immediate management attention and found the city had made substantial progress. The city had either implemented or was in the process of implementing every one of these important recommendations.

(Report No. 2011-121)

STATEWIDE SINGLE AUDIT

Each year, the State Auditor's office is required to audit the state's financial statements and its use of federal awards, including American Recovery and Reinvestment Act of 2009 (ARRA) funds. The 2010 Statewide Single Audit required over 27,000 hours to audit the $13.46 billion in federal awards spent on major programs by the state. We found that the Department of Elementary and Secondary Education monitored its sub-recipients' ARRA spending one year in arrears, and the Department of Higher Education was initially unaware it had a duty to monitor how the $134 million of ARRA funds it disbursed to colleges and universities was spent.

In 74% of the cases we reviewed, the Department of Health and Senior Services had not conducted the mandatory annual reassessment of eligibility for a Medicaid Waiver program, and, in many cases, the Department of Social Services-Children's Division lacked adequate eligibility documentation and had insufficient supporting documentation for payments made. The Department of Social Services-Family Support Division lacks a formal and comprehensive system for evaluating whether costs charged to or counted toward the Temporary Assistance for Needy Families program were allowable. The Department of Health and Senior Services did not adequately control voided Women, Infants and Children program checks, and over 2,000 voided checks were later redeemed. No findings were made with respect to the Missouri Department of Transportation or Department of Economic Development. Given the compound nature of this audit report, no rating is assigned.

(Report No. 2011-011)

MISCELLANEOUS

In addition to elected officials, school districts and universities, courts, state agencies, contract license offices and federal awards, the State Auditor audits class three counties, boards and commissions, and transportation development districts, in addition to fulfilling other statutory obligations. Moreover, upon receipt of a petition bearing a sufficient number of valid signatures, the State Auditor will conduct an audit of any political subdivision, for which the political subdivision bears the cost. Below are summaries of some of the above-described audits released in 2011.

Schuyler County Collector and Property Tax System

While conducting a regularly-scheduled audit of Schuyler County, the State Auditor's office discovered evidence of theft in the County Collector's office. In total, at least $568,974 in property tax receipts is missing. Weak internal controls and procedures allowed the theft to continue undetected over several years. The former County Collector resigned and pled guilty to a federal charge of felony mail fraud. The State Auditor's office rated the performance of the Schuyler County Collector's office **Poor**.

(Report No. 2011-112)

Board of Election Commissioners, City of St. Louis

The State Auditor determined the Board of Election Commissioners (BEC), City of St. Louis, does not routinely review and update the database of registered voters. Although the BEC has made significant improvements since the prior audit, we still found that over 2,400 voters were registered in the city and elsewhere in the state. The BEC does not separately account for the additional five percent of election costs charged, so it is difficult to determine if the funds are used in compliance with state law. The audit

also found that the BEC does not adequately track candidate reports and may not always comply with the Sunshine Law and procurement policies. The BEC's overall performance in the areas audited was rated **Fair**.

(Report No. 2011-111)

Compilation of 2010 Criminal Activity Forfeiture Act Seizures

State law requires the State Auditor's office to issue an annual compilation of the Criminal Activity Forfeiture Act (CAFA) seizures for the year. The law requires the Attorney General, prosecuting attorneys, and law enforcement agencies participating in the federal forfeiture system to submit an annual report to the State Auditor; these reports are used to prepare the annual compilation. In February, the State Auditor's office released the 2010 report based upon the information it had received, but it was missing nine prosecuting attorneys' reports and all applicable law enforcement agencies' reports. Based upon the information provided, less than $26,000 in seizure proceeds went to Missouri public schools. Due to the nature of this compilation report, no rating is assigned.

(Report No. 2011-008)

City of Lanagan

During a petition audit of the City of Lanagan, the State Auditor identified over $13,500 in missing funds. Because city records disappeared from City Hall, auditors were unable to determine if additional monies were missing. In addition, auditors concluded that the city owes the state at least $36,000 in excess ticket revenues. The audit found the city is in poor financial condition and lacks adequate accounting controls and procedures. The audit recommended the city investigate large water losses, review its water rates, and enforce delinquent penalties. The City of Lanagan received a rating of **Poor**.

Thomas A. Schweich

Missouri State Auditor

Village of Riverview

December 2011

Report No. 2011-122

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Village of Riverview

Financial Condition, Reports, and Budgets	The General Fund is in poor financial condition, and the village's monthly financial reports and budgets need improvement. General Fund expenditures have exceeded receipts in each of the last 4 years, and the village has made transfers from restricted funds to cover shortages. During 2010, the village was charged overdraft fees 12 times. The Board of Trustees receives detailed financial reports each month, but some of these reports were not accurate, interfering with the Board's ability to make informed decisions about village operations. Village budgets did not contain all elements required by state law, and some were not accurate.
Expenditures	The village did not obtain bids for some purchases over $5,000 despite a village ordinance requiring it to do so. The village does not have adequate controls in place to ensure fuel purchases for law enforcement are reasonable. Officers use a fuel card to purchase fuel and note their odometer reading, but the village produced no documentation that fuel statements are reviewed or that discrepancies are investigated. The village awarded vehicle-repair work worth $2,900 to a business owned by two Board members, and the owner/Board members participated in the vote. The meeting minutes did not disclose the relationship, and simply referred to the business as a "private business." Although a state statute and a village ordinance both prohibit such a transaction unless the contract was competitively bid and the related entity was the lowest bidder, the village provided no documentation that it obtained bids for the work.
Restricted Funds	The village lacks adequate procedures to ensure restricted funds are spent only for intended purposes. The village allocated expenses to the Capital Improvements Fund without adequate supporting documentation or Board approval. The village transferred $240,905 from the Capital Improvements Fund to the General Fund to allocate expenses from 2008 and 2009, and began allocating some salaries and expenses to the Capital Improvements Fund each month. Under state law, these monies are only to be used for funding, operating, and maintaining capital improvements. In addition, the village does not separately account for motor vehicle-related fees and road and bridge taxes, so it cannot demonstrate compliance with constitutional and statutory restrictions on how these monies are spent. The village also made transfers from the Sewer Lateral Fund to the General Fund which appear excessive and lack supporting documentation.

Payroll Procedures and Personnel Policies	The village does not adequately segregate duties for payroll procedures, making it difficult to ensure payroll is processed accurately. If the village cannot segregate these duties, a supervisory or independent review should be conducted regularly. The Police Department submits time summaries based upon the work schedule rather than documentation of actual hours worked. Our review noted discrepancies between these time summaries and the computer aided dispatch reports which record the number of hours worked each day and are signed by the officers. The village allows employees to accumulate negative leave balances and take leave without submitting written leave requests, in violation of the village personnel policy. The village does not comply with its compensatory time policy, and neither its current practice nor its policy complies with the Fair Labor Standards Act. Village employees earn compensatory time for hours worked in excess of 8 hours per day and during weeks that they use compensatory time and leave, neither of which is required by federal law or village policy.
Sunshine Law	The village did not always document the reasons or votes for closing a meeting, and village policy does not clearly state how much citizens will be charged for duplication and research for a Sunshine request. Village personnel indicated that employee timecards and employee position status (full-time or part-time) are closed records, but these items are not addressed in the village policy and do not clearly qualify as closed records.

In the areas audited, the overall performance of this entity was **Poor**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	The Village of Riverview was awarded a $17,890 Edward Byrne Memorial Justice Assistance Grant Program Local Solicitation grant, of which, $7,300 was received and spent during the year ended December 31, 2010, for software.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 19

THOMAS A. SCHWEICH
Missouri State Auditor

To the Honorable Chairperson
and
Members of the Board of Trustees
Village of Riverview, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit the Village of Riverview. The village engaged Hochschild, Bloom & Company LLP, Certified Public Accountants (CPAs), to audit the village's financial statements for the year ended December 31, 2010. To minimize duplication of effort, we reviewed the CPA firm's audit report. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2010. The objectives of our audit were to:

1. Evaluate the village's internal controls over significant management and financial functions.

2. Evaluate the village's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the village, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the village's management and was not subjected to the procedures applied in our audit of the village.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures for the areas audited. The accompanying Management Advisory Report presents our findings arising from our audit of the Village of Riverview.

An additional report, *No. 2011-27, Twenty-First Judicial Circuit, Village of Riverview Municipal Division*, was issued in June 2011.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Debra S. Lewis, CPA
In-Charge Auditor:	Julie M. Moore, MBA
Audit Staff:	Jared Wooderson

Village of Riverview
Management Advisory Report
State Auditor's Findings

1. Financial Condition, Reports, and Budgets

The financial condition of the General Fund is poor and needs to be addressed. In addition, village monthly financial reports and budgets need improvement.

1.1 Financial condition

The financial condition of the General Fund is weak and is not expected to improve during the year ended December 31, 2011, which could put citizens at risk of the reduction or loss of some services. The following table reflects the revenues, expenditures, and fund balance of the General Fund for 2010, 2009, and 2008, from prior CPA audit reports, and anticipated amounts for 2011 from the budget.

	2011 Budgeted	2010 Actual	2009 Actual	2008 Actual
Revenues	$ 993,800	972,311	992,160	1,027,258
Expenditures	(1,095,135)	(1,265,040)	(1,209,842)	(1,149,352)
Revenues over (under) expenditures	(101,335)	(292,729)	(217,682)	(122,094)
Transfers in (out)	109,000	158,904	255,705	(428)
Change in Fund Balance	7,665	(133,825)	38,023	(122,522)
Beginning Fund Balance	116,263	250,088	212,065	334,587
Ending Fund Balance	123,928	116,263	250,088	212,065
Less restricted balance *	143,406	141,571	137,417	148,861
Ending unrestricted balance	$ (17,478)	(25,308)	112,671	63,204

* The restricted balance is the combined ending balance of the Sewer Lateral Fund and the Police Training Fund.

Expenditures of the General Fund have exceeded receipts in each of the last 4 years (excluding transfers). To help improve the financial condition of the General Fund, several transfers from restricted funds were made to the General Fund in 2009. The village transferred in $240,905 from the Capital Improvements Fund to recoup capital improvement expenses paid from the General Fund during 2009 and 2008. In addition, $12,500 was transferred from the Sewer Lateral Fund to recoup the costs paid from the General Fund related to the administration of this fund for 2005 through 2009. Some of these transfers were not adequately supported or proper (see MAR finding number 3).

In addition to the transfers approved by the Board of Trustees to allocate General Fund expenses, the Village Clerk also transferred monies from the Capital Improvements Fund to the General Fund during 9 months in 2010, to cover cash flow shortages in the General Fund; however, the village was still charged 12 times with overdraft charges on the General Fund bank account during 2010. The Village Clerk transferred some monies back to the Capital Improvements Fund when the monies were no longer needed;

however, the General Fund owed the Capital Improvements Fund $70,000 as of December 31, 2010. The estimated 2011 ending fund balance of the General Fund after adjustment for the amount due to the Capital Improvements Fund would be ($87,478).

The Village also deposits motor vehicle-related fees and road and bridge tax monies into the General Fund. As a result, some of the General Fund balance may be restricted for the Street Fund; however, the amount cannot be estimated (see MAR finding number 3).

In November 2010, the Board laid off a part-time administrative employee and a full-time police officer. In addition, the Board reduced the hours of an additional police officer from 40 to 30 hours per week. The Financial Liaison Trustee indicated these reductions, totaling approximately $69,500 per year, were made to improve the financial condition of the village. However, in December 2010, the Board approved a 3 percent raise for all remaining village employees, increasing salaries approximately $18,000.

It is essential the Board of Trustees address the financial condition of the General Fund both in the immediate and long-term future. To improve the financial condition of the village, the Board should review expenditures and reduce discretionary spending as much as possible, evaluate controls and management practices to ensure efficient use of village resources, attempt to maximize all sources of revenue, and closely monitor budgets.

1.2 Treasurer's report

The Board of Trustees receives and reviews a detailed monthly financial report, but some portions of the reports are not correct. Without an accurate financial report, it is difficult for the Board to make informed financial decisions regarding the village. During our review of the November and December 2010 monthly financial reports, we noted the following issues:

- Transfers between the Capital Improvements Fund and the General Fund were not shown consistently, sometimes overstating receipts or expenditures of those funds (see MAR finding number 3).
- Duplicate expenditures were included on two monthly reports, totaling $5,955.
- Certificates of deposits are not identified to a specific fund.

The inaccurate financial reports may have contributed to the poor financial condition of the village.

1.3 Budgets

Village budgets are not complete and some were misstated. Without accurate budgets, it is difficult for the Board to evaluate operations and

project the anticipated needs of the village for the upcoming year. We noted the following concerns during our review of budgets:

- The 2010 budget did not contain beginning and ending cash balances. The 2011 budget included actual 2010 beginning and ending cash balances for funds; however, the balances shown did not agree with reconciled bank balances. The actual ending 2010 balance of the General Fund was understated by $39,654 and the Capital Improvement Fund was understated by $285,827 on the budgets.

- The 2011 budget did not contain a budget message.

- On the 2011 budget, some transfers between funds were only shown on the budget of only one of the funds. In 2009, the village budgeted to transfer $12,500 from the Sewer Lateral Fund to the General Fund; however; this was only reflected on the budget for the Sewer Lateral Fund.

Section 67.010, RSMo, requires the preparation of an annual budget with specific information. A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific expectations for each area of village operations. A budget can also provide a means to effectively monitor actual costs by periodically comparing budgeted amounts to actual expenditures and the financial condition of the village.

Recommendations

The Board of Trustees:

1.1 Closely monitor the financial condition of the village and take the necessary steps to improve the financial condition of village funds. The Board should also perform long-term planning and ensure receipts are maximized, expenditures are closely monitored, and overdraft fees are eliminated.

1.2 Ensure the monthly financial report is accurate and complete.

1.3 Ensure budgets comply with state law and reflect accurate information.

Auditee's Response

The Board of Trustees provided the following written responses:

1.1 The Board of Trustees (the "Trustees") and staff are very much aware of the declining financial condition of the General Fund. The Trustees and staff will continue to work diligently to improve the

efficiency of Village expenditures and receipts with the hopes of maintaining its level of services to its citizens.

The Village engages the services of Hochschild, Bloom & Company LLP (the "Financial Advisor") to conduct a yearly audit of the Village and to review the monthly transfers, revenues and expenditures of the Village. Transfers from restricted funds in 2009, allocating expenses for 2005-2009, were completed under the oversight and review of the Financial Advisor. The Village agrees with the recommendation of the Auditor that these transfers must be adequately supported and the Trustees have directed staff to maintain such documentation.

1.2 Although not required under Missouri Law, the Village has worked with its Financial Advisor to prepare monthly financial statements for the Trustees and the Public. The Trustees agree with the Auditor regarding the importance of the accuracy of these financial statements with regards to maintaining expenditures within annual budgets. It is a priority of the Trustees that these monthly financial statements are accurate, and the Trustees have communicated this priority status to staff and the Financial Advisor.

1.3 The Trustees agree that the Village's annual budget must contain a budget message. A budget message will be included in all future Village budgets. Furthermore, the Trustees agree that accurate financial information is essential to a well planned Village budget. The Trustees have directed staff and the Financial Advisor to immediately implement these changes.

2. Expenditures

Controls and procedures over village expenditures are in need of improvement.

2.1 Bidding

Bids were not obtained for some purchased items. Without obtaining bids, the village cannot ensure it is receiving the best and lowest price and all interested parties are given an equal opportunity to participate in village business. Although Village Code Section 130.060, requires employees to solicit and advertise for bids for items or services costing more than $5,000, the village did not solicit bids or document sole source procurement for the following purchases in 2010:

Item or Service	Cost
Salt spreader	$ 5,997
104 tons of salt	6,204
Insurance	31,259

2.2 Fuel

The village does not have controls in place to ensure fuel purchases for law enforcement are reasonable. Proper controls will aid the village in preventing payments to vendors for amounts improperly billed and decrease the risk of theft or misuse of fuel occurring without detection. Law enforcement officers purchase gasoline for village-owned vehicles using fuel cards and enter the odometer readings during fueling; however, we noted several readings were entered incorrectly. The Police Chief indicated he reviews fuel statements for reasonableness prior to submitting them to the Village Clerk for payment; however, his review is not documented. Also, there was no documentation to show the incorrect odometer readings were noted or investigated. In addition, no one calculates the miles per gallon, per vehicle, per month, to review for reasonableness. Our review of December 2009 and January 2010 fuel invoices, noted one officer purchased 11.026 gallons of fuel at 10:23 and purchased an additional 10.876 gallons of fuel for the same vehicle, per the statement, 13 minutes later. The Police Chief indicated another officer had problems with his fuel card and this officer paid for fuel for both vehicles; however, this was not documented.

2.3 Conflict of interest

The village disbursed approximately $2,900 for the repair of village vehicles to a business owned by two members of the Board of Trustees. Board meeting minutes indicate the trustees who own the business voted to award the bid to their business.

In addition, village personnel could not provide documentation of the bids obtained. Meeting minutes indicate the village obtained bids for a new transmission and other repairs to a village truck and accepted the low bid from a "private business", but did not disclose the name of the business or that it was owned by two village trustees.

Village Code Section 135.040, states that no owner in a business who is a member of the Board of Trustees shall perform any service for the village in the amount of $500 or more per year unless the transaction is made pursuant to an award on a contract after it was publicly advertised and competitively bid, and provided that the bid was accepted was the lowest received. In addition, Sections 105.454 and 105.458, RSMo, prohibit financial transactions between the village and elected or appointed officials which involve more than $500 unless there has been public notice to solicit proposals, and competitive bidding and the lowest bid is accepted.

Personal interests in business matters of the village create conflicts of interest. Officials should abstain from any type of involvement in decisions which relate to themselves or relatives.

Recommendations

The Board of Trustees:

2.1 Ensure bids are solicited for all applicable purchases in accordance with village code.

2.2 Adopt procedures to reconcile fuel purchased to fuel used and review fuel use for reasonableness.

2.3 Comply with state law and village code by obtaining and documenting bids on any purchases involving village officials. Village officials who have a conflict should fully disclose their interest and should not vote on matters that involve them personally. Such matters and transactions should be completely documented so the public has assurance no official or relative has profited improperly.

Auditee's Response

The Board of Trustees provided the following written responses:

2.1 Although not required under Missouri Law, the Village has an ordinance requiring all expenditures in excess of $5,000.00 to be solicited through a bid process. The Auditor's report reflects three items or services that were not procured through bid or inadequate documentation was maintained. The Trustees have directed staff to immediately document all bids obtained for expenditures in excess of $5,000.00, pursuant to Section 130.060 of the Village's Municipal Code. With regards to the Auditor's report reflecting a $31,259.00 purchase of insurance, the Village utilizes the services of an "insurance broker" to solicit and obtain competitive bids for the Village's insurance needs. The 2010 insurance expenditure was at the recommendation of the Village's "insurance broker." The Village will require future "insurance brokers" to provide documentation of such competitive bidding, for Village records.

2.2 With regards to fuel receipts, the Chief of Police has already implemented a review documentation procedure for the review of fuel receipts for Village-owned vehicles.

2.3 The Trustees agree with the Auditor's comments and have implemented their recommendations.

3. Restricted Funds

The village has not established adequate procedures to ensure restricted monies are disbursed only for intended purposes.

3.1 Capital Improvements Fund

Some allocations of expenses to the Capital Improvements Fund and transfers from that fund were not reasonable, supported by adequate documentation, or approved by the Board of Trustees. Without adequate documentation, the village cannot ensure all allocations made between funds were proper and restricted funds were spent for intended purposes. Capital improvement sales taxes of approximately $173,000 were deposited to the Capital Improvement Fund during the year ended December 31, 2010.

In December 2009, the village transferred $115,267 and $125,638 from the Capital Improvement Fund to the General Fund to allocate expenses from 2009 and 2008, respectively, and began allocating some salaries and expenses to the Capital Improvement Fund each month. Village personnel indicated monies were transferred due to the financial condition of the General Fund (see MAR finding number 1). The following concerns were noted with the transfers:

- Salaries and fringe benefits of public works employees, who perform multiple functions, are allocated 50 percent to the Capital Improvement Fund (restricted) and 50 percent to the General Fund; however, no documentation of how these percentages were determined could be provided.

- During the 3 years ended December 31, 2010, the following expenses included in the allocations to the Capital Improvement Fund do not appear to be capital improvements:

Description	Amount
Electric for street lights	$ 53,700
Trash service	21,000
Cleaning supplies, gloves, batteries, office supplies, traffic tickets, and windshield wiper fluid	4,600
Electric and water services, port-a-potties, and reserved signs for the village park	4,700

Village personnel could not provide documentation to show these items were capital improvements. It appears the village has stretched the definition of capital improvements to include basic village operation expenditures, due to the decreasing financial condition of the village.

In addition, the Village Clerk often transfers monies from the Capital Improvement Fund to the General Fund due to cash shortages in the General Fund. The Village Clerk does not maintain adequate records to track the transfers. Also, there was no documentation of Board approval of the transfers. At December 31, 2010, the General Fund owed $70,000 to the Capital Improvement Fund for transfers that were not repaid to the Capital Improvement Fund.

Section 94.577, RSMo, provides that capital improvement sales tax monies are to be used for the sole purpose of funding capital improvements, including the operation and maintenance of capital improvements. Section 94.575, RSMo, defines a capital improvement as any capital or fixed asset having an estimated economic useful life of at least two years; and capital assets or fixed assets as being assets of long-term character that are intended

to continue to be held or used, including but not limited to land, buildings, machinery, furniture, and other equipment, including computer hardware and software.

To ensure village funds are spent appropriately, documentation should be maintained to support the allocation of expenses and to track transfers between funds. In addition, Board approval of transfers/allocations should be documented in the minutes and by signature or initials on the supporting documentation or a detailed list of transfers.

3.2 Streets Fund

Motor vehicle-related fees and road and bridge taxes are not accounted for separately to show compliance with restrictions established by state law. In addition, the village has not prepared or submitted a "Road and Bridge Tax Disbursement Affidavit" to St. Louis County each year as required by state law.

In 2010, the village received approximately $30,700 and $18,000 in motor vehicle-related fees and road and bridge taxes, respectively. These monies are deposited to the General Fund; however, expenditures of these monies are not specifically identified. In addition, records of any accumulating balances of these monies are not maintained. As a result, the village cannot determine at any point in time what portion of the General Fund balance represents these restricted monies or demonstrate compliance with restrictions.

Article IV, Section 30 of the Missouri Constitution, requires motor vehicle-related receipts apportioned by the state of Missouri be disbursed for street related purposes only, and Section 137.558 RSMo, provides receipts received for road and bridge taxes shall be spent for the improvement and repair of public roads, streets, and bridges. Section 137.558.3, RSMo, provides any village receiving road and bridge taxes shall submit an affidavit each year to the county indicating the money received shall be or has been spent for the improvement and repair of public roads, streets, and bridges within the corporate limits of the village.

3.3 Sewer Lateral Fund

The village does not have supporting documentation for administrative transfers made from the Sewer Lateral Fund to the General Fund, which appear excessive. As a result, there is no assurance these funds were spent only for their intended purpose. In 2010 and 2009, $2,500 and $12,500, respectively, were transferred from the Sewer Lateral Fund to the General Fund. The $12,500 in 2009 was $2,500 per year for the 5 years ended December 31, 2009. The administrative transfers were in excess of 11 percent of the fund's expenditures each year. Per the Village Clerk, the village's financial advisor suggested the transfer of an administrative fee for work performed for the Sewer Lateral Fund. There is no documentation supporting how the $2,500 per year fee was determined.

To ensure restricted funds are spent appropriately and expenditures are allocated to various funds in proportion to the benefits received, the village should ensure the allocation of costs is supported by adequate documentation and reasonable.

Recommendations

The Board of Trustees:

3.1 Ensure expenditures and salaries allocated to the applicable village funds are supported by adequate documentation, properly approved, and comply with state law.

3.2 Determine the amount of restricted monies in the General Fund and establish separate funds or a separate accounting of these monies as required by state law. In addition, the Board should file an affidavit of road and bridge expenditures.

3.3 Ensure all transfers between funds are adequately supported and reasonable.

Auditee's Response

The Board of Trustees provided the following written responses:

3.1 As previously stated, the Village utilizes the services of a Financial Advisor on a yearly basis for a full audit and on a monthly basis for review of all expenditures, receipts and transfers. The previous allocations of expenses from restricted funds were completed under the oversight and review of the Financial Advisor. The Trustees have instructed staff and the Financial Advisor to take the necessary steps to assure that adequate documentation is maintained to support the allocation of expenses from all restricted funds.

3.2 The Trustees have directed staff and the Financial Advisor to immediately implement the Auditor's recommendations under this subsection. Additionally, the Village will take the steps necessary to comply with the affidavit requirements of Section 137.558.3 RSMo.

3.3 The Trustees have directed staff and the Financial Advisor to take the steps necessary to ensure that all transfers between funds are supported and reasonable, per the Auditor's recommendation.

4. Payroll Procedures and Personnel Policies

Payroll records and procedures are in need of improvement. In addition, the village does not comply with its personnel policies. During the year ended December 31, 2010, the village spent approximately $680,900 for payroll.

4.1 Board approval

There is a lack of segregation of duties for payroll procedures. Without proper segregation of duties, the Board cannot ensure payroll is processed accurately. The Village Clerk receives employee timecards or department summaries of timecards every 2 weeks and posts hours worked to the contracted payroll system for processing. There is no independent review of the payroll register or payroll expenditures.

Proper segregation of duties is necessary to ensure all transactions are accounted for properly and assets are adequately safeguarded. If proper segregation of duties cannot be achieved, the Board should implement a documented independent or supervisory review to ensure the payroll records are in agreement with the accounting records. To adequately document Board approval, the payroll register should be reviewed, and signed or initialed by the Board of Trustees.

4.2 Time summaries

Police Department time summaries are not adequately supported by signed time records reporting all hours worked. Without signed time records, the Village cannot ensure employees are paid only for hours actually worked. The Police Lieutenant prepares a time summary listing all police department employees for each 2 week pay period from the work schedule instead of utilizing documentation of actual hours worked or computer aided dispatch (CAD) reports. Each day an officer is on patrol, the officer prints out a CAD report; records the number of hours worked, the date, vehicle used, beginning and ending mileage, and the total number of miles; signs the report; and submits it to the Lieutenant. However, the Lieutenant simply files the CAD reports for a year and then discards them.

Our review of the summary reports for May 30, 2010, through June 12, 2010, noted the following:

- There is no backup documentation for hours on the summary if an officer is not on patrol or on call. CAD reports do not include court or training hours. These hours are simply noted in the time summary. The time summary is not signed by the officer documenting the hours he was in court or training. The Police Chief and Lieutenant do not sign the time summary, which is the only documentation of their hours worked, since they are not on patrol.

- Some time summaries did not agree to the CAD reports. The time summary for May 30 through June 12, 2010, indicates one officer did not work on June 5th and a second officer worked 11 hours on July 12th, but the CAD reports show the first officer worked 10 hours on June 5th and the second officer worked only 10 hours on July 12th.

Detailed time records, signed by employees and reviewed and approved by supervisors, document and support hours actually worked, provide information necessary to monitor overtime worked and leave time use and balances, and are beneficial in demonstrating compliance with district policies and federal Fair Labor Standards Act of 1938 (FLSA) requirements.

4.3 Personnel policy

Employees are allowed to accumulate negative leave balances which does not comply with the village personnel policy. Without adherence to personnel policies, the Board cannot ensure all employees are treated equally.

The Village Clerk records negative leave hours in employee compensatory leave records as a negative entry and applies leave (vacation, sick, or compensatory) as it is earned to the negative balance until the compensatory leave balance is reduced to zero or a positive balance. There is no documentation in payroll records to show the leave transfers were discussed with the employees or approved by the Board of Trustees. For example:

- One employee accumulated a negative 8.25 hours leave balance by taking off a variety of hours ranging from 15 minutes to 2 hours and 15 minutes from August 19, 2010, through September 2, 2010. On September 2, 2010, the Village Clerk transferred 16 hours from the employee's vacation leave to cover the 8.25 hours of unearned leave which left a positive compensatory balance of 7 hours and 45 minutes.

- Beginning on August 10, 2010, an employee was allowed to take 59.5 hours of unearned leave. The Village Clerk applied 4 hours of earned sick leave to the negative balance and deducted 55.5 hours from the employee's final paycheck in December. The Village Clerk indicated the employee was out sick for the majority of the unearned hours, but could not provide documentation of this.

The employees noted in the examples did not complete leave requests for the time off taken. Village Code Section 501, provides each eligible employee must submit a written request in advance of the time he/she elects to be absent from regular duties, and exceptions may be made in cases of illness, accident, or emergency. In addition, there was no documentation in the meeting minutes to indicate the Board approved the unearned leave or the procedures used to reduce the accumulated negative balances.

4.4 Compensatory time policy

Current compensatory time procedures do not comply with village policy, and the village policy for compensatory time does not comply with the FLSA. In addition, village policy does not address how leave taken is to be addressed when calculating compensatory time or which employees, if any, would be exempt from overtime.

Our review of payroll indicated village employees earn compensatory time for hours worked in excess of 8 hours per day, not for hours worked over 40 hours per week as stated in village policy. In addition, employees earn compensatory time during weeks that they use compensatory time and leave. For example, in June 2010, one employee worked 37 hours and 45 minutes one week, used 4 hours and 45 minutes compensatory time, and used 8 hours vacation which totaled 50 hours and 30 minutes. Village records show the employee received 10 and 1/2 hours compensatory leave for this week.

Village policy states all employees earn compensatory time at a rate of 1 hour for every additional hour worked over 40 hours in a 7 day period. The FLSA requires employers to pay overtime or provide compensatory time at time and one-half to any nonexempt employees who work more than 40 hours during a normal work week or 171 hours in a 28 day cycle for law enforcement personnel.

Recommendations

The Board of Trustees:

4.1 Review and approve all payroll registers.

4.2 Require employees to prepare and submit time records for actual hours worked, which are signed by the employee, approved and signed by the applicable supervisor, and filed with the Village Clerk.

4.3 Discontinue allowing employees to use unearned leave.

4.4 Review overtime and compensatory policies with legal counsel to ensure compliance with the FLSA. In addition, the Board should ensure current practices for calculating compensatory time comply with village policy.

Auditee's Response

The Board of Trustees provided the following written responses:

4.1 The Trustee assigned to the individual Village Departments will review and initial the individual department's payroll.

4.2& 4.3 The Auditor's recommendations under these sub-sections have been implemented by the Village.

4.4 In October 2011, the Trustees passed an ordinance implementing the Auditor's recommendation under this sub-section.

5. Sunshine Law

Some requirements in Chapter 610, RSMo (the Sunshine Law), regarding open and closed meetings were not followed.

5.1 Closed meetings

From January 2010 through April 2011, the village did not document the reasons or the vote regarding meeting closure for 3 of the 12 closed meetings.

Section 610.022, RSMo, requires before any meeting may be closed, the question of holding the closed meeting and the reason for the closed meeting shall be voted on at an open session.

5.2 Rates on Sunshine Requests

Village policy does not clearly indicate the rate to be charged for duplication and research. As a result, citizens do not know how much should be charged for requests.

Village policy requires citizens to complete a "Request for Information Under the Sunshine Law" form. The request form attached to the policy as "Exhibit J", which is also the form distributed to citizens at the counter, indicates a research rate of $10 per hour. The form does not indicate a copying rate. The Village Clerk stated these forms were not correct and printed a form from her computer, which showed a research rate of $20.10 per hour and no copy rate; however, the Village Clerk indicated the correct research rate is $21.01 per hour and the copying rate is $10.15 per hour. The Village Clerk indicated the forms and exhibit had not been updated.

Section 610.026, RSMo, allows a maximum of 10 cents per page plus an hourly fee for copying public records, not to exceed the average hourly rate of pay of clerical staff, plus the actual costs incurred for any research for processing the request. The village should update its Sunshine policy and request form to show the amount currently charged per hour for copying and for research. In addition, the village should clearly document how the rates charged comply with state law.

5.3 Closed Records

Village personnel indicated employee timecards and employee position status (full-time or part-time) are closed records and are not made available to the public. These items are not addressed in village policy as closed records and do not clearly qualify as closed records. Without demonstrating how these records are considered closed, the village cannot show compliance with state law.

A Request for Information Under the Sunshine Law Form submitted to the village requested a list of employees' hourly wages and an indication of which employees were part-time. The Village Clerk provided a list of employee positions and salaries, but did not provide information regarding which positions were part-time. She replied, "Section 610.021 (13) RSMo, authorizes the closing of 'Individually identifiable personnel records,

performance ratings or records pertaining to employees or applicants for employment, except that this exemption shall not apply to the names, positions, salaries and lengths of service of officers and employees of public agencies once they are employed as such, and the names of private sources donating or contributing money to the salary of a chancellor or president at all public colleges and universities in the state of Missouri and the amount of money contributed by the source;' therefore, this list does not indicate who is a part time employee." The information regarding part-time positions was available in the budget documentation maintained by the Village Clerk.

Section 610.023, RSMo, prescribes that each public governmental body shall make that body's public records available for inspection and copying by the public. In addition, under Section 610.027.2, RSMo, the burden is on the village and its members to demonstrate compliance with the Sunshine Law when records are closed.

Recommendations

The Board of Trustees:

5.1 Ensure meeting minutes specifically document the reasons and vote for going into closed session.

5.2 Document how fees charged for processing Sunshine Law requests are calculated. In addition, the Board of Trustees should ensure the correct fees are charged to all citizens.

5.3 Ensure village policy documents specific records deemed closed. In addition, the Board of Trustees should ensure records are only closed in compliance with the Sunshine Law.

Auditee's Response

The Board of Trustees provided the following written responses:

5.1 The Trustee's have instructed the Village Clerk to make sure that the reason for the vote to enter in closed session is adequately documented in the Village's meeting minutes.

5.2 The Village has only charged the correct amount for requests pursuant to Section 610 RSMo; however, the Trustees have instructed staff to document compliance with Missouri Law.

5.3 The Auditor states that Village personnel indicated that employee time cards are closed records that are not available to the public. When a request was previously received for copies of employees' time cards, the Village Clerk informed the requestor that the Village would provide redacted copies of time cards. The names of the individual employee would be redacted from the time cards. It is the Village's position that this position complies with Section 610

RSMo. With regards to "part time" or "full time" status of individual employees, the Village agrees that individually identifiable employee status as either "full time" or "part time" is a public record under Section 610 RSMo. All requests pursuant to Section 610 RSMo will continue to be reviewed by the Village Attorney for compliance with State law and relevant Attorney General Opinions.

Village of Riverview
Organization and Statistical Information

The Village of Riverview is located in St. Louis County. The village was incorporated in 1950. The village employed 13 full-time employees and 2 part-time employees on December 31, 2010.

Village operations include law enforcement services, maintenance of village streets, building and electrical permits and inspections, and recreational facilities.

Chairman and Board of Trustees

The village government consists of a five-member elected board of trustees. The members are elected for 2-year terms. The chairman is appointed by the board from its members. The board of trustees, at December 31, 2010, are identified below. The members of the board of trustees are paid $100 per month. The compensation of these officials is established by ordinance.

Steve Paro, Chairman
Craig W. Boehmer, Trustee
Phyllis Paro, Trustee
Howard Pierce, Trustee
Bruce Stocker, Trustee

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The village was awarded $17,890 in federal stimulus monies through the Edward Byrne Memorial Justice Assistance Grant Program Local Solicitation grant, which was awarded by the U.S. Department of Justice for the purchase of court and accounting software for the municipal court. During the year ended December 31, 2010, the village received and spent approximately $7,300 for the software.

THOMAS A. SCHWEICH
Missouri State Auditor

To the Honorable Mayor
and
Members of City Council
City of Neosho, Missouri

We have conducted follow-up work pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program on certain audit report findings contained in Report No. 2011-36 *City of Neosho,* issued in July 2011. The objectives of the AFTER program are to:

1. Identify audit report findings that require immediate management attention and any other findings for which follow up is considered necessary at this time, and inform the city about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

    - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
    - In Progress: Auditee has begun to implement and intends to fully implement the recommendation.
    - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
    - Not Implemented: Auditee has not implemented the recommendation and indicates that it will not do so.

Our methodology included working with the city, prior to completion of the audit report, to develop a timeline for the implementation of corrective action related to the audit recommendations. We reviewed documents and other evidence indicating the level of implementation for each recommendation reviewed.

As part of the AFTER work conducted, we reviewed a report summarizing the status of our recommendations and supporting documentation submitted by the city before the follow-up meeting on December 8, 2011. We also held a meeting with city officials[1] to seek clarification and review additional documentation. Documentation provided by the city in its pre-meeting report and/or at the meeting included the fiscal year 2012 budget, city council meeting minutes, contracts, new policies and procedures, various accounting records, and bank statements. This report is a summary of the results of this follow-up work, which was substantially completed during December 2011.

Thomas A. Schweich
State Auditor

[1] City Manager Troy Royer did not participate in the meeting with city officials. Mr. Royer was previously employed by the State Auditor's office and worked on the original audit of the City of Neosho. That report was finalized and made public prior to Mr. Royer being offered and accepting the City Manager position.

City of Neosho
Follow-Up Report on Prior Audit Findings
Status of Findings

1. Financial Condition

The General Fund was in poor financial condition due to a prolonged decline in sales tax revenues; low cash reserves resulting from real estate purchases; cost overruns on renovation projects; and subsidization of the golf course for several years. The city failed to monitor its budget and cash balances, and as a result, was not aware of the severity of its financial condition.

The City Council did not receive and review accurate financial information which would have assisted in effectively monitoring cash balances and the financial condition of city funds. Accounting records and annual budgets were not accurate.

The city historically operated its golf course at a loss, and the Golf Fund had a deficit fund balance at the end of the city's last 2 audited fiscal years (2009 and 2008). As a result, the General Fund was required to subsidize its operations and activities. City records indicated approximately $3.5 million of the city's debt balance was for golf course improvements and equipment.

The city's independent audit report for the year ended September 30, 2009, indicated the city inappropriately borrowed restricted monies to subsidize the General Fund, and accurate information was not available for the year ended September 30, 2010.

At the recommendation of its independent auditor, the city developed a financial plan in July 2010, to address current and future cash flow issues to assist in meeting financial obligations and the repayment of restricted funds. The city also eliminated 36 jobs during the year ended September 30, 2010.

Recommendation

The City Council require accurate and timely financial reports be prepared, closely monitor the city's financial condition, and take the necessary steps to improve the financial condition of the General Fund and Golf Fund. The Council should also develop a debt policy and monitor the overall financial obligations of the city.

Status

In Progress

City officials indicated the General Fund balance increased during the year ended September 30, 2010, from a beginning deficit of $1,042,656 to an ending balance of $84,897. The unaudited General Fund balance at September 30, 2011, was approximately $835,000, which represents about a 79 day reserve.

City officials indicated they understand the necessity of timely and accurate financial reporting. The City Council is now receiving financial statements of the prior month at the second Council meeting each month. A new City Manager was hired and started on September 19, 2011, and a new Finance

Director was hired and started on September 26, 2011. The Finance Director, Accounting Manager, and the City Manager review the accuracy of reports prior to distribution. The city intends to follow Governmental Accounting Standards Board (GASB) guidance in the preparation of financial statements. Beginning in October 2011, the Finance Director presents highlights of financial results to the Council, as well.

City officials indicated that to reduce the city's subsidization of the golf course, the city closed the nine holes of the course known as "The Lakes". This was done to reduce the maintenance costs of the golf course and focus concentration on the remaining 18 holes. According to city officials, the other aspect of the golf course that causes the city's subsidization is the debt that is associated with the course. The city has looked into some possible ways to reduce the debt through refunding and consolidation to save some current costs and also obtain a lower interest rate in the current market. The golf course is the collateral for the 2006A Certificates of Participation (COPs). This original debt issuance was for a total of $6.125 million which includes five separate debt issuances including streets, drainage, golf course, and wastewater. The golf course portion of this debt is approximately $3.06 million, but as stated above collateralizes the entire debt of $6.125 million. These COPs are not callable until 2016. According to city officials, it is not in the city's best interest financially to refund any of this debt until the call date of 2016 and the city will re-evaluate the debt structure at that time.

City officials indicated they understand commingling and combining of funds is prohibited and transfers from restricted funds are not allowed. The city has re-segregated the inappropriately combined funds and has created an interfund repayment plan. All scheduled repayments have been made on time.

City officials have drafted a debt management policy which addresses aspects of debt financing, record keeping, monitoring, and proper disclosures and plan to present the policy to the City Council for approval at the January 17, 2012, meeting.

City officials understand its debt load is higher than desirable for a city of its size and resources. Debt service payments are made on time and other options are continuously explored including refinancing options, new revenue sources, enhancing community appeal, and more.

2.1 Accounting records

Accounting records were not maintained in a manner to allow the city to properly track and record the financial activity of restricted monies, and as a result, the accounting records maintained by the city were not accurate. The city consolidated several restricted funds into the General Fund in fiscal year 2008. While the city had taken steps to deposit current restricted receipts into separate funds, the balances of restricted funds as of

September 30, 2010, had not been determined and transferred to those new restricted funds.

Recommendation

The City Council ensure accounting records accurately reflect the financial activity of the city. The Council should also determine the amount of restricted monies in the General Fund, make appropriate transfers, and continue to track restricted monies as required by state law.

Status

Implemented

City officials indicated they are committed to timely and accurate financial reporting. Revenues are deposited, reviewed, and posted daily. Disbursements are reviewed and approved prior to payment and coded accurately. Bills are paid on time with discounts taken as applicable. All fees are accounted for properly within fund and account types. The city understands that consolidating restricted funds with the General Fund is not permissible and has re-segregated funds. Staff have been educated and finance management and staff are participating in relevant continuing education. The city is committed to accounting practices in conformity with city code, Missouri law, and GASB standards.

2.2 Bank reconciliations

As of February 2011, bank reconciliations had not been performed for the master fund bank account since September 2009, and our review of the last bank reconciliation performed of the city's investment bank account for August 31, 2010, noted a difference of $121,500 between the reconciled bank balance and the general ledger balance.

Recommendation

The City Council ensure bank reconciliations are performed each month, the reconciled bank balance is compared to the general ledger balance, and any differences are investigated.

Status

Implemented

Beginning in April 2011, bank statements have been reconciled to the general ledger on a monthly basis and are current. Reconciliations are completed before financial reporting each month to ensure all transactions have been recorded. According to city officials, reconciliations and cash summary reporting is provided to the City Council on the second meeting of the month.

2.3 Budgets

The 2011 and 2010 fiscal year budgets were not accurate and complete. The budgets did not include the beginning and estimated ending cash balances, and actual receipts and disbursements for the preceding year. The City Council indicated various information was not included in the budgets because it was not accurate.

Recommendation	The City Council prepare complete and accurate budget documents.
Status	**In progress** The 2012 fiscal year budget was approved by the City Council in September 2011. While it is not totally accurate and complete, the city hired a new City Manager and Finance Director in September 2011, and the City Manager, Finance Director, and Accounting Manager are reviewing and identifying budget adjustments to correct deficiencies. A detailed description of all the proposed adjustments, the overall financial impact, and the restated budget will be presented to the City Council for review and approval. The 2012 fiscal year budget does include an estimate of beginning and ending cash balances and prior year results. Monthly financial reports provided to the Council include a comparison of actual results to budgeted amounts.

3.3 Real Estate Transactions - Downtown Parking	The city spent a total of approximately $392,000 in fiscal years 2008 and 2009 to purchase properties for parking (including $290,000 for additional civic center parking), but did not plan financing for the development of the properties, and as a result, the properties remain unused.
Recommendation	The City Council document plans to develop properties purchased.
Status	**In progress** City officials indicated that prior to approval of the purchase of property a business plan shall be developed and presented to the City Council to include a detailed description of the planned use, all related costs associated with the planned use (demolition, modifications, utility issues, etc.), and the projected 5 to 10 year cost of maintenance for the property. The city has also developed formal plans for the properties purchased for parking and the projects are currently in process.

6.1 Bidding	Although the city had a procurement policy which required city officials to solicit bids for items or services costing more than $1,500 and advertise and obtain City Council approval for bids for items or services costing more than $5,000, the city did not solicit bids for numerous purchases made during the year ended September 30, 2010, and through January 2011. Further, while the City Council had adopted and approved a formal purchasing policy, various versions of the policy, which included conflicting purchasing and bidding requirements, were used by city departments.
Recommendation	The City Council ensure bids are solicited for all applicable purchases and services in accordance with city ordinances and sufficient documentation is maintained. The Council should also ensure the adopted and approved purchasing policy is used by all departments.

Status

In Progress

City officials indicated the city understands the importance of procurement controls and an effective bid process to maximize value to the city for taxpayer dollars spent. The city has instituted a practice of requiring bids. For purchases up to $1,500, it is up to the director's discretion, within the constraints of the city code and budget. Purchases of $1,500 to $5,000 require three written, catalog, or faxed quotes and City Manager approval is required. Purchases of $5,000 and above require three sealed bids and City Council approval.

On October 29, 2011, the City Clerk notified all city directors by memo of the current purchasing policy to ensure the correct purchasing policy was utilized.

Invoices are compared to bid information prior to payment.

During the fiscal year 2012 budget process the City Council approved letting the golf course management contract run out for the third and final year of the contract compared to buying out the last year. Some aspects of the contract were changed such as amending the contract payment amount from $211,297 per year to $201,000 per year and the percentage of golf cart rental fees from 12.5 percent to 10 percent. The golf course management contract will be re-evaluated during the fiscal year 2013 budget process.

7.1 Fuel and Usage Records

Problems noted regarding fuel and usage records included:

- Significant differences between fuel use and purchases were not investigated.
- Police department fuel use was not reconciled to fuel purchases.
- Mileage or fuel use logs were not maintained for bulk fuel tanks used by the golf course, and as a result, fuel use was not reconciled to fuel purchases.
- A mileage log was not maintained for the courtesy car at the airport, and as a result, fuel use was not reconciled to fuel purchases.
- Mileage logs maintained by the City Manager, Fire Chief, and employees of the police department, park department, and public works department were not always accurate and complete.

Recommendation

The City Council require fuel use logs be maintained for all city-owned vehicles and equipment, and these logs be reviewed for accuracy and

reconciled to fuel purchases. Any significant discrepancies should be investigated.

Status

Implemented

City officials indicated all departments are required to keep a fuel and mileage log in every city vehicle. Each month, the Public Works Administrator downloads a fuel report from the automated fueling system and prepares each department a spreadsheet that lists the date, time, pump number, odometer reading, quantity of fuel pumped, employee card number, department, and vehicle number. The directors or their designees then compare their department's fuel usage logs to the spreadsheet and check for discrepancies.

A uniform mileage and fuel log was developed by the city and has been implemented for city-wide use. The mileage and fuel log includes date, equipment identification number, employee name, gas/diesel, fuel pumped, miles-in, miles-out, and comments.

9.1 Segregation of Duties

Accounting duties were not adequately segregated. The Accounting Manager prepared deposits, took deposits to the bank, and reconciled some city bank accounts. In addition, there was no documented supervisory review of the duties performed by the Accounting Manager.

In June 2010, the Finance Director was given authority by the City Manager to make electronic wire transfers between city bank accounts; however, procedures did not provide for documented supervisory review of such wire transfers.

Recommendation

The City Council segregate accounting duties to the extent possible and implement appropriate reviews and monitoring procedures.

Status

In Progress

There are two collection clerks in the water department. Together, the two clerks prepare the deposit for that day's business and reconcile it to the daily collection reports. City officials indicated cameras with audio and video have been installed in the collections office and all receiving, counting, and balancing activities are conducted in view of the cameras. In addition, according to city officials, the Finance Director and Accounting Manager make unannounced visits to the collection office throughout the day. Once reconciled, the deposit is then placed and locked in a bank bag that once locked is only accessible by the bank. City officials indicated one clerk will then take the deposit to the bank. Deposits are made daily and intact. The Accounting Manager then verifies the amount deposited in the bank is the same amount recorded in both the general ledger and the collection closing

documents for that day. City officials indicated collection clerks cannot go back to a prior day and change transaction detail. According to City officials, an accounting clerk position has been approved and is being posted. The accounting clerk will cross train as a collection clerk to fill in for scheduled and unscheduled absences of one of the regular collection clerks. All finance department personnel will be required to take a 1-week vacation with another person performing their essential functions while they are absent. The Accounting Manager reconciles the city's bank accounts. The Finance Director reviews the account reconciliations before they are provided to the City Council.

City officials indicated wire transfers from the investment account to other organizations are first initiated through the bank web site by the City Clerk. The City Clerk gets a copy of the request for transfer, the appropriate documents, and the authorizing signature. The City Clerk then initiates the payment to the appropriate financial institution. Once initiated, the Accounting Manager signs into the web site, reviews the initiated transfer, and transmits the payment. Copies of the transfer request, back up documentation, authorizing signature, and the transfer confirmation are kept with the batch created to move the monies on the general ledger side.

The city is in the process of evaluating replacement financial reporting and management software which will include at a minimum, general ledger, accounts payable/purchase order, payroll, human resources, and utility billing. A new system is expected to be fully implemented with respect to financial and billing activities by September 30, 2012.

9.2 Receipting, Posting, and Depositing Procedures

Receipting, posting, and depositing procedures need improvement.

- Manual receipt slips were not issued for some monies received.
- The numerical sequence of manual receipt slips issued by the receptionist at city hall and employees of the collection department and park department were not accounted for properly.
- Amounts recorded on the manual receipt slips were not reconciled to the city accounting system and deposits.
- Receipt slips were not always issued by the collection department for monies collected at other departments and then transmitted to the collection department.
- The numerical sequence of receipt and batch numbers assigned by the city computerized accounting system were not accounted for properly.

- City receipts were typically not deposited timely and intact and were not always posted to the computerized accounting system timely.

- Rental deposits for use of the Lamp Community Center were held until refunded, and no documentation was retained to support the refunds.

Recommendation

The City Council require receipt slips be issued in numerical sequence for all monies received and the numerical sequence of receipt slips be accounted for properly. The City Council should also ensure manual receipt slips are reconciled to amounts recorded on the computerized accounting system and deposits, deposit all monies intact and in a timely manner, and issue all refunds by check. The City Council should account for the numerical sequence of computerized receipt and batch numbers and work with the computer programmer to ensure the accounting system tracks voided or deleted receipt numbers.

Status

Implemented

City officials indicated when other departments collect monies, a signed remittance form is submitted detailing what the payment is for, where it should be coded, and a breakdown of payment type. The department is to wait while the collection clerk verifies and signs off on the transmittal. The collection clerk will then provide the department a copy with a system generated transaction number.

All receipt numbers are accounted for properly, whether for utility or other city revenue collected. If a receipt number is spoiled or wasted, the clerk is to screen print and attach an explanation to the daily balance report. All batch numbers are also accounted for and audited daily by the billing specialist.

Receipts for the utility department are automatically generated by the system. Collections by the City License Clerk are receipted manually. The City License Clerk uses pre-numbered triplicate receipts and all receipt numbers are accounted for properly. City licenses are also pre-numbered and all license numbers are accounted for properly.

Payments are collected from the after-hours drop box each morning and payments through the mail are delivered to the collections department daily. Payments received through the drop box, mail, window, and from other departments are to be processed and deposited in the bank on the same day they are received.

The Accounting Manager reconciles all receipts the following day, verifies account codes assigned, and releases the transaction for posting to the general ledger.

The city has established a practice that all deposits received from whatever source or for whatever purpose are deposited daily and credited to the deposit account of the appropriate fund. When deposits are to be refunded, the refund is issued by check.

10.1 Subsidization and Utility Rates

Utility revenues were used to subsidize General Fund operations, and as a result, city customers may have been paying too much for utility services.

The city increased water and sewer rates in fiscal years 2008 and 2009, respectively, without performing cost analyses or utility rate reviews.

Recommendation

The City Council discontinue using utility monies to fund other city operations. In addition, the City Council should review utility rates periodically to ensure receipts are sufficient to cover all costs of providing these services, but not set at a level which results in excessive fund balances. Such reviews should be documented.

Status

In Progress

City officials indicated when final adjustments are complete to the fiscal year 2011 financial records, an analysis will be performed on the utility revenues and expenditures to determine if the revenues are adequate to meet current and upcoming operating costs and related debt obligations. The utility rate structure will be reviewed. The information will be presented to the City Council for information and action, if needed.

The city understands that Utility Fund revenues are not to be used to subsidize the General Fund and has taken measures to assure that it will not do so in the future, including the requirement that all fund transfers be reviewed and approved in advance by the City Council.

10.2 Water Usage

Although the city compared the gallons of water billed to customers to gallons of water pumped each month, significant differences were not investigated. In addition, city water usage was not tracked, and without this information the city could not properly perform the reconciliation.

Recommendation

The City Council investigate significant differences between gallons of water pumped to gallons billed and track city usage on a monthly basis.

Status

In Progress

City officials indicated that each month, the Public Works Administrator completes a pumping report that includes water pumped from the filtration plant and wells to get a total of all gallons pumped. She also compiles data from each pump station, tower, and main line meter that depicts usage split into the Crowder College area and the City of Neosho to narrow down the

area that could possibly have a major leak. She then assembles information from the pumping report, billing print outs, water usage from the Fire Department, wastewater line maintenance, water line and fire hydrant leaks, and repairs to obtain a water loss percentage. Starting with the July 2011 meter books, she has started entering every meter reading into a spreadsheet, to audit the computerized billing system for any major inconsistencies and to compare the totals with Billing Department totals. If a vast discrepancy is noted for a meter, a work order is filled out and the problem is investigated and repaired, if needed.

10.5 Adjustments

While the Finance Director reviewed and approved adjustments to the utility system, which were submitted by the Billing Analyst, a subsequent review of the actual changes made to the utility system was not performed.

Recommendation

The City Council ensure approved adjustments are compared to actual changes made in the utility system.

Status

Implemented

City officials indicated the city follows the city's ordinance regarding utility billing adjustments. A new form has been implemented which requires the billing coordinator to sign off when an adjustment is requested. Approval by the Finance Director or the Finance Manager is required to make the adjustment. After the adjustment is made, the Utility Collection Specialists verify the adjustment was made accurately.

11. Meeting Minutes

The city did not ensure compliance with the Sunshine Law for closed session meetings.

- Meeting minutes were not sufficient to demonstrate how some issues discussed in closed meetings were allowable under the Sunshine Law.
- Open meeting minutes indicated meetings were closed by the City Council for a specific reason; however, closed meeting minutes indicated other topics, that were not specifically identified in open meetings minutes, were discussed.

Recommendation

The City Council ensure only allowable topics are discussed in closed meetings and specific reasons for closing a meeting are documented. Closed meeting discussions should be limited to topics announced in open session.

Status

Implemented

Open minutes for the city document the reasons for closing meetings and specific sections of law that allow for the closed meeting are documented. All closed meeting discussions are limited to the topics announced in open

session. City officials indicated the City Clerk ensures all city staff and City Council members have a copy of the Missouri Sunshine Law books along with a letter referencing the importance of strict compliance. According to city officials, the City Clerk re-distributed the booklet to all applicable individuals in November 2011. All Sunshine Requests are directed to the City Clerk to ensure ongoing compliance.

Thomas A. Schweich

Missouri State Auditor

CONSERVATION

Department of Conservation

December 2011

Report No. 2011-120

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Missouri Department of Conservation (MDC)

Elk Restoration	After the MDC presented a budget estimating a cost of $411,185 to release 150 elk in the state, the Commission voted to move forward with the elk restoration project, but the budget presented did not include costs for several items, such as salaried employees, habitat improvements, or long-term monitoring. As of June 30, 2011, the MDC had spent over $1.23 million to reintroduce just 39 elk; it had spent three times more to reintroduce about one-fourth as many elk as planned. MDC executive staff and the Commission discussed the elk restoration project in closed sessions in January, April and May 2010. Those discussions were not allowable under the Sunshine Law.
Conservation Area Planning	The MDC did not have area management plans for 470 of 807 (59%) applicable conservation areas and accesses, and it only confirmed 104 of the existing plans as being current (69 were specifically reported to be outdated). In our prior audit report (Report No. 2009-113), we noted that the MDC had not made it a priority to develop and update such plans.
Expenditures	The MDC needs to improve internal controls over procurement cards. On several occasions, MDC employees split transactions to avoid transaction limits or bidding requirements. In addition, the MDC agreed to pay a retired former employee at least $155,000 to write a book about Missouri rivers and streams. The MDC did not solicit bids or document its reasons for this sole source procurement.

In the areas audited, the overall performance of this entity was **Good**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	During the year ended June 30, 2010, the Department of Conservation received monies from the U.S. Department of Agriculture-Wildland Fire Management program and the U.S. Department of the Interior-Habitat Enhancement, Restoration and Improvement programs, and spent $50,628 on the Fuel for Schools and Williams Ford Low Water Crossings projects.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Conservation Commission
and
Robert L. Ziehmer, Director
Department of Conservation
Jefferson City, Missouri

We have audited certain operations of the Department of Conservation, in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the years ended June 30, 2010 and 2009. The objectives of our audit were to:

1. Evaluate the department's internal controls over significant management and financial functions.

2. Evaluate the department's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the department, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the department's management and was not subjected to the procedures applied in our audit of the department.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the Department of Conservation.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Dennis Lockwood, CPA
In-Charge Auditor:	Christina Davis
Audit Staff:	Albert Borde-Koufie, MBA
	Jennifer Weggenmann, MBA
	Joshua Allen, CPA

1. Elk Restoration

The Missouri Department of Conservation (MDC) did not prepare a complete and accurate estimate of costs to reintroduce elk into Missouri. The MDC estimated the cost to reintroduce 150 elk into Missouri in the Spring of 2011 would be about $411,000 ($2,740 per elk); however, as of June 30, 2011, the MDC has spent approximately $1.23 million ($31,538 per elk) to release a total of 39 elk into the state. The Commission discussed issues related to the elk restoration project in closed session which did not appear to be allowable for closed session under state law.

1.1 Project costs

In October 2010, MDC officials presented the Commission a financial budget that included estimated costs of $411,185 to release 150 elk in the state. In October 2010, the Commission voted to move forward with elk reintroduction. The budget included costs to capture the elk in Kentucky and construct holding pens, payroll for hourly employees, and various other related costs. However, the budget did not include personnel costs of salaried employees, or the long term cost to monitor the elk. In addition, the budget indicated habitat improvements within the elk restoration zone would be necessary, but did not estimate the cost of those improvements.

As of June 30, 2011, the MDC has incurred personnel services including fringe benefits, expense and equipment, habitat improvement, and elk monitoring costs of about $568,000, $357,000, $219,000 and $86,000, respectively. The total estimated cost incurred in state fiscal year 2011 was $1,230,000, over three times the original cost estimate. As of June 1, 2011, 34 adult and 5 newborn elk, just over 25 percent of the projected number of elk included in the MDC report, have been reintroduced in Missouri.

To help ensure the Commission makes well-informed decisions, the MDC executive staff should provide complete and accurate fiscal information.

1.2 Closed session discussions

In the January, April, and May 2010 closed sessions, MDC executive staff and the Commission held discussions in closed session regarding the elk restoration project. The State Auditor's office believes the closing of these meetings violated the Sunshine Law.

The MDC general counsel opined that such discussions were allowed in closed session due to the potential for litigation or discussion of legal matters.

According to the Sunshine Law, meetings, records, votes, actions, and deliberations of public governmental bodies are to be open to the public unless otherwise provided by law and exceptions should be strictly construed to promote the state's policy of open records. The Sunshine Law, Chapter 610, RSMo, provides public governmental bodies shall not discuss any other business during the closed meeting which differs from the specific reason used to justify such meeting, record, or vote. In addition, the

Commission should restrict the discussions in closed meetings to specific topics listed in Chapter 610, RSMo.

Recommendations

The MDC:

1.1 Ensure complete and accurate cost estimates for significant projects are prepared and provided to the Commission.

1.2 Ensure only allowable subjects are discussed in closed meetings.

Auditee's Response

1.1 As defined in the elk restoration plan, the estimated operational cost for trapping, holding, relocating, testing, and monitoring up to 150 elk in Fiscal Year 2011 (FY11) was approximately $411,000 in Department funds. A total of $363,033 was actually expended by the Department during FY11 for operational costs associated with elk restoration. As openly discussed with the Conservation Commission, the budget submitted with the Elk Restoration Plan included Department operational costs for the remainder of FY11. Consistent with other Department operational cost projections, the Commission was fully aware of activities not contained in the $411,000 operational costs and that existing staff hours would be used to implement the elk restoration project. The Commission understood habitat improvements on private and public land would provide benefits to a wide variety of forest, fish, and wildlife resources in the restoration zone. The Commission was fully informed of all pertinent and relevant information at the time the elk restoration decision was made.

The $31,538 per elk is a misleading calculation. The $1.23 million cost included all staff time, habitat work that benefits all wildlife, road maintenance to ensure public access, landowner technical assistance and cost-share services, etc, within the approximate 225,000 acre restoration zone. The majority of those services would be incurred regardless of elk restoration efforts. Staff and visitors to the area have noted turkey, deer, bobcats, coyotes, and bear, in addition to elk, in the area benefiting from the habitat improvements. Habitat work occurred well before elk restoration activities and will occur well after initial restoration steps are completed. The stated $1.23 million dollar amount included one-time costs for building pens that will be used over the lifetime of the project. Road improvements made in Missouri have and will continue to enhance public access and associated economic benefits to the area for decades. This is an ongoing, multiple-year project that will bring up to 150 elk to the state.

1.2 The department contends that closed session discussions identified by the State Auditor were related to potential legal actions, causes of action, or litigation, as reflected in the minutes and as specifically allowed by RSMo. §610.021(1). We believe holding these legal discussions in closed session did not, in any way, violate the Sunshine Law. Prior to every closed Commission meeting, all topics proposed for discussion are reviewed by the department's counsel to ensure the topics fall within one of the statutory exceptions to the Sunshine Law; during closed sessions, discussions are limited to those topics covered by the statutory exceptions.

2. Conservation Area Planning

The MDC has not made significant progress toward ensuring management plans for conservation areas have been developed and updated. An analysis of preliminary area planning data indicated 470 (59 percent) of 807 conservation areas and accesses did not have an area plan as of June 2011.

In our prior audit report, issued in October 2009, we noted the MDC had begun development of a tracking system for area management plans, but development and updating of plans had not been made a priority for regional and area managers, and revisions of area planning policies and procedures had not been completed.

In May 2011, the MDC completed development of new area planning policies. The MDC requested regional coordination teams (RCTs) report the current status of area plans and develop a schedule to complete development and updating of area plans for all conservation areas and accesses by July 1, 2016. We requested the preliminary information on the current status of area plans submitted by the RCTs. That information had not been compiled into a report or reviewed by the MDC for completeness or accuracy; however, it appears to be the most current information available. Of 955 facilities including conservation areas, accesses, towersites, community lakes, ranges, and buildings listed in the data, the MDC determined 807 conservation areas and accesses should have a plan prepared. However, the RCTs reported area plans did not exist for 470 of these facilities. In addition, of the 337 existing plans, the RCTs reported 69 were outdated and did not state whether 164 plans were current or not.

The newly developed policy states the purpose of area planning is to create a direct linkage between department goals, area management objectives, and the allocation of resources. In addition, area plans will establish management continuity over time and communicate resource and public use management decisions more clearly within and outside the department.

Area management plans are one of the primary means to identify existing natural resources and potential resource management activities and public utilization of MDC lands. MDC staff indicated the area plans are an

important component in the development of divisional and regional budgets and workload planning.

Recommendation

The MDC ensure area management plans are developed and updated in a timely manner.

Auditee's Response

Efforts are well under way that are consistent with the auditor's recommendations and we are encouraged by the State Auditor's concurrence with our planned approach. The Department has over 800 areas that require area plans; plans have already been developed for more than 330 areas and an additional 135 area plans are scheduled for completion by July 2012. Efforts have been put into place that will result in completion of all area plans by July 2016.

3. Expenditures

The MDC needs to improve internal controls over procurement cards. The MDC did not ensure a single source procurement involving a former employee was properly documented.

3.1 Procurement card controls

MDC employees using procurement cards split purchases or allowed vendors to split purchases and failed to bid some purchases. The state procurement card policy and the cardholder agreements signed by employees receiving cards prohibit splitting of purchases. When purchases are split, the established transaction limit control authorized for the individual cardholder is circumvented. Also cardholders may inappropriately split transactions in an attempt to circumvent bidding requirements.

The MDC issued over 1,400 procurement cards to its employees and during state fiscal years 2010 and 2009, MDC procurement card purchases totaled over $9.9 million and $9.0 million, respectively. In state fiscal year 2010, there were over 80,000 transaction lines in the MDC procurement card vendor detailed transaction report. We reviewed 25 transaction lines, totaling nearly $146,000, and noted:

- Three instances totaling over $8,700 in which a single purchase was split into two transactions for the transaction to be less than the individual transaction limit for the cardholder. MDC financial services had detected two of the three instances during the processing of the procurement card invoices.

- Three instances totaling over $15,000, in which the cardholder failed to obtain bids prior to making the purchase. MDC financial services detected two of these three instances after the purchases were made and while processing the procurement card invoices.

- One of the purchases was for ammunition and both statewide procurement card policies and the cardholder agreement prohibit the purchase of ammunition. MDC officials indicated they have determined the purchase of ammunition by MDC employees is appropriate; however, the MDC has not requested a waiver from the Office of Administration.

Our review of the procurement card detail report for state fiscal year 2011, which included over 82,500 records, noted approximately 150 transactions, each greater than $500, which appeared to be possible split purchases. We provided a listing of these transactions to MDC officials who determined 17 purchases (34 transactions) were split purchases; three of which had previously been identified by existing procurement card control procedures. According to the MDC, most of the other 116 transactions were the result of the vendor splitting the purchase to avoid the per transaction limit assigned to the employee's procurement card, or the vendor imposing transaction limits on the amount the vendor would accept on a single transaction. MDC officials indicated the issue of splitting purchases is being addressed through group and individual training. The MDC should continue to monitor procurement card activity to identify improper usage and provide additional training to and/or discipline MDC employees whose purchases violate procurement card purchasing policies.

3.2 Single source procurement

In December 2009, the MDC entered into a contract with a former employee to write, upon his retirement, a comprehensive book about Missouri rivers and streams. The employee retired effective July 1, 2010, under the departmental retirement incentive program. Under the contract, also effective July 1, 2010, the former employee is paid $5,000 per month for 31 months. In addition, the MDC can renew the contract for up to 24 additional months. MDC officials indicated potential cost recovery is not a significant factor when deciding to proceed with educational projects, and this arrangement qualified as a sole source procurement because the former employee was uniquely qualified to write the book. However, MDC officials did not document the sole source procurement decision as required by MDC policy. The following required actions were not performed:

- A purchase requisition requesting approval of the sole source procurement was not prepared and submitted to MDC financial services.

- A single feasible source approval request worksheet was not prepared.

- MDC did not submit a request for specific procurement authority from Office of Administration, Division of Purchasing.

- Documentation from the vendor stating they are the only provider of the commodity or service was not obtained.

The MDC should ensure sole source procurement decisions are documented and approved as required by MDC policy.

Recommendations

The MDC:

3.1 Monitor procurement card activity to identify improper usage and provide additional training to and/or discipline employees whose purchases violate procurement card purchasing policies. In addition, the MDC should request policy waivers from the Office of Administration prior to authorizing employees to make purchases of prohibited items to ensure such purchases comply with state procurement card policies.

3.2 Ensure sole source procurement decisions are documented and approved as required.

Auditee's Response

3.1 The Department has implemented steps to ensure staff is aware of transaction limits, that invoices are not to be split to circumvent the transaction limits, and that there are appropriate processes to request a waiver for larger purchases. The Department is in the process of developing required, on-line training for all cardholders that will ensure consistent messages are provided. Cardholders who do not comply with the procurement card policies will be required to re-take the on-line training. The Department will seek waivers from the Office of Administration when considered necessary.

Forty-five of the 150 FY11 transactions reported by the State Auditor as split purchases were for hotel charges or training registrations. MDC's review of these transactions concluded these transactions were obvious situations where two or more employees stayed at the same hotel or attended the same training; therefore, payments to the same vendor for the same amount and on the same day would appear reasonable. Forty-six other transactions were reportedly split to comply with the vendor's internal procedures for processing payments made by credit card. MDC's review of these transactions concluded the majority of these transactions were split for this purpose and not to bypass single transaction limits, monthly billing cycle limits, or purchasing policies. These explanations, along with explanations for various other transactions reported as split purchases, were provided to the State Auditor prior to the conclusion of the audit.

3.2 Steps have been taken to ensure all future single source procurements comply with the procedures outlined in the Department's Business Policy Manual.

Department of Conservation
Organization and Statistical Information

The Department of Conservation is constitutionally created pursuant to Article IV, Sections 40(a) and 46. The general functions of the department are to control, manage, restore, conserve, and regulate all bird, fish, game, forestry, and wildlife resources of the state. At June 30, 2010, the department owned 788,432 acres of land in the state.

The department is headed by a four-member bipartisan commission, appointed by the Governor with the advice and consent of the Senate. They serve without compensation for staggered six-year terms.

Commission Members at June 30, 2010

Commissioner	Term Expires
William F. McGeehan	July 1, 2011
Don Johnson	July 1, 2013
Becky Plattner	July 1, 2013
Don C. Bedell	July 1, 2015

The Commission appoints a director who serves as the administrative officer of the Department of Conservation. The director appoints other employees and is assisted by an assistant director and two deputy directors with programs carried out by the divisions of fisheries, forestry, wildlife, protection, private land services, resource sciences, outreach and education, design and development, administrative services, and human resources.

Robert L. Ziehmer was appointed Director effective January 15, 2010, replacing John Hoskins upon his retirement. At June 30, 2010, the department had approximately 1,350 salaried and 450 hourly employees.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

During the year ended June 30, 2010, the Department of Conservation spent American Recovery and Reinvestment Act (ARRA) of 2009 monies totaling $50,628 to 1) help seven schools reduce energy costs, create jobs and provide incentives for better forest management through the Fuel for Schools project and 2) provide a better habitat for the endangered Niangua Darter while making driving safer through the Williams Ford Low Water Crossings Project. These monies were provided to the Department of Conservation through the United States Department of Agriculture-Wildland Fire Management and the United States Department of the Interior-Habitat Enhancement, Restoration and Improvement programs.

* Biennial appropriations set up in fiscal year 2010 are re-appropriations to fiscal year 2011. After the fiscal year-end processing has been completed, the unexpended fiscal year 2010 appropriation balance for a biennial appropriation is established in fiscal year 2011. Therefore, there is no lapsed balance for a biennial appropriation at the end of fiscal year 2010.

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Grundy County, Missouri

The Office of the State Auditor is responsible under Section 29.230, RSMo, for auditing certain operations of Grundy County, and issues a separate report on that audit. In addition, in cooperation with the county, the Office of the State Auditor has contracted for an audit of the county's financial statements for the 2 years ended December 31, 2010, through the state Office of Administration, Division of Purchasing and Materials Management. A copy of this audit, performed by Kevin G. Hudson, Certified Public Accountants, is attached.

Independent Auditors' Report

To the County Commission of
Grundy County, Missouri
Trenton, Missouri

I have audited the accompanying financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of Grundy County, Missouri, as of and for the years ended December 31, 2010 and 2009, which collectively comprise the County's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the County's management. My responsibility is to express an opinion on these financial statements based on my audit.

I conducted my audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that I plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. I believe that my audit provides a reasonable basis for my opinion.

As discussed more fully in Note 1, the County prepares its financial statements on the cash basis of accounting, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

In my opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position-cash basis of the governmental activities, each major fund, and the aggregate remaining fund information of the County as of December 31, 2010 and 2009, and the respective changes in financial position-cash basis, thereof for the years then ended in conformity with the basis of accounting described in Note 1.

In accordance with *Government Auditing Standards,* I have also issued my report dated November 23, 2011, on my consideration of the County's internal control over financial reporting and on my tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of my testing of internal control over financial reporting and compliance and the results of that testing and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with the *Government Auditing Standards* and should be considered in assessing the results of my audit.

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. I have applied certain limited procedures to the required supplementary information, budgetary comparison information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to my inquiries, the basic financial statements, and other knowledge I obtained during my audit of the basic financial statements. I do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

My audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise the County's basic financial statements. The accompanying Schedule of Expenditures of Federal Awards is presented for purposes of additional analysis as required by U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments and Non-Profit Organizations*, and is not a required part of the basic financial statements of Grundy County, Missouri. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The Schedule of Expenditures of Federal Awards has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In my opinion, the information is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Kevin G. Hudson, C.P.A.
Trenton, Missouri
November 23, 2011

The discussion and analysis of Grundy County's financial performance provides an overall review of the County's financial activities for the years ended December 31, 2010 and 2009. The intent of this discussion and analysis is to look at the County's financial performance as a whole; readers should also review the basic financial statements, including the notes to the financial statements, to enhance their understanding of the County's financial performance.

Financial Highlights

Key financial highlights for 2010 and 2009 are as follows:

- The county's total governmental revenues exceeded total expenditures by $184,675 for the year ended December 31, 2010. The total expenditures exceeded governmental receipts by $411,098 for the year ended December 31, 2009. Of this deficit, $474,287 was related to the construction of the new law enforcement center. When taking this into consideration, revenues would have exceeded expenditures by $63,189.

- The county's governmental funds ended the year ended December 31, 2010 with a combined cash balance of $2,411,954 and the year ended December 31, 2009 of $2,227,279.

- County revenues for the year ended December 31, 2010 of $4,291,175 decreased by $836,961 over the county revenues for the year ended December 31, 2009 of $5,128,136. The difference is related to the county receiving a large grant for bridge construction in the road and bridge fund in 2009.

- County expenditures for the year ended December 31, 2010 of $4,106,500 decreased by $1,432,734 over the county expenditures for the year ended December 31, 2009 of $5,539,234. Of these expenditures $474,287 was related to the construction of the new law enforcement center for the year ended December 31, 2009 and the remainder was related to the bridge construction projects.

Overview of the Financial Statements

The contents of this report comply with the presentation requirements of Statement No.34 of the Governmental Accounting Standards Board, *Basic Financial Statements - and Management's Discussion and Analysis - for State and Local Governments,* as applicable to the cash basis of accounting. The county's basic financial statements consist of government-wide financial statements, fund financial statements, and notes to the financial statements. The notes are an integral part of the government-wide and fund financial statements and provide more detail about the information presented in the statements. This report also contains other financial information in addition to the basic financial statements.

The county has elected to present its financial statements on the cash basis of accounting, a basis of accounting other than accounting principles generally accepted in the United States of America. "Basis of accounting" refers to when financial events are recorded. Under the cash basis of accounting, revenues are recorded when received rather than when earned, and expenditures are recorded when paid rather than when the related liabilities are incurred. Therefore, when reviewing the financial information and discussion in this report, the reader should recall the limitations resulting from use of the cash basis of accounting.

Government-Wide Financial Statements

The Government-Wide Statement of Net Assets and the Government-Wide Statement of Activities report information about the county as a whole. These statements present the county's net assets and show how they have changed. Over time, increases or decreases in the county's net assets are one indicator of whether its financial health or position is improving or deteriorating. However, to assess the county's overall financial health, the reader needs to consider additional nonfinancial factors. The government-wide financial statements report only governmental activities - activities such as general government operations, public safety, and health and welfare that are usually financed through taxes and intergovernmental receipts. The county has no business-like activities-activities financed wholly or partially by fees charged to external parties for goods or services.

Fund Financial Statements

The fund financial statements provide detailed information about the most significant funds - not the county as a whole. Some funds are required to be established by state law or by bond covenants. However, the County Commission establishes other funds to help it control and manage money for particular purposes or to show that it is meeting legal responsibilities for using certain taxes, grants, or other sources of receipts. The fund financial statements include only governmental funds, which focus on the flow of money into and out of those funds and the balances left at year end that are available for spending. The governmental fund statements provide a detailed view of the county's general government operations and the basic services it provides. Governmental fund information helps the reader determine whether more or fewer financial resources can be spent in the near future to finance the county's programs.

Notes to the Financial Statements

The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found on pages18-24 of this report.

Other Information

This report also includes as required supplementary information this Management's Discussion and Analysis and the Budgetary Comparison Schedules for all governmental, special revenue funds and capital projects funds - cash basis. Such information is intended to supplement the government-wide financial statements, fund financial statements, and notes to the financial statements but is not a part of those statements.

In addition, the report includes the following components that are not a required part of the financial statements: the Schedule of Expenditures of Federal Awards, required for audits of federal program expenditures conducted in accordance with Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations.*

Government-wide Financial Analysis

Below is a chart showing assets, receipts and disbursements for the years ended December 31, 2010 and 2009.

	Year Ended December 31, 2010	2009
Net Assets	$2,411,954	$ 2,227,279
Program Receipts	2,094,198	2,973,896
General Receipts	2,196,977	2,154,240
Disbursements	4,106,500	5,539,234
Change in Net Assets	184,675	(411,098)

For the two years disclosed in the audit, the change in Net Assets is primarily due to the increase in the General Fund and the Ambulance Fund. These funds had combined net assets $1,066,662 in 2009 as compared to $1,206,307. Program receipts decreased in 2010 due to the bridge construction grant that was received and expended in 2009. General receipts did not fluctuate much between 2009 and 2010. Expenditures decreased in 2010 due to the road and bridge construction project that occurred in 2009 and the final construction payment for the Law Enforcement Construction Fund. During 2009 the county incurred a deficit of $474,271 in the Law Enforcement Construction Fund for the final construction payment thus accounting for a large portion of the difference in the Change in Net Assets.

Financial Analysis of the County's Funds

The focus of the County's governmental funds is to provide information on near-term inflows, outflows and balances of spendable resources. Such information is useful in assessing the County's financing requirements. In particular, unreserved fund balance may serve as a useful measure of a government's net resources available for spending at the end of the year.

As of December 31, 2010, the county's governmental funds reported combined ending fund balances of $2,411,954, an increase of $184,675 over the prior years fund balance of $2,227,279. The unreserved portion of fund balance was $672,743 for 2010 and $609,782 for the year ended 2009. The remainder of fund balance is reserved to indicate that it is not available for new spending because it has already been committed.

The General Fund is the chief operating fund of the County. At the end of the fiscal year 2010, unreserved fund balance of the General Fund was $672,743 and the unreserved fund balance of the General Fund for fiscal year 2009 was $609,782. As a measure of the General Fund's liquidity, it may be useful to compare both unreserved fund balance and total fund balance to total fund expenditures.

The unreserved fund balance of the General Fund increased by $62,961 for fiscal year 2010 as compared to an increase of $81,797 for fiscal year 2009.

County Revenue Fund Budgeting Highlights

The County's budget is prepared according to Missouri law and is based on accounting for certain transactions on a basis of cash receipts, disbursements, and encumbrances. The most significant budgeted fund is the County Revenue Fund.

The original and final budgeted revenues for the general fund were $1,243,986 for 2010 and $1,305,127 and $1,305,727 for 2009. The original and final budgeted expenditures were $1,540,990 and $1,541,430 for 2010 and $1,416,138 and $1,418,638 for 2009.

The County did make some small budget amendments to various funds.

Capital Assets and Debt Administration

During 2006 the county issued General Obligation Bonds in the amount of $4,995,000 for the construction of a new law enforcement facility. The balance of these bonds were $4,600,000 for the year ended December 31, 2010. The county also has a lease for the purchase of a backhoe. The balance of this lease was $67,131 at December 31, 2010.

Economic Factors and Next Year's Budgets

The opening of the new law enforcement center has added greatly to both the physical and economic well being of the citizens of Grundy County. The county sales taxes have increased slightly in the past two years, which is a positive sign.

The Counties General Fund has increased $144,758 over the two year period that was audited. This is encouraging due to the current economic times. The increased costs for fuel, materials, equipment, utilities, and operating expenditures continues to be a source of concern as well as the general state of the economy.

Requests for Information

This financial report is designed to provide our citizens, taxpayers, creditors, and investors with a general overview of the County's finances and to demonstrate the County's accountability for the money it receives. If you have any questions about this report or need additional financial information, contact Betty Spickard, County Clerk, 700 Main Street, Trenton, Missouri 64683, (660) 359-4040.

FUND FINANCIAL STATEMENTS

Note 1: Summary of Significant Accounting Policies

The financial statements of Grundy County, Missouri (the County) have been prepared on the cash basis of accounting, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America. The Governmental Accounting Standards Board is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The County has adopted the reporting model as required by GASB Statement 34, for the presentation of information in the government-wide financial statements and the major fund statements. The more significant of the County's accounting policies are described below.

A. Reporting Entity

In evaluating the County as a reporting entity, management has addressed all potential component units (traditionally separate reporting entities) for which the County may be financially accountable and, as such, should be included within the County's financial statements. The County (the primary government) is financially accountable if it appoints a voting majority of the organization's government board and (1) it is able to impose its will on the organization or (2) there is a potential for the organization to provide specific financial benefit or to impose specific financial burden on the County. Additionally, the primary government is required to consider other organizations for which the nature and significance of their relationship with the primary government are such at exclusion would cause the reporting entity's financial statements to be misleading or incomplete.

Based on the application of the above criteria, the county has no component units.

B. Basis of Presentation

Government-wide Statements

The Statement of Net Assets and the Statement of Activities present financial information about the County's governmental activities. These statements include the financial activities of the primary government in its entirety. Eliminations have been made to minimize the double-counting of internal transactions. These statements distinguish between the governmental and business-type activities of the County. Governmental activities generally are financed through taxes, intergovernmental revenues, and other nonexchange transactions. Business-like activities are financed wholly or partially by fees charged to external parties for goods or services. For the years ended December 31, 2010 and 2009, the county had only governmental activities.

Note 1: Summary of Significant Accounting Policies (Continued)

The Government-Wide Statement of Net Assets presents the financial condition of the county's governmental activities at year-end. The Government-Wide Statement of Activities presents a comparison between direct expenses and program revenues for each function of the County's governmental activities. Direct expenses are those that are specifically associated with and are clearly identifiable to a particular function. Program revenues include (a) charges paid by the recipients of goods or services offered by the programs and (b) intergovernmental receipts that are restricted to meeting the operational or capital requirements of a particular program. Revenues that are not classified as program revenues, including all taxes, are presented as general revenue. The comparison of direct disbursements with program receipts identifies the extent to which each governmental function is self-financing or draws from the general receipts of the county.

Fund Financial Statements

A fund is defined as a fiscal and accounting entity with a self-balancing set of accounts. The county uses funds to segregate transactions related to certain functions or activities in order to aid financial management and to demonstrate legal compliance. Fund financial statements are designed to present financial information of the county primary government at this detailed level. The fund financial statements focus on major funds. Each major fund is presented in a separate column, and nonmajor funds are aggregated and presented in a single column. Major funds include (a) the county's primary operating fund, (b) any fund for which total cash, receipts or disbursements of an individual fund are at least 10% of the corresponding element total for all funds of that type, and © any other fund that county officials believe is particularly important to financial statement users.

The accompanying financial statements are structured into one category of funds - governmental. Governmental funds are those through which most governmental functions are typically financed. Reporting for such funds focuses on the sources, uses, and balances of current resources. The county's major governmental funds are as follows:

General Fund - The General Fund is used to account for all revenues and expenditures applicable to the general operations of county government that are not properly accounted for in another fund. All general operating revenues that are not restricted or designated as to their use by outside sources are recorded in the General Fund. Revenues are derived primarily from taxes and intergovernmental revenues.

Special Revenue Funds - The Special Revenue Funds are used to account for the proceeds of specific revenue that are legally restricted to expenditure for specified purposes. The Special Road and Bridge Fund, Law Enforcement Center Fund and Ambulance Funds are all considered Special Revenue Funds.

Capital Projects Funds - The Capital Projects Fund is used to account for resources designated to construct or acquire capital assets and major improvements. Revenues are derived primarily from the issuance of long-term liabilities, intergovernmental revenues, grants and earnings on investments.
The Law Enforcement Construction Fund is considered a Capital Project Fund.

The county's nonmajor governmental funds are also special revenue funds.

Note 1: Summary of Significant Accounting Policies (Continued)

Fiduciary funds account for assets held by the county as a trustee or an agent for individuals, private organizations, other governments, or other funds. Fiduciary fund reporting focuses on net assets and changes in net assets; fiduciary assets are reported in a separate Statement of Fiduciary Net Assets because the county cannot use those assets to finance its operations. The county's fiduciary funds consist of agency funds, which report assets held in a purely custodial capacity and do not involve measurement of results of operations.

The agency funds include the County Collector's Fund, Unclaimed Fees Fund, School Fines Fund, School Overplus Fund, Task Force Seizures, Marion Township Road Improvements, Cemetery and County Employees Retirement Fund. These funds are all included in the accompanying Statement of Fiduciary Net Assets.

C. Basis of Accounting

Basis of accounting refers to when transactions are recorded in the financial records and reported in the financial statements. The government-wide and fund financial statements are prepared on the cash basis of accounting; accordingly, amounts are recognized when received or disbursed in cash. Consequently, certain assets and their related revenues (such as accounts receivable and revenues billed but not yet collected for goods and services provided) and certain liabilities and their related expenditures (such as accounts payable and expenditures for goods and services received but not yet paid for) are not recorded in these financial statements. Generally accepted accounting principles for state and local governments require revenues to be recognized when they are earned or when they become available and measurable and expenditures or expenses to be recognized when the related liabilities are incurred.

Equity classifications: On the Government-Wide Statement of Net Assets, equity is classified as net assets and displayed in two components: restricted and unrestricted. Net assets are reported as restricted when limitations are imposed on their use through either the enabling legislation adopted by the County Commission or external restrictions imposed by creditors, grantors, or the laws and regulations of other governments. All other net assets are reported as unrestricted. The county applies restricted resources first when a disbursement is made for which both restricted and unrestricted net assets are available.

In the fund financial statements, equity is classified as fund balance and also may be displayed in two components: reserved and unreserved. Fund balance is reported as reserved to indicate that a portion of the fund balance is not available for appropriation or is legally segregated for a specific future use. When such restrictions do not exist, fund balance is reported as unreserved.

D. Vacation, Personal and Sick Leave

Vacation time, personal time is considered as expenditures in the year paid. Vacation time is awarded based on years of service and must be used in its entirety prior to the employee's next anniversary date. The county does not have personal days, but comp time can be earned by working overtime.

Note 1: Summary of Significant Accounting Policies (Continued)

E. Budgets and Budgetary Accounting

The County follows the following procedures in establishing the budgetary data reflected in the financial statements:

1) In accordance with Chapter 50, (Sections 50.525 through 50.745, RSMo 2000), the County adopts a budget for various County funds.

2) Prior to December 31, each department, office, institution, commission, or court of the County submits to the budget officer its requirements for expenditures and its estimated revenues for the next budget year. These figures are presented with corresponding figures for the last completed year and an estimate of the current year.

3) The budget officer holds public hearings prior to presentation of the budget document to the County Commission no later than January 15th of each year.

4) A public hearing is held not earlier than 10 days after the budget document is made available to the public and with at least 5 days notice of the hiring.

5) Amendments to the budget are made by the County Commission as required to allow for appropriation of increased revenues and adjustments between line items within the budget. A few budget amendments were made for 2010 and 2009. Please see budgetary comparison schedules in required supplementary information for further details.

The County's policy is to prepare the annual operating budget on a cash basis.

F. Inventories and Capital Assets

Inventories include office equipment, road and vehicle maintenance supplies, and fuel. Capital assets consist of land, buildings, furniture, equipment, vehicles, and infrastructure such as roads and bridges. Both inventories and capital assets are recorded as disbursements when they are purchased or constructed.

G. Long-Term Debt

Consistent with the cash basis of accounting, long-term debt is not reported in the government-wide or fund financial statements. Proceeds from debt issuances are reported when received, and payments of principle and interest are reported when disbursements are made.

Note 1: Summary of Significant Accounting Policies (Continued)

H. Estimates

The preparation of financial statements in conformity with generally accepted accounting principles required management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

I. Risk of Loss

The County protects itself from risk of loss by purchasing commercial insurance for property damage and liability risks. The County does not self insure its risks.

Note 2: Stewardship, Compliance and Accountability

Compliance with Finance Related Legal and Contractual Provisions

The County incurred no material violations of finance related legal and contractual provisions.

Excess of Expenditures Over Appropriations in Individual Funds

For the two years ended December 31, 2010, the County had an excess of expenditures over appropriations in the Law Enforcement Center for 2010, Law Enforcement Training Fund for 2009, Senate Bill 40 Fund for 2009 and 2010, the Senior Citizens Tax Fund for 2009 and 2010 the Cemetery Trust Fund for 2009 and the Special Elections Fund for 2009.

Net Assets/Fund Balance Deficit

The County had no funds with a deficit balance for the two years ended December 31, 2010.

Note 3: Cash and Investments

Deposits - At December 31, 2010 and 2009, the carrying amount of the County's deposits was $2,411,954 and $2,227,279 respectively. The bank balance for the year ended December 31, 2010 and 2009 was $2,724,510 and $2,499,491 respectively. Custodial credit risk is the risk that in the event of a bank failure, a government's deposits may not be returned to it. The County's deposit policy for custodial credit risk requires compliance with the provisions of state law. County policy further requires that all securities that serve as collateral against the deposits of a depository institution must be held in safekeeping at a non-affiliated custodial facility. Of the bank balance, $250,000 was covered by federal depository insurance and $2,474,510 was covered by collateral held by the County's safekeeping agent in the County's name at December 31, 2010 and $2,249,491 for the year ended December 31, 2009.

Note 3: Cash and Investments (Concluded)

The Senior Citizens Tax Fund and the Senate Bill 40 Fund deposits at December 31, 2010 and 2009, and the County's Collector's deposits at December 31, 2010 and 2009, were not exposed to custodial credit risk because they were entirely covered by federal depositary insurance, by collateral securities held by the county's or board's custodial bank in the county's or board's name.

State law requires collateralization of all deposits with federal depository insurance; bonds and other obligations of the U.S. Treasury, U.S. agencies or instrumentalities of the State of Missouri; bonds of any city having a population of not less than two thousand, county, school district, or special road district of the State of Missouri; bonds of any state, tax anticipation notes issued by any first class county, or a surety bond having an aggregate value at least equal to the amount of the deposits

Investments - The county may purchase any investments allowed by the State Treasurer. These include (1) obligations of the United States government or any agency or instrumentality thereof maturing and becoming payable not more than three years from the date of purchase, or (2) repurchase agreements maturing and becoming payable within ninety days secured by U.S. Treasury obligations of U.S. government agencies or instrumentalities of any maturity, as provided by law. At December 31, 2010 and 2009 the County had $150,000 and $150,000 invested in Certificates of Deposit for each year respectively.

Interest Rate Risk - Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value to changes in market interest rates. The County has no formal investment policy regarding interest rate risk.

Investment Credit Risk - The County has no investment policy that limits its investment choices other than the limitation of state law as follows:

a. Direct obligations of the U.S. Government, its agencies and instrumentalities to which the full faith and credit of the U.S. Government is pledged, or obligations to the payment of which the full faith and credit of the State is pledged.

b. Certificates of deposit or savings accounts that are either insured or secured with acceptable collateral with in state financial institutions, and fully insured certificates of deposit or savings accounts in out-of-state financial institutions.

Concentration of Credit Risk - The County places no limit on the amount it may invest in any one issuer. For the two years ended December 31, 2010, the County had no concentration of credit risk.

Note 4: Taxes

Property taxes attach as an enforceable lien on property as of January 1 each year. Taxes are levied on November 1st and payable by December 31st of each year. Taxes paid after December 31 are subject to penalties. The county bills and collects its own property taxes and also taxes for most other local governments (except some cities). The assessed valuation of the tangible taxable property for the calendar years 2010 and 2009 for purposes of County taxation was as follows:

	2010	2009
Real Estate	$ 62,508,540	$ 61,978,620
Personal Property	29,929,684	30,816,360
Railroad and Utilities	13,584,822	12,301,600
Total	$ 106,023,046	$ 105,096,580

The County also receives sales tax collected by the State and remitted based on the County's sales tax rate to the total sales tax collected in the County.

The tax levy per $100 of the assessed valuation of tangible taxable property for the calendar years 2010 and 2009 for purposes of County taxation was:

	2010	2009
General Revenue Fund	$ .1894	$ .1800
Total	$ .1894	$ .1800

Note 5: Commitments and Contingencies

The county is a party to various legal proceedings. At the date of these financial statements, the County cannot estimate its liability, if any, from losses that may result from certain proceedings. In the opinion of management and the County attorneys, the potential adverse impact of these proceedings would not be material to the combined financial statements of the County.

The County has several federal and state grants for specific purposes that are subject to review and audit by grantor agencies. Such audits could result in reimbursements to the grantor agency for expenditures disallowed under the terms of the grant. County management is not aware of any potential losses from such disallowance and believes that reimbursements, if any, would not be material.

Note 6: Prior Period Adjustments

In the prior year, the County was required to include the Circuit Clerk Interest Fund, the Law Library Fund and the Associate Division Interest Fund in the County's financial statements. For the two years ended December 31, 2010, the County is no longer required to include these funds in the financial statements. The omission of these funds caused the beginning fund balance to be adjusted by $23,740.

Note 7: County Employees' Retirement Fund (CERF)

The County Employees' Retirement Fund was established by the State of Missouri to provide pension benefits for County officials and employees.

A. Plan Description

The Retirement Fund is a cost-sharing multiple employer defined benefit pension plan covering any county elective or appointed officer or employee whose performance requires the actual performance of duties during not less than (1,000) one thousand hours per calendar year in each county of the state, except for any city not within a county and any county of the first classification having a charter form of government. It does not include county prosecuting attorneys covered under the Missouri State Retirement System, county sheriffs covered under Sections 57.949 to 57.997, RSMo and certain personnel not defined as an employee per Section 50.1000(8), RSMo. The Fund was created by an act of the legislature and was effective August 28, 1994. The general administration and the responsibility for the proper operation of the fund and the investment of the fund are vested in a board of directors of nine persons.

B. Pension Benefits

Beginning January 1, 1997, employees attaining the age of sixty-two years may retire with full benefits with eight or more years of creditable service. The monthly benefit for County Employees is determined by selecting the highest benefit by calculating using three different prescribed formulas (flat-dollar formula, targeted replacement ratio formula, and prior plan's formula). A death benefit of $10,000 will be paid to the designated beneficiary of every active member upon his or her death.

Upon termination of employment, any member who is vested is entitled to a deferred annuity, payable at age sixty-two. Early retirement at age fifty-five with reduced benefit is allowed for vested employees.

Any member with less than eight years of creditable service forfeits all rights in the fund but will be paid his or her accumulated contributions.

The County Employees' Retirement Fund issues audited financial statements. Copies of these statements may be obtained from the Board of Directors of CERF by writing to CERF, 2121 Shotthill Woods Drive, Jefferson City, Missouri 65102-2271, or by calling 1-573-632-9203.

C. Funding Policy

In accordance with State Statutes, the Plan is funded through various fees collected by counties and remitted to the CERF. Eligible employees hired before February 2002 have an option to contribute 2% of their annual salary, while employees hired after February 2002 are required to contribute 6% of their annual salary in order to participate in the CERF. During 2010 and 2009, the County collected and remitted employee contributions of approximately $16,964 and $35,764 respectively, for the years then ended.

Grundy County, Missouri
Notes to the Required Supplementary Information
For the Two Years Ended December 31, 2010

Note 1: Budgeting and Budgetary Practices

The County Commissioners and other applicable boards are responsible for the preparation and approval of budgets for various county funds in accordance with Sections 50.525 through 50.745, RSMo, the county budget law.

Note 2: Budgetary Basis of Accounting

The County budget is adopted on the cash basis of accounting.

Note 3: Expenditures in Excess of Appropriations

For the two years ended December 31, 2010, expenditures exceeded final budget amounts as follows:

	Amount Over Budget	
	2010	2009
Law Enforcement Center Fund	$ 2,413	$ -
Law Enforcement Training Fund	$ -	$ 1,245
Senate Bill 40 Fund	$ 13,209	$ 27,120
Senior Citizens Tax Fund	$ 8,357	$ 359
Cemetery Trust Fund	$ -	$ 72
Special Elections Fund	$ -	$ 7,724

FEDERAL COMPLIANCE SECTION

Independent Auditor's Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

To the County Commission of
Grundy County, Missouri
Trenton, Missouri

I have audited the financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of the Grundy County, Missouri as of and for the two years ended December 31, 2010, which collectively comprise of the County's basic financial statements and have issued my report thereon dated November 23, 2011. In my report, the county prepares its financial statements on a prescribed basis of accounting that demonstrates compliance with the cash basis and budget laws of the State of Missouri, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America. I conducted my audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing my audit, I considered the County's internal control over financial reporting as a basis for designing my auditing procedures for the purpose of expressing an opinion on the financial statements but not for the purpose of expressing an opinion on the effectiveness of the County's internal control over financial reporting. Accordingly, I do not express an opinion on the effectiveness of the County's internal control over financial reporting.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the County's financial statements will not be prevented, or detected and corrected on a timely basis.

Independent Auditor's Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*
(Concluded)

My consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over financial reporting that might be deficiencies, significant deficiencies or material weaknesses. I did not identify any deficiencies in internal control over financial reporting that I consider to be material weaknesses, as defined above.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the County's financial statements are free of material misstatement, I performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of my audit, and, accordingly, I do not express such an opinion. The results of my tests disclosed no instances of noncompliance or other matters that are required to be reported under Government Auditing Standards.

This report is intended solely for the information of the Board of Commissioners, management, others within the entity, federal awarding agencies, and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

Independent Auditors' Report on Compliance with Requirements Applicable to Each Major Program and on Internal Control over Compliance in Accordance with OMB Circular A-133

To the County Commissioners
Grundy County, Missouri
Trenton, Missouri

Compliance

I have audited the compliance of the Grundy County, Missouri with the types of compliance requirements described in the OMB Circular A-133 *Compliance Supplement* that could have a direct and material effect on each of the County's major federal programs for the two years ended December 31, 2010. The County's major federal programs are identified in the summary of auditors' results section of the accompanying schedule of findings and questioned costs. Compliance with the requirements of laws, regulations, contracts and grants applicable to each of its major federal programs is the responsibility of the County's management. My responsibility is to express an opinion on the County's compliance based on my audit.

I conducted my audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133. *Those standards and OMB* Circular A-133 require that I plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the County's compliance with those requirements and performing such other procedures as I considered necessary in the circumstances. I believe that my audit provides a reasonable basis for my opinion. My audit does not provide a legal determination on the County's compliance with those requirements.

In my opinion, the County complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the two years ended December 31, 2010.

Independent Auditors' Report on Compliance with Requirements Applicable to Each Major Program and on Internal Control over Compliance in Accordance with OMB Circular A-133 (Continued)

Internal Control Over Compliance

The management of the County is responsible for establishing and maintaining effective internal control over compliance with requirements of laws, regulations, contracts and grants applicable to federal programs. In planning and performing my audit, I considered the County's internal control over compliance with the requirements that could have a direct and material effect on a major federal program in order to determine my auditing procedures for the purpose of expressing my opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, I do not express an opinion on the effectiveness of the County's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance*, is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis.

My consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be deficiencies, significant deficiencies or material weaknesses. I did not identify any deficiencies in internal control over compliance that I consider to be material weaknesses, as defined above.

This report is intended solely for the information and use of the Board of Commissioners, management, others within the entity, federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

The accompanying Notes to the Supplementary Schedule are an integral part of this schedule

Grundy County, Missouri
Notes to the Supplementary Schedule
For the Years Ended December 31, 2010 and 2009

Note 1: Summary of Significant Accounting Policies

A. Purpose of Schedule and Reporting Entity

The accompanying Schedule of Expenditures of Federal Awards has been prepared to comply with the requirements of OMB Circular A-133. This circular requires a schedule that provides total federal awards expended for each federal program and the Catalog of Federal Domestic Assistance (CFDA) number or other identifying number when the CFDA number is not available.

This schedule includes all federal awards administered by Grundy County, Missouri.

B. Basis of Presentation

OMB Circular A-133 includes these definitions, which govern the contents of the schedule:

Federal financial assistance means assistance that non-Federal entities receive or administer in the form of grants, loans, loan guarantees, property (including donated surplus property), cooperative agreements, interest subsidies, insurance, food commodities, direct appropriations, and other assistance, but does not include amounts received as reimbursement for services rendered to individuals.

Federal award means Federal financial assistance and Federal cost-reimbursement contracts that non-Federal entities receive directly from Federal awarding agencies or indirectly from pass-through entities. It does not include procurement contracts, under grants or contracts, used to buy goods or services from vendors.

Accordingly, the schedule include expenditures of both cash and noncash awards.

C. Basis of Accounting

The schedule is presented on the cash basis of accounting, which recognizes amounts only when disbursed in cash.

Note 2: Subrecipients

The county provided no federal awards to subrecipients during the years ended December 31, 2010 and 2009.

Grundy County, Missouri
Schedule of Findings and Questioned Costs
Years Ended December 31, 2010 and 2009

Section I - Summary of Auditors' Results

Financial Statements

Type of auditor's report issued	Unqualified
Internal control over financial reporting:	
Material weakness(es) identified	_Yes X No
Significant deficiencies identified not considered to be material weaknesses?	_Yes X None Reported
Noncompliance material to financial statements noted	_Yes X No

Federal Awards

Internal control over major programs:	
Material weakness(es) identified?	_Yes X No
Significant deficiencies identified not considered to be material weaknesses?	_Yes X None Reported
Type of auditor's report issued on compliance for major programs	Unqualified
Any audit findings disclosed that are required to be reported in accordance with Circular A-133, Section .510(a)	_Yes X No

Identification of major programs:

CFDA Number	Name of Federal Program or Cluster
97.036	Public Assistance Grants

Dollar threshold used to distinguish between Type A and Type B programs:	$ 300,000
Auditee qualified as low-risk auditee	_Yes X No

Grundy County, Missouri
Schedule of Findings and Questioned Costs
Years Ended December 31, 2010 and 2009

Section II - Financial Statement Findings

This section contains no audit findings that *Government Auditing Standards* requires to be reported for an audit of financial statements.

Section III - Federal Award Findings and Questioned Costs

This section contains no audit findings that *OMB Circular A-133* requires to be reported for an audit of financial statements.

Grundy County, Missouri
Follow-Up on Prior Audit Findings for an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

In accordance with *Government Auditing Standards,* this section reports the auditor's follow-up on action taken by Grundy County, Missouri, on the applicable findings in the prior audit report issued for the two years ended December 31, 2008. There were no prior audit findings that *Government Auditing Standards* requires to have follow up action taken by Grundy County, Missouri for the two years ended December 31, 2008.

Grundy County, Missouri
Summary Schedule of Prior Audit Findings In Accordance
with OMB Circular A-133

Section .315 of OMB Circular A-133 requires the auditee to prepare a Summary Schedule of Prior Audit Findings to report the status of all findings that are relative to federal awards and included in the prior audit report's Schedule of Findings and Questioned Costs. The summary schedule also must include findings reported in the prior audit's Summary Schedule of Prior Audit Findings, except those listed as corrected, no longer valid, or not warranting further action.

Section .500(e) of OMB Circular A-133, requires the auditor to follow up on these prior audit findings; to perform procedures to assess the reasonableness of the Summary Schedule of Prior Audit Findings; and to report, as a current year finding, when the auditor concludes that the schedule materially misrepresents the status of any prior findings.

The prior audit report issued for the two years ended December 31, 2008, included no audit findings that Section .510(a) of OMB Circular A-133 requires to be reported for an audit of federal awards.

Thomas A. Schweich

Missouri State Auditor

Review of 2011 Property Tax Rates

December 2011

Report No. 2011-118

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Review of the 2011 Property Tax Rates

Background

Section 137.073, RSMo, requires the State Auditor's office to annually review the local property tax rates of all taxing authorities in the state to determine whether taxing authorities levied taxes in accordance with Missouri law and adjusted property tax rates to keep property reassessments from affecting revenue.

Results

We reviewed 4,854 property tax rates for 2,816 taxing authorities. The following taxing authorities levied tax rates greater than the tax rate certified, resulting in excess taxes levied of $495,742: City of Kinloch (commercial); City of Pagedale (residential); Elmwood Park Street Light District (residential, commercial and personal property); Kinloch Fire Protection District (residential); Pattonville R-III School District (personal property); and Village of Velda Village Hills (commercial). In accordance with Section 137.073.6(2), RSMo, we referred the six non-compliant taxing authorities to the Missouri Attorney General's office.

Additional Comments

The State Auditor's office has no authority to determine or review individual tax assessments. All individual tax assessments matters are the responsibility of the county assessor and board of equalization. Appeals to the state on tax assessment matters are handled by the Missouri State Tax Commission.

Because of the limited objective of this review, no overall rating is provided.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

Not applicable.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The State Auditor's office is required by Section 137.073, RSMo, to annually review local property tax rates of all taxing authorities in the state. The primary objectives of this review were to determine whether:

1. Local governing boards levied taxes in accordance with the Missouri Constitution and state law.

2. Local property tax rates were adjusted to ensure property reassessments were revenue neutral.

Reassessments of existing property are not intended to increase property tax revenue but to equitably reallocate the existing tax burden based on the relative value of property owned by taxpayers.

For 2011, we received substantiating data and issued a finding on 4,854 property tax rates of 2,816 taxing authorities. Six taxing authorities levied tax rates that exceeded the tax rate certified, resulting in excess taxes levied of $495,742. The number of taxing authorities levying a non-compliant tax rate is 0.21 percent of all taxing authorities.

Property taxes are the main source of revenue for many of Missouri's special purpose political subdivisions and county boards. The bulk of property taxes, however, fund public schools. General acceptance of these taxes is dependent on fair and equitable assessment practices and public understanding and input regarding the setting of rates. If the tax burden is increased without voter approval, confidence in the fairness and assessment practices is often eroded.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
In-Charge Auditor:	Becky Webb, CPA
Audit Staff:	Dana Wansing, MPA

2011 Property Tax Rates Results

Summary

The State Auditor received substantiating data and reviewed 4,854 property tax rates for 2,816 taxing authorities. Of the rates reviewed, 513 are debt service tax rates, 127 are new property tax rates approved by voters, and 25 are existing property tax rates that were increased by voter approval. The remaining 4,189 tax rates were reviewed for compliance with tax rate ceiling rollback requirements only. Six taxing authorities (0.21 percent of all taxing authorities) levied six tax rates that are non-compliant. Although varying factors contributed to these violations, all six non-compliant rates, $495,742 excess revenues levied, are from St. Louis County. Taxing authorities wholly in St. Louis County are required to use the four-rate system of levying a separate rate for each subclass of property. Uncertainty with the implementation of the four-rate system originates from a lack of statutory guidance on the handling of elections, recoupments, voluntary reductions, and debt service levies. In the absence of statutory guidance specifically addressing ballots posed under the four-rate system, the State Auditor's office has reviewed all ballots under the assumption that all elections apply to all property.

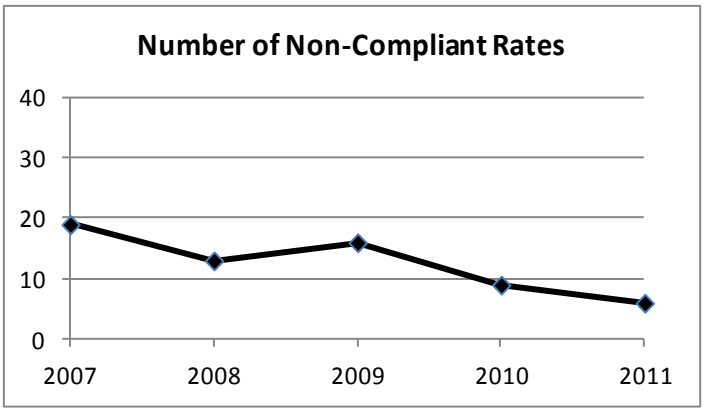
In compliance with Section 137.073.6(2), RSMo, the six non-compliant taxing authorities were referred to the Missouri Attorney General's office. The table below lists the taxing authorities that levied tax rates in excess of the legally permissible tax rate provided by state law.

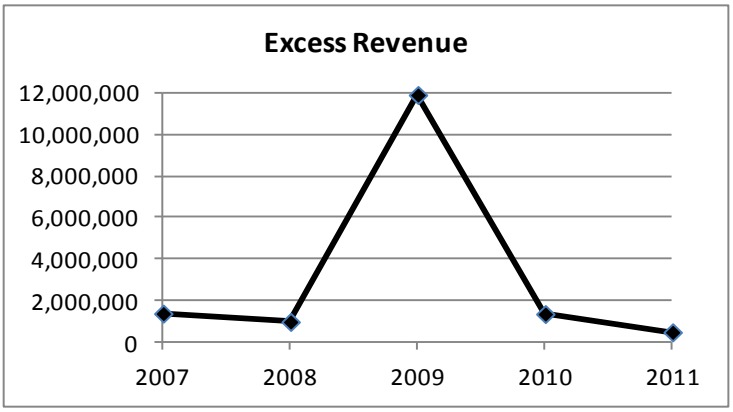
County	Political Subdivision	Levy Purpose	Assessed Valuation	(1) Certified Rate	Actual Rate Levied	(2) Excess Revenue
St. Louis	City of Kinloch	General Revenue				
	Commercial		1,421,330	0.7290	0.7860	810
St. Louis	City of Pagedale	General Revenue				
	Residential		11,428,630	0.2680	0.2690	114
St. Louis	Elmwood Park Street Light District	General Revenue				
	Residential		2,114,100	0.0000	0.4000	8,456
	Commercial		27,000	0.0000	0.4000	108
	Personal Property		352,490	0.0000	0.4000	1,410
St. Louis	Kinloch Fire Protection District	General Revenue				
	Residential		1,501,800	0.8430	0.9000	856
St. Louis	Pattonville R-III School District	Operating Funds-Schools				
	Personal Property		269,314,170	3.7550	3.9345	483,419
St. Louis	Village of Velda Village Hills	General Revenue				
	Commercial		257,610	0.2650	0.4860	569
Total (6)						$495,742

(1) The Certified Rate column represents the rates determined to be legally permissible based on the information submitted by the taxing authority.

(2) The excess tax revenue is computed by multiplying the excess tax rate (actual rate levied minus the certified rate) by the assessed valuation and dividing by 100.

The following graphs illustrate the 5-year history of non-compliant rates and revenue. The influx of excess revenues in 2009 was due to St. Louis County levying $11,447,230 of the total $11,901,903 (96 percent) in excess revenues.





Methodology

The State Auditor's office and county officials assist local government officials in determining the data necessary to complete the tax rate computations. Taxing authorities are required to file data supporting the proposed property tax rates with the county, using forms prescribed by the State Auditor. The counties forward the substantiating data received to the State Auditor for review. The data is reviewed and a finding is returned to both the county and the taxing authority advising whether the proposed rates comply with Missouri law.

The 2011 tax rate ceilings were determined based on the requirements of Section 137.073, RSMo, and Article X, Section 22, Missouri Constitution (commonly referred to as the Hancock Amendment). Each tax rate ceiling is determined annually and is adjusted to ensure revenue neutrality. The review of each tax rate ceiling is based on the assessed valuation for the entire political subdivision and is not calculated on an individual taxpayer basis.

To ensure taxing authorities do not receive a windfall from reassessment, the review of property tax rates begins with the prior year allowed revenue. Current year tax rates must be set to yield the same gross revenue as allowed in the prior year. In addition, an adjustment is made for additional revenue permitted for assessment growth. That adjustment is the lower of (1) the actual growth rate, (2) the inflation rate, or (3) 5 percent. Factors such as new construction and improvements, newly added territory, newly separated territory, and changes from locally assessed to state assessed property also affect the tax rate ceiling calculation. The counties use this rate to assess taxes on all property including new construction and improvements.

Voters may authorize increases beyond the set limits. Voter-approved increases are reviewed for compliance with applicable laws and stated ballot restrictions. The State Auditor's office also reviews debt service tax rates. A tax levied to meet the annual debt service requirement is generally viewed as reasonable if the revenue to be generated plus the existing fund balance does not exceed the current payment requirements plus a reserve for the following year's payments.

A taxing authority's total assessed valuation submitted by the County Clerk or a representative of the political subdivision is used in the State Auditor's office review of property taxes. The State Auditor's office does not review the assessed valuation of individual pieces of property, since Chapter 138, RSMo, governs the appeals process for assessed valuations. Citizens may appeal their individual assessed valuations calculated by the County Assessor to the local Board of Equalization. Citizens not satisfied with the resolution by the Board of Equalization may appeal the decision to the Missouri State Tax Commission. Any decision of the Missouri State Tax Commission may be reviewed by a court of law.

As assessed valuations increase, tax rate ceilings generally decrease, depending on the amount of the increase, to produce substantially the same amount of revenue as allowed in the prior year. As assessed valuations decrease tax rate ceilings may increase to produce substantially the same revenue as allowed in the prior year from existing property, limited by voter authorization. See Appendixes I and II for a summary of the changes in assessed valuation by type of taxing authority, and Appendixes III and IV for a summary of changes in tax rate ceilings by type of taxing authority.

In addition, Appendix V is a map that provides a statewide geographical perspective of county valuation changes due to new construction and reassessment from 2010 to 2011. Appendix VI is a map that reflects the inflationary change in each county's valuation from the previous year. A significant inflationary change generally indicates a major reassessment occurred. However, 2011 assessed valuations indicate the majority of county adjusted assessed valuation changes were less than the Consumer Price Index, which does not indicate a major reassessment.

Taxing authorities are listed by primary county and categorized by type of taxing authority. The counties are listed alphabetically (Adair through Wright, followed by the City of St. Louis). A taxing authority located in more than one county is listed under the primary county only.

The assessed valuations presented for taxing authorities, except school districts, include all taxable locally assessed and state assessed property. The assessed valuations presented for school districts include only taxable locally assessed property. The abated portions of property valuations that

are not taxable under various economic development programs are omitted from the taxable assessed valuations used to compute the annual tax rate ceiling.

Sales tax rollbacks required by law for some county levies were not reviewed as part of this report. Sales tax (Proposition C) rollbacks for school levies were subjected to a limited review when it appeared the district waived all or part of the rollback without voter approval in order to generate additional local revenues. Appendixes VII and VIII-A indicate the 481 school districts that have either full or partial waivers of Proposition C (sales tax) reductions. A majority of school districts have obtained voter approved waivers of the required sales tax rollback of their 2011 property tax including 441 with a full waiver and 40 with a partial waiver.

Legislative Issues

Sections 137.073.5(3) and (4), RSMo, were revised in 2008, requiring taxing authorities that voluntarily reduce a tax rate in an even numbered year to base the following (odd numbered) year on the voluntarily reduced rate instead of the tax rate ceiling. These provisions also allow taxing authorities that voluntarily reduce a tax rate in a previous even numbered year to undo that voluntary reduction in the following even numbered year. To increase the tax rate in the following even numbered year, the taxing authority must conduct a public hearing, and adopt an ordinance, resolution, or policy statement justifying its action prior to setting and certifying its tax rate.

Sections 137.180.3 and .4, RSMo, were revised in 2010 to reschedule the date new estimated tax rates had to be calculated and mailed for taxing authorities not partially in first class charter counties or the City of St. Louis. Effective dates were changed from January 1, 2011, to January 1, of the year following receipt of software necessary for implementation provided by the State Tax Commission. As of December 31, 2011, such software has not been provided.

House Bill No. 506, First Regular Session, 96th General Assembly changed the Maximum Authorized Levy definition for some taxing authorities. This affects taxing authorities that had elections applied to tax rate year 2009 or after that experienced a decrease in assessed valuation in the election year.

APPENDIX I
2011 PROPERTY TAX RATES
SUMMARY OF CHANGES IN ASSESSED VALUATION FOR LOCAL GOVERNMENTS LEVYING A SINGLE TAX RATE ON ALL PROPERTY

Type of Taxing Authority	Number of Taxing Authorities	Number of Tax Rates Authorized	Number of Tax Rates

(1) This column includes levies that existed in prior years and were revised due to an election. This column also includes school levies that increased due to the school board's election to implement Missouri Constitutional Amendment No. 2 approved by voters on November 3, 1998, which allows school districts to levy a minimum of $2.7500 by school board action alone.

(2) This column includes new voter approved tax rates, newly formed districts, or a levy voted to replace an expired levy.

APPENDIX IV

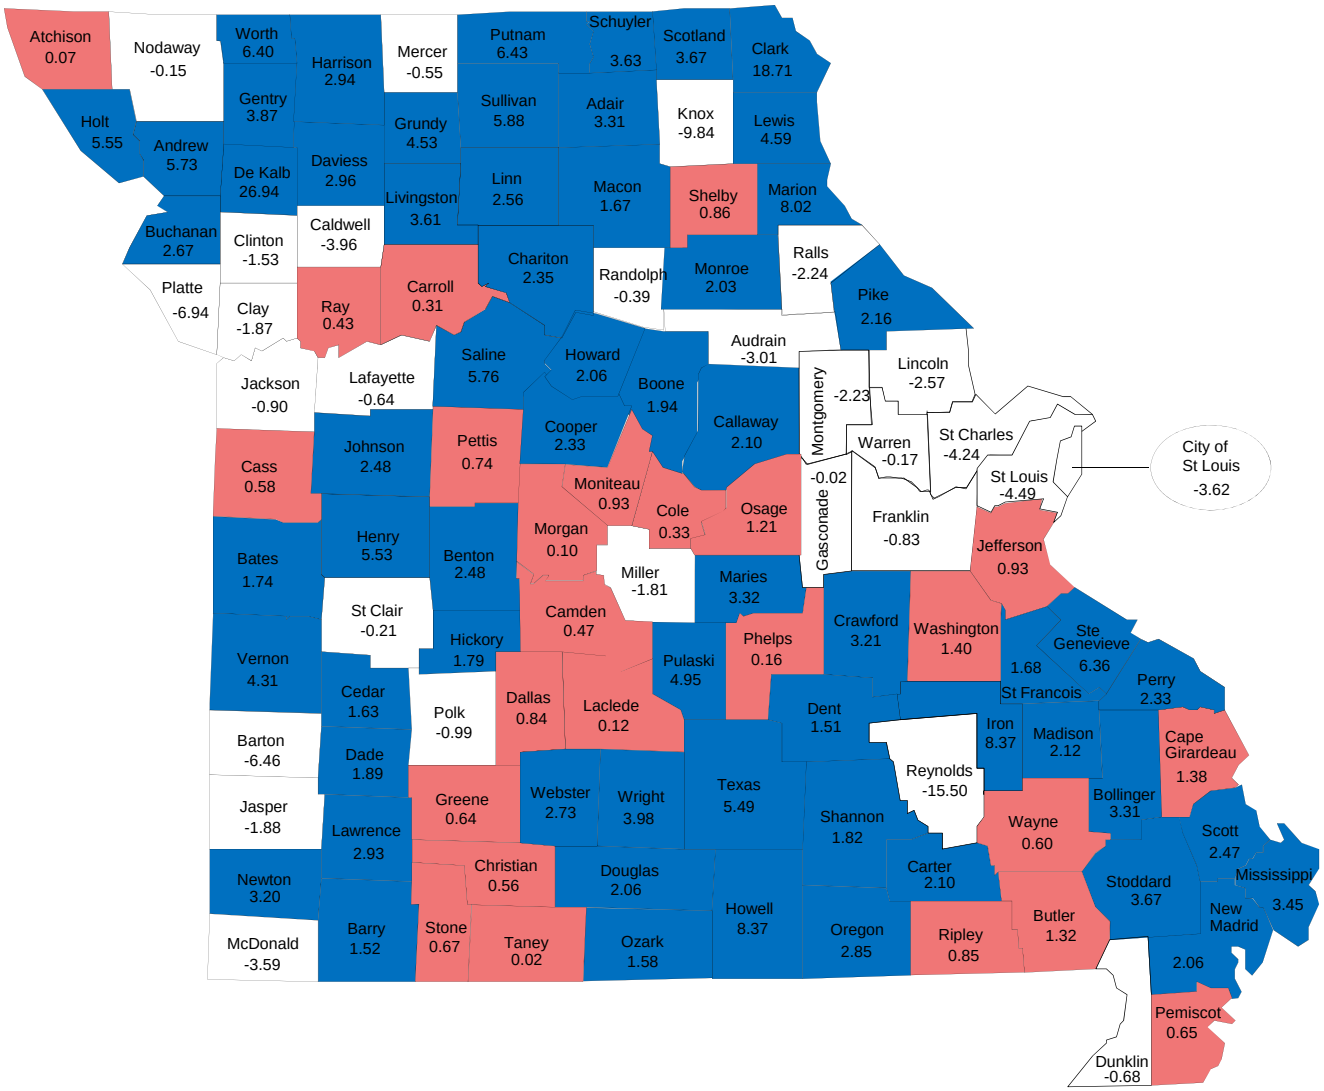
APPENDIX V
2011 PROPERTY TAX RATES
2010 – 2011 PERCENTAGE CHANGE IN TOTAL ASSESSED VALUATIONS BY COUNTY
OVERALL COUNTY VALUATION CHANGES PRIOR TO ADJUSTMENTS

Over CPI (62)

From 0.01% to CPI (25)

No Change or Decrease (28)

The 2011 consumer price index (CPI) of 1.50% was certified by the State Tax Commission.



High County: DeKalb 26.94 Low County: Reynolds -15.50

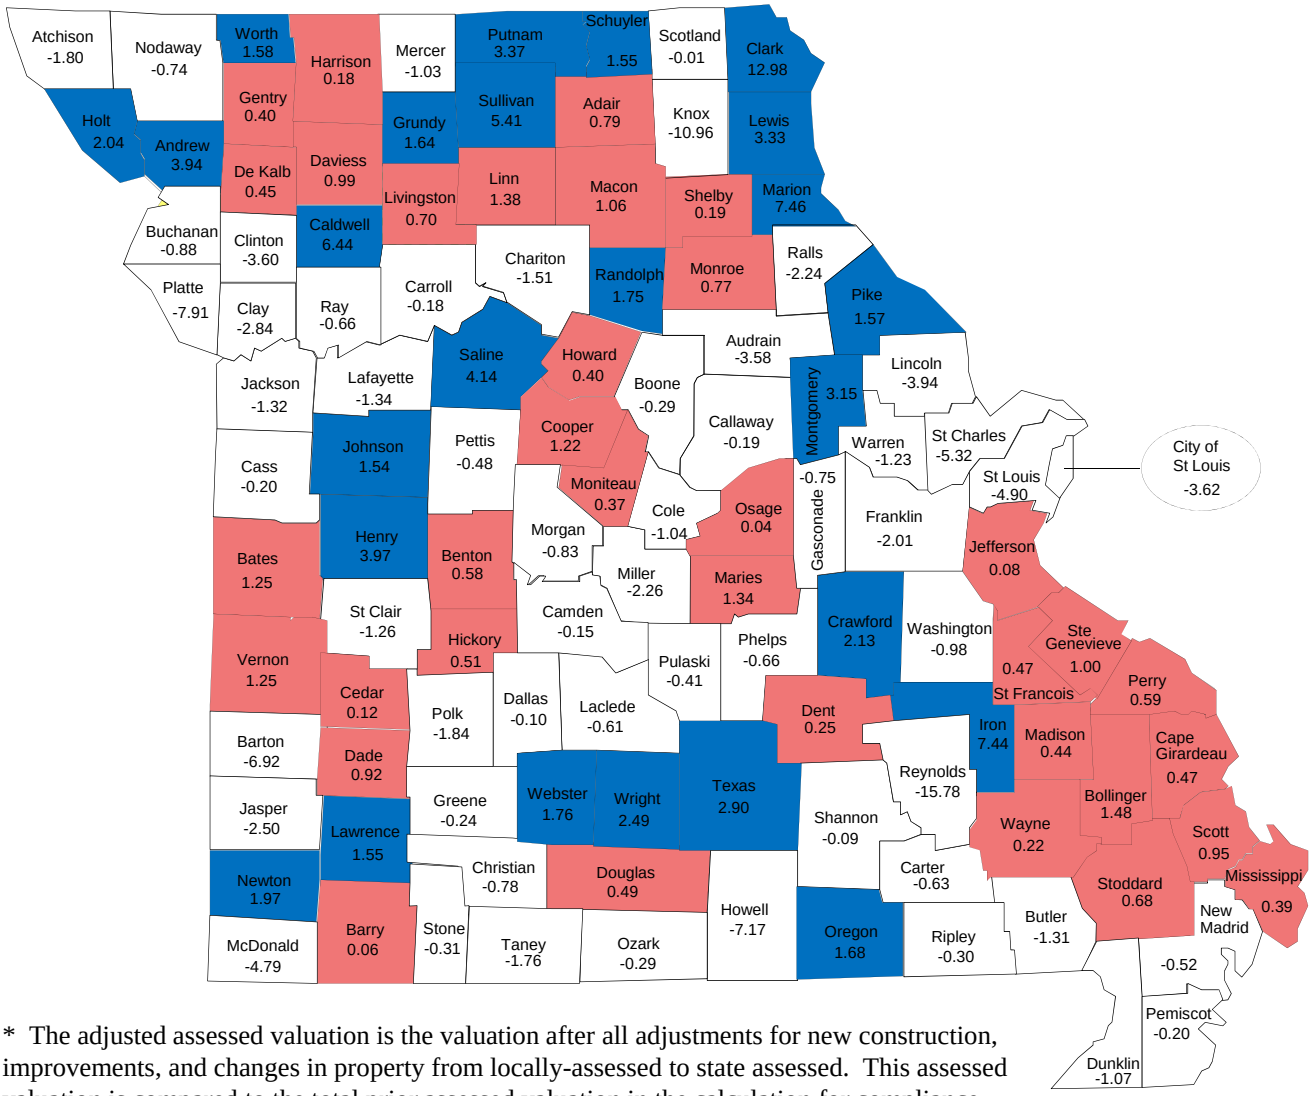
APPENDIX VI
2011 PROPERTY TAX RATES
2010 – 2011 PERCENTAGE CHANGE IN ADJUSTED ASSESSED VALUATIONS BY COUNTY*

Over CPI (25)

From 0.01% to CPI (35)

No Change or Decrease (55)

The 2011 consumer price index (CPI) of 1.50% was certified by the State Tax Commission.



* The adjusted assessed valuation is the valuation after all adjustments for new construction, improvements, and changes in property from locally-assessed to state assessed. This assessed valuation is compared to the total prior assessed valuation in the calculation for compliance with the Hancock Amendment.

High County: Clark 12.98 Low County: Reynolds -15.78

LEGEND:

* Levy was not certified due to insufficient substantiating data; however, it does not appear that a rate was levied.
** Levy did not exist in the given year.
A A new voter approved tax rate, newly formed district, or a levy voted to replace an expired levy.
B A voter approved increase to an existing levy.
C Levy includes a recoupment rate authorized by state law.
D Levied a tax rate in excess of the legally permissible tax levy as provided by state law, see the Results Section for 2011 levies and Report No. 2010-168, Review of 2010 Property Tax Rates.
E School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to $0.0000 and levy up to its calculated tax rate ceiling.
F School district has a partial Proposition C (sales tax) waiver which allows the school district to waive a portion of its required Proposition C reduction to the extent necessary to collect $2.7500 or the amount stated on the ballot.
G Article X, Section 11(g) of the Missouri Constitution allows the Kansas City 33 School District School Board to set its tax levy at a rate that is lower than the court-ordered rate for the 1995 tax year (which was $4.96). The rate so established may be changed from year to year by the School Board.
H City of Neosho in Newton County reinstated a previously authorized levy that was voluntarily reduced to zero in 1998 - 2009.

NOTE:

Taxing authorities are listed by primary county and categorized by type of taxing authority. The counties are listed alphabetically (Adair through Wright followed by the City of St. Louis). When a taxing authority is in more than one county, it is listed under the primary county only.

All rates in the levied column represent the rate extended and certified to the State Auditor's office by both the taxing authority and the county or counties in which the tax rate is levied.

Assessed Value column presents only the assessed valuation the property tax is levied against.

The revenue generated is computed by dividing the assessed valuation by 100 and multiplying the quotient by the tax rate levied.

This Appendix does not list taxing authorities that levied a separate tax rate for each subclass of property. Previous legislation required taxing authorities wholly in St. Louis County and allowed the City of Gladstone in Clay County to calculate a separate tax rate on each subclass of property. Taxing authorities partially in St. Louis County, whether the primary county is St. Louis County or another county, are required to levy a single rate on all property when one or more counties opted in and one or more counties opted out of the provisions requiring the multi rate calculation. See Appendixes VIII-A and VIII-B for a listing of 2011 and 2010 taxing authorities that calculated separate tax rates for each subclass of property.

													Total Revenue	$ 1,225,879,223

LEGEND:

* Levy was not certified due to insufficient substantiating data; however, it does not appear that a rate was levied.
** Levy did not exist.
A A new voter approved tax rate, newly formed district, or a levy voted to replace an expired levy.
B A voter approved increase to an existing levy.
C Levy includes a recoupment rate authorized by state law.
D Levied a tax rate in excess of the legally permissible tax levy as provided by state law, see the Results Section for the 2011 levies.
E School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to $0.000 and levy up to its calculated tax rate ceiling.
F School district has a partial Proposition C (sales tax) waiver which allows the school district to waive a portion of its required Proposition C reduction to the extent necessary to collect $2.7500 or the amount stated on the ballot.
G Levy includes a recoupment rate authorized by state law. School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to $0.0000 and levy up to its calculated tax rate ceiling.

NOTE:

This Appendix contains levy information for political subdivisions wholly in St. Louis County and the City of Gladstone in Clay County. Previous legislation required taxing authorities wholly in St. Louis County and allowed the City of Gladstone in Clay County to calculate a separate tax rate on each subclass of property. Political subdivisions partially in St. Louis County and partially in another county(ies) were also required by previous legislation to levy a single rate on all property when one or more counties opted in and one or more counties opted out of the provisions requiring the multi rate calculation. See Appendix VII for a listing of 2011 and 2010 taxing authorities that calculated a single tax rate to apply to all property.

All rates in the levied column represent the rate extended and certified to the State Auditor's office by both taxing authority and the county or counties in which the tax rate is levied.

Assessed Value column presents only the assessed valuation the property tax is levied against.

The revenue generated is computed by dividing the assessed valuation by 100 and multiplying the quotient by the tax rate levied.

2011 PROPERTY TAX RATES
LISTING OF 2010 TAX RATES FOR LOCAL GOVERNMENTS LEVYING A SEPARATE TAX RATE FOR EACH SUBCLASS OF PROPERTY

		Residential Real Estate			Agricultural Real Estate			Commercial Real Estate			Personal Property		
Political Subdivision	Purpose	Assessed Value	Ceiling	Levied	Assessed Value	Ceiling	Levied	Assessed Value	Ceiling	Levied	Assessed Value	Ceiling	Levied

LEGEND:

* Levy was not certified due to insufficient substantiating data; however, it does not appear a rate was levied.
** Levy did not exist.
A A new voter approved tax rate, newly formed district, or a levy voted to replace an expired levy.
B A voter approved increase to an existing levy.
C Levy includes a recoupment rate authorized by state law.
D Levied a tax rate in excess of the legally permissible tax levy as provided by state law, see Report No. 2010-168, Review of 2010 Property Tax Rates.
E School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to $0.000 and levy up to its calculated tax rate ceiling.
F School district has a partial Proposition C (sales tax) waiver which allows the school district to waive a portion of its required Proposition C reduction to the extent necessary to collect $2.7500 or the amount stated on the ballot.
G Levied a tax rate in excess of the legally permissible tax levy as provided by state law, see the Results Section for the 2010 levies. Levy includes a recoupment rate authorized by state law. School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to $0.0000 and levy up to its calculated tax rate ceiling.
H Levy includes a recoupment rate authorized by state law. School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to $0.0000 and levy up to its calculated tax rate ceiling.
I Determination of compliance is pending an Attorney General Opinion requested to determine interpretation of the correct operating levy established by the ballot language from November 2008. Levy also includes a recoupment rate authorized by state law. School district also has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to $0.0000 and levy up to its calculated tax rate ceiling.
J A voter approved increase to an existing levy. School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to $0.0000 and levy up to its calculated tax rate ceiling.
K A voter approved increase to an existing levy. Levy includes a recoupment rate authorized by state law. School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to $0.0000 and levy up to its calculated tax rate ceiling.

NOTE:

This Appendix contains levy information for political subdivisions wholly in St. Louis County and the City of Gladstone in Clay County. Previous legislation required taxing authorities wholly in St. Louis County and allowed the City of Gladstone in Clay County to calculate a separate tax rate on each subclass of property. Political subdivisions partially in St. Louis County and partially in another county(ies) were also required by previous legislation to levy a single rate on all property when one or more counties opted in and one or more counties opted out of the provisions requiring the multi rate calculation. See Appendix VII for a listing of 2011 and 2010 taxing authorities that calculated a single tax rate to apply to all property.

All rates in the levied column represent the rate extended and certified to the State Auditor's office by both taxing authority and the county or counties in which the tax rate is levied.

Assessed Value column presents only the assessed valuation the property tax is levied against.

The revenue generated is computed by dividing the assessed valuation by 100 and multiplying the quotient by the tax rate levied.

Thomas A. Schweich

Missouri State Auditor

Ozark County

December 2011

Report No. 2011-117

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Ozark County

County Disbursements	The Presiding Commissioner signed a lease agreement between the county and a not-for-profit organization for which he served as President. The County Commission meeting minutes do not reflect the discussion or vote to approve the lease, and it is not clear how the county established the lease rate ($300 per month) or why it did not advertise the property for lease or solicit competitive bids. The county did not solicit bids, retain sufficient bid documentation, including sole source justifications, or advertise for various items or services as required by state law. The Sheriff did not solicit bids, as was required, to purchase a patrol sports utility vehicle (SUV) and related equipment costing $47,371 with federal monies, and six months later purchased two similar, but newer, SUVs for $28,275 each. The county did not maintain fuel logs for eight of its ten road and bridge bulk fuel tanks, six of which are located at employee residences, the Sheriff's department did not always maintain mileage information on its vehicles, and the Assessor's office did not track who drove its vehicles and the purpose of the trip. Finally, the county did not have adequate documentation to support two disbursements of Community Development Block Grant monies.
County Sales Tax	The county did not sufficiently reduce the General Revenue property tax levy for sales tax receipts and has accumulated approximately $50,000 in excess property tax revenue. The County Commission needs to reduce the General Revenue property tax levy to compensate for this excess. In addition, the county did not accurately report property tax reduction amounts to the State Auditor's office resulting in a reduction in the county's property tax rate ceiling. After identifying the reporting errors made by the county, the State Auditor's office made the necessary corrections to reinstate the county's tax rate ceiling.
Sheriff's Controls and Procedures	The Sheriff's department needs to improve its receipting and depositing procedures. Receipts collected at the Sheriff's department front window are not adequately safeguarded, and the composition of receipts is not always documented or reconciled to bank deposits. Deposits are not always made intact or timely, and the change fund for phone card sales is not maintained at a constant amount. The Sheriff's department used Sheriff's Revolving Fund monies to purchase surveillance and recording equipment, but state law restricts these funds to expenditures associated with concealed carry endorsements or renewals. The Sheriff's department collects a $10 bond processing fee, but state law no longer authorizes collecting such a fee (and previously only authorized a $5 fee).
Prosecuting Attorney Controls and Procedures	As noted in our prior audit report, the Prosecuting Attorney's office lacks adequate controls and procedures for receipting, depositing, and processing bad checks. The Prosecuting Attorney's office does not issue receipt slips for monies received, does not immediately restrictively endorse money orders, and does not maintain a centralized record of all monies collected, making it more difficult to ensure all monies are transmitted to the County

Treasurer. Bad check complaint forms should be sequentially numbered as they are received, and a log should be maintained to track the disposition of each complaint.

Budgets

As noted in our prior audit report, the County Commission needs to improve its budgeting procedures. The County Commission does not regularly review budget to actual statements, and actual disbursements were more than budgeted disbursements for some funds. Some budgets were not prepared until after the monies had already been spent, and no documentation was available to show that the County Commission had approved some budget amendments.

Sheriff Compensatory Leave

Sheriff's department employees accrued more compensatory time than allowed by county policy resulting in higher Sheriff's department payroll costs. Employees accrued compensatory time for time worked over 40 hours in one week, but federal law, and county policy, only require compensatory time be accrued for law enforcement for hours worked in excess of 171 hours in a 28 day period. The Sheriff's department does not submit its leave records to the County Clerk's office, making it difficult for the County Commission to ensure compensatory time is managed in compliance with law and policy.

In the areas audited, the overall performance of this entity was **Fair**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

During the two years ended December 31, 2010, the county was awarded a $127,850 Bureau of Justice Assistance Recovery Act: Assistance to Rural Law Enforcement to Combat Crime and Drugs Grant for personnel and fringe benefits, travel expenses, and a vehicle and vehicle equipment for a drug task force officer. As of June 30, 2011, the county had expended $96,983, and an additional $30,867 remained to be spent before October 2011. The Sheriff noted that, without additional funding, the position created by this grant may be eliminated.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 15

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Ozark County

We have audited certain operations of Ozark County in fulfillment of our duties under Section 29.230, RSMo. In addition, Davis, Lynn & Moots, P.C., Certified Public Accountants, was engaged to audit the financial statements of Ozark County for the 2 years ended December 31, 2009. The scope of our audit included, but was not necessarily limited to, the 2 years ended December 31, 2010. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Ozark County.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Donna Christian, CPA, CGFM
In-Charge Auditor:	Donald Troy Royer
	Natalie McNish, CGAP
Audit Staff:	David Olson
	Connie James
	Joshua Allen, CPA

1. County Disbursements

The county did not take steps to avoid the appearance of or actual conflicts of interest when leasing the Courthouse Annex to a local not-for-profit (NFP) organization. In addition, controls and procedures over county disbursements including bidding, fuel use, and monitoring grant funds need improvement.

1.1 Courthouse Annex

Presiding Commissioner David Morrison signed a lease agreement between the county and a local NFP organization, for which he served as President, with no discussion or vote to approve the agreement documented in the County Commission meeting minutes. In addition, it is unclear how the lease rate was determined, and capital improvements made in exchange for lease payments were not documented.

On April 5, 2010, the Presiding Commissioner signed an agreement for the county to lease approximately one half of the space in the almost 7,200 square foot courthouse annex to the NFP for which he served as the President. Although the County Commission met on April 5, 2010, the discussion and vote to approve this lease agreement was not documented in the meeting minutes. The minutes simply indicate the County Commission approved the lease.

The lease agreement waived first year lease payments in exchange for capital improvements to the structure, and guaranteed a monthly lease rate of $300 per month for the next 5 years. According to the Presiding Commissioner, the rental rate was set low because the NFP provides services to low income families and individuals in the county; however, this benefit was not disclosed in the lease agreement. Capital improvements included new heating and air systems, handicap accessible deck and decking on the rear entrance, installation of dividing walls for offices and meeting space, drop ceiling, and flooring; however, the county did not obtain and review documentation from the organization to support the required improvements totaling approximately $33,000 until our request in September 2011. In addition, the county did not solicit competitive bids for leasing the space, advertise the space for lease, or list the space with a local real estate agent. Further, there is no documentation to indicate how the lease amount was determined.

As an elected official, the Presiding Commissioner serves in a fiduciary capacity and has an obligation to the public to avoid the appearance of impropriety. Signing a lease agreement for the county with a NFP that he serves as president without any documented abstention from the vote creates the appearance of a conflict of interest. To avoid potential conflicts of interest, meeting minutes should include documentation of all discussions and votes to approve such agreements and related abstentions. The county should perform and document a cost analysis for leasing office space, and utilize tools such as competitive bidding, advertisement, or professional

services as needed to maximize the revenue to the county. Further, when the county allows services or improvements to be exchanged for payments due, the County Commissioners should obtain and review applicable supporting documentation to ensure contract compliance.

1.2 Bidding

The county did not solicit bids, retain sufficient bid documentation including sole source justification, or advertise for various items or services.

- The Sheriff did not solicit bids for the following purchases:

Items	Cost
Jail Food (2009 and 2010)	$67,869
Patrol SUV	39,250
Patrol truck	17,500
Patrol vehicle surveillance systems	10,380
Patrol SUV equipment	8,121
Dispatch radio	7,768
Sheriff's Department surveillance system	4,575

  The patrol SUV ($39,250) and related equipment ($8,121) noted in the table above were purchased using American Recovery and Reinvestment Act monies received by the Sheriff's Department. The grant required the solicitation of bids for these purchases. Six months later, the Sheriff purchased two similar SUVs one model year newer at a cost of $28,275 each, using the state contract.

- Although county officials indicate bids were solicited, sufficient documentation was not retained to show compliance with state law for the purchase of tires for road and bridge equipment totaling $17,942 or grader blades totaling $7,982.

- The county did not document sole source procurement for ready mix concrete and patrol car repairs totaling $30,222 and $17,412, respectively, during the 2 years ended December 31, 2010. According to county officials, these items and services were not competitively bid because only one vendor could provide the items or services needed.

Section 50.660, RSMo, provides guidance on bidding requirements and procedures. Routine use of a competitive procurement process for major purchases ensures the county has made every effort to receive the best and lowest price and all interested parties are given an equal opportunity to participate in county business. Documentation of the various proposals received, and the county's selection process and criteria should be retained to demonstrate compliance with applicable laws or regulations and support decisions made. In addition, the failure to comply with bidding requirements

for purchases from federal grant funds can result in reduced funding in future years.

1.3 Fuel and vehicle use

Improvement is needed in the controls and procedures over fuel and vehicle use. Accounting records indicate fuel purchases totaled approximately $264,000, $65,000, and $5,000 by the road and bridge department, Sheriff's department, and Assessor's office, respectively, during the 2 years ended December 31, 2010.

Road and bridge

Fuel logs are not maintained for eight of the county's ten bulk fuel tanks. These eight tanks are not located on county property and six of these eight tanks are located at employee residences. Without fuel logs, the county is unable to compare the amount of fuel used to the amount of fuel purchased to ensure all fuel is accounted for properly.

Sheriff

Mileage information is not always maintained for Sheriff's department vehicles. While this information is supposed to be documented on the daily maintenance log for each vehicle by the deputy assigned to the vehicle, our review of maintenance logs found no documentation of mileage information.

Assessor

Mileage and fuel logs maintained for the Assessor's office vehicle do not indicate the individual driving the vehicle or the purpose of the trip.

Conclusion

To ensure the reasonableness and propriety of fuel used and fuel disbursements, procedures should be established to monitor fuel use and reconcile the amount of fuel used to fuel purchased. Mileage and fuel logs are necessary to support fuel charges and to document the appropriate use of vehicles. Failure to account for fuel purchases could result in loss, theft, and misuse going undetected.

1.4 Community Development Block Grant (CDBG)

The county did not have adequate documentation to support the disbursement of $125,000 in CDBG monies during the 2 years ended December 31, 2010. In June 2009, the county was awarded a CDBG from the Department of Economic Development (DED). These funds were received for the purpose of providing an acquisition loan to a local company for the expansion of their facilities and area job creation.

The county submitted two requests for funds to the DED. The first included a request for $13,283 for working capital and the second request for $111,717 for machinery and equipment. The county did not request or receive any supporting documentation of actual costs incurred from the local company prior to making these requests for funds.

To ensure all disbursements of grant funds meet the requirements and restrictions specified in the grant agreement, the county should require adequate supporting documentation be submitted for all disbursements.

Similar conditions were noted in our prior audit report.

Recommendations

The County Commission:

1.1 Avoid the appearance of and actual conflicts of interest and ensure all pertinent information is documented in meeting minutes. In addition, the County Commission should perform procedures to maximize revenues and obtain and review documentation to ensure contract compliance.

1.2 Perform a competitive procurement process for all major purchases and maintain documentation of decisions made. If it is not practical to obtain bids in a specific instance, or if sole source procurement is necessary, the circumstances should be thoroughly documented.

1.3 Require fuel logs be maintained, and these logs be reviewed for accuracy and reconciled to fuel purchases. Any significant discrepancies should be investigated. In addition, the Sheriff and Assessor should ensure complete mileage logs are maintained for county vehicles.

1.4 Require adequate supporting documentation for all disbursements.

Auditee's Response

The County provided the following responses:

1.1 Improvements have been made in the content of County Commission meeting minutes since the date of this lease agreement. Our meeting minutes will document the specific vote and related abstentions to avoid any apparent or actual conflicts of interest, and we will advertise available lease space for bids. Documentation to show improvements made to the courthouse annex are now on file with the county.

1.2 We will discuss the bidding noncompliance with the Sheriff, and in the future, we will require sufficient documentation from the Sheriff to show state bidding laws were followed before the check is approved for payment.

1.3 Meters have now been purchased for these eight road and bridge department fuel tanks and logs will be maintained. We will discuss the lack of mileage information with the Sheriff, and the Assessor has already implemented this recommendation.

1.4 Documentation was maintained for most of the disbursements related to this grant. We believe the grant administrator, South Central Ozark Council of Governments has the documentation that was not on file at the county; however, we will require a copy of all supporting documentation be sent to the County Commission before disbursement of grant funds are approved in the future.

The Sheriff provided the following responses:

1.2 We are now utilizing state bids for more purchases and will better document bids received and actions taken to ensure the best vendor is selected.

1.3 We have now implemented a daily mileage log.

2. County Sales Tax

Property tax reductions were not sufficient to offset sales taxes received by a total of approximately $50,000 for the years 2007 through 2011. In addition, property tax reduction amounts were not properly reported to the State Auditor's office.

Section 67.505, RSMo, requires the county to reduce property taxes for a percentage of sales taxes collected. Ozark County voters enacted a one-half cent sales tax with a provision to reduce property taxes by 50 percent of sales taxes collected. The county is required to estimate the annual property tax levy to meet a 50 percent reduction requirement, and certify to the State Auditor's office the annual property tax levy including the amount the levy is required to be reduced for sales tax collections, as well as any voluntary reductions. The county did not sufficiently reduce the General Revenue property tax levy for sales tax receipts, and has accumulated approximately $50,000 in excess property tax revenue as follows:

	Year Ended December 31,		
	2011*	2010	2009
Required property tax reduction	$ 126,510	126,510	131,295
Actual/Estimated property tax revenue reduction	136,312	88,688	170,386
(Under)/Over collection	(9,802)	37,822	(39,091)
Prior years (under)/over collection	60,035	22,213	61,304
Total property tax (under)/over collected	$ 50,233	60,035	22,213

* The required property tax reduction is based upon estimated 2011 sales tax revenues.

Further, because the county did not specify the reductions were sales tax related on the levy certification forms, the reductions were considered voluntary and due to Section 137.073(5) (4), RSMo, the tax rate ceiling for the General Revenue Fund was initially lowered for 2011, further limiting the county's ability to correct the excess property collections from prior years. After identifying these errors made by the county, the State Auditor's

office made the necessary corrections to reinstate the county's tax rate ceiling for 2011.

To ensure property tax levies are properly set and property tax ceilings are maintained, the County Clerk should ensure property tax levies are adequately reduced by 50 percent of sales tax revenue and the property tax levy reductions are accurately classified when reported to the State Auditor's office.

Recommendation

The County Commission adequately reduce property tax levies for 50 percent of sales tax revenue and properly distinguish between sales tax and voluntary reductions on certified property tax forms.

Auditee's Response

The County Commission provided the following response:

Along with the County Clerk, we will ensure the county's property tax levy is properly reduced for 50 percent of sales tax revenue and tax forms are completed properly before remitting the forms to the State Auditor's office next year.

3. Sheriff's Controls and Procedures

Weaknesses exist in accounting controls and procedures in the Sheriff's department. The Sheriff's department collected approximately $78,000 and $75,000 during the 2 years ended December 31, 2010 and 2009, respectively.

3.1 Receipting and depositing procedures

Receipting and depositing procedures need improvement.

- Receipts taken at the front window of the Sheriff's department are not adequately safeguarded. They are kept in the bookkeeper's deposit book on her desk where all staff on duty can access them.

- Tow fees collected for local tow truck drivers on impounded vehicles are not receipted and are held in cash and given to the truck driver when the next vehicle is delivered to the Sheriff's impound lot. The Sheriff's department collects approximately $100 in towing fees per vehicle.

- The composition of receipts is not reconciled to the composition of deposits because the method of payment is not always correctly recorded on receipt slips issued, and the composition of deposits is not always correctly recorded on the deposit slips. For example, on December 30, 2010, the bookkeeper issued a receipt slip indicating $1,100 cash was received for phone card sales. When the deposit slip was prepared, instead of documenting cash and check, the bookkeeper documented the receipt number as a check number and the amount of $1,100 as though a check was received. Through our review of bank

back up documentation, we found $908 of this was cash and $192 was check or money order.

- Deposits are not always made intact. We noted a personal check was cashed from department receipts during a cash count on July 13, 2011.

- Deposits for monies collected in the jail are not always made in a timely manner. For example, $1,100 cash was received for an impound fee invoice on December 22, 2010, but was not deposited until December 31, 2010. During 2010, it appeared the bookkeeper was only depositing jail receipts once a week. Also, phone card sale receipts are only transferred to the secretary once a month for deposit. Most of these receipts are cash and during 2010, average monthly deposits totaled $1,400.

- A change fund, provided for phone card sales, is not maintained at a constant amount. For example, when monies were deposited on September 30, 2010, $31 remained in the cash box to be used as a change fund; however, after the following deposit on November 2, 2010, $75 remained.

Failure to implement adequate receipt and depositing procedures increases the risk that loss or misuse of money received will go undetected.

3.2 Sheriff's Revolving Fund

Disbursements from the Sheriff's Revolving Fund are not in compliance with state law. The Sheriff purchased a surveillance and recording system costing $4,575 on February 1, 2011, to record activity in the interrogation and booking rooms, parking lot, and gas tank area.

Per Section 50.535, RSMo, Sheriff's Revolving Fund monies are to be used for the purchase of equipment, to provide training, and to make necessary expenditures to process applications for concealed carry endorsements or renewals, including but not limited to the purchase of equipment, training, fingerprinting and background checks, and employment of additional personnel.

3.3 Bond fees

The Sheriff's department currently collects a $10 bond processing fee; however, state law does not include provisions to collect such a fee. Bond processing fees of approximately $1,300 collected during the 2 years ended December 31, 2010, were deposited into the Law Enforcement Sales Tax Fund. Although Section 57.280, RSMo, previously authorized the Sheriff to collect a $5 fee for taking and returning every bond required by law, this statute was amended and does not currently contain a provision to collect bond processing fees. Therefore, it appears the Sheriff does not have statutory authority to collect this fee and should refrain from collecting it.

Recommendations

The Sheriff:

3.1 Adequately safeguard receipts from loss or misuse, issue receipt slips for all monies received, ensure the correct composition is documented on receipt slips and deposit slips, disallow the cashing of personal checks from department receipts, ensure all monies are deposited intact and in a timely manner, and ensure change funds are maintained on an imprest basis.

3.2 Use Sheriff's Revolving Fund monies in accordance with state law.

3.3 Discontinue collecting the bond fee.

Auditee's Response

The Sheriff provided the following responses:

3.1 We will move monies collected to a more secure location, ensure receipt slips are issued for tow fees collected, and ensure the method of payment is correctly documented on all receipt slips, and we will not cash personal checks from cash receipts in the future. We have already started depositing more timely and will try to maintain a more consistent change fund for phone card sales.

3.2 We believe the purchase of this equipment was allowable. The fingerprinting machine and camera are located in the booking area. We take each CCW applicant into this area to fulfill the fingerprinting requirement and take their picture. To meet safety regulations, all activity in this area is required to be recorded.

3.3 We have already stopped collecting this fee.

4. Prosecuting Attorney Controls and Procedures

Procedures for receipting, depositing, and processing bad checks are in need of improvement. The Prosecuting Attorney's office collected fees totaling approximately $14,000 during the 2 years ended December 31, 2010.

4.1 Receipting and depositing procedures

Receipt slips are not issued for monies received, and money orders are not restrictively endorsed immediately upon receipt. No detailed record of the monies collected by the Prosecuting Attorney's office is maintained. While the Prosecuting Attorney's clerk makes a copy of each money order and places it in the defendant's file, there is no centralized record of all money collected to ensure all monies are properly transmitted to the County Treasurer.

To ensure monies are accounted for properly and transmitted intact, pre-numbered receipt slips should be issued for all monies received, the method

of payment should be indicated on each receipt slip, and the composition of receipt slips issued should be reconciled to the composition of the amounts transmitted to the County Treasurer. In addition, money orders payable to the Prosecuting Attorney should be restrictively endorsed immediately upon receipt.

4.2 Bad check processing procedures

An adequate system to account for all bad checks received by the Prosecuting Attorney's office, as well as the subsequent disposition of these bad checks, has not been established. Currently, merchants complete a complaint form at the time the bad check is turned over to the Prosecuting Attorney for collection. The complaint form and information regarding the handling of each case is maintained in the individual case files. The Prosecuting Attorney's office has not established a log of each check received and its disposition to ensure the bad checks have been accounted for properly.

To ensure all bad checks turned over to the Prosecuting Attorney are handled and accounted for properly, a sequential number should be assigned to each bad check complaint form or bad check received and a log should be maintained showing each bad check and its disposition. The log should contain information such as the assigned number, the merchant, the issuer of the check, the amount of the check, the amount of the bad check fee, and the disposition of the bad check.

Similar conditions previously reported

Conditions similar to points 4.1 and 4.2 were noted in our prior audit report.

Recommendations

The Prosecuting Attorney:

4.1 Issue receipt slips for all monies received and reconcile receipt slips to amounts transmitted to the County Treasurer. Additionally, the Prosecuting Attorney should ensure money orders are restrictively endorsed immediately upon receipt.

4.2 Implement procedures to adequately track the receipt and disposition of all bad check complaints.

Auditee's Response

The Prosecuting Attorney provided the following response:

We are currently in the process of making plans to upgrade our computer system. The new system will provide better accountability over bad check money orders received and allow us to more easily track the disposition of all cases. In addition, money orders will be endorsed immediately upon receipt.

5. Budgets

The County Commission does not review budget to actual statements on a regular basis to properly monitor county finances and actual disbursements exceeded budgeted disbursements for some funds. Also, budgets for some new funds were not prepared until after monies were disbursed from these funds. For example, the 2010 budget was amended in November 2010 to add the Community Facilities (CF) Vehicle Grant Fund with budgeted disbursements of $72,150; however, this money was received in May 2010, and disbursed in June and July 2010, several months before the budget for this fund was prepared.

In addition, we found no documentation of a public hearing or approval by the County Commission for budget amendments approved in October and November 2009 and February 2010.

Budget documents are an essential tool for the efficient management of county finances. Adequate budget monitoring allows the county to properly react and plan for increased disbursements and deceased revenues.

Similar conditions were noted in our prior audit report.

Recommendation

The County Commission monitor budgets to ensure budgeted disbursements are not exceeded and budgets are properly approved for all new funds prior to the disbursements of monies.

Auditee's Response

The County Commission provided the following response:

We will monitor our budgets more closely and ensure budget amendments are completed timely. In addition, budget amendment procedures, which include a public hearing, are now properly documented in County Commission meeting minutes.

6. Sheriff Compensatory Leave

Compensatory leave earned by Sheriff's department employees is not in compliance with the county personnel policies and procedures manual. Because the County Clerk does not maintain centralized records of vacation and sick leave and compensatory time for Sheriff's department employees, the County Commission is unaware of the noncompliance with the county compensatory leave policies.

Sheriff's department employees accrue compensatory leave for any time worked over 40 hours in one week; however, the county personnel policies and procedures manual states the work period for certain Sheriff's department employees is based on 171 hours worked during a 28 consecutive day period. Allowing compensatory leave for law enforcement based on a 40 hours week results in higher Sheriff's department payroll costs.

While records of vacation and sick leave and compensatory time earned, taken, or accumulated are prepared and maintained by the Sheriff's department, they are not submitted to the County Clerk's office monthly. Without centralized leave records, the County Commission cannot ensure employee compensatory time is properly computed and leave time is properly tracked in compliance with the county policy.

To limit the county's liability for compensatory time to law enforcement officers, the county should complete a thorough review of compensatory time calculations and ensure compliance with the county's established policy. Additionally, to ensure county policy is properly followed, centralized and complete leave records of all county employee vacation and sick leave and compensatory time should be maintained by the County Clerk. Centralized leave records also aid in determining final pay for employees leaving county employment or in the event disputes arise and demonstrate compliance with the Fair Labor Standards Act of 1938.

A similar condition was noted in our prior audit report.

Recommendation

The County Commission ensure compensatory leave is computed for law enforcement officers in compliance with county policy and work with the Sheriff and the County Clerk to maintain centralized leave records for all county employees.

Auditee's Response

The County Commission provided the following response:

We will require the Sheriff's Department forward all leave balances to the County Clerk at the end of this year so the County Clerk can track leave accrual and usage beginning January 1, 2012. We will also require the Sheriff's Department to comply with the adopted county personnel policy with regards to the calculation of compensatory leave.

The Sheriff provided the following response:

We will work with the County Clerk to implement this recommendation by January 1, 2012.

Ozark County
Organization and Statistical Information

Ozark County is a county-organized, third-class county. The county seat is Gainesville.

Ozark County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 51 full-time employees and 11 part-time employees on December 31, 2010.

In addition, county operations include a Health Center and Recycling Center.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2011	2010
David Morrison, Presiding Commissioner	$	27,080
T.J. Lewis, Associate Commissioner		25,080
Greg Donley, Associate Commissioner		25,080
Becki Strong, Circuit Clerk and Ex Officio Recorder of Deeds (1)		
Kellie Maddox, County Clerk (2)		32,750
Lisa Hawkins, County Clerk (2)		4,721
Thomas W. Cline, Prosecuting Attorney		45,000
Raymond Pace, Sheriff		42,000
David Ford, County Treasurer		38,000
Ron Mahan, County Coroner		11,000
Melinda Abraham, Public Administrator		26,250
Billy D. Hambelton, County Collector year ended February 28,	38,000	
Katherine Loftis, County Assessor , year ended August 31,		38,000
Tim Morgan, County Surveyor (3)		N/A

(1) Compensation is paid by the state.

(2) Lisa Hawkins was appointed as County Clerk in November 2010 to replace Kelly Maddox who resigned in November 2010. Ms. Hawkins was elected to this position in November 2010.

(3) Compensation on a fee basis.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

According to county personnel, the county was awarded the following American Recovery and Reinvestment Act of 2009 (ARRA) funding during the 2 years ended December 31, 2010:

A $127,850 Bureau of Justice Assistance Recovery Act: Assistance to Rural Law Enforcement to Combat Crime and Drugs Grant was awarded by the Department of Justice for personnel and fringe benefits, travel expenses, and a vehicle and vehicle equipment for a drug task force officer. As of June 2011, the county has received and expended $96,983. An additional $30,867 remains to be spent before October 2011. This grant resulted in the creation of one job; however, the Sheriff indicated that without additional grant funding this position may be eliminated.

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Transportation Development Districts as of December 31, 2009

Background	As of December 31, 2009, 166 Transportation Development Districts (TDDs) had been established, with a reported total estimated transportation project costs of over $1.6 billion and a reported total anticipated revenues of over $2 billion. The 2009 TDD audit report provides information regarding the 166 TDDs and presents audit results for 8 specific TDDs: Meadows, Stone Ridge, Cross Creek, CB 5421/5975, Platte Valley Plaza, Raytown Highway 350, The Market at McKnight I, and Euclid Buckingham.
Notification	The General Assembly should consider legislation requiring the State Auditor's office be notified when a TDD is established, since state law requires the State Auditor's office to audit each TDD periodically.
Department of Revenue Collections	Three TDDs (Poplar Bluff Conference Center, North Main/Malone and Southtown) still collected their own sales taxes during 2010 even though a new state law required vendors to submit sales tax directly to the Department of Revenue. The General Assembly should consider further legislation to establish a penalty for non-compliance.
Financial Statements	Sixteen TDDs failed to file the required financial statement/report for 2009 with the State Auditor's office, and one TDD filed late, creating an aggregate maximum fine of $810,500 as of August 31, 2010. The General Assembly should consider further legislation to authorize an agency to assess and collect such fines authorized by Section 105.145.8, RSMo. The following TDDs failed to file the required statement/report: North Kansas City Light Rail, 620 Market, First Capital Drive, I-44 and Highway 47, Indian Ridge Resort, Olive/Graeser, Poplar Bluff Conference Center, Spindler, Toad Cove Complex, Toad Cove Resort, Truman Road, Blue Ridge Town Centre, Country Club Plaza, Farris Family, Interstate Plaza/North Town Village, and Northwoods. North Main/Malone filed its financial statement late. In addition, the Stone Ridge TDD submitted inaccurate financial statements.
Competitive Bidding	Three of the eight selected TDDs need to improve their procurement practices and maintain documentation of competitive bidding processes. State law requires competitive bidding for certain TDD construction contracts, and competitive bidding helps ensure the district is getting the best value and gives all parties an equal chance to participate in district business.
Engineering Services	One of the eight selected TDDs failed to document the evaluation and selection of engineering services. It chose the engineering services provider because the same engineer was used for the private portion of the project.

Budgetary Matters	Five of the eight selected TDDs exhibited problems with their budgets. One TDD budgeted a deficit balance, and several failed to timely approve complete budgets.
Bank Reconciliations	One of the selected TDDs did not complete timely bank reconciliations, and another of the selected TDDs did not maintain a running balance for its checking account, so it did not know the applicable account balance to conduct a reconciliation.
Meetings	Three of the eight selected TDDs failed to hold annual board meetings.
Deposits	One of the selected TDDs did not timely deposit monies received, which increases the risk of loss, theft, or misuse of funds.
Financial Condition	One of the selected TDDs does not have sufficient receipts to pay its annual debt interest.
Prevailing Wages	Three of the eight selected TDDs failed to maintain evidence of compliance with prevailing wage laws.
Additional Comments	On a positive note, our audit of the Meadows TDD noted no matters which required reporting.

Because of the compound nature of this audit report, no overall rating is provided.

American Recovery and Reinvestment Act (Federal Stimulus)	The TDDs did not receive any federal stimulus monies during the audited time period.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly

We have audited certain operations of selected transportation development districts (TDDs) as required by Section 238.272, RSMo. The objectives of our audit were to:

1. Report selected information regarding the various TDDs.

2. Evaluate internal controls over significant management and financial functions of selected TDDs.

3. Evaluate compliance with certain legal provisions of selected TDDs.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The audit reports (1) selected information regarding TDDs and recommendations for improvements to selected TDDs regarding (2) deficiencies in internal controls and (3) noncompliance with legal provisions. The accompanying Management Advisory Report presents our findings arising from our audit of the TDDs.

The accompanying information in the appendixes is presented for informational purposes. This information was obtained from TDD representatives and was not subjected to the procedures applied in our audit of the TDDs.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Todd M. Schuler, CPA
In-Charge Auditor:	Rex Murdock, M.S.Acct.
Audit Staff:	Karla Swift, MBA

Transportation Development Districts
Introduction

Background

The Transportation Development Districts Act, Sections 238.200 to 238.280, RSMo, allows for the formation of transportation development districts (TDDs). These entities are separate political subdivisions established and organized for the construction of roads, bridges, interchanges, or other transportation-related projects. The projects are generally financed through the issuance of revenue notes, revenue bonds, or other debt securities for a period not to exceed 40 years. TDDs are governed by a board of directors of not less than 5 nor more than 15 members. The board has the authority (after qualified voter approval[1]) to impose sales taxes or tolls, levy property taxes, and levy special assessments within the boundaries of the TDD to pay the expenditures of the entity, including the liquidation of debt incurred to fund the transportation-related projects. The revenues of a TDD, the majority of which are sales taxes, can only be used for transportation-related projects.

The process of establishing a TDD is initiated by the filing of a petition in the circuit court governing the boundaries of which the proposed district is located. Such a petition can be filed by: (1) not less than 50 registered voters within the proposed TDD, (2) all the owners of real property located within its proposed boundaries, if there are no eligible registered voters residing within the proposed district, (3) a local transportation authority (LTA), or (4) two or more LTAs. A county, city, special road district, or any other local public authority having jurisdiction over transportation projects and services can serve as a LTA.

Missouri state law requires a copy of the petition filed to establish a TDD be provided to the Missouri Highways and Transportation Commission (MoDOT) and each affected LTA. Those entities are then allowed to file an answer stating agreement with or opposition to the creation of the district. In addition, any resident, taxpayer, or any other entity within the proposed district may join in or file a petition supporting or answer opposing the creation of the district. The circuit court subsequently hears the case, if necessary, and makes a decision whether to authorize the establishment of the district.

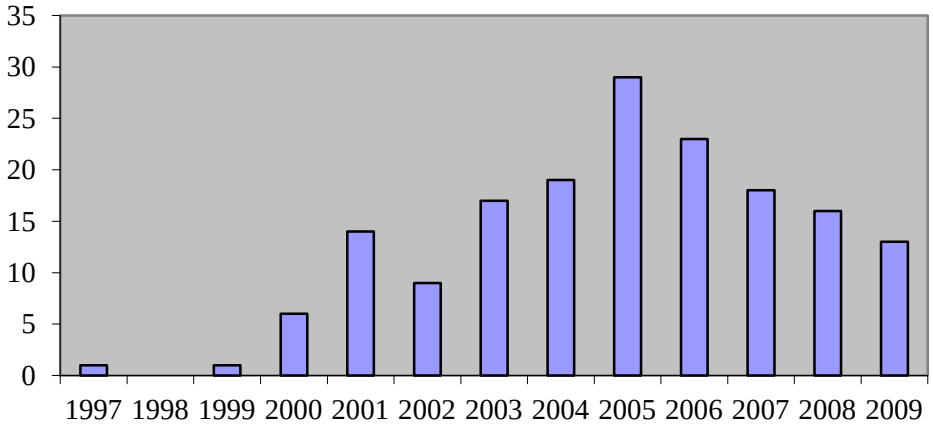
Although there is no statutory annual audit requirement, many districts are required to obtain annual audits by revenue bond covenants. In addition, Section 238.272, RSMo, provides the State Auditor's office (SAO) shall audit each TDD once every 3 years, and may audit more frequently if deemed appropriate.

[1] Section 238.202, RSMo, currently defines qualified voters as any persons residing within the proposed or established district who have registered to vote pursuant to Chapter 115, RSMo, and the owners of real property, who shall receive one vote per acre, provided that any registered voter who also owns property must elect whether to vote as an owner or a registered voter.

Section 238.275, RSMo, provides for the abolishment of a TDD once its projects are completed, ownership of the projects has been transferred to MoDOT or the LTA, and the district has no outstanding liabilities. In addition, a TDD can be abolished if the board of directors determines the projects cannot be completed due to lack of funding or for any other reason. Prior to a TDD submitting the question to abolish the district to the applicable voters, the SAO must audit the TDD to determine its financial status, and whether it can be abolished. See Appendix C for information regarding abolished TDDs.

The Transportation Development Districts Act was enacted in 1990, and the first TDD was established in 1997. As of December 31, 2009, 166 TDDs were in existence in the state of Missouri (including 13 TDDs which were established in 2009). Almost 70 percent of the districts have been established in the state's two largest metropolitan area (with 80 and 37 of the TDDs located in St. Louis and Kansas City metropolitan areas[2], respectively). Additionally, 64 (approximately 39 percent) TDDs were located either completely or partially in a tax increment financing redevelopment (TIF) area. See Appendix A for information regarding whether a particular TDD is located within a TIF area.

Number of TDDs Established by Year



Officials/representatives of the TDDs reported total estimated transportation project costs of over $1.6 billion. In addition, officials/representatives reported total estimated revenues of over $2 billion would be collected over the lives of the respective TDDs (estimated project costs and anticipated

[2] The St. Louis metropolitan area is defined here as the geographic area that includes the city of St. Louis, St. Louis County, St. Charles County, Jefferson County, and Franklin County. The Kansas City metropolitan area is defined here as the geographic area that includes Jackson County, Platte County, Clay County, and Cass County.

revenue information were not reported for some of the TDDs because information had not been determined or could not be located).

The table below shows the total estimated project costs and anticipated revenues of the 166 TDDs by various dollar ranges.

	Number of TDDs	
Dollar Range	Estimated Transportation Project Costs	Expected Revenue
$0 to $1 million	19	13
$1 million to $5 million	68	48
$5 million to $10 million	25	34
$10 million to $15 million	18	13
$15 million to $35 million	22	27
More than $35million	9	13
Not reported	5	18

Scope and Methodology

The scope of the audit included, but was not necessarily limited to, the 3 years ended December 31, 2009.

Our methodology included gathering information regarding the TDDs established in 2009, through discussions with various MoDOT officials and from a TDD database and files maintained by that agency. Information obtained included TDD name, location, applicable county/municipality, date established, identity of the individual(s)/entity who filed the petition, the type of funding (i.e., sales taxes, property taxes, etc.), and the funding rate (e.g., 1 percent). Some of this information is presented in Appendix A.

To determine and report estimated project costs and estimated revenues of the TDDs newly established in 2009, survey questionnaires were sent requesting information including, but not limited to, the geographic location of the TDD, estimated total project costs, how project costs were financed and the amount of that financing, estimated total revenues to be collected and over what period of time, when the collection of revenue and initial expenses began, the party responsible for collection of the revenues and administering the funds, whether financial audits have been conducted by an independent auditor, the name of the development and type of businesses in the district, and whether or not the TDD is located in a TIF area. Some of the survey information received from the TDDs is presented in Appendix A.

Relative to our audit responsibilities pursuant to Section 238.272, RSMo, we selected and conducted audit work related to various TDDs (the selected districts). To evaluate internal controls at the selected districts, we reviewed written policies and procedures, financial records, and other pertinent documents; and interviewed various personnel of the district, as well as

certain external parties. To evaluate compliance with certain legal provisions at selected districts, we obtained an understanding of legal requirements related to TDDs, and reviewed meeting minutes, budgets, and financial statements.

Some data presented in Appendixes A and B was compiled from survey information submitted by officials/representatives of the various TDDs and the annual financial or audit reports submitted by those districts. This information was not verified for accuracy by us. If any information presented in Appendix A of the prior report was found to have changed since the previous audit, that information was updated on the current appendixes to the extent those changes were noted by us or brought to our attention. The financial data presented in Appendix B is presented as classified by the districts or the districts' independent auditors, if applicable; therefore, some disbursements may be classified in an inconsistent manner.

The following table includes the 37 TDDs considered for audit during our current audit, including the 8 TDDs selected for review. Some of the TDDs had financial statement audits performed by independent auditors.

TDD Name	Date Established	Fiscal Year End	Financial Statement Audits: Selected for Review by SAO	Financial Statement Audits: Not Selected for Review by SAO	Unaudited: Selected for Review by SAO	Unaudited: Not Selected for Review by SAO

The audited district was selected because of the significance of its financial activity, with expenditures in excess of $5 million during fiscal years 2007 through 2009. The seven unaudited districts were selected because their

transportation projects were substantially completed and/or significant financial activity was incurred by the TDD or developer during 2007 through 2009, and/or other considerations. The reported disbursements of the 20 unaudited districts which were not selected totaled less than $2.8 million during fiscal years 2007 through 2009.

A Schedule of Receipts, Disbursements, and Cash Balances for the eight selected districts is presented in Appendix B. The financial information of the selected districts is presented on a cash basis, and reflects the financial activity and balances of the selected TDDs during the applicable years; however, it does not reflect any project-related costs incurred by the developers that were not yet reimbursed by the applicable districts. In some cases, those unreimbursed developer-incurred costs are substantial.

Overall Audit Findings

1. Notification

There is no statutory provision which requires the State Audtior's office (SAO) to be notified when a transportation development district (TDD) is established. Section 238.272, RSMo, requires the SAO to audit each TDD at least every 3 years, and more frequently if deemed necessary, and Section 238.275.3, RSMo, requires the SAO to audit a TDD prior to a vote regarding its abolishment. Also, Section 105.145, RSMo, requires all political subdivisions in the state to file an annual financial report with the SAO.

Although the SAO is contacted by some TDD representatives when a district is established, the SAO has generally had to consult with MoDOT officials to identify newly established TDDs. While these communications with MoDOT have allowed us to identify and track most of the TDDs, there have been instances where we later became aware of the existence of a TDD.

Recommendation

The General Assembly consider further legislation to require TDD officials to notify the SAO when a TDD is established.

2. Department of Revenue Collections

During 2010, the Poplar Bluff Conference Center TDD, North Main/Malone TDD, and Southtown TDD collected their own sales taxes. Effective January 1, 2010, Section 238.235, RSMo, requires TDD sales taxes be remitted to the DOR, who then remits the collections to the TDD. Previously, businesses located within a TDD collected the applicable sales tax and remitted it to the TDD directly.

Although state law requires the DOR to collect district sales taxes, the statutes do not provide penalties for non-compliance.

Recommendation

The General Assembly establish a penalty for non-compliance with collection procedures provided by state law.

3. Financial Reporting

Of the 166 districts in existence at December 31, 2009, 17 (10.24 percent) districts filed financial statement/audit reports late or did not file a financial statement with the SAO, as required by law, creating a fine of up to $810,500 as of August 31, 2010. North Main/Malone TDD filed its financial statement late, while the remaining 16 districts had not filed a financial statement as of August 31, 2010.

TDD Name	Fiscal Year End	Maximum fine to be assessed as of August 31, 2010
North Kansas City Light Rail TDD	09/30/09	$101,500
620 Market TDD	12/31/09	56,500
First Capital Drive TDD	12/31/09	56,500
I-44 and Highway 47 TDD	12/31/09	56,500
Indian Ridge Resort TDD	12/31/09	56,500
Olive/Graeser TDD	12/31/09	56,500
Poplar Bluff Conference Center TDD	12/31/09	56,500
Spindler TDD	12/31/09	56,500
Toad Cove Complex TDD	12/31/09	56,500
Toad Cove Resort TDD	12/31/09	56,500
Truman Road TDD	12/31/09	56,500
Blue Ridge Town Centre TDD	12/31/09	26,000
Country Club Plaza TDD	12/31/09	26,000
Farris Family TDD	12/31/09	26,000
Interstate Plaza/North Town Village TDD	12/31/09	26,000
Northwoods TDD	12/31/09	26,000
North Main/Malone TDD	12/31/09	14,000

Section 105.145, RSMo, requires transportation development districts (TDDs) to file annual financial statements with the SAO. Section 105.145.8, RSMo, states that any district that fails to timely submit a copy of the annual financial statement to the SAO shall be subject to a fine not to exceed $500 per day. 15 CSR 40-3.030 provides if a political subdivision is audited by an independent auditor, a copy of the audit report can be filed in lieu of a separate financial report. The annual financial report is to be filed within 4 months of the entity's fiscal year end, while an audit report can be filed within 6 months of the entity's fiscal year end.

While a fine for late filing of the financial statement/audit report was authorized, the law does not establish the agency responsible for assessment and collection authority of the fines.

Recommendation

The General Assembly establish legislation authorizing an agency of the state with assessment and collection authority for the fines for late filing of financial statements/audit reports.

Audits of Selected Districts

The following section reports information related to the eight TDDs selected for review. The selected districts are presented in the order of date established.

1. Meadows TDD

The Meadows TDD was organized in January 2007 by a petition filed by the property owner/developer and the City of Lake St. Louis. The district is

located in Lake St. Louis. The Board of Directors and officers include three representatives from the City of Lake St. Louis and two representatives of the property owner/developer. The qualified voter of the district is the property owner/developer. The district has a fiscal year end of December 31 and did have independent audits performed during the 3 years ended December 31, 2009. The City of Lake St. Louis and St. Charles County were the LTAs.

During our audit work related to this TDD, we noted no matters which needed to be reported.

2. Stone Ridge TDD

The Stone Ridge TDD was organized in January 2007 by a petition filed by the property owner/developer and is located in Jefferson City. The Board of Directors and officers are representatives of the developer. The qualified voter of the district is the property owner/developer. The district has a fiscal year end of December 31 and did not have independent audits performed during the 3 years ended December 31, 2009. The City of Jefferson City was the LTA.

During our audit work related to this TDD, we noted the following:

2.1 Financial statements

Financial statements submitted to the SAO were not accurate. The December 31, 2007, cash balance on the financial statement originally submitted to the SAO did not agree with the January 1, 2008, cash balance listed on the financial statement. In April 2010, the district submitted an amended financial statement to correct the December 31, 2007, cash balance. However, the December 31, 2007, cash balance reported on the amended financial statement did not agree to either the accounting records or bank documentation. After bringing this to the district's attention, the district submitted another amended financial statement which agreed to accounting records and bank documentation.

The December 31, 2008, financial statement indicated advances from the bank of $1,297,430. Actual advances from the bank were $1,001,104 and $296,326 was advanced from the developer. Complete and accurate financial statements are necessary to keep citizens informed of the financial activity and condition of the district.

2.2 Bank reconciliations

Monthly bank reconciliations are not adequate. The district does not maintain a running balance for the operating fund, so the district does not know the applicable balance to reconcile to when preparing the reconciliation. While the district stated bank reconciliations were performed, the district did not retain documentation of the bank reconciliations.

Preparation of monthly bank reconciliations and maintenance of records of cash balances is necessary to ensure the bank account is in agreement with accounting records and to detect and correct errors. Additionally, complete documentation of reconciliations should be maintained to support conclusions and corrections and to facilitate independent reviews.

2.3 Budgets

Budgets are not in compliance with state law. The annual budgets for 2007, 2008, and 2009 did not contain a general budget summary or actual receipts and disbursements for the 2 preceding years, and the 2008 budget reflected a deficit budgeted balance. In addition, actual disbursements exceeded budgeted disbursements in 2008 and 2009, by approximately $1.1 million and $3.1 million, respectively.

Sections 67.010 to 67.040, RSMo, include provisions regarding annual budgets.

Recommendations

The Board of Directors:

2.1 Prepare accurate financial statements which provide citizens an accounting of all financial activity of the district.

2.2 Ensure complete bank reconciliations are retained and a running book balance is maintained.

2.3 Prepare annual budgets in accordance with state law and ensure actual disbursements do not exceed budgeted amounts.

Stone Ridge TDD Response

The Stone Ridge TDD Board of Directors provided the following written response:

The District hereby acknowledges recommendations 2.1, 2.2, and 2.3 in your report, and particular attention will be paid moving forward to ensure that the District's financial records, annual reports, and ongoing budget items are in full compliance with all requirements of the State Auditor's Office and Missouri state law. The District's accountant has reviewed the other financial information provided in your report and has indicated that it is accurate.

3. Cross Creek TDD

The Cross Creek TDD was organized in February 2007 by a petition filed by the property owner/developer and is located in Columbia. The Board of Directors and officers are representatives of the developer. The qualified voter of the district is the property owner/developer. The district has a fiscal year end of December 31 and did not have independent audits performed during the 3 years ended December 31, 2009. MoDOT had jurisdiction over the project, and the City of Columbia and Boone County were the LTAs.

During our audit work related to this TDD, we noted the following:

3.1 Competitive bidding

The district did not ensure contractors were selected through a competitive bid process. Documentation to support the procurement of the contractor was not maintained.

Section 238.252, RSMo, requires all construction contracts in excess of $5,000 between a TDD and a private contractor be competitively bid and awarded to the lowest and best bidder. In addition, the cooperative agreement with MoDOT requires the district or its contractor to solicit competitive bids.

3.2 Prevailing wages

The district was unable to provide evidence of compliance with prevailing wage provisions related to district projects.

The MoDOT and Cross Creek TDD Cooperative Agreement requires the district and its subcontractor to pay the prevailing hourly rate of wages for each craft or type of worker required to complete the roadway project as determined by the Missouri Department of Labor and Industrial Relations. In addition, Sections 290.210 to 290.340, RSMo, include provisions regarding prevailing wages.

3.3 Meetings

The Board failed to hold meetings as required. The property owners held the initial meeting on March 21, 2007, followed by a Board of Directors meeting. The Board of Directors met again in August and September 2007. The property owners and Board of Directors did not meet in 2008 or 2009.

Article IV, Section 4 of the district by-laws require a property owners meeting at least every 13 months, with a board meeting to immediately follow the property owners meeting. Holding meetings at least annually would meet the requirements of the by-laws and allow the district to conduct necessary business.

Recommendations

The Board of Directors:

3.1 Ensure bids are solicited for all applicable purchases in accordance with state law and sufficient documentation is maintained.

3.2 Ensure adequate documentation is submitted to substantiate prevailing wages are paid on construction projects, as required by state law.

3.3 Conduct a meeting at least once every 13 months, as required by district by-laws.

Cross Creek TDD Response

The Cross Creek TDD Board of Directors did not provide a response.

4. CB 5421/5975 TDD

The CB 5421/5975 TDD was organized in March 2007 by a petition filed by the property owners/developer and is located in St. Louis. The Board of Directors and officers are representatives of the developer. The qualified voters of the district are the property owners. The district has a fiscal year end of December 31 and did not have independent audits performed during the 3 years ended December 31, 2009. The City of St. Louis was the LTA.

During our audit work related to this TDD, we noted the following:

4.1 Budgets

Budgets are not prepared timely. The district did not prepare the 2009 and 2008 budgets until June 2010, when the 2010 budget was prepared. One cause of the failure to adopt budgets was the lack of formal board meetings in 2008 and 2009. (See section 4.5).

Sections 67.010 to 67.040, RSMo, include provisions regarding annual budgets.

4.2 Deposits

Monies received were not deposited timely. District records indicate monies were received and posted as early as November 1, 2008, but were not deposited until February 1, 2009.

To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds, all monies received should be recorded and deposited timely.

4.3 Bank reconciliations

Bank reconciliations are not completed timely. The district records indicate the December 31, 2008, bank reconciliation was completed on June 14, 2009.

Timely preparation of monthly bank reconciliations is necessary to ensure the bank account is in agreement with accounting records and to detect and correct errors in a timely manner.

4.4 Financial condition

District receipts are not sufficient to pay the annual interest on the debt incurred for the district project. The district has incurred approximately $330,280 in interest costs since the bonds were issued; however, the district has only paid $116,314. The district indicated that beginning in approximately 12 years, the district will no longer be required to make TIF payments, increasing revenue for debt repayments.

4.5 Meetings

The Board failed to hold annual meetings. The Board met in August 2008, and the next meeting was in June 2010.

Article V, Section 2 of the district by-laws require the district to hold an annual meeting to appoint officers of the district. Holding meetings at least annually would meet the requirements of the by-laws and allow the district to conduct necessary business, such as adopting annual budgets.

Recommendations

The Board of Directors:

4.1 Prepare annual budgets which contain all information required by state law.

4.2 Deposit receipts timely.

4.3 Ensure bank reconciliations are performed timely.

4.4 Monitor the financial condition of the district to provide sufficient cash to make annual interest payments.

4.5 Conduct a meeting at least once per year.

CB 5421/5975 TDD Response

The CB 5421/5975 TDD Board of Directors provided the following written response:

The District does not intend to comment on the report.

5. Platte Valley Plaza TDD

The Platte Valley Plaza TDD was organized in March 2007 by a petition filed by the property owner/developer and is located in Platte City. The original Board of Directors and officers included three representatives of the developer and two representatives of the city. The current Board of Directors and officers include two members of the city council, two local business owners (not related to the developer), and one member as a representative of the developer. The boundaries of the district were amended in May 2008 to include additional property within the district. The qualified voters of the district are the property owners within the district. The district has a fiscal year end of December 31 and did not have independent audits performed during the 3 years ended December 31, 2009. MoDOT had jurisdiction over this project, and the City of Platte City was the LTA.

During our audit work related to this TDD, we noted the following:

5.1 Budgets

Budgets were not approved timely and did not always comply with state law. The 2008 budget was approved in April 2008, and amended in May 2009. The 2009 budget was approved in May 2009. Budgets did not always list the detailed receipts or disbursements, and the 2 previous years actual receipts and disbursements were not included.

Sections 67.010 to 67.040, RSMo, include provisions regarding annual budgets.

Recommendations

The Board of Directors:

5.1 Prepare annual budgets which contain all information required by state law.

Platte Valley TDD Response

The Platte Valley TDD Board of Directors provided the following written response:

5.1 The District will, with respect to all future budgets, timely approve its annual budget and include in each annual budget, all information required by Missouri law.

6. Raytown Highway 350 TDD

The Raytown Highway 350 TDD was organized in May 2007 by a petition filed by the property owners and is located in Raytown. The original Board of Directors and officers included three representatives from the City of Raytown, and two members of the Raytown Consolidated School District No. 2, or the original property owners within the district. The Raytown Consolidated School District sold their property within the district and are no longer authorized to appoint members to the district board. The current Board of Directors and officers are employees of the City of Raytown. The qualified voters of the district are the property owners within the district. The district has a fiscal year end of October 31 and did not have independent audits performed during the 3 years ended October 31, 2009. MoDOT had jurisdiction over this project, and the City of Raytown was the LTA.

During our audit work related to this TDD, we noted the following:

6.1 Prevailing wages

The district did not adequately monitor the provisions of the contract with the City of Raytown regarding contractor compliance with prevailing wage laws as required by its contract with MoDOT. At our request, the district requested the City of Raytown provide an affidavit from the contractor indicating it had complied with prevailing wages.

The district entered into a Cooperative Agreement with the City of Raytown that outlines the district serves only as a funding source for repayment of the TDD portion of the TIF bonds and relied on the City of Raytown to monitor payment of prevailing wages; however, the district entered into a cooperative agreement with MoDOT which requires the district and its sub-contractors to pay or provide for the payment of the prevailing hourly rate of wages for each craft or type of worker required to complete the district projects.

The district should maintain documentation to provide evidence of compliance of prevailing wages paid to workers on district projects to meet the requirements of the agreement with MoDOT. In addition, Sections 290.210 to 290.340, RSMo, include provisions regarding prevailing wages.

6.2 Budgets

The 2010 budget was not approved timely. The district began collecting sales taxes in December 2009; however, the 2010 budget was not approved until May 2010, 7 months into the operating year.

Sections 67.010 to 67.040, RSMo, include provisions regarding annual budgets.

6.3 Competitive bidding

The district did not ensure the contractors selected by the City of Raytown for the district project were selected through a competitive bid process as required by its contract with MoDOT. The district indicated it entered into a cooperative agreement with the City of Raytown and it was the city's responsibility to ensure compliance with all applicable laws, including competitive bidding. After our inquiry regarding competitive bidding, the district provided an affidavit from the developer which listed the names of six companies which provided bids for the construction of district projects. Although the city performed the contracting, TDD monies are to repay a portion of the TIF bonds and the district has a statutory obligation to ensure procurement of the contractor or subcontractor has been a competitive process.

Section 238.252, RSMo, requires all construction contracts in excess of $5,000 involving a TDD and a private contractor be competitively bid and awarded to the lowest and best bidder. In addition, the cooperative agreement with MoDOT requires the district or its contractor to solicit competitive bids.

6.4 Meetings

The district failed to hold annual meetings. The Board met in May 2007, and the next meeting was in April 2010. The developer was to appoint three members to the board; however, the developer did not appoint board members, and therefore, city employees were appointed to the original board. The city appointed board members resigned from the board and the developer did not submit the names of potential board members for appointment, therefore, the board did not meet.

Article V, Section 2 of the district by-laws requires the district hold an annual meeting to appoint officers of the district. Holding meetings at least annually would meet the requirements of the by-laws and allow the district to conduct necessary business, such as adopting annual budgets.

Recommendations

The Board of Directors:

6.1 Ensure adequate supporting documentation is submitted to substantiate prevailing wages are paid on construction projects as required by law.

6.2 Prepare annual budgets which contain all information required by state law.

6.3 Ensure bids are solicited for all applicable purchases in accordance with state law and sufficient documentation is maintained.

6.4 Conduct a meeting at least once per year.

Raytown Highway 350 TDD Response

The Raytown Highway 350 TDD Board of Directors provided the following written response:

6.1 The District and the Missouri Highway and Transportation Commission (the "MHTC") entered into a Cooperative Agreement (the "MHTC Agreement") on July 24, 2007. Section 4.1 of the MHTC Agreement provides that the District may cause to be executed with the City of Raytown ("the City") a construction contract with a contractor to construct the improvements that are funded, in part, with District revenues. The District did not enter into a contract directly with the contractor that constructed the District projects and did not pay wages directly, but instead entered into a Cooperative Agreement with the City (May 23, 2007) ("the City Agreement"). Section 4.1 of the City Agreement provides that the District's sole role is to fund and assist in the funding of the District projects, and all construction shall occur by or at the direction of the City or MHTC. MHTC, with respect to improvements in state right-of-way, and the City, with respect to all other improvements, had the obligation to monitor the contractor to ensure compliance with prevailing wage laws.

6.2 The District was formed and held its first meeting in 2007. The District was formed on the initiative of the City several years before construction of the retail project within the District area to facilitate bond financing by the City. After the first District meeting occurred in 2007, the District did not begin generating sales tax revenue until the fourth quarter of 2009. During the time from 2007 through the fourth quarter of 2009, three of the five members of the District Board of Directors (the "District Board") moved out of the area and were no longer associated with this project, and the terms of the other two members expired. The District did not receive the names of eligible candidates, and was not able to hold an election

of the property owner to repopulate the District Board, until May 2010. Immediately after the May 2010 election, the new members of the District Board held a meeting to take all necessary annual actions, including approval of the annual budget.

6.3 Section 3.3(D) of the MHTC Agreement provides that the District may cause certain actions, including competitive bidding for the District projects, to be taken by other parties. Section 4.1 of the City Agreement provides that MHTC, with respect to improvements in state rights-of-way, or the City, with respect to all other improvements, had the obligation to ensure that competitive bidding occurred for the District projects. The affidavit of the contractor, as supplied to the District by the City, identifies six companies that bid for the construction of the District projects.

6.4 During fiscal years 2008 and 2009, the District did not conduct any business and it did not collect any revenue. The District Board did not meet during fiscal years 2008 or 2009 because there was no business to discuss, no actions to consider, no revenue to expend, and no items that could have been placed on an agenda.

Auditor's Comment

6.4 During the 2 year period the TDD Board did not meet, the project the TDD was formed to construct was in progress. Whether revenues were collected or not, the Board should have met, not only to meet the requirements of the by-laws, but also to monitor construction activity, such as meeting state law requirements for bidding of the project and prevailing wage laws.

7. The Market at McKnight I TDD

The Market at McKnight I TDD was organized in May 2007 by a petition filed by the property owners/developer and is located in Rock Hill. The Board of Directors and officers includes four representatives of the developer and two representatives of the City of Rock Hill. The qualified voters of the district are the property owners. The district has a fiscal year end of December 31 and did not have independent audits performed during the 3 years ended December 31, 2009. MoDOT had jurisdiction over this project, and the City of Rock Hill was the LTA.

During our audit work related to this TDD, we noted the following:

7.1 Prevailing wages

We requested the district to provide documentation to support compliance with prevailing wages, however the district did not respond to our request. Certified contractor payrolls reviewed by the district, or, at a minimum, an affidavit of compliance with prevailing wage laws from the contractor were not provided. We requested documentation of the prevailing wages; however, the district did not produce the documentation.

The District entered into a cooperative agreement with the MoDOT which requires the district and its sub-contractors to pay or provide for the payment of prevailing hourly rate of wages for each craft or type of worker required to complete district projects. The district should maintain documentation to provide evidence of compliance of prevailing wages paid to workers of district projects. Sections 290.210 to 290.340, RSMo, include provision regarding prevailing wages.

7.2 Competitive bidding

The district did not ensure contractors were selected through a competitive bid process. We requested documentation of the competitive bids for the procurement of the contractor; however, the district did not produce the documentation.

Section 238.252, RSMo, requires all construction contracts in excess of $5,000 involving a TDD and a private contractor be competitively bid and awarded to the lowest and best bidder. In addition, the cooperative agreement with MoDOT requires the district or its contractor to solicit competitive bids.

7.3 Engineer selection

The district did not document its selection of engineering services for the related transportation projects. The provider of engineering services was chosen based on the fact that the same engineer was used for the private portion of the project.

Sections 8.285 to 8.291, RSMo, provide guidance on the selection of engineering, architectural, and surveying services.

Recommendations

The Board of Directors:

7.1 Ensure adequate supporting documentation is submitted to substantiate prevailing wages are paid on construction projects, as required by state law.

7.2 Ensure bids are solicited for all applicable purchases in accordance with state law and sufficient documentation is maintained.

7.3 Comply with state law when procuring engineering services and document the evaluation and selection process.

The Market at McKnight I TDD Response

The Market at McKnight TDD's Board of Directors did not provide a response.

8. Euclid Buckingham TDD

The Euclid Buckingham TDD was organized in June 2007 by a petition filed by the property owner/developer and is located in St. Louis. The Board of Directors and officers include three members from the City of St. Louis,

one member of the contractor, and one outside director. The qualified voters of the district currently are the property owners/residents. The fiscal year end is December 31, and the district did not have independent audits performed during the 3 years ended December 31, 2009. The City of St. Louis was the LTA.

During our audit work related to this TDD, we noted the following:

8.1 Budgets

The district did not adopt a budget for fiscal year 2010, although the district sales tax was effective July 2010.

Sections 67.010 to 67.040, RSMo, include provisions regarding annual budgets.

Recommendation

The Board of Directors:

8.1 Prepare annual budgets which contain all information required by state law.

Euclid Buckingham TDD Response

The Euclid Buckingham TDD's Board of Directors did not provide a response.

APPENDIX A

Transportation Development Districts

Information Regarding Establishment, Estimated Project Costs, and Anticipated Revenues of Transportation Development Districts

District Name	Date Established	Fiscal Year End	County	Municipality	Petition To Establish Was Filed By:	Number of Property Owners	Estimated Project Costs	TDD's Estimated Life	Total Anticipated Revenues	Sales Tax Rate (A)	TDD Within a TIF district?

Footnote legend

(A) In addition to sales tax, several districts authorized the following additional revenue sources: property taxes; special assessments; private hanger rental, fueling, airline agreement, rental car agreement, and other collateral service fees; and parking fees.

(B) The district has registered voters who approved establishment of the district.

(C) The TDD did not respond to our questionaire soliciting applicable information.

(D) Counties are Macon, Marion, Monroe, Ralls, and Shelby. Cities are the City of Clarence, City of Hannibal, City of Hunnewell, City of Macon, City of Monroe City, and City of Shelbina.

(E) Project costs/life of district/anticipated revenues included in information presented for Platte County Missouri South I.

(F) After this TDD was created, the developer found the proposed projects not to be feasible.

TIF - Tax Increment Financing - 50 percent of the sales tax collected is used for TIF projects unless an agreement specifies otherwise.

Source: Judgment and Order issued by the Circuit Courts, TDD survey questionnaires, and communication with district officials/representatives.

HEALTH AND SENIOR SERVICES

Monitoring of Long-Term Care Facilities and Handling of Complaint Investigations

December 2011

Report No. 2011-115

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of The Department of Health and Senior Services, Monitoring of Long-Term Care Facilities and Handling of Complaint Investigations

Background	The Department of Health and Senior Services (DHSS) licenses and inspects long-term care facilities and investigates complaints affecting the elderly and disabled. The Section for Long-term Care Regulation (SLCR) surveys and inspects certain facilities and investigates related complaints. The Central Registry Unit maintains the Elder Abuse and Neglect Hotline and receives reports of alleged abuse, neglect, or financial exploitation of eligible persons. The Bureau of Home and Community Services (HCS) provides services to eligible persons, oversees in-home service providers and investigates abuse complaints.
Surveys and Inspections of Long-Term Care Facilities	Sections 198.022 and 198.526, RSMo require the SLCR to conduct at least two inspections each year of all licensed facilities. The SLCR staff did not conduct 471 of the 1,132 (42%) statutorily-required interim or "second" inspections. The SLCR surveyors and inspectors did not always perform survey and inspection tasks within required timeframes. Similar conditions were noted in prior reports.
Complaint Investigations of Long-Term Care Facilities	The SLCR staff did not always conduct on-site complaint investigations within the applicable timeframe, promptly notify the reporter and/or the facility of the results, or accurately and promptly enter the investigation dates into the automated system. In addition, Region 7, which encompasses the city of St. Louis and the counties of St. Charles, St. Louis and Jefferson, is responsible for 32 percent of facility complaints and has historically had difficulty hiring and retaining staff. Similar conditions were noted in prior reports. The SLCR recently reassigned 30 facilities from Region 7 to Region 5 to reduce the Region 7 workload.
Performance Reviews	When the SLCR surveyors and federal surveyors reviewed the same 56 facilities, federal surveyors noted 317 more deficiencies than the SLCR surveyors. More training may be needed to ensure the SLCR surveyors are properly identifying and citing deficiencies. We noted a similar condition in our three previous audit reports. The SLCR's complaint investigations need improvement, and the SLCR does not routinely conduct performance evaluations of its surveyors using the Missouri On-Site Survey Evaluation Process, as required by state law and noted in our prior audit report.
Staffing at Nursing Facilities	Section 198.079, RSMo, requires the SLCR to establish reasonable standards and regulations related to the number and qualifications of nursing facilities staff, but the current Code of State Regulations does not set any objective standard for minimum staffing requirements at nursing facilities.
Alzheimer's Special Care Units	As noted in our prior audit report, the SLCR does not adequately verify the information contained in disclosure forms related to licensed Alzheimer special care units/programs, as required by state law.

Employee Disqualifications	The DHSS does not timely process substantiated complaints of abuse, neglect or misappropriation of property through the DHSS Employee Disqualification Listing (EDL). During the audited period, from the day a complaint was received, it took the DHSS an average of 507 days for HCS cases and an average of 260 days for SLCR cases to make an EDL placement decision. Moreover, at least three complaint investigations were misfiled, including one which was misplaced for over 2 years. Such delays expose facility residents to contact with potentially inappropriate individuals.
Home-Based Elderly and Disabled Adults Complaints	HCS caseworkers did not always timely investigate complaints, obtain supervisory approval for unmet timeframes, or correctly enter data into the case files and the computerized case management system.

In the areas audited, the overall performance of this entity was **Fair**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	Not applicable.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon
and
Margaret T. Donnelly, Director
Department of Health and Senior Services
Jefferson City, Missouri

We have audited certain operations of the Department of Health and Senior Services (DHSS) related to the monitoring of long-term care facilities and the handling of complaint investigations for the elderly and disabled adults in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the years ended June 30, 2010 and 2009. The objectives of our audit were to:

1. Evaluate the department's compliance with certain statutory and federal requirements regarding inspections and surveys of long-term care facilities.

2. Evaluate the department's compliance with certain statutory requirements regarding the investigation and processing of complaints affecting the elderly or disabled in long-term care facilities or receiving home and community services.

3. Evaluate the economy and efficiency of certain management practices and operations related to the monitoring of long-term care facilities and handling of complaints affecting the elderly and disabled.

Our audit determined the DHSS has not complied with certain requirements for the frequency of inspections and the timeliness of certain inspection tasks and has not adequately complied with certain other mandates. We determined the DHSS has not always complied with certain requirements for the timeliness of complaint investigation tasks. Additionally, the DHSS has not always timely investigated and reviewed cases requiring referral to the employee disqualification list.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Dennis Lockwood, CPA
In-Charge Auditor:	John Lieser, CPA
Audit Staff:	Ryan Redel, CFE, CIA
	Michelle Gresham, M.Acct.
	Jessica Jordan

Background

The Department of Health and Senior Services (DHSS) licenses and inspects long-term care facilities and investigates complaints affecting the elderly and disabled.

Organizational information

The DHSS serves as the central agency coordinating all programs relating to the lives of older Missourians. Its goals are to improve the quality of life, maintain personal dignity, and protect the basic rights of Missouri senior citizens. Its services include institutional programs, which safeguard residents in long-term care facilities; home and community care programs, which provide support for older persons who live in the community; and programs for immediate assistance to older persons and disabled individuals who encounter abuse, neglect, or exploitation. The DHSS promotes public awareness of the needs and abilities of elderly persons while maximizing independence for these older Missourians.

Section for Long-term Care Regulation

The Section for Long-term Care Regulation (SLCR), located organizationally under the DHSS Division of Regulation and Licensure, is responsible for conducting surveys of federally certified long-term care facilities; state inspections of other long-term care, residential care, and assisted living facilities; and investigating complaints regarding those facilities. The SLCR has seven regions across the state that are headquartered in Springfield, Poplar Bluff, Kansas City, Cameron, Macon, Jefferson City, and St. Louis. The SLCR works with the U.S. Department of Health and Human Services, Centers for Medicare and Medicaid Services (CMS) to determine Medicaid/Medicare certification of facilities. In addition, the section reviews and approves architectural plans for proposed long-term care facilities, provides data for certificate of need determinations, and develops and implements appropriate rules and regulations in accordance with the Omnibus Nursing Home Act.

Central Registry Unit

The Central Registry Unit (CRU), a unit within the DHSS Division of Senior and Disabilities Services (DSDS), maintains the Elder Abuse and Neglect Hotline and receives reports of alleged abuse, neglect, or financial exploitation of persons 60 years of age or older and other eligible adults between age 18 and 59 with substantial mental or physical impairment. The CRU was established pursuant to a state law which requires the department to maintain a central registry capable of receiving and maintaining reports received in a manner that facilitates rapid access and recall of the information reported, and of subsequent investigations and other relevant information.

Bureau of Home and Community Services

The Bureau of Home and Community Services (HCS), located within the DSDS, is responsible for services and programs directly administered by the DSDS involving eligible persons 60 years of age or older and adults with disabilities between the ages of 18 and 59. The HCS has five regions across the state that are headquartered in Springfield, Cape Girardeau, St. Louis,

Kansas City, and Columbia. Services such as personal care, homemaker, chore, nursing, respite, adult day health care, counseling, and consumer-directed services are made available to the elderly and persons with disabilities in their homes. When abuse complaints are reported, the HCS conducts investigations and provides necessary protective services. Generally, to be eligible for services, adults must meet specific guidelines pertaining to protective, economic, social, and care needs. Through a comprehensive investigative or assessment process, the HCS determines the intervention and/or services necessary to meet the needs of each eligible adult. The bureau is also charged with the oversight of in-home service providers, consumer-directed vendors, counseling providers, and residential care facility personal-care providers who deliver services to clients/consumers of the DSDS.

SLCR surveys, inspections, and complaint investigations

Under federal regulations and state statute, the SLCR is responsible for conducting federal surveys and state inspections on all licensed long-term care facilities in the state and investigating complaints related to those facilities for compliance with federal and state health and safety standards. Compliance with those standards is necessary for facilities to be certified to participate in Medicare and Medicaid programs and licensed to operate in the state. The facilities are licensed according to the level of care provided to residents. Nursing facilities provide long-term care for elderly persons requiring the most intensive care needs. The numbers of long-term care facilities by type at June 30, 2010, were as follows:

Type	Number
Skilled nursing	497
Intermediate care	32
Residential care	435
Assisted living	168
Total	1,132

All of these facilities are required by state law to be licensed by the SLCR to operate in the state and must comply with state regulations regarding resident care and safety. Additionally, about 500 of the nursing facilities and intermediate care facilities are certified by the CMS to participate in the Medicare and/or Medicaid programs and must comply with federal regulations related to resident care and safety.

Surveys and inspections

The SLCR is required by Section 198.022, RSMo, to conduct at least two inspections annually of all licensed facilities and by the Social Security Act to conduct a survey of all certified facilities at intervals of no longer than 15 months. One of these required inspections is designated the annual or "full" inspection, which determines whether the facility is in compliance with all state licensing and provision of care requirements. The "interim" inspection (also known as the second inspection) is an abbreviated inspection that

focuses on certain quality of care issues. Section 198.526, RSMo, allows the SLCR to perform only one inspection annually for those facilities found to be in substantial compliance with requirements based on previous inspections and complaint investigations. For certified facilities, the SLCR conducts the survey and state inspection simultaneously. The SLCR reported 999 surveys and full inspections were performed at certified facilities, 1,261 full inspections were conducted at facilities that are not certified, and 1,510 interim inspections were performed for all facility types during state fiscal years 2010 and 2009. The SLCR reported 279 interim inspections were not performed, as allowed by statute, during the 2 year period because the facility was determined to be in substantial compliance with licensing and operational requirements. The SLCR also reported interim inspections, although required, were not conducted at 471 facilities in fiscal year 2010.

Inspection and survey procedures are outlined in the SLCR Administrative Policy and Procedures manual and the State Operations Manual (SOM), developed by the CMS for use by the states in certifying facilities for participation in the Medicare and Medicaid programs. SLCR policies and the SOM require inspection and survey tasks be completed within designated timeframes as follows:

- Statement of deficiencies: SLCR surveyors/inspectors record noted facility non-compliance with state and/or federal resident care and safety requirements on a statement of deficiencies (SOD) and provide the SOD to the facility. Deficiencies are classified based on the scope and severity of the violation using federal and state classification systems. Except for the most serious violations, which require immediate notification and correction, the SLCR must provide the SOD to the facility within 10 working days of the exit conference at which problems noted during the survey or inspection are discussed. For survey revisits, the SOD must be completed within 70 days of the initial survey exit.

- Plan of corrections: Facilities are required to prepare a written plan of corrections (POC) to each cited deficiency on the SOD and provide the POC to the SLCR within 10 calendar days or 10 working days of delivery of the SOD for the survey or inspection, respectively. The SLCR must evaluate the POC and notify the facility whether the POC is acceptable or requires amendment within 10 calendar days or 10 working days of receipt of the POC for surveys or inspections, respectively.

- Revisit: After the POC is accepted, the SLCR determines whether a revisit is needed to ensure the facility has achieved compliance. The SLCR considers the nature and severity of the deficiencies in making

this determination. If a revisit is necessary, it must be conducted within 60 calendar days of the survey exit or, for inspections, within 90 calendar days of the inspection exit except for minor violations where 120 calendar days is allowed.

- Inspection documentation: In addition to the SOD and the POC, the surveys and inspections are documented on various forms, letters, and notes and this documentation constitutes the inspection packets. The documentation is completed and reviewed at the regional offices and required information is entered into the federal survey system. The packets are then provided to the central office for review, additional data entry into the federal system, scanning, and filing. For federal surveys, an initial survey packet is to be completed within 40 calendar days of the survey exit and the final packet completed within 30 days of the final survey action. For inspections, the inspection packet is to be completed within 30 days of final inspection action.

Complaint investigations

The SLCR investigates complaints about long-term care facilities. Complaints about long-term care facilities made to the Elder Abuse and Neglect Hotline are forwarded by the CRU to the section for investigation. In accordance with SLCR policy, all complaint investigations are to be initiated by contacting the reporter, if known, within 24 hours. After discussion with the reporter and review of all applicable information, the surveyor will prioritize the complaint into one of seven categories based on severity. The complaint descriptions for the three most serious complaint categories, as well as SLCR policy timeframes for conducting the initial on-site visits and exiting or finishing the on-site investigation, are as follows:

- Priority A: These complaints contain allegations of immediate jeopardy and SLCR policy requires the on-site visit be conducted within 24 hours and the investigation exited within 30 calendar days of complaint receipt.

- Priority B: These complaints contain allegations of actual harm that do not indicate ongoing immediate jeopardy and SLCR policy requires the on-site visit be conducted within 10 working days and the investigation exited within 45 calendar days of complaint receipt.

- Priority C: These complaints contain other allegations of resident harm that do not rise to the level of A or B and SLCR policy requires the on-site visit be conducted within 30 calendar days and the investigation exited within 90 calendar days of complaint receipt.

Complaint investigation procedures are outlined in SLCR policy and the SOM. During fiscal years 2010 and 2009, 13,595 complaints about facilities were received as summarized below.

	Year Ended June 30,	
Priority	2010	2009
A	378	501
B	2,882	3,181
C	2,318	2,519
Others	939	877
Total	6,517	7,078

External and internal oversight

The CMS and the SLCR Quality Assurance Unit (QAU) perform various oversight functions of surveys/inspections and complaint investigations.

The CMS establishes performance standards for determining the adequacy of the SLCR survey performance. The CMS gathers data to measure these standards by reviewing data related to the timing of surveys and complaint investigations and by testing complaints and surveys. Annually, the CMS tests 40 complaint investigations for propriety and 5 percent of surveys for federal validation. Federal validation of surveys is done through: (a) comparative surveys, in which a CMS team conducts an independent survey within 60 days of the state survey (to compare results), and (b) observational surveys, in which a CMS team accompanies the state team to observe the process of the state team. The SLCR is required to implement corrective measures for inadequate performance.

The QAU performed reviews of the propriety of complaint investigation and SODs. The QAU reviewed the documentation for 91 complaint investigations in 2009 and 121 complaint investigations in 2010 for proper investigative procedures and documentation. During the year ended June 30, 2010, the QAU reviewed 77 SODs arising from inspections and surveys for proper content, clarity, and accuracy.

HCS complaint investigations

The HCS is responsible for recording and investigating complaints regarding reported adults made to the Elder Abuse and Neglect Hotline maintained by the CRU. Reported adults are persons aged 60 or over and adults age 18 to 59 with disabilities. The HCS investigates to determine if protective services are needed for the reported adult. Upon receipt, the CRU classifies the reports into three classes based on the severity of the alleged risk to the reported adult and the classification dictates the required promptness of the investigation. Class I reports are allegations that, if true, present either an imminent danger to the health, safety or welfare of a reported adult or a substantial probability that death or serious physical harm will result. Class II reports contain allegations of some form of abuse, neglect or exploitation but do not allege or imply a substantial probability of immediate harm or danger. Class III reports are those for which HCS protective service involvement is not required or which contain vague information insufficient to make a determination of risk. After classification, the reports are sent to one of the HCS regions for investigation. The HCS

Protective Service manual requires the caseworker make an initial visit to the reported adult within 24 hours for class I reports. For class II reports, the caseworker must initiate the investigation within 48 hours by contacting the reporter and make an initial visit to the reported adult within 7 days. Class III reports require no investigation. The HCS manual requires the class I and II investigations be closed within 90 days and supervisor approval obtained when the policy timeframes cannot be accomplished. Reports received requiring investigation during the years ended June 30, 2010 and 2009, were as follows:

	Year ended June 30,	
Class	2010	2009
I	2,922	2,842
II	20,279	18,954
Total	23,201	21,796

Complaints referred for EDL determination

Various sections of state law require the department to maintain an Employee Disqualification List (EDL). The EDL includes the names of persons who have been finally determined by the DHSS, pursuant to Section 660.315, RSMo, to have recklessly, knowingly, or purposely abused or neglected, or to have misappropriated any property or funds, of a long-term care facility resident or in-home services client. Long-term care facilities and in-home services providers are prohibited from employing any person whose name appears on the EDL. In most instances, the EDL review process begins with a complaint made to the CRU hotline which is then investigated by SLCR or HCS regional staff depending on whether the complaint relates to a long-term care facility or in-home service provider, respectively. For substantiated cases of abuse, neglect, or misappropriation of property, the regional staff label the cases for EDL referral and send them to the central office (CO) staff of the SLCR and the HCS for review. If the CO staff determine a case should be considered further for EDL referral, it is forwarded for legal review to determine whether individuals should be placed on the EDL and for what length of time. If the person to be added to the EDL challenges the allegation, he/she may request a hearing with the department. In addition, persons placed on the EDL following the hearing shall have the right to seek judicial review as provided under Chapter 536, RSMo. SLCR policy requires regional staff submit the file to CO within 30 days of the last investigative action. HCS policy requires regional staff complete all complaint investigations within 90 days of complaint receipt.

During the 2 years ended June 30, 2010, 886 EDL cases were reviewed by CO staff of the HCS and the SLCR and 571 EDL cases were further reviewed by DHSS legal staff.

SLCR and HCS workload and staffing

Both SLCR and HCS officials cited the need for additional staffing to meet the statutory requirements for the frequency of inspections and the timeliness of complaint investigations. DHSS officials indicated staff reductions and difficulty in attracting and retaining staff impacted their ability to complete statutory mandates and policy goals including performance of interim inspections at SLCR licensed facilities, and completion of both SLCR and HCS complaint investigations within established timeframes. As a result, DHSS officials indicated it has been necessary to prioritize assignments and the timeliness and the ability to address lower priority work has suffered.

SLCR staffing and workload

SLCR officials indicated, following the significant increase in inspector and surveyor staff in state fiscal year 2008, the SLCR was able to meet the workload. However, officials indicated the SLCR experienced a significant increase in the number of complaints in 2009 while also experiencing problems with attracting and retaining qualified inspectors and surveyors. In early 2010, SLCR officials determined they would be unable to accomplish all required tasks. Licensed facilities, complaint investigations, and, actual and budgeted full time equivalent (FTE) surveyors/inspectors were as follows:

	Year Ended June 30,				
	2010	2009	2008	2007	2006
Licensed facilities	1,132	1,128	1,149	1,149	1,168
Complaints	6,516	7,078	6,531	6,479	5,868
FTE Actual	202	204	202	176	166
FTE Budgeted	225	229	233	249	196

The SLCR policy for prioritizing the scheduling assignments, when necessary, is as follows:

Priority	Assignment
1	Priority A complaint investigations
2	Priority B complaint investigations
3	Recertification surveys
4	Full inspections
5	Revisits and follow-up surveys
6	Priority C complaint investigations
7	Complaints about unlicensed facilities
8	New facility licensure inspections
9	Initial certification surveys
10	Other complaint investigations and second inspections

HCS staffing and workload

A HCS study, reported in the fiscal year 2010 departmental budget request of the DHSS, determined its staff workloads for fiscal year 2010 would exceed caseload standards and projected a staffing deficit of about 115 staff to accomplish its workload. HCS investigations were as follows:

	Year Ended June 30,				
	2010	2009	2008	2007	2006
Total investigations	23,201	21,796	19,442	17,879	16,045

The HCS requested additional staffing for the fiscal year ended June 30, 2010, that was not funded. However, beginning in fiscal year 2011, the General Assembly addressed the staffing deficit by authorizing the department to contract for assessment services which the DHSS estimated would reduce total staff workload by 33 percent.

Scope and Methodology

Our methodology included the following procedures:

- Reviewing written policies and procedures and relevant statutes and regulations.
- Interviewing various personnel of the SLCR, the CRU, and the HCS.
- Reviewing the survey and/or inspection files for a sample of 60 surveys and/or full inspections (27 federally certified facilities and 33 state licensed only facilities).
- Reviewing the complaint investigation files for a sample of 60 priority A, B, and C complaints investigated by the SLCR.
- Reviewing the complaint investigation files for a sample of 60 class I and II complaints investigated by the HCS.
- Reviewing the EDL-referral files for 11 complaints that were referred by the HCS and the SLCR for consideration for addition to the EDL.
- Reviewing databases provided by the SLCR of complaint investigations and surveys and inspections.
- Reviewing databases provided by the HCS of complaint investigations.
- Reviewing databases provided by the DHSS of complaints referred for EDL consideration by the HCS and SLCR regional offices.
- Reviewing databases provided by the SLCR of deficiencies cited during inspections and complaint investigations.

- Reviewing the results of monitoring, oversight, and testing of SLCR surveys and complaint investigations by the CMS.

- Reviewing the results of QAU reviews of the SLCR complaint investigations and SODs.

- Reviewing other pertinent documents as necessary.

The audit focused on current procedures, procedures during the years ended June 30, 2010 and 2009, and investigations of complaints and inspections and surveys of long-term care facilities during the years ended June 30, 2010 and 2009.

1. Surveys and Inspections of Long-term Care Facilities

The Section for Long-term Care Regulation (SLCR) did not inspect some long-term care facilities when required. Additionally, the SLCR surveyors and inspectors did not always perform survey and inspection tasks within the required timeframes.

1.1 Frequency of inspections

During the year ended June 30, 2010, the SLCR did not perform 471 of 1,132 (42 percent) second inspections of facilities as required by Section 198.526, RSMo. DHSS officials indicated the SLCR did not perform these second inspections due to staff vacancies; difficulties in attracting and retaining qualified candidates; and the significant training and oversight required for new employees before they are fully functional. The SLCR, based upon its established priorities, began performing second inspections only in conjunction with complaint investigations, and as result, 471 facilities did not receive a second inspection. Sixty-one facilities that did not receive a second inspection had a recent history of substantiated Class I violations and state and federal sanctions, such as denial of payment for new admissions and civil monetary penalties. The following table reports the number of facilities by type that did not receive a required second inspection in fiscal year 2010:

Facility Type	Number
Skilled nursing	151
Intermediate care	11
Residential care	221
Assisted living	88
Total	471

Frequent inspections of long-term care facilities are needed to ensure the facilities are in compliance with resident health and safety requirements. The Department of Health and Senior Services (DHSS) should analyze utilization of current staff resources and present options to the legislature regarding responsibilities currently required by state law.

1.2 Untimely survey and inspection tasks

The SLCR has not always completed survey and inspection tasks within the required policy timeframes.

Statements of deficiencies (SODs)

The survey/inspection team did not always prepare SODs within policy timeframes. SLCR policies require SODs be provided to the facility within 10 working days of the survey/inspection exit and for survey revisits within 70 calendar days of the survey exit. Of the 60 surveys and inspections we tested, 48 surveys and inspections resulted in the preparation of an SOD. Of those SODs, 4 SODs (or 8 percent) were sent to the facility from 1 to 6 working days after the expiration of the policy timeframe.

Plans of correction (POC)

Facility POCs were not always timely accepted or rejected by the SLCR. SLCR policies require the surveyors/inspectors notify the facility within 10 calendar days (for surveys) and 10 working days (for inspections) whether the POC has been accepted or rejected. Of 48 surveys and inspections that resulted in SODs, SLCR surveyors/inspectors exceeded the policy timeframes for accepting or rejecting the POC for 8 (17 percent). In these cases, the surveyors/inspectors exceeded the policy timeframes from 1 to 5 calendar days. In one of these cases, the surveyor/inspector rejected the POC and required the facility develop an amended plan.

Revisits

SLCR surveyors/inspectors did not always conduct timely revisits of facilities to ensure corrective measures were taken in response to a SOD or did not always make timely decisions about the need for a revisit. SLCR policies require revisits be performed within 60 days of survey exits and 90 days of inspection exits (or 120 days for minor violations). We tested 44 cases where SLCR policy would require a revisit be considered. The surveyor/inspector exceeded the policy timeframe for conducting the revisit or determining a revisit was not needed by 2 to 10 calendar days in 5 of the 44 (11 percent) surveys or inspections tested. In one of these revisits, the surveyor/inspector found the facility was still not in compliance with requirements and a subsequent SOD and POC were required.

Survey/inspection packets

Staff in the regional offices did not always submit survey/inspection packets to the central office within the policy timeframes. SLCR policies require initial survey packets be completed within 40 days of the survey exit and the final survey packet be completed within 30 days of the final survey action. SLCR policies require inspection packets be completed within 30 days of the final inspection action. Of 60 survey/inspections tested, 19 packets (32 percent) were not submitted within policy timeframes. Exceptions ranged from 4 days to 142 days late.

Impact of untimely tasks

Monitoring activities of the regional offices and central office have not been sufficient to ensure compliance with established survey/inspection timeframes. A SLCR official indicated the regional offices and central office have monitoring systems to track the timely completion of tasks. For example, central office staff produce weekly reports of pending revisits for certified facilities and monthly reports of pending survey/inspection packets and notify the regional offices of revisits or packets due. However, audit results indicate additional efforts are needed to comply with policy timeframes. The SLCR attributes noncompliance to staffing and workload issues in the regions. The completion of the SODs, review of the POCs, and performance of the revisits have effects on the timing of the completion of corrective actions by the facilities, and the timeliness of these tasks is important to ensure proper resident care and safety.

Similar conditions previously reported

Similar conditions were noted in previous reports.

Recommendations

The Department of Health and Senior Services:

1.1 Conduct inspections as required by law. In addition, the DHSS should analyze utilization of current staff resources and present options to the legislature regarding responsibilities currently required by state law.

1.2 Complete survey and inspection tasks within the policy timeframes.

Auditee's Response

1.1 DHSS concurs with this recommendation. DHSS' Scheduling of Assignments policy (#101.00) is used to set work priorities. Priority is given to investigation of complaints involving allegations of immediate jeopardy or significant harm and annual or full inspections. Second inspections are a lower priority on the list of required assignments. It should be noted that every facility received a full inspection in both fiscal years 2009 and 2010. Beginning in Fiscal Year 2012, DHSS has given increased priority to conducting second inspections in those facilities with Class I or Uncorrected Class II deficiencies within the past two fiscal years. DHSS will continue to analyze utilization of staff resources.

1.2 DHSS concurs with this recommendation:

- *Statements of Deficiencies (SOD) - DHSS makes every attempt to prepare SODs within policy timeframes. In rare circumstances, DHSS exceeds the required timeframe in order to ensure the SOD is a comprehensive, complete, defendable document.*
- *Plans of Correction (POC) - DHSS strives to ensure all POCs are accepted within the required timeframes. DHSS will consider revising the POC policy to reflect ten working days to accept/reject the POC to be consistent across facility types.*
- *Revisits - It should be noted that the revisit that resulted in additional deficiencies was started within required timeframes, but due to complaints received after the start of the revisit, DHSS was unable to complete the revisit and investigate the complaints within required timeframes.*
- *Survey/Inspection Packets - DHSS revised the survey/inspection packet policy in June 2010. Rather than submitting the entire survey/inspection packets to the central office, the regional offices now submit a smaller set of forms. This change resulted in quicker processing times and reduced postage costs. The regional offices*

retain the full survey/inspection packets. DHSS will consider revising the survey/inspection packet policy to be consistent with CMS Performance Standard requirements that require information to be entered in the federal system within 70 calendar days of the exit conference.

2. Complaint Investigations of Long-term Care Facilities

SLCR staff did not always conduct on-site complaint investigations within policy timeframes, promptly notify the reporter and/or facility of the investigation results, or enter investigation dates accurately and promptly in the Automated Survey Processing Environment (ASPEN) Complaint Tracking System (ACTS). Additionally, the SLCR has not fully addressed staffing and workload disparities in its regions.

2.1 Untimely complaint investigation tasks

The SLCR has not always completed complaint investigation tasks within the required policy timeframes.

On-site investigations

The SLCR surveyor/inspector did not always begin the on-site investigation within policy timeframes. The policy requires onsite investigations to be started within 24 hours, 10 days, and 30 days for priority A, B, and C complaints, respectively.

Based on data on the ACTS, the computerized system used by the SLCR for recording complaint investigations, on-site investigations were not always initiated within policy timeframes for priority A, B, and C complaints received during the 2 years ended June 30, 2010, as follows:

Complaint priority	Total investigations	Untimely on-site investigations	Error rate
A	879	1	0.0%
B	6,063	475	7.8%
C	4,837	1,429	29.5%

Notifications of results

The SLCR surveyor/inspector did not always notify the reporter or facility of the complaint investigation results within policy timeframes. SLCR policy requires the reporter, if an address is known, and the facility, when no deficiencies are found, be notified of the complaint investigation results within 14 calendar days of the exit. The following was noted during our test of 60 complaints:

- The letter to the reporter was untimely in 9 of 29 (31 percent) complaints for which a letter to the reporter was required, with exceptions ranging from 1 to 58 days late.

- When no deficiencies were found, the letter to the facility was untimely for 16 of 49 (33 percent) complaints with exceptions ranging from 1 to 266 days late.

By not sending out the required notification timely, the reporter and facility remain unaware of the official outcome of the investigation. A SLCR official indicated these problems were due to workload issues.

The SLCR should strive to meet the investigative timeframes to ensure residents are safe from harm, deficiencies are promptly identified and corrected, and the reporter is promptly notified of the investigation results. Delayed initiation can make it more difficult to determine whether an incident or violation actually occurred. Also, any delay in the initiation of the on-site investigation would delay the communication of deficiencies to the facility and therefore delay needed corrective action by the facility.

2.2 Reports to monitor timeliness

The effectiveness of SLCR reports to monitor timeliness of tasks have been reduced due to incorrect dates and untimely entry of data. From the ACTS data, weekly reports of incomplete complaint investigations are produced for review by the regional supervisors and the SLCR Quality Assurance Unit (QAU) and year-end reports of the timeliness of on-site investigations are produced for review by the U.S. Department of Health and Human Services, Centers for Medicare and Medicaid Services (CMS) and the QAU.

Incorrect entries

The date of commencement of the on-site complaint investigation was sometimes incorrectly recorded on the ACTS. For priority A, B, and C complaints received during the 2 years ended June 30, 2010, the ACTS data included about 1,400 records (12 percent of the population) for which the starting date of the complaint investigation was earlier than the date the complaint was received. A SLCR official indicated this occurs when a complaint is received that relates to an earlier complaint with an ongoing investigation. However, due to this practice, the SLCR is unable to determine whether complaint investigations were initiated within policy timeframes. Additionally, for 3 of 60 complaints tested, the on-site investigation date was incorrectly recorded on the ACTS due to data input errors, according to a SLCR official.

Staff in the regional offices enter the on-site date based on the investigation documentation prepared by the surveyor. A SLCR official indicated that ACTS data is periodically verified to the complaint investigation documentation by central office staff. Our review indicates these actions have not effectively eliminated the on-site date errors. Incorrect on-site dates make the ACTS data less useful as a tool for monitoring the timeliness of complaint investigations. The SLCR should review the ACTS for correct on-site dates and make appropriate corrections.

Untimely entries

Some information related to complaint investigations was not promptly entered into the ACTS. According to ACTS data as of June 30, 2010, 171 complaints had no recorded investigation start date despite the deadline for the initiation of the complaint investigation having passed. Of these, 165 complaints originated within Region 7.

We also noted 125 complaints where the time frame for the exit of the investigation had been exceeded; 118 of these complaints, or 94 percent, were for Region 7. A SLCR official told us an exit had already occurred for 8 of these complaints, ranging from about 1 month to about 6 months prior, but the investigation results and completion had not yet been entered into the ACTS. According to SLCR officials, the delays pertain to unsubstantiated complaints with no SODs and documenting the results of these investigations is given lower priority than investigating new complaints and reporting deficiencies resulting from complaint investigations. SLCR officials also indicated staff workload, especially in Region 7, has caused the untimely entries. Due to these staff workload issues, the QAU assisted Region 7 with data entry on complaint investigations for much of 2009. In addition, the section instituted new requirements for regional supervisory staff to review the ACTS data weekly for incomplete or missing information. It appears the new requirements have significantly reduced the amount of incomplete or missing information, except in Region 7.

For SLCR management and other supervisory officials to have up-to-date information to monitor the status of complaint investigations, all actions and supporting information related to investigations should be entered in the ACTS system on a timely basis.

2.3 Region 7 staffing and workload

According to a SLCR official, the section has historically had difficulty hiring and retaining staff for Region 7. Region 7 is responsible for the city of St. Louis and the counties of St. Charles, St. Louis, and Jefferson. This region was responsible for about 20 percent of total licensed facilities and about 19 percent of SLCR staff were assigned to the regional office. However, during the years ended June 30, 2010 and 2009, about 32 percent of facility complaints pertained to Region 7 facilities.

SLCR staff from other regions and central office have assisted Region 7 with its workload in recent years. To reduce the Region 7 workload, effective July 1, 2011, the SLCR reassigned 30 facilities in St. Charles County to Region 5. The SLCR official indicated further regional changes may also be made. The SLCR should review the staffing and workload of the regional offices and consider further realignments to enhance the efficiency and effectiveness of regional staff and ensure uniformity in workload and timely completion of complaint investigation tasks.

Similar conditions previously reported

Similar conditions were noted in previous reports.

Recommendations

The Department of Health and Senior Services:

2.1 Conduct complaint investigation tasks within policy timeframes.

2.2 Ensure the ACTS contains accurate on-site dates and timely data on investigation results.

2.3 Review regional workloads and staffing and make changes to enhance efficiency and effectiveness and more uniformly distribute workload.

Auditee's Response

2.1 DHSS concurs with this recommendation. It should be noted that the vast majority of time frames not met involved priority C complaints, which do not involve allegations of immediate jeopardy or significant harm. DHSS gives priority to complaints alleging immediate jeopardy or significant harm.

2.2 DHSS concurs with this recommendation. A variety of reports are utilized to identify inaccurate data entry and correct errors. DHSS conducts annual statewide regional complaint training for staff. The training conducted during the summer of 2011 addressed timely and accurate data entry. DHSS will continue working with staff to enter required data in the ACTs database promptly and accurately.

2.3 DHSS concurs with this recommendation. Effective July 1, 2011, St. Charles County was transferred from the St. Louis region to the Macon region to reduce workload disparities in the St. Louis region. DHSS will continue to evaluate workload levels of each region and make workload and/or staffing adjustments as appropriate.

3. Performance Reviews

SLCR surveyors cited fewer deficiencies than federal surveyors during comparative surveys and concerns were noted by the CMS and QAU during reviews of SLCR complaint investigations. The SLCR does not routinely prepare performance evaluations of its survey employees pursuant to the Missouri On-site Survey Evaluation Process (MOSEP), as required by state law.

Federal comparative surveys

The CMS conducted 48 comparative surveys for life safety regulation compliance and 8 comparative surveys for health care regulation compliance during the 2 years ended June 30, 2010. Federal surveyors cited more deficiencies in their survey of the 56 facilities than the SLCR staff cited in surveys of the same facilities. The federal surveyors noted 317

deficiencies (292 during life safety code comparative surveys and 25 during health care comparative surveys) that were not cited by the SLCR surveyors. According to the CMS surveyors, most of the 317 deficiencies should have been cited by the SLCR surveyors based on the evidence that was or should have been available at the time of the SLCR survey. The different results in the surveys conducted by the federal surveyors and SLCR surveyors could be partially due to changed conditions between the two survey dates and different resident samples chosen during the two surveys. The SLCR provided individual and group training sessions to surveyors related to the comparative survey results. However, the results suggest more training may be needed for SLCR staff to ensure SLCR surveyors are properly identifying and citing deficiencies.

A similar condition was noted in our three previous audit reports.

Complaint investigations

The QAU and the CMS have noted concerns with the quality of the SLCR complaint investigations. Reviews of complaint investigations performed separately by the QAU and the CMS both indicated that, based on the investigation documentation, resident samples were sometimes too small and observations, record reviews, and interviews related to resident samples were sometimes not relevant to adequately determine the facility's compliance with requirements pertaining to the complaint allegations. The SLCR responded to the review results with individual and group training and subsequent review results seem to have improved for the reviews conducted during the 2 years ended June 30, 2010. However, the recent results suggest that further training is needed to ensure complaint investigations are conducted and documented properly.

Missouri On-site Survey Evaluation Process

The SLCR does not routinely prepare performance evaluations of its survey employees pursuant to the Missouri On-site Survey Evaluation Process (MOSEP), as required by state law.

Legislation passed in 1999 established the MOSEP to identify education and training needs for state surveyors and to ensure the uniform application of regulation standards in long-term care facilities throughout the state. Section 198.527, RSMo, requires the department to periodically evaluate its surveyors regionally and statewide to identify any deviations or inconsistencies in regulation application, and based on this evaluation, develop and implement additional training and knowledge standards. MOSEP evaluations are to include an on-site observation of employees performing survey tasks and consider overturned informal disputes. A SLCR official indicated that all surveyors are evaluated annually and on-site evaluations are sometimes performed and used in the annual evaluations. In addition, the SLCR indicated, that due to staffing limitations, it has not been able to conduct regional and statewide analysis of surveyor evaluation

results to identify education and training needs that could result in more uniform application of state regulation standards.

This condition was also noted in our prior audit report.

Recommendation

The Department of Health and Senior Services continue to evaluate the results of comparative surveys and reviews of complaint investigations in designing future staff training. In addition, the DHSS should complete the staff performance evaluations pursuant to the MOSEP program as required by state law.

Auditee's Response

DHSS partially concurs with this recommendation. As outlined in the audit report, DHSS has conducted individual and group training sessions related to the comparative survey results and complaint investigations. DHSS agrees the Missouri On-site Survey Evaluation Process (MOSEP) could be a useful education/training tool for its surveyors. However, DHSS utilizes other methods to evaluate staff that can be accomplished with existing resources. DHSS supervisors in each region monitor staff continually and conduct regular onsite reviews of each surveyor's performance. Annual employee performance appraisals are completed based on the monitoring of staff performance throughout the year.

It should be noted that the mandate associated with MOSEP was not funded when the requirement was enacted in 1999. Implementing MOSEP without additional state funding would require reassignment of staff from critical licensure, survey and complaint duties.

4. Staffing at Nursing Facilities

The SLCR has no minimum direct care or nursing staffing standard in place for nursing facilities. Section 198.079, RSMo, requires the SLCR to promulgate reasonable standards and regulations related to the number and qualifications of employees and contract personnel having responsibility for any service provided for residents in intermediate care and skilled nursing facilities. However, the current Code of State Regulations (CSR), 19 CSR 30-85.042 (37), only requires nursing facilities to employ nursing staff "in sufficient numbers and with sufficient qualifications" to meet resident needs. This is subjective and open to interpretation of the state surveyor staff. Prior to September 30, 1998, Missouri had minimum nursing staff requirements in place for a number of years. However, on that date, the minimum standards were rescinded from state regulations. According to a report issued in 2008[1], 42 states have some form of minimum direct care or nursing staff requirements exceeding the requirements in Missouri. The SLCR cited 17 nursing homes for inadequate staffing (deficiency tag number F-353) in fiscal year 2010. Three homes were cited twice during

[1] Harrington,C. *Nursing Home Staffing Standards in State Statutes and Regulations,* University of California, San Francisco, CA., January 2008

that period. Eighteen deficiencies were cited on the deficiencies matrix at levels D, E, or F (no actual harm), 1 was cited at level H (a pattern of actual harm), and 1 was cited at the most serious level, level L (a widespread pattern of actual harm). According to SLCR personnel, some facilities continue to bring in additional staff during inspections. This practice could temporarily hide or mask an understaffing problem, and may result in no staffing deficiency being cited and potential future negative resident outcomes.

We obtained staffing time information self-reported by nursing homes for the month of April 2011 from the CMS website[2]. That information included the number of nursing hours per resident day for the 2 weeks prior to the most recent survey for about 500 Missouri nursing homes. The CMS also reported an estimated level of expected nursing hours per resident day necessary to provide adequate resident care, based upon the RUG-53 (Resource Utilization Group) staff time values for residents in the nursing home at the time of the survey. The expected hours reported were for the quarter that included the survey period and would not necessarily reflect staffing needs at the time of the survey. The CMS also calculated an adjusted hours per resident day figure which was based upon the ratio of actual to expected hours per day times the national average hours per day for each category. This calculation benefitted homes that staffed at higher levels for some categories and reduced the adjusted hours for homes that were staffing significantly under the expected staffing levels in other categories.

Our analysis of Missouri data noted 158 nursing homes provided at least 30 minutes per resident day less than the expected nursing hours staffing level and 35 homes provided at least 30 minutes less than the adjusted nursing hours staffing level. We also noted 116 homes provided fewer hours than both the expected and adjusted nursing hours and 3 of the 116 homes provided at least 30 minutes less than both measures. It appears that facility staffing may not be adequate for a significant number of Missouri nursing homes. Adequate facility staffing is important for quality resident care and minimum nursing staff requirements may be helpful in reducing the number of homes with less than expected or adjusted nursing hours.

A similar condition was noted in previous audit reports.

Recommendation

The Department of Health and Senior Services re-establish minimum staffing standards for nursing facilities.

[2] http://www.cms.gov/CertificationandComplianc/Downloads/staffingdatafile.zip. Accessed May 3, 2011

Auditee's Response

DHSS does not concur with this recommendation. DHSS believes establishing minimum staffing standards may actually make citations for quality of care more difficult when facilities meet the minimum staffing standards but are providing poor quality of care. DHSS believes that in order to be effective, minimum staffing ratios must consider factors such as acuity level of the residents and the training and competency of staff. As the acuity level of residents changes and/or staff turnover occurs, the frequency and type of nursing services and other staffing required may also change. Currently, DHSS evaluates the adequacy of nursing staff based on the care needs of the residents and any negative outcomes based on the staffing in the facility. The audit report references data from CMS regarding expected and adjusted nursing hours. However, like DHSS, CMS has not mandated a minimum nursing staffing ratio.

5. Alzheimer's Special Care Units

The SLCR does not adequately verify the accuracy of disclosure forms related to Alzheimer special care units/programs as required by law.

Some long-term care facilities have established special units or programs to care for individuals who have been diagnosed with Alzheimer's disease or a related disorder. As of June 2010, 217 of the 1,132 licensed facilities (19 percent) had an Alzheimer special care unit or program.

Section 198.510, RSMo, requires that any such facility disclose the form of care or treatment provided that distinguishes that unit or program as being especially applicable, or suitable, for persons with Alzheimer's disease or dementia. This disclosure is to be made to the department (the DHSS) which licenses the facility. According to that statute, this disclosure should be made on a form developed by the department and include an explanation as to how the care is different from the rest of the facility in various areas including, but not limited to, the unit/program's overall philosophy and mission, assessment and establishment of a patient care plan, staff training and continuing education practices, the costs of care and any additional fees, and safety and security measures. A copy of this disclosure form is to be given to the patient and the patient's family at the time of admission.

This statute also states that as part of the long-term care facility's regular license renewal procedure, the licensing department (the DHSS) shall examine the disclosure form and verify the accuracy of the information disclosed. Based on our discussions with SLCR officials, it is not apparent that adequate actions are taken by the department, either during the licensing process or the inspection process, to verify the information on the disclosure form is accurate or that the nursing facility has followed the practices outlined in the form.

We were told that during the license renewal process, the Licensure Unit receives these forms with the license renewal requests and turns the forms over to the Policy Unit for review. The Policy Unit reviews the forms for

missing information or obvious errors, but no other procedures are performed to verify the accuracy of the disclosure form as part of the licensing process.

Department policies also provide that the accuracy of the disclosure form is to be verified during the inspection process; however, if this is done it appears it is generally not documented. Section III, Policy No. 305.00 of the SLCR Administrative Policy and Procedure manual states that during an annual inspection, the surveyor is to utilize the Alzheimer's unit disclosure form by comparing inspection findings regarding the care provided to sampled Alzheimer patients against the information presented in the disclosure form. In addition, that policy states the surveyor will review the availability and distribution of the disclosure form.

While state surveyors may be verifying the accuracy of the information on the disclosure forms during the inspection process, it does not appear this is documented in the completed inspection documents or surveyor notes. A SLCR official indicated that surveyors are most concerned about overall patient care and as long as sampled patients are properly cared for, the surveyors are probably not concerned about verifying and documenting the accuracy of the disclosure form information.

As a result of this situation, there is not adequate assurance the Alzheimer Special Care disclosure forms submitted by the applicable facilities to the department and distributed to the applicable patients/families accurately reflect the special care and operating practices at those facilities. Consequently, patients/families may not have accurate and complete information upon which to make their placement decision.

This condition was also noted in our prior audit report.

Recommendation

The Department of Health and Senior Services review its current practices related to the verification and review of Alzheimer special care units/programs and the disclosure forms which are submitted by the applicable facilities. Steps should be taken to ensure the disclosure forms accurately reflect the care and practices at those facilities.

Auditee's Response

DHSS concurs with this recommendation, and will consider options that better provide for review and verification of the disclosure form. DHSS examines the form for content, but does not verify all information contained on the form. However, DHSS determines if residents of special care units are receiving the appropriate care in accordance with each resident's care plan during onsite inspections. DHSS staff will cite a facility for failure to provide the appropriate care.

6. Employee Disqualifications

The DHSS has not processed substantiated complaints of abuse, neglect, or misappropriation of property through the DHSS Employee Disqualification Listing (EDL) review process in a timely manner.

Case processing

The DHSS process for investigation and review of complaints requiring EDL consideration often resulted in an untimely EDL placement decision and DHSS processing timeframes and goals were often exceeded. During the 2 years ended June 30, 2010, the average number of days from complaint receipt to an EDL placement decision was 507 days for the 240 Bureau of Home and Community Services (HCS) cases, and 260 days for the 331 SLCR cases.

We reviewed the case files for 11 (2 HCS and 9 SLCR complaints) of the 571 cases and noted policy timeframes or processing timeliness goals were often not met during each phase of the process.

Item number	Region	Regional Investigation (days)	Central Office Review (days)	Legal Review (days)	EDL Placement Decision
1	HCS region 3	275	82	273	Not placed
2	HCS region 2	295	90	20	EDL - permanent
3	SLCR region 7	276	35	40	Not placed
4	SLCR region 7	276	35	40	EDL - 2 years
5	SLCR region 2	45	133	166	EDL - 5 years
6	SLCR region 4	135	25	132	Not placed
7	SLCR region 7	279	35	27	Not placed
8	SLCR region 6	64	20	364	EDL - 7 years
9	SLCR region 7	318	68	23	EDL - 3 years
10	SLCR region 7	846	77	24	EDL - 3 years
11	SLCR region 5	119	94	43	EDL - 2 years

Timeframes and processing goals for EDL complaint investigations were exceeded.

- The regional investigation process exceeded the HCS 90 day policy timeframe to complete the complaint investigation for both HCS complaints reviewed.
- The regional investigation process exceeded the SLCR policy timeframe to complete the investigation report for eight of the nine SLCR cases.
- In all cases, the central office processing goal of 14 days was exceeded.

- While the DHSS has no processing timeliness goals or policies for legal review, the days for legal review exceeded 130 days in four cases.

DHSS officials attributed delays to excessive workload of regional staff or central office staff, a filing error by SLCR staff, and delays while the regional or legal staff awaited the outcome of investigations by law enforcement or circuit court cases before proceeding with the EDL referral as the outcome of those outside actions would impact the EDL decision by the DHSS.

DHSS procedures to monitor the cases for timely processing have not prevented delays. Cases received by the central office are tracked and monthly reports of outstanding cases are produced. As of June 1, 2010, 37 (25 HCS and 12 SLCR) of the 100 outstanding cases had been received by the central office more than 1 month previously. The SLCR and the HCS have recently made, or are considering, changes that may help address the staffing and workload issues impacting regional office investigations of complaints for EDL referral. The SLCR and the HCS should consider additional staffing options to improve the timeliness of the reviews by central office.

Misfiled and untimely processed cases

The DHSS does not have adequate controls to ensure all EDL-referred cases are processed. Central office staff have no review procedures to ensure all complaints intended for referral to central office from the SLCR regional offices are received and input into the central office computer system. In 1 of 11 cases tested, the complaint investigation file was intended to be referred for EDL review but was misfiled by the regional office. As a result, the central office did not review the complaint file until nearly 2 years later. The complaint, received in June 2007, was investigated in September 2007, but the misfiling was not discovered until October 2009 when the SLCR regional office received another complaint regarding the same alleged perpetrator. At that time, the DHSS processed the original complaint and the perpetrator was placed on the EDL in April 2010. The perpetrator was employed by long-term care facilities until the April 2010 disqualification.

In September 2010, the QAU discovered two additional SLCR complaint files received between January 2009 and September 2010, that were intended for EDL referral but had been misfiled. The QAU intends to begin performing monthly reviews to ensure SLCR complaints intended for EDL referral have been received by the SLCR central office.

Resident protection

The purpose of the EDL procedure is to protect residents in long-term care facilities and individuals receiving in-home services from disqualified caregivers. An untimely EDL referral process allows potentially inappropriate individuals to continue to have patient contact. The importance of prompt processing of EDL cases is recognized by the SLCR

as its workload prioritization policy ranks investigating priority A complaints with allegations of abuse and neglect as the highest priority task. The DHSS should address the workload issues, process EDL cases in a more timely manner, and frequently review records of complaints to ensure potential EDL cases were processed properly.

Recommendation

The Department of Health and Senior Services process cases involving EDL referral in a more timely manner and in accordance with policy timeframes and established goals and establish controls to ensure cases referred to the central office are received and processed timely.

Auditee's Response

DHSS concurs with this recommendation. DHSS implemented additional controls in October 2010 to ensure that all EDL complaints are routed appropriately prior to being filed. A monthly report was added to track when complaints are mailed by the regional office to the central office. The report identifies complaints that have not been submitted to the central office in a timely manner. Any discrepancies in the report are reviewed and resolved.

Also, DHSS implemented a new computer system (Case Compass) in August of 2011 that will replace the CRANE system. The system sends reminders to supervisors to ensure that appropriate review and follow up occurs.

7. Home-Based Elderly and Disabled Adults Complaints

The HCS did not always investigate complaints within policy timeframes, obtain supervisory approval for unmet timeframes, or correctly record data in the case file and the computerized Central Registry for Abuse, Neglect and Exploitation (CRANE) case management system.

7.1 Untimely investigative tasks

HCS caseworkers did not always meet policy timeframes for the initiation of the investigations and initial visits to the reported adults and supervisory approval for these unmet timeframes was not always documented. Additionally, investigations were not always closed within policy timeframes.

Initiation of investigation

HCS caseworkers did not always meet policy timeframes for initiating the investigations and did not obtain documented supervisory approval for the unmet timeframe. For 1 of 60 complaints tested (2 percent) the investigation was initiated 3 days late. HCS officials indicated the delay was due to caseworker error. Additionally, in one complaint tested, HCS officials indicated the investigation was initiated by attempted contacts with the reporter; however, those contacts were not documented as required.

Contact with reported adult

HCS caseworkers did not always meet policy timeframes for conducting the initial visits with the reported adults and did not always obtain documented

supervisory approval when timeframes were not met. For 9 of 60 cases tested (15 percent) the reported adult was not seen timely and for 3 of these exceptions supervisory approval for the unmet timeframe was not documented in the case file as required. For the three cases, the visit to the reported adult was 1 day late, 3 days late, or waived because the reported adult could not be located. HCS policy requires the caseworker obtain documented supervisory approval when the policy timeframes for visiting the reported adult or initiating the investigation cannot be accomplished.

To ensure the safety of the reported adult and comply with policy, the caseworkers should initiate the investigations and visit the reported adults within the policy timeframes or obtain documented supervisory approval for the unmet timeframe.

Case closures

HCS caseworkers did not always close cases within the 90 day timeframe required by policy. Upon completion of an investigation, caseworkers are required to finish preparing the necessary forms to document the investigations and record the results on the CRANE. For 10 of 60 cases tested, or 17 percent, the case was not closed within the 90 day policy timeframe. These 10 items ranged from 1 day late to 123 days late. HCS policies require the caseworkers record all investigative case actions on a form in the case file. We reviewed these forms for the tested cases and noted for each of these cases extended periods of inactivity, either during the investigation or after the investigation and prior to case closure, contributed to the untimeliness of the case closure.

Monitoring efforts have been insufficient to prevent the delays. Monthly reports of open cases are produced and distributed to supervisors for review. We reviewed the November 2010 report which indicated about 23 percent of the open cases had complaint receipt dates 90 days or more prior to the report date. Bureau officials also indicated that supervisors discuss each pending hotline case with caseworkers on a monthly basis. The HCS attributes the delays to excessive worker caseload.

The HCS should complete investigations within 90 days to ensure further protective services are established promptly if needed and information is available on the system for consideration in any subsequent reports affecting the same reported adult, and to comply with policy.

Contracting for assessment services

DHSS officials indicated HCS staff will no longer perform assessment duties beginning in 2011. Section 208.895, RSMo, as revised by Senate Bill No. 1007, Second Regular Session, 95th General Assembly, authorizes the department to use a contracted vendor to perform those services. As a result, HCS officials believe staff should have adequate time to complete complaint investigations within the established timeframes, once the contract is executed.

7.2 Data errors

We noted instances where case data was not accurately recorded in the case file and CRANE.

Abuse Neglect and Exploitation scores

HCS caseworkers did not properly record the abuse, neglect, and exploitation (ANE) scores on the CRANE system and case file documentation for 13 of 60 items tested, (22 percent). HCS policy requires the caseworkers assign scores to represent the highest level of risk to the reported adults for abuse, neglect, and exploitation during the investigations. These scores are used in the evaluation of the need for further protective services for the reported adult. For the 13 items, the ANE score reported on the case file documentation differed from the score recorded on the CRANE. Incorrect ANE scores in the CRANE system reduce the ability of HCS management to monitor compliance with case handling policies and to ensure the appropriate level of HCS protective services are provided to the reported adult. HCS caseworkers should compare the ANE scores on the two sources to ensure accuracy.

Incorrect dates

HCS caseworkers did not always correctly record the dates of the initial visits to the reported adults. For 2 of the 60 items tested (3 percent) the date of initial visit to the reported adult as recorded on the CRANE differed from the corresponding date recorded on the case file documentation. Additionally, we inquired about 33 other cases where the CRANE data indicated the reported adult was not visited or was not visited timely and HCS officials indicated the date visited was incorrectly recorded on 5 of these items and the reported adult was actually visited timely. To allow for proper monitoring of the timely visit to the reported adult, the HCS should compare the date of the initial visit between the case file and CRANE and correct any discrepancies.

Recommendations

The Department of Health and Senior Services:

7.1 Ensure cases are investigated, documented, and closed timely and ensure supervisory approval is obtained and documented for cases where policy timeframes are not met for initiation of the investigation and initial visit to the reported adult.

7.2 Ensure the ANE score and date of initial visit to the reported adult are correctly recorded in the case file and CRANE.

Auditee's Response

7.1 DHSS concurs with this recommendation. DHSS implemented a contract with a third party on May 19, 2011 to perform all of the assessments for home and community based services. This allowed state staff to devote more time to abuse, neglect and exploitation investigations. While the contract was terminated on August 31, 2011 due to failure of the contractor to perform required duties, DHSS does not plan to have staff that conduct abuse, neglect and exploitation investigations resume assessment functions.

Since the contract was terminated, temporary state staff have been hired to perform assessment functions.

Also, Case Compass includes features that remind supervisors to ensure that appropriate review and follow up occurs. If cases are not timely completed, an explanation is required by the field staff and supervisor.

7.2 DHSS concurs with this recommendation.

DHSS implemented a new computer system (Case Compass) in August of 2011 that will replace the CRANE system. Case Compass facilitates more timely data entry by DHSS staff since the same information no longer has to be entered in multiple databases. This not only enhances productivity, but reduces the likelihood of data entry errors.

Thomas A. Schweich

Missouri State Auditor

Jackson County Sports Complex Authority

December 2011

Report No. 2011-114

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Jackson County Sports Complex Authority

Background	The Jackson County Sports Complex Authority (Authority) is a body corporate and politic and a political subdivision of the state of Missouri. The Authority was created by statute to oversee the construction of the Harry S. Truman Sports Complex, a dual stadium complex for football and baseball. The Authority is party to 25-year lease agreements with the Kansas City Royals and the Kansas City Chiefs signed in 2006, when renovations to the complex were started. These amended leases shifted the primary responsibility for long-term maintenance of the stadiums to the teams and require the teams pay rent to the Authority. The Authority pays management fees to the teams under a management contract to compensate the teams for the cost of utilities and managing the daily operations of the stadiums. The Authority is governed by a five-member board of commissioners, each of whom is recommended by the Jackson County legislature and appointed by the Governor with the advice and consent of the Senate. The Authority employs an executive director and office manager.
Closed Meetings	On several occasions, the Authority said it was closing a meeting to discuss one topic, but then discussed other topics, some of which were not allowable under the Sunshine Law.
Insurance Coverage	The Chiefs and Royals are contractually required to maintain liability insurance on the respective stadiums, and Jackson County fulfills the Authority's duty to maintain casualty insurance, but the Authority did not request proof of insurance from any of these parties to confirm that adequate coverage is in place.
Expenditures	The Authority did not maintain adequate supporting documentation for some expenditures. The Authority purchased a chartered flight for $6,500, but the voucher does not indicate who was on the flight or the purpose for the flight. In addition, the Executive Director's expense reports did not always document the purpose of the expenses. The Authority does not always competitively bid professional services, such as legislative, accounting and audit, and legal services, as is required by Section 64.940.3, RSMo.
Tickets and Suite Usage	The Authority does not adequately document who uses its tickets for the Royals home baseball games or its suite at the Chiefs home football games, making it difficult to ensure the cost of providing food, beverages and tickets to state and local public officials is reported to the Missouri Ethics Commission. Between January 2008 and December 2010, the Authority's lobbyist reported only $1,857 in expenditures provided to public officials at Chiefs games and reported no expenditures for use of Royals tickets by public officials.

Board Supervision

The Authority's Board of Commissioners should improve its oversight of the Authority's activities. The Board does not usually request supporting documentation for expenditures, and there is no documentation that the Board provides any other type of supervision over the activities of the Executive Director.

In the areas audited, the overall performance of this entity was **Good**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Jackson County Sports Complex Authority did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 10

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the Missouri General Assembly
and
Members of the Jackson County Sports Complex Authority
Kansas City, Missouri

We have audited certain operations of the Jackson County Sports Complex Authority in fulfillment of our duties under Chapter 29, RSMo. The authority engaged Cudney, Ecord, McEnroe & Mullane LLC, Certified Public Accountants, to audit the authority's financial statements for the 3 years ended December 31, 2010. To minimize duplication of effort, we reviewed the CPA firm's audit reports. The scope of our audit included, but was not necessarily limited to, the years ended December 31, 2010, 2009, and 2008. The objectives of our audit were to:

1. Evaluate the authority's internal controls over significant management and financial functions.

2. Evaluate the authority 's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the authority, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the authority's management and was not subjected to the procedures applied in our audit of the authority.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures.

The accompanying Management Advisory Report presents our findings arising from our audit of the Jackson County Sports Complex Authority.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	John Luetkmeyer, CPA
Assistant Director:	Douglas J. Porting, CPA, CFE
Audit Manager:	Todd M. Schuler, CPA
In-Charge Auditor:	Julie A. Moulden, CPA, MBA
Audit Staff:	Karla D. Swift, MBA

Jackson County Sports Complex Authority
Management Advisory Report
State Auditor's Findings

1. Closed Meetings

Information provided in the closed session minutes for several meetings was not sufficient to demonstrate that issues discussed were allowable under the Sunshine Law.

- The open session minutes for meetings held by the Board during February and April 2008 cited personnel issues as the reason for closing the meeting, but instead, existing contracts were discussed. We also noted closed meetings in January 2009 and February 2010 for which legal issues were cited as the reason for closing the meeting, but instead, an existing contract was discussed. Discussion related to existing contracts is not an allowable topic for closed session.

- We identified closed meetings in April 2009 and January 2010 in which legal issues was cited as the reason for closing the meeting, but instead, a personnel issue was discussed.

- We identified a meeting in September 2009 which cited leases as the reason for closing the meeting, but real estate matters were discussed.

Section 610.020.7, RSMo, requires governmental bodies to prepare and maintain minutes of open and closed meetings. In addition, Section 610.022, RSMo, provides that the Board shall not discuss any other business during the closed meeting that differs from the specific reasons used to justify such meeting, record, or vote, and limits the types of topics which can be discussed in closed meetings.

Recommendation

The Jackson County Sports Complex Authority ensure topics discussed during closed session meetings are allowable and the reasons for closing a meeting are documented in the open session minutes.

Auditee's Response

While both legal issues and personnel issues can arise from existing contracts, we agree we should stay on the topic for which we went into closed session and we will also ensure the topic is allowable. When a board member makes a motion to go into closed session, they are using their best judgment consistent with their understanding of the sunshine law.

2. Insurance Coverage

The authority should require documentation of the sports complex insurance coverage. In 2006, the authority entered into amended operating leases with the Chiefs and Royals thereby giving the teams the cost responsibility and risk for the long term repair, maintenance and operation of the stadiums. Article 17, Section 17.2 of the Chiefs' amended lease requires the Chiefs to provide liability insurance on Arrowhead Stadium. Section 28 of the Royals' amended lease requires the Royals to provide liability insurance on Kauffman Stadium. The leases do not require the teams to provide proof of insurance to the authority and the authority did not request proof during the audit period.

In addition, the authority is required under Article XVII, section 17.01 of the original lease agreements to provide casualty insurance as a condition of the lease. In addition, Article 17, Section 17.1 of the amended lease requires the casualty insurance to include coverage specifically for acts of terrorism. According to the Executive Director, the casualty insurance is provided by Jackson County on the authority's behalf, but the authority did not request documentation from the county that coverage was adequate to meet the terms of the lease.

The authority has a responsibility to ensure the stadiums, as public assets, are adequately insured at all times. Without obtaining adequate documentation and implementing proper monitoring procedures, the authority cannot determine the stadiums are adequately insured as required.

Recommendation

The Jackson County Sports Complex Authority obtain detailed summaries of the levels of insurance coverage.

Auditee's Response

We agree and will obtain summaries of the existing insurance coverage provided by others. The 2006 Lease Amendments actually provide that the "Landlord/County" will provide casualty insurance. (Kansas City Chiefs section 17.1) "Landlord/County" is defined in section 34.2 as referring to " a joint obligation or joint right of, or determination to be made by, or with respect to, both Landlord and the County, as the context indicates." The County has always provided the casualty insurance under the 2006 Lease Amendments.

3. Expenditures

Controls and procedures over Authority expenditures could be improved.

3.1 Supporting Documentation

Some payments were not supported by an invoice or other adequate documentation.

- A chartered flight was purchased for $6,500. The payment voucher did not indicate who was on the flight or the purpose for the flight.

- The Executive Director received expense reimbursements totaling $11,333 during the 3 years ended December 31, 2010. The expense reimbursement reports did not show the purpose and the destination for mileage reimbursements, making it difficult to determine the propriety and reasonableness of the expenses claimed. In addition, the Executive Director received reimbursement for the purchase of three gift cards totaling $400. The expense report did not document the purpose or the recipients of the gift cards, nor was other documentation provided to indicate such information.

To ensure the validity and propriety of disbursements, adequate supporting documentation should be obtained for all goods and services. In addition, to ensure reimbursement requests are reasonable and represent valid disbursements, the authority should ensure documentation is adequately detailed.

3.2 Procurement of Professional Services

The authority does not always competitively bid professional service contracts, as required by state law. During the 3 years ended December 31, 2010, competitive bids were not solicited for legislative, accounting and audit, and legal services totaling approximately $141,000, $45,000, and $304,000, respectively. The authority signs a new engagement letter for accounting and audit services on an annual basis and signs a new agreement for legislative services every 2 years. The engagement letter for legal services was last updated in April 2005. Rather than periodically soliciting bids for these services, the Executive Director indicated the authority has used the same providers for years and is pleased with the results and thus, did not solicit bids in recent years for these services.

Section 64.940.3 RSMo, states any expenditure made by the authority in excess of $25,000, including professional service contracts, must be competitively bid.

Recommendations

The Jackson County Sports Complex Authority:

3.1 Ensure adequate supporting documentation is submitted and retained for all disbursements.

3.2 Ensure competitive bids are solicited periodically for professional services, in accordance with applicable state law.

Auditee's Response

3.1 We agree with the recommendation and have already addressed the issue.

The $6500 payment was for a flight to Jefferson City to appear before the Missouri Development Finance Board (MDFB) to obtain the tax credits of $25 million, $15 million of which was used for Arrowhead Stadium, and $10 million of which was used for facilities at Missouri Western University in St. Joseph, Missouri to allow the Kansas City Chiefs to return their annual summer camp to Missouri. The plane that had been chartered was about 1/10 of the price, but could not take off because that morning Kansas City was in the midst of one very heavy snowstorm and visibility was zero. The Authority had no choice but to book the only available plane for this important meeting. The passengers on the plane included the president of Missouri Western University, officials of the Kansas City Chiefs, a state senator, a member of the MDFB, the Executive

Director, and the General Counsel of the Authority. The Authority was reimbursed a portion of the cost by the Kansas City Chiefs.

The gift cards were purchased at the direction of a former Chairman of the Board as Christmas gifts for an employee and two catering people who work in the suite.

3.2 Agree in principle. When the current law firm was retained by the Authority, we believe it is the first time that proposals were solicited for legal services. The existing audit firm has been doing the financial statements for the Authority for the past 15+ years. With the new leases in effect any changes to these firms would be very expensive at this time.

4. Tickets and Suite Usage

Documentation of the use of the authority's suite at the Chiefs home football games and authority tickets for the Royals home baseball games is inadequate. The cost of providing food, beverages, and tickets to state and local public officials at Chiefs football games and Royals baseball games is not adequately tracked and the authority does not maintain a record of who uses the provided tickets at each game.

Section 105.473, RSMo, requires that all expenditures made by a lobbyist or lobbyist principals on behalf of state and local officials, their staff, or spouses and dependent children be reported monthly by the lobbyists to the Missouri Ethics Commission (MEC). The expenditures to be reported shall include the costs of food, beverages, and the face value of tickets provided to these individuals. Records supporting who used the tickets would allow the authority to ensure the value of the tickets, food, and beverages provided to public officials is properly reported.

For each Chiefs home game, the authority receives 46 tickets to the game at no cost to the authority and for each Royals game, each authority member receives 4 tickets. The authority members, staff, and invited guests, including government officials, watch the football games from the authority's suite at Arrowhead stadium overlooking the playing field. Food and beverages are provided at the Arrowhead suite at no cost to the authority by its registered lobbyist, as required in the contract. The authority does not have a suite at Kauffman Stadium, therefore, food and beverages are not provided for Royals games. The authority indicated its lobbyist is responsible for distribution of tickets and tracking expenditures provided to state and local officials at the games and reporting those amounts to the MEC. Between January 2008 and December 2010, the authority's lobbyist reported minimal expenditures of $1,857 provided to public officials at Chiefs games and no amount was reported for use of Royals tickets by public officials. The Executive Director indicated neither the authority nor its lobbyist maintain a complete list of who used each ticket provided to the

authority, making them unable to document the amount of expenditures reported to the MEC was accurate.

Adequate records of all suite attendees and all ticket recipients are necessary to ensure the authority and its lobbyist have reported all expenditures provided to state and local officials, as required by state law.

Recommendation

The Jackson County Sports Complex Authority maintain records of all Arrowhead suite attendees and Royals ticket recipients to ensure the costs of any food, beverages, and tickets provided to state and local officials are reported to the MEC as required by state law.

Auditee's Response

The Authority already satisfies this recommendation. The governmental relations firm retained by the Authority dispenses all tickets to public officials and pays for all food and drink in the Arrowhead suite. The Executive Director and a member of the governmental relations firm are at every Chiefs home game to ensure compliance. The firm maintains a complete record of public officials which is filed with the Missouri Ethics Commission and is available online. No food or drink is furnished at Royals games. We do not believe law or policy requires the Commissioners to list the names of those guests of theirs who are not public officials.

Auditor's Comment

While the government relations firm retained by the authority does maintain records of public officials attending games in the authority's suite, the firm does not, nor does the authority, maintain a record of who uses all the tickets available, whether a public official or not. Only by maintaining a complete listing of all suite attendees and comparing that listing to the public officials usage information reported to the MEC, can the authority ensure all public officials usage is properly reported.

5. Board Supervision

To strengthen internal controls, the Authority's Board of Commissioners should provide better oversight of authority activities.

The Board employs an Executive Director to provide active supervision, control, and management of the day-to-day operations of the authority, which includes processing and approving expenditures and other financial related activities. The Board meets monthly to discuss authority business including personnel issues, contracted services, financial activity, and potential and upcoming maintenance and repair projects. The Board is provided summary financial information at each board meeting, including a listing of expenditures. However, supporting documentation for expenditures is not usually requested and there is no documentation the Board has provided any other type of supervision over the activities of the Executive Director.

The staff of the authority consists of the Executive Director and an Office Manager. The small staff size inhibits the ability to provide adequate segregation of duties. However, periodic reviews of supporting documentation of transactions by the Board or a designated member would help improve oversight. Without adequate oversight, the Board has less assurance that all assets are adequately safeguarded, and all transactions are accounted for properly, adequately supported, and for reasonable and appropriate uses.

Recommendation

The Jackson County Sports Complex Authority should establish procedures to improve the oversight of the operations of the authority. These procedures should include timely supervision and, at a minimum, a periodic review of supporting documentation of transactions and the work performed by the Executive Director.

Auditee's Response

While we agree that procedures can always be improved and we will certainly look for such opportunities, we believe the Board is fully aware of all expenditures and the Executive Director has documentation in the form of invoices and cancelled checks which are available upon request. Periodic review is done for certain invoices (legal expenses) by a Board member. The Board is also fully aware and receives detailed documents to support the bond disbursements each month well in advance of their actual disbursement. During the construction project, the Board received weekly e-mail updates and a detailed written monthly report.

Jackson County Sports Complex Authority
Organization and Statistical Information

The Jackson County Sports Complex Authority is a body corporate and politic and a political subdivision of the state of Missouri. The authority was created in 1965 under the authority of Section 64.920, RSMo, to oversee the construction of the Harry S. Truman Sports Complex, a dual stadium complex, which opened for football during the 1972 season and for baseball during the 1973 season.

The authority was assigned certain powers, duties, and obligations directed principally to plan, construct, operate, and maintain all things necessary to a complex suitable for all types of sports and recreation.

The authority is currently operating under 25-year amended lease agreements with the Kansas City Royals and Kansas City Chiefs which were entered into in January 2006. Each lease agreement calls for annual basic rents of $450,000 paid by each team and percentage rentals based upon gross receipts, net of taxes, in excess of $7,500,000.

The authority entered into management contracts with the teams, as part of the original 1990 leases, which provide for the authority to pay management fees to the Royals and Chiefs. Management fees of approximately $2 million and $1.9 million were paid to the Royals and Chiefs, respectively, during the year ended December 31, 2010. These fees are to compensate the teams for the costs to manage the daily operations of the stadiums, including utilities. The management fees currently increase each year with the Consumer Price Index, not to exceed 4.75 percent, during the remainder of the contracts.

In 2006, the authority amended the leases and entered into development agreements with the teams to renovate Arrowhead and Kauffman stadiums to bring them up to current National Football League and Major League Baseball standards. In 2006, Jackson County issued $425 million of leasehold revenue bonds to fund a portion of the renovation projects. In addition, Jackson County voters approved a three-eighths cent sales tax which the county will use to pay the debt service costs on the 2006 bonds and to provide for ongoing repairs and maintenance of the common areas of the complex over the 25 year leases. The Missouri Development Finance Board contributed $75 million in Tax Credits for Contributions for the renovation projects. The Royals contributed $25 million and the Chiefs contributed $125 million; with the teams responsible for any cost overruns from the renovation projects and ongoing stadium maintenance costs. The renovations to Kauffman Stadium were completed in April 2009 at a cost of $271.8 million and the renovations to Arrowhead Stadium as of July 2011 totaled $405 million.

In 1990, the voters of Jackson County approved the shift of an eight cent property tax levy to the county's Park Fund to help finance the obligations contained in the leases. Since that time, the county has allocated $3.5

million annually from this levy to support the obligations contained in the leases. In 1998 and 2002, the county issued $40,170,000 and $10,000,000, respectively, of leasehold revenue bonds in part to fund improvements at the sports complex. The 1998 bond proceeds were used for repairs, maintenance and improvement expenditures totaling $34,100,000.

From 1991 to 1996, the Missouri General Assembly appropriated $2 million annually for the maintenance of the sports complex pursuant to Sections 67.638 through 67.641, RSMo. The state funding increased to $3 million annually beginning in 1997.

Each year, the authority enters into a cooperative agreement with the City of Kansas City, whereby the city agrees to appropriate $2 million annually to partially fund the master plan projects and for other maintenance and repair expenses at the sports complex. However, the City of Kansas City only appropriated $1.7 million in fiscal year 2009 and $1.5 million in fiscal year 2010. Jackson County made up the deficiencies. The county, state, and city funds have been deposited into a Convention and Sports Complex Fund which was established pursuant to Section 61.641, RSMo, and the monies in this fund are used to maintain and operate the sports complex.

Authority Commissioners

The authority board is bipartisan and consists of five commissioners who are qualified voters of the state of Missouri and residents of Jackson County. The Jackson County legislature submits a list of candidates to the Governor to replace members of the Board whose terms have expired. The Governor then appoints, with the advice and consent of the Senate, the succeeding members from that list of candidates. The commissioners serve staggered terms of five years and hold office until a successor has been appointed and confirmed. Commission members receive a maximum salary of $3,000 per year, plus reimbursement for actual expenses incurred in the performance of their duties. The Board elects its own officers. At December 31, 2010, the commissioners were:

Commissioner	Term Expires
J. Beto Lopez, Chairman	July 15, 2012
Gerald Winship, 1st Vice-Chairman	July 15, 2014
Jon R. Gray, 2nd Vice-Chairman	July 15, 2013
Deron Cherry, Treasurer (1)	July 15, 2011
Garry Kemp, Secretary (2)	July 15, 2015

(1) Deron Cherry was re-appointed to a 5 year term ending July 15, 2016
(2) Garry Kemp replaced Michael Smith as Secretary in October 2010

As of December 31, 2010, the authority employed an executive director and an office manager to provide various administrative and support functions. Jim Rowland has served as Executive Director for the authority since 2006.

The Executive Director's salary for the year ended December 31, 2010, was $120,000.

Copies of the authority's financial statements can be obtained from the authority.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Jackson County Sports Complex Authority did not receive any federal stimulus monies during the 3 years ended December 31, 2010.

Thomas A. Schweich

Missouri State Auditor

ADMINISTRATION

Children's Trust Fund Board

December 2011

Report No. 2011-113

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Department of Administration, Children's Trust Fund Board (CTFB)

Background

The CTFB was established by Section 210.170, RSMo, to provide child abuse and neglect public awareness and prevention programs throughout the state. The Board is comprised of 21 members, 17 appointed by the Governor, 2 members of Missouri Senate appointed by the President Pro Tem of the Senate, and 2 members of the Missouri House of Representatives appointed by the Speaker of the House. The Board appointed an executive director who, along with three other employees, performs administrative duties.

Monitoring

The CTFB did not comply with its policy for timely monitoring of general prevention program grantees. CTFB written policy requires an on-site monitoring visit of all first year grantees, and stated practice is to conduct these visits within the first 2 years of the 5-year grant cycle. As of June 30, 2011, 21 of 71 (30%) grantees did not receive a monitoring visit within the first 2 years of the grant cycle. Of these, 6 received a monitoring visit in the third or fourth year, but 15 of these had not received a monitoring visit at all. Timely monitoring helps ensure general prevention funds are used for intended purposes.

In the areas audited, the overall performance of this entity was **Good**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Department of Administration, Children's Trust Fund Board did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

B Comparative Statement of Appropriations and Expenditures, 4 Years Ended June 30, 2011....9

C Comparative Statement of Expenditures (From Appropriations) 5 Years Ended June 30, 2011....11

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the Children's Trust Fund Board
and
Kirk Schreiber, Executive Director
Jefferson City, Missouri

We have audited certain operations of the Children's Trust Fund Board in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the 4 years ended June 30, 2011. The objectives of our audit were to:

1. Evaluate the board's internal controls over significant management and financial functions.

2. Evaluate the board's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the board; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the board's management and was not subjected to the procedures applied in our audit of the board.

For the areas audited, we identified (1) a deficiency in internal controls, (2) no significant noncompliance with legal provisions, and (3) no significant deficiencies in management practices and procedures. The accompanying Management Advisory Report presents our finding arising from our audit of the Children's Trust Fund Board.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Douglas J. Porting, CPA, CFE
Audit Manager:	Keriann Wright, MBA, CPA
In-Charge Auditor:	Denise Huddleston, MBA

Children's Trust Fund Board
Management Advisory Report
State Auditor's Findings

Monitoring

The Children's Trust Fund Board (CTFB) is not complying with its policy for timely monitoring of general prevention program grantees, providing less assurance that general prevention funds are being used as required. The CTFB provides funding to various organizations through several programs, one of which is the general prevention program. This funding is used to provide programs and services to help families reduce the risk of child abuse and neglect. To promote general prevention program sustainability, the CTFB commits funding to successful grantees on a 5-year cycle. During the 4 years ended June 30, 2011, the CTFB disbursed approximately $3.7 million to 71 general prevention grantees.

CTFB written policy requires an on-site monitoring visit to be conducted on all first year grantees and stated practice is to perform these site visits within the first 2 years of the grant period. During site visits, CTFB personnel perform both a programmatic review by interviewing recipients and providers, and a financial review of supporting documentation. Other methods used to monitor general prevention grantees include reviewing required annual or biannual reports and detailed reimbursement requests; however, documentation supporting the information submitted is not required.

We found that site visits are not always completed timely, or at all, during the life of the grant. As of June 30, 2011, we noted 21 of 71 general prevention grantees did not receive a site visit within the first 2 years of the grant cycle as required by CTFB written or stated policies. Of these, 6 grantees received a site visit in the third or fourth year of the grant cycle and 15 grantees had not received a site visit at all although they were in at least the third year of the grant cycle or the grant had been finalized. Total funding disbursed to these 15 grantees was approximately $1.18 million during the current 5-year cycle. According to CTFB personnel, these site visits had not been completed timely due to staffing and funding limitations. To adapt to these limitations, CTFB personnel indicated they schedule site visits based on proximity to other scheduled reviews or delay or waive visits based on low-risk factors, such as past experience with the grantee. CTFB policy does not reflect this practice and such decisions have not been adequately documented.

Timely monitoring of grantees is necessary to ensure general prevention funds are adequately supported and used for intended purposes.

Recommendation

The CTFB ensure site visits are conducted timely in accordance with policy, and any decisions made to deviate from policy should be adequately documented.

Auditee's Response

The Executive Director provided the following written response on behalf of the Children's Trust Fund Board (CTFB):

The CTFB will devise and implement a schedule to insure the timely on-site monitoring of general prevention contracts within the first two years of the contract period. Additionally by the close of fiscal year 2012, the CTFB plans to monitor the 15 general prevention grantees as identified by the Missouri State Auditor as not having received timely visits. General prevention grantees are required by the CTFB to retain documentation for a period of five (5) years after the contract period expires or is terminated for purposes of auditing/monitoring by the CTFB. The Board of Directors will review and revise as needed policy governing grant/contract monitoring, taking into account risk factors and history of the recipient organization, staff resources, proximity of scheduled reviews in geographic regions and other factors.

Children's Trust Fund Board
Organization and Statistical Information

The Children's Trust Fund Board (CTFB) was established by Section 210.170, RSMo, to provide child abuse and neglect public awareness and prevention programs throughout the state. Under the provisions of Section 210.174, RSMo, any individual or corporation may designate a part or all of his/her income tax refund to be contributed to the CTFB. Additional funding is derived from contributions made directly to the CTFB including to obtain the specialized CTFB license plate, fees on marriage licenses, vital records, federal and other grants.

Section 210.170, RSMo, provides that the board shall consist of twenty-one members. Seventeen members are appointed by the Governor with the advice and consent of the Senate. Members serve until their successor is appointed. Two members of the Missouri House of Representatives are appointed by the Speaker of the House and two members of the Missouri Senate are appointed by the President Pro Tem of the Senate. Members of the Senate and House of Representatives serve on the CTFB until their term in the House or Senate expires. On June 30, 2011, the CTFB had nineteen members and two vacancies. Members serving on the board as of June 2011 were:

Members	City	Term Expires
Rev. Eric F. Battle	St. Louis	September 2012
Nela Beetem	Holts Summit	September 2012
Susan E. Block	University City	September 2012
Paula E. Clay	Columbia	September 2009
Lynne Cooper, D. Min.	St. Louis	September 2011
Kathleen Boyle Dalen, Ph.D.	Kansas City	September 2011
Jillian Harris	Jefferson City	September 2010
Robert J. Harris, M.D.	Columbia	September 2011
Stephen F. Huss, Ph.D.	Hillsboro	September 2010
Dena Ladd	St. Louis	September 2010
Patrice Mugg	Kirkwood	September 2010
Martina L. Peterson	Kansas City	September 2012
Charmaine Smith	St. Louis	September 2012
Regina Staves, Ph.D.	Kansas City	July 2012
Thomas M. Vansaghi, Ph.D.	Kansas City	September 2011
Representative Michael McGhee	Odessa	
Representative Jill Schupp	Creve Coeur	
Senator Jolie Justus	Kansas City	
Senator John Lamping	St. Louis	

The board is empowered to enter into contracts with public or private agencies, schools, or qualified individuals to establish community-based educational and service programs focused on the prevention of child abuse and neglect. The programs include crisis care, home visiting, counseling, and support groups. The board also provides public education about the

problem of child abuse and neglect and how Missouri citizens can contribute to prevention efforts.

The board may appoint an executive director to perform administrative duties. Kirk Schreiber was appointed Executive Director in October 2005. Three other employees perform various administrative duties and responsibilities.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The CTFB did not receive any federal stimulus monies during the 4 years ended June 30, 2011.

Thomas A. Schweich

Missouri State Auditor

Schuyler County Collector and Property Tax System

December 2011

Report No. 2011-112

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Schuyler County Collector and Property Tax System

Missing Monies

Property tax receipts of at least $568,974 are missing. A lack of oversight and a failure to segregate duties allowed the missing monies to go undetected. The former County Collector collected receipts but did not deposit some monies, issued checks from the County Collector's official bank account made payable to herself, and used error-correction fluid to alter tax book entries. Because of inadequate and incomplete records, the auditors could not determine whether additional monies are missing. Law enforcement authorities were alerted, and criminal charges have been filed against the former County Collector.

Property Tax System Controls and Procedures

The county did not prepare a separate delinquent property tax book, and to conceal the missing monies, the former County Collector improperly increased the delinquent tax totals on her annual settlements. No one totals the unpaid entries in the tax books, and as a result, the County Clerk and County Commission did not verify the delinquent tax totals. State law requires the County Collector to prepare the delinquent tax listings, the County Commission to examine and correct the listings and the County Clerk to make the listings into delinquent tax books and charge the County Collector with the amount of delinquent taxes to be collected.

The County Assessor's office recorded changes to property assessments on unnumbered manual forms which the former County Collector used to compute tax amounts and post additions and abatements manually to the tax books, and neither the County Clerk nor the County Commission verified the accuracy and completeness of the tax book additions and abatements made by the former County Collector.

Neither the County Clerk nor the County Commission adequately reviewed or verified the amounts on annual settlements prepared by the former County Collector, which allowed incorrect amounts on the settlements to go undetected.

County Collector's Controls and Procedures

The former County Collector did not record some property tax receipts on abstract reports and did not adequately reconcile receipts to bank deposits. Proper internal controls over receipts should include recording all paid tax statements on daily abstract or receipt lists, reconciling the lists to bank deposits, and reconciling the method of payment received to the composition of deposits.

The former County Collector did not always perform, or did not maintain documentation of, monthly bank reconciliations and did not adequately reconcile liabilities to the bank account balances. At June 30, 2011, identified liabilities exceeded the adjusted bank balance by $18,665.

The former County Collector did not issue receipts slips for some partial payments, did not use numbered receipt slips for partial payments, and did not maintain a ledger or other record to adequately identify partial payments collected and balances due from each taxpayer.

Commissions and Written Agreements

The former County Collector withheld commissions at a higher rate than allowed by law. The County Collector withheld approximately $5,250 more per year than she was entitled to withhold, which she remitted to the General Revenue Fund. The former County Collector also improperly withheld and remitted to the General Revenue Fund a one-half percent mailing commission on railroad and utility taxes, totaling $5,885 for tax years 2007 through 2010. The county collects property taxes for various cities in the county but did not have up-to-date written agreements for these services. State law requires such contracts to be in writing.

In the areas audited, the overall performance of this entity was **Poor**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Schuyler County Collector did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 15

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
County Collector of Schuyler County

We have audited the County Collector and Property Tax System of Schuyler County. During our audit of certain operations of Schuyler County in fulfillment of our duties under Section 29.230, RSMo, we determined there were monies missing in the office of the County Collector. The County Collector resigned effective August 31, 2011, and a successor was appointed on October 24, 2011, and sworn into office on November 3, 2011. Section 52.150, RSMo, requires the State Auditor to audit the office of the County Collector after being notified of a vacancy in that office. The scope of our audit of the County Collector and Property Tax System included, but was not necessarily limited to, the period March 1, 2007, to August 31, 2011. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant property tax functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Determine the extent of monies missing from the County Collector's office.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. The county and the County Collector's office did not maintain adequate records to support certain significant financial and property tax book transactions, including incomplete records of tax book additions and abatements and incomplete tax receipt records. Because of this limitation on the scope of our audit, we could not adequately audit certain transactions.

We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

Except as discussed in the second paragraph, we conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the County Collector and Property Tax System.

Section 52.150, RSMo, requires the County Commission to accept the State Auditor's report and, if necessary, to take certain specific actions if the State Auditor finds any monies owing to the county or the former County Collector.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) missing monies totaling at least $568,974. The accompanying Management Advisory Report presents our findings arising from our audit of the County Collector and Property Tax System of Schuyler County.

An audit of certain operations of Schuyler County, fulfilling our obligations under Section 29.230, RSMo, is still in process, and any additional findings and recommendations will be included in the subsequent report.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Mark Ruether, CPA
In-Charge Auditor:	Heather R. Stiles, MBA, CPA
Audit Staff:	Janielle Robinett
	Angela M. McFadden

1. Missing Monies

Weaknesses in internal controls and record keeping procedures of the County Collector's office and property tax system, as noted throughout this report, allowed missing monies of at least $568,974 to go undetected. Information regarding these missing monies has been shared with law enforcement authorities. On June 27, 2011, Kathy Roberts (former County Collector) ceased performing duties related to the County Collector's office, and on August 31, 2011, Roberts resigned her position as Schuyler County Collector. Criminal charges were filed on October 7, 2011.

The missing monies went undetected due to a lack of segregation of duties and oversight. The County Collector's office is a two-person office, which makes proper segregation of accounting duties difficult. Normally, when duties cannot be adequately segregated due to limited staff available, at a minimum, the County Collector should perform and document periodic supervisory reviews of accounting records. However, the County Collector was responsible for most recording, depositing, disbursing, and reconciling duties. Due to the lack of oversight in the County Collector's office, it is even more important for the County Commission and County Clerk to perform the checks and balances provided by state law.

For the 4 years ended February 28, 2011, the County Collector's office processed and distributed approximately $2.2 million annually in property taxes and other monies, as recorded on the annual settlements.

Unrecorded receipts

Property tax receipts of at least $568,974 collected by the County Collector's office were not recorded and properly distributed. The majority of these receipts were not deposited into the former County Collector's official bank account; however, some of the unrecorded receipts were deposited and the former County Collector issued checks from her official bank account which do not appear to be for legitimate purposes (as described below).

Upon receipt of property tax payments, the County Collector's office procedures are to stamp the tax statements as paid and file the statements with the corresponding bank deposit slips. However, numerous stamped paid tax statements were located in the vault in the County Collector's office and were not filed with deposit slips. We attempted to trace several of these stamped paid tax statements to abstract lists (lists of taxes recorded and distributed to taxing authorities), but could not locate any of these paid tax statement amounts on the abstract lists.

The majority of the stamped paid tax statements not filed with deposit slips were marked as paid in cash. We reviewed deposits to the former County Collector's official bank accounts during the months of October through January for each of the 4 years of the audit period, which represents the busiest tax collection periods, and noted minimal cash deposited.

Improper disbursements

From March 1, 2007, to June 30, 2011, various checks totaling $46,686 were issued from the former County Collector's official bank account payable to the former County Collector or to a family member. The former County Collector could not provide adequate documentation to support the purpose of these checks, and based on copies of the canceled checks obtained from the county's depositary bank, it appears these checks were endorsed by the former County Collector and deposited into a personal bank account. In addition, the former County Collector provided us with copies of some of these canceled checks for which the payee appeared to be altered.

Methods to conceal missing monies

Various methods were used to conceal missing monies, including inflating the amount of delinquent tax credits reported on annual settlements. As required by state law, the former County Collector prepared annual settlements of tax book charges and credits for the year ended February 28 (29), each year. The settlements accurately reported taxes deposited and distributed to the taxing authorities, but amounts collected and not deposited and distributed were falsely reported on the settlements as uncollected delinquent amounts. As a result, total delinquent credits reported on the annual settlements increased significantly during the past 4 years, from $514,166 at March 1, 2007, to $767,159 at February 28, 2011.

Our review of the county's property tax books noted alterations or the use of white error correction fluid to various entries posted to the tax books. While the county's tax books are printed from the computerized property tax system, the former County Collector did not utilize the computer system to record tax receipts. Manual notations were documented in the tax books to denote dates paid, and some of these manual notations were concealed with error correction fluid. Our review noted several of the entries concealed with error correction fluid were related to tax statements stamped paid in cash that could not be traced to bank deposits or entries on the abstract lists.

Determination of shortage

To determine the amount of missing monies, we reviewed the county's property tax books and unpaid tax statements as of June 30, 2011, and determined actual delinquent tax totals at that date. We then reviewed tax book transactions, including collections and tax book additions and abatements, from March 1, 2011, to June 30, 2011, and determined the actual amount of delinquent taxes at February 28, 2011. Our audit work determined actual delinquent taxes totaled approximately $216,850 at February 28, 2011, while the former County Collector reported total delinquent taxes of $767,159. As a result, taxes of approximately $550,309 cannot be accounted for and are missing.

In addition, liabilities exceeded the balance in the former County Collector's official bank account by $18,665, which represents a shortage in the bank account. We prepared a bank reconciliation for the former County Collector's bank account at June 30, 2011, and compared the adjusted

balance (bank balance plus identified deposits-in-transit less identified outstanding checks) to identified liabilities. The account had an adjusted balance of $27,901, compared to identified liabilities of $46,566. Liabilities consisted of June tax collections distributed in July ($25,406), undistributed land tax sale proceeds ($1,820), partial tax payments held in the account ($3,923), and an undistributed protested tax refund ($15,417).

Potential additional missing monies

Due to inadequate or incomplete records, additional missing monies could exist but cannot be readily determined. Some tax book addition and abatement amounts reported on the former County Collector's annual settlements do not appear accurate. For example, some assessment forms located in the former County Collector's vault for property tax additions could not be traced to tax book addition amounts charged to the former County Collector on the annual settlements; however, manual tax statements were located for these property tax additions. Additionally, tax book abatement credits of $3,566 reported on the February 28, 2011, annual settlement could not be traced to supporting documentation and represent the amount of 2006 personal property tax abatements already credited in the previous year's annual settlement. While it appears additional monies could be missing because of inaccurate addition and abatement amounts reported on the annual settlements, we could not determine the actual amount of tax book additions and abatements to compare to amounts reported on the annual settlements.

In addition, some of the tax statements which could not be traced to deposits or abstract lists were for taxes paid after December 31 and would have been assessed delinquent penalties and interest. However, due to inaccurate or missing receipt records, we could not readily determine the amount of penalties and interest collected but not deposited and distributed.

Upon discovery of the missing monies and resignation of the former County Collector, the County Clerk and County Commission have implemented changes to improve controls over property tax transactions.

Recommendation

The County Commission and County Clerk take necessary action to recover the missing monies and work with law enforcement authorities regarding any criminal prosecution.

Auditee's Response

The County Commission and County Clerk provided the following written response:

The Prosecuting Attorney is currently working with the local insurance company and the bonding company to recoup the monies.

2. Property Tax System Controls and Procedures

Significant weaknesses were noted in controls and procedures over the county's property tax system.

2.1 Delinquent tax books

The county does not prepare separate delinquent property tax books, and no one totals the unpaid entries in the tax books to obtain and document delinquent tax totals. As a result, the County Clerk and the County Commission did not verify the accuracy of delinquent tax totals claimed by the former County Collector.

The County Assessor utilizes a computerized assessment and tax system to enter property assessments, and this information is used by the county to generate property tax books annually in October; however, the former County Collector elected not to utilize the system to record tax receipts. Tax receipts were manually recorded on the tax books, which did not allow the county to generate separate delinquent tax books from the computer system. County officials indicated the county is currently in the process of fully utilizing the computerized system for recording tax receipts, which should allow separate delinquent tax books to be generated in the future.

Section 140.030, RSMo, requires the County Collector to prepare delinquent tax listings. Section 140.040, RSMo, requires the County Commission to examine and correct the listings, and Section 140.050, RSMo, requires the County Clerk to make the listings into delinquent tax books and charge the County Collector with the amount of delinquent taxes to be collected. Because the County Collector is responsible for collecting property taxes, good internal controls require someone independent of that process be responsible for generating and testing the accuracy of delinquent property tax books. If it is not feasible for the County Clerk to prepare delinquent tax books, at a minimum, the County Clerk should verify the accuracy of the delinquent tax amounts annually at the beginning of the County Collector's fiscal year (March 1).

2.2 Additions and abatements

Controls over property tax additions and abatements were not adequate. There was no independent comparison of property assessment changes made by the County Assessor to the related changes in the property tax books made by the former County Collector. In addition, the County Commission only approved changes in assessed valuations and did not approve the related tax book additions and abatements.

The County Assessor's office records changes to property assessments on unnumbered manual forms. These forms were forwarded to the County Collector's office, and the former County Collector used the assessed valuation changes to compute the related tax amounts and manually post

additions and abatements to the tax books. The former County Collector then forwarded the assessment change forms to the County Clerk's office, and the County Clerk's office prepared sequentially numbered orders of assessment changes for County Commission approval. The County Clerk did not receive the tax book addition and abatement amounts from the former County Collector and did not receive copies of the assessment change forms directly from the County Assessor. Therefore, the County Clerk and the County Commission could not verify the accuracy and completeness of the tax book additions and abatements prepared by the former County Collector.

Because the County Assessor did not file the unnumbered assessment change forms separately (they were filed with each applicable property record) and did not prepare summaries of all assessment changes, we could not verify the accuracy and completeness of the tax book additions and abatements prepared by the former County Collector.

Sections 137.260 and 137.270, RSMo, assign responsibility to the County Clerk for making corrections to the tax books with the approval of the County Commission. The lack of independent verification and approval of assessed valuation changes made by the County Assessor and tax book additions and abatements made by the County Collector significantly increases the risk of intentional and unintentional errors and omissions to the property tax books.

2.3 Review of annual settlements

Neither the County Commission nor the County Clerk adequately reviewed or verified the amounts on the annual settlements prepared by the former County Collector. As a result, incorrect amounts recorded on the settlements prepared by the former County Collector as noted in MAR finding number 1 went undetected.

As required by Section 139.160, RSMo, the former County Collector prepared annual settlements of tax book charges and credits for the years ended February 28 (29). While these settlements were reviewed and approved by the County Clerk and the County Commission, the County Clerk did not verify the accuracy of various amounts recorded on the annual settlements. The County Clerk maintained a summary of collections recorded on the former County Collector's monthly settlements which materially agreed to collections and distributions recorded on the annual settlements. In addition, the County Clerk verified the accuracy of the current tax book charges recorded on the annual settlements. However, the County Clerk did not obtain records or verify the accuracy of amounts recorded on the annual settlements for additions, abatements, delinquent taxes, protested taxes, and city tax collections.

Section 51.150.1(2), RSMo, requires the County Clerk to maintain accounts with all persons chargeable with monies payable to the county treasury. An accurate account book would help the County Clerk ensure the amount of taxes charged and credited to the County Collector each year is complete and accurate and could be used by the County Clerk and the County Commission to verify the County Collector's monthly and annual settlements. Such procedures are intended to establish checks and balances related to the collection of property taxes.

Recommendations

The County Commission and County Clerk:

2.1 Establish procedures to prepare delinquent tax books. If preparation of delinquent tax books is not feasible, the County Clerk should total and verify delinquent tax amounts annually on March 1 and document all procedures performed.

2.2 Work with the County Assessor to ensure all tax book additions and abatements are properly recorded, approved, and charged to the County Collector.

2.3 Review the accuracy and completeness of the County Collector's monthly and annual settlements. This could be accomplished by the County Clerk maintaining a complete and accurate account book with the County Collector of all tax book charges and credits.

Auditee's Response

The County Commission and County Clerk provided the following written responses:

2.1 A new system has been adopted to do the delinquent tax books. The County Commission and County Clerk would have already implemented these steps had they been notified of the issues in previous audits that were conducted by the Missouri State Auditor's Office.

2.2 The County Assessor and County Clerk have a new system in place for all additions and abatements.

2.3 The County Clerk's office is already doing this. Due to false information that the previous County Collector reported to the County Clerk's office, it was hard to detect that monies were missing.

Auditor's Comment

2.1 Implementation of internal controls is the responsibility of county management.

3. County Collector's Controls and Procedures

Significant weaknesses existed in the former County Collector's accounting controls and procedures.

3.1 Receipts and deposits

The former County Collector did not record some property tax receipts on abstract reports and did not adequately reconcile receipts to bank deposits.

The former County Collector generally deposited monies daily and normally reconciled receipts to deposits by including corresponding paid tax statements with the deposit slips; however, some bank deposits did not include paid tax statements and were not otherwise reconciled to receipts. In addition, the former County Collector prepared manual monthly abstract lists of individual paid tax statements; however, these lists did not include daily receipt totals and were not reconciled to deposits.

As noted in MAR finding number 1, numerous paid tax statements were found in the County Collector's office which were not filed with deposit slips, were not included on monthly abstract lists for the month paid, and could not otherwise be traced to bank deposits.

Furthermore, the method of payment (cash, check, and money order) was not indicated on some tax statements and the composition of receipts was not always reconciled to the composition of deposits. The former County Collector stated the method of payment is indicated if a cash payment is made or if a check payment is received from someone other than the taxpayer; however, the composition of some deposits did not agree to the corresponding tax statements filed with the bank deposit.

Proper internal controls over receipts should include recording all paid tax statements on daily abstract or receipt lists, reconciling the lists to bank deposits, and reconciling the method of payment to the composition of deposits. Without performing such reconciliations, there is little assurance all monies received are deposited in the bank account or all receipts are properly recorded.

3.2 Bank reconciliations and liabilities

Documentation of monthly bank reconciliations was not always prepared or retained by the former County Collector. In addition, the former County Collector did not adequately reconcile liabilities to the bank account balances. As noted in MAR finding number 1, we attempted to prepare a bank reconciliation for the former County Collector's main collection account at June 30, 2011, and attempted to identify related liabilities. Our review noted identified liabilities exceeded the adjusted bank balance by $18,665.

While bank reconciliations were generally included on the back of monthly bank statements, some reconciliations could not be located and some reconciliations were not accurate. Some outstanding checks were not included on applicable bank reconciliations, and bank balances were not always reconciled to the balances recorded in the checkbook register. In addition, negative cash balances were sometimes noted in the checkbook register and the register balances were not kept up-to-date and did not appear accurate. Because liabilities exceeded the bank balance, it appears current month's receipts were used to make the previous month's distributions.

Monthly bank reconciliations and identification of liabilities are necessary to ensure records are in balance, errors are detected and corrected on a timely basis, and sufficient funds are available for the payment of all amounts due. Without the preparation of such reconciliations, there is little assurance cash receipts and disbursements are properly handled and recorded.

3.3 Partial payments

Records and procedures related to the collection of partial payments were not adequate. Receipt slips for partial payments were not numbered and the former County Collector did not issue receipt slips for some partial payments received. In addition, the former County Collector did not maintain a ledger or other record to adequately identify amounts collected and balance due from each taxpayer.

Upon our initial inquiry, the former County Collector indicated she did not accept partial payments. The Deputy County Collector indicated partial payments were accepted, recorded on unnumbered receipt slips and on the office's copy of the tax statement, and were not distributed until the taxes were paid in full. The tax statements were filed with all other unpaid statements until full payment was received, at which time the taxes were abstracted and distributed. Because receipt slips were not issued for some partial payments and because applicable receipts and balances due were not recorded on a separate ledger, it was difficult to determine the amount of partial payments held in the former County Collector's bank account.

Without accurate and detailed records for all partial payments collected and balances due, there is little assurance partial payments are properly handled and recorded.

Recommendations

The County Collector:

3.1 Record all receipts on the abstract lists and reconcile receipts to deposits by preparing daily totals on the abstract lists which agree to daily deposits. Additionally, the method of payment should be recorded on all tax statements and the composition of receipts

should be reconciled to the composition of deposits. Any differences should be investigated and explained.

3.2 Prepare and retain accurate monthly bank reconciliations. In addition, monthly lists of liabilities should be prepared and reconciled to the monthly bank balances.

3.3 Maintain accurate records of all partial payments received and due, including reconciling amounts collected to amounts held in the bank account. Additionally, pre-numbered receipt slips should be issued for all partial payments received.

Auditee's Response

The current County Collector provided the following written responses:

3.1 With the new tax system being used in the County Collector's office, there are reports that are printed from the system that show all taxes that were taken in daily. While in the process of learning the new system and getting everything set up, the newly appointed County Collector was using a computer spreadsheet to keep her daily abstracts.

3.2 Bank reconciliations are now done and looked over by the County Collector and County Clerk monthly. These bank reconciliations are matched to the partial payments ledger, interest ledger, surtax ledger, reclaimed property ledger, and any other ledgers that are on file with the County Collectors' office along with all money that was brought in and disbursed for the office for that particular month.

3.3 Pre-numbered receipt slips have been purchased and are already being used for any partial payment that is received. A partial payment ledger has already been implemented. Bank reconciliations are now matched to the partial payments ledger and other monies being held.

4. Commissions and Written Agreements

Commissions withheld by the former County Collector from some tax receipts were incorrectly calculated. In addition, written agreements with the cities for which property tax collection services are performed are not current.

4.1 Commissions

The former County Collector did not properly withhold commissions from tax collections. The County Collector withheld commissions at a higher rate than allowed by law. The former County Collector calculated commissions as a Bracket 2 collector (as defined in Section 52.260, RSMo), and a 2.5 percent commission was withheld from the first $350,000 collected and 1

percent from all additional amounts collected. The basis for a Bracket 2 collector is total annual taxes levied are less than $2 million. However, total annual taxes levied have exceeded $2 million each year, as documented on the former County Collector's annual settlements for the 4 years ended February 28, 2011. As a result, the County Collector is a Bracket 3 collector and a 1 percent commission should be withheld from all taxes collected. As a result, approximately $5,250 in annual commissions were over-withheld each year from tax collections and paid to the county General Revenue Fund.

Additionally, the former County Collector incorrectly withheld a one-half percent mailing commission on railroad and utility taxes. Section 52.250, RSMo, allows this commission on all current taxes as compensation for mailing the tax statements, exclusive of railroad and utility taxes. As a result, the former County Collector over-withheld and remitted commissions to the General Revenue Fund of $1,232, $1,490, $1,517, and $1,646 for tax years 2010, 2009, 2008, and 2007, respectively.

To ensure commissions are properly computed and paid to the General Revenue Fund, the County Collector should ensure applicable statutes are followed for the computation of commissions. To correct previous errors noted, the County Collector should determine total commissions over-withheld and make appropriate adjustments to tax and commission distributions with approval of the County Commission.

4.2 Written agreements

The county did not have up-to-date written agreements for city property tax collection services performed. The county collects property taxes for the cities of Downing, Glenwood, Lancaster, and Queen City. These agreements provide for amounts to be retained by the county to cover various operating costs and for amounts to be retained personally by the County Collector. The most recent agreements were entered into by the former County Collector in 1998 (Downing and Glenwood), 2000 (Queen City), and 2008 (Lancaster).

Section 50.332, RSMo, allows county officials, subject to the approval of the County Commission, to perform services for cities they normally provide to the county for additional compensation. Section 432,070, RSMo, requires all such contracts to be in writing. Up-to-date written contracts are necessary to clearly address the responsibilities of the cities, county, and County Collector, clearly define the amount of additional compensation to be assessed and paid to the county and County Collector, and address the proper distribution of all amounts collected.

Recommendations

The County Collector:

4.1 Recalculate commissions from past years and withhold from or make adjustments to future distributions to correct for errors noted. In the future, the County Collector should calculate and withhold commissions in accordance with state law.

4.2 Work with the County Commission to obtain current written agreements with the cities for tax collections.

Auditee's Response

The current County Collector provided the following written responses:

4.1 We will look into this matter as time allows.

4.2 The County Collector and County Commission will draw up new contracts for the collection of taxes for each individual city. The contracts will then be presented to each city for review and signatures.

Schuyler County Collector and Property Tax System Organization and Statistical Information

The County Collector bills and collects property taxes for the county and most local governments. Pursuant to Section 52.015, RSMo, the term for which collectors are elected expires on the first Monday in March of the year in which they are required to make their last final settlement for the tax book collected by them. Annual settlements are to be filed with the county commission for the fiscal year ended February 28 (29).

Kathy Roberts was the County Collector during the audit period from March 1, 2007 until August 31, 2011. Tammy Steele was appointed the Schuyler County Collector on October 24, 2011, and sworn into office on November 3, 2011.

The County Collector received compensation of $14,652 for the period March 1 through August 31, 2011. During the years ended February 28 (29), 2011, 2010, 2009, and 2008, the County Collector received compensation of $25,013, $24,871, $24,910, and $23,480, respectively. Compensation was in accordance with statutory provisions.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Schuyler County Collector did not receive any federal stimulus monies during the period March 1, 2007, to August 31, 2011.

December 2011

Report No. 2011-111

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Board of Election Commissioners, City of St. Louis

Voter Registration	The Board of Election Commissioners, City of St. Louis, (BEC) does not routinely review and update the database of registered voters, and over 2,400 voters were registered in the city and elsewhere in the state. The BEC has made significant improvements in this area since our prior audit in 2004.
Election Services Fund	The BEC deposited the additional 5 percent of election costs charged and collected to the General Fund instead of the Election Services Fund, so it is not clear the monies were used for training programs and additional supplies or equipment to improve the conduct of elections, as required by state law.
Closed Meetings	The BEC did not comply with the Sunshine Law with respect to closed meetings. Roll call votes to go into closed session were not taken and/or recorded in the minutes, the specific reasons for closing meetings were not included in the minutes, and the closed minute meetings indicate unallowable topics were discussed in closed session.
Disbursements	The BEC had no documentation that it solicited bids for five procurements.
Campaign Finance	The BEC does not adequately track all required candidate reports, so there is no assurance complete and accurate candidate reports are filed when due and late fees assessed for violations. For five candidate committees reviewed for the year ended June 30, 2011, two did not file a 40 day report, four did not file the 30 day after report, and three did not file the 8 days before or quarterly reports. In addition, for the April 5, 2011 ballot, 11 out of 29 committees failed to file an organization statement, and three candidates failed to file a termination statement.

In the areas audited, the overall performance of this entity was **Fair.***

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	The Board of Election Commissioners, City of St. Louis, did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the Board of Election Commissioners
City of St. Louis, Missouri

We have audited certain operations of the Board of Election Commissioners, City of St. Louis, in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2011. The objectives of our audit were to:

1. Evaluate the board's internal controls over significant management and financial functions.

2. Evaluate the board's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the board, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the board's management and was not subjected to the procedures applied in our audit of the board.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures.

The accompanying Management Advisory Report presents our findings arising from our audit of the Board of Election Commissioners, City of St. Louis.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Debra S. Lewis, CPA
In-Charge Auditor:	Steven Re, CPA
Audit Staff:	M. M. Williams.

1. Voter Registration

Many city voters are registered to vote in both the city and another location, which increases the risk of voter fraud occurring during elections. At our request, the Board of Election Commissioners (BEC) generated a list of potential duplicate registered voters as of June 23, 2011, from the Missouri Centralized Voter Registration (MCVR) database maintained by the Missouri Secretary of State, which showed more than 2,400 voters were registered in both the city and elsewhere in the state. Of these, 231 voters were registered twice in the city and approximately 1,050 voters were listed as active by both the city and another election authority.

The BEC does not have written procedures requiring MCVR records be reviewed for duplicate registered voters. The BEC can review and update voter registration records for duplicate registered voters throughout the state through the MCVR database. However, a review had not been performed since at least November 5, 2010, when the employee responsible for reviewing and updating duplicate voter registrations left employment. In addition, no documentation could be provided to show the review was done prior to this employee's departure. BEC management indicated they were unaware this review had not been performed recently. On June 15, 2011, there were 224,994 voters registered in the city, of which 194,330 were active.

It is apparent the BEC has made improvement in this area, when the 2,400 duplicate registrations noted during the audit are compared to over 15,000 noted in our prior audit (report 2004-040); however, more improvement is needed. The BEC, along with all election authorities, is mandated under the National Voter Registration Act of 1993 (NVRA), to conduct a program to maintain the integrity of voter registration rolls. In addition, NVRA, Section 8, requires states to maintain accurate and current voter registration lists by identifying persons who have become ineligible due to having died or moved outside the jurisdiction.

Recommendation

The BEC periodically review and investigate potential duplicate voter registrations to ensure voter registration records are as accurate as possible.

Auditee's Response

The BEC provided the following written response:

The BEC appreciates and fully complies with its responsibilities under the NVRA. This is reflected in its Mission Statement that states, in relevant part, that the mission of the BEC is to insure that "voter files are kept accurate and up-to-date."

In furtherance of that mission, the BEC utilizes various sources available to it to discharge this responsibility, including (i) the Duplicate Voter Registration Report (the "DVRR") generated by the Missouri Centralized Voter Registration ("MCVR") system maintained by the Missouri Secretary

of State (the "SOS") of voters who may be registered in more than one county in Missouri; (ii) monthly reports from the 22nd Judicial Circuit of convicted felons and persons who have been adjudged incompetent; and (iii) monthly reports from Missouri Department of Health and Senior Services of St. Louis City residents who have died. The BEC also receives voter registration and change of address information from Missouri Department of Revenue driver's license offices and various social service agencies, follows up on returned mail to try to identify voters who may have moved, and cross-checks its voter registration database with counties in Illinois. Any and every suspected violation of a voting law is promptly investigated and the results reported to the appropriate law enforcement officials if warranted.

The Report states (Page 4) that "[m]any city voters are registered to vote in both the city and another location." Although the BEC goes to great lengths to avoid duplicate registrations, it is important to place the word "many" in perspective. As a practical matter, the more than 2,400 potentially duplicate voter registrations found by the auditors represent just over 1% of the nearly 225,000 registered voters in the City of St. Louis. In contrast, the auditors at the time of the last audit of the BEC in 2004 found more than 24,000 questionable voters which was approximately 9.6% of the more than 249,000 registered voters in the City of St. Louis then. Due in part to the introduction of a centralized voter registration database, the BEC has made significant strides to improve its performance in this area in the last seven years.

The BEC conducts an investigation after every federal election of voting activity in surrounding counties, including Illinois, with a view to identifying any instances of suspected voting irregularities (which encompasses not only duplicate voter registrations, but also voters registered at a location which is a vacant lot or which contains a derelict building), with a view to turning over evidence of any such irregularity to the U.S. Attorney and/or the Circuit Attorney for the City of St. Louis. This vigilance on the part of the BEC has resulted in no less than fourteen convictions for voter fraud in the past six years.

There are some election authorities in Missouri that do not regularly check the Duplicate Voter Registration Report ("DVRR") available through the MCVR system. As a result, the SOS periodically issues a written reminder to such election authorities reminding them of their voter registration list-monitoring obligation. The BEC has never received such a reminder from the SOS. Although there is no specific statutory or regulatory mandate concerning the frequency with which list maintenance activity must be performed, it is impossible for the BEC to eliminate all duplicate voter registrations in its database if other election authorities are not fulfilling their responsibilities in this regard.

In analyzing the issue of duplicate voter registrations, it is important to understand that on any given day the DVRR will disclose the names of thousands of voters who appear to be registered in more than one county. For example, the DVRR for June, 2011, which was provided to the auditors, contained more than 5,000 duplicate names; the one for September 2011, contains more than 3,000 such names; and the DVRR for October, 2011 contains nearly 3,600 names. This is because there is no consistency among the various counties in Missouri as to when they check the DVRR and update their records. There is also one election authority in Missouri that is not connected to the MVCR system, which means that the names of voters who might have been registered in that county at one time and are now registered in St. Louis City (or vice versa) always appear on the DVRR.

In checking or "working" the DVRR, staff at the BEC checks every name on the report to verify that the information is accurate and that each voter listed as being registered in both St. Louis City and another county is the same person (i.e., has the same date of birth and/or the same last four digits of their Social Security Number). If so, and the voter's most recent activity is in our jurisdiction, staff merges that individual's voter registration record from the other jurisdiction with ours. Conversely, if the voter's most recent activity is in the other jurisdiction, then staff will delete the voter's registration information from our database. If, in each instance, the "other jurisdiction" is not similarly working the DVRR, then that particular voter's name will appear on the next DVRR printed and worked. In addition, as noted above, since there is one county in Missouri that has its own voter registration database that is not part of MCVR, the names of voters registered both there and in St. Louis City will always appear on the DVRR, even though the BEC has properly worked previous Duplicate Voter Registration Reports.

There are other reasons why names appear on the DVRR For example, a change in the criteria by which MCVR searches for duplicate names may result in more names appearing on the DVRR than before. For example, in comparing the October DVRR with the September list we noticed the addition of the names of some voters that one would have expected to appear on the list previously. This was because MCVR was previously unable to identify as a duplicate voter someone who was registered in one county under a maiden name and in a different county under a married name. Now that such identification is possible, additional duplicate voter registrations will be able to be deleted.

In an effort to further improve its performance in this area the Democratic and Republican Supervisors in the Registration Department are now working the DVRR each month and signing off on the Report after it is worked to verify that the review has been completed. This monthly review requirement is being incorporated in a written Registration Department Procedures Manual that is being developed to insure that anyone new to the BEC will know what is required in this regard. We also anticipated dividing

this work among several staff members during a busy election cycle so that the Report can be worked more frequently.

2. Election Services Fund

The BEC did not deposit the additional 5 percent of election costs charged and collected to the Election Services Fund as required. As a result, it could not be determined whether these monies were spent in compliance with state law. The monies were deposited to the city's General Fund. BEC management indicated they were not aware the revenues should be credited to the Election Services Fund. The BEC charged and collected $64,743 for the additional 5 percent of election costs during the year ended June 30, 2011.

Section 115.065.4, RSMo, states the Election Services Fund shall be budgeted and expended at the direction of the election authority and shall not be used to substitute for or subsidize any allocation of general revenue for the operation of the election authority's office without the express consent of the election authority. The Election Services Fund shall be used by the election authority for training programs and purchase of additional supplies or equipment to improve the conduct of elections.

Recommendation

The BEC ensure the 5 percent election revenues are deposited to the Election Services Fund and budgeted and spent in accordance with state law.

Auditee's Response

The BEC provided the following written response:

The BEC agrees with the recommendation and notes that it is developing a Election Procedure Manual that will set forth written procedures for every department applicable to the conduct of an election that will include a section on election costs and the proper accounting thereof. This Manual will be finalized and in effect for the Presidential Preference Primary Election scheduled for February 7, 2012.

3. Closed Meetings

Procedures for conducting and documenting meetings need improvement.

- The minutes for open meetings do not document the specific reasons for closing the meeting. For example, the open meeting minutes normally indicate the Board has adjourned its regular meeting and entered into closed session to discuss legal, personnel, purchasing, and real estate matters.

- A roll call vote to go into a closed session is not taken and/or recorded in the minutes.

- The closed minutes were not sufficient to demonstrate that issues discussed were allowable under Chapter 610, RSMo, the Sunshine Law.

Some of these issues included approval for payment of legal fees, a Christmas party for the office staff, payment of some vendor bills, employee training, and voter registration cards.

Chapter 610, RSMo, provides that the question of holding a closed meeting and the reason for the closed meeting be voted on at an open meeting by a roll call vote and requires minutes be prepared for all closed meetings. The law also provides that public governmental bodies shall not discuss any other business during the closed meeting that differs from the specific reasons used to justify such meeting, and limits what types of topics can be discussed in closed meetings.

Recommendation

The BEC ensure compliance with the Sunshine Law regarding closed meetings.

Auditee's Response

The BEC provided the following written response:

The BEC agrees with the recommendation and is pleased to report that, even while the audit was continuing, it had implemented the changes recommended by the auditors. This includes (i) stating on the notice that is posted announcing a Board meeting that the Board may go into closed session pursuant to RSMO Section 610.021 to discuss legal, personnel and real estate matters, if necessary; (ii) reflecting in the minutes of open session a roll call vote to go into closed session; (iii) documenting in the minutes of the closed session that any issues discussed were permissible under the Sunshine Law; (iv) recording the roll call vote of any matters voted on in closed session; and (v) reflecting in the minutes of the open session the roll call votes, if any, taken during closed session.

4. Disbursements

Although BEC personnel indicated bids were probably solicited, no documentation of bids was provided for the following items:

Item or Service	Amount
Transportation costs	$ 12,000
Computer equipment	19,848
Handicap equipment	27,961
Election supplies	2,150
Computer maintenance	30,000

As a result, there is no assurance the BEC is selecting the most economical cost when obtaining goods or services and is in compliance with its informal bid policy.

BEC personnel stated they use vendors approved by the City of St. Louis Supply Division when possible or solicit three bids for goods or services greater than $1,000. Bidding for major purchases helps ensure the BEC

receives fair value by contracting with the lowest and best bidders. Bid documentation should include a list of vendors contacted, a copy of the bid specifications, copies of all bids/proposals received, justification for awarding the bid/proposal, and documentation of discussions with vendors.

Recommendation

The BEC maintain adequate documentation of all bids, including the reasons why bids are not solicited and why certain bids are selected.

Auditee's Response

The BEC provided the following written response:

The BEC agrees with the recommendation and is writing a formal policy regarding the purchase of goods and services that will (i) detail when bids need to be solicited and whether such bids need to be in writing; (ii) require that verbal bids be documented and that all bids be retained for at least three years; and (iii) set forth criteria by which bids are to be evaluated and when factors other than cost should be considered (such as timing; a vendor's prior history with the BEC and/or the City of St. Louis; etc.). It should be noted that the BEC has always requested bids for major purchases of goods and/or services and then selected the vendor whose bid best served the interests of the taxpayers of the City of St. Louis. Per your recommendation, that practice will now be documented.

5. Campaign Finance

The BEC did not perform several duties related to monitoring campaign finance issues to ensure campaign disclosure reports were filed correctly and timely. In addition, the BEC does not maintain an adequate filing, coding, and cross indexing system; notify candidates for failing to file; assess late filing fees; or notify the Missouri Ethics Commission (MEC) of violations.

In April 2010, the BEC entered into a Local Campaign Finance Reporting Waiver Agreement with the MEC. As a result of this agreement, only candidate committees to elect committeemen, committeewomen, members of the Board of Education, and trustees of the Junior College District, or committees formed to support/oppose ballot measures only in the City of St. Louis are required to file campaign reports with the BEC.

5.1 Coding and index system

Several candidate reports were not filed with the BEC as required; however, there was no indication the BEC noted the nonfiling or attempted to resolve or report the non-compliance to the MEC. The BEC has not developed a sufficient and complete coding and cross-indexing system to track all required reports. As a result, there is no assurance required reports are filed when due, the reports filed are reviewed for completeness and accuracy, the person or committee is notified of missing reports, the MEC is notified of violations, and any late fees are assessed.

Between July 1, 2010, and June 30, 2011, there were four elections with 12 candidates who should have filed campaign reports. We reviewed reporting

for 5 of the 12 candidate committees and noted 2 did not file a 40 day report, 4 did not file the 30 day after report, and 3 did not file the 8 days before or quarterly reports as required by law. In addition, the BEC did not notify four of the five candidates or the MEC of the violations. The BEC issued a certificate of election to the winners of these elections although the committees had not filed the required reports with the BEC.

Section 130.056.2, RSMo, states each appropriate election officer accept reports and statements required to be filed with the person's office; develop for the officer's constituency a filing, coding, and cross-indexing system; make the reports and statements filed available for public inspection and copying; preserve such reports and statements for a period of not less than 5 years from the date of receipt; examine each report and statement filed to determine if the reports and statements appear to be complete and filed within the required time; notify a person required to file a report or statement the person has failed to file a report or statement as required by law; and notify the MEC if the person has reasonable cause to believe a violation has occurred. In addition, requirements for disclosure reports are set forth in Section 130.041, RSMo, and the required times to file are specified in Section 130.046, RSMo.

5.2 Statement of organization and termination

The BEC does not ensure all candidates and committees file a statement of organization and a termination statement. As a result, there is no assurance candidates and committees are filing campaign reports with the BEC as required by law. We obtained a list of all candidates and issues appearing on the April 5, 2011, ballot and noted the BEC did not have a statement of organization on file for 11 of 29 committees. In addition, three candidates failed to file a termination statement.

Section 130.021.5, RSMo, states the treasurer or deputy treasurer acting on behalf of any person or organization or group of persons and any candidate who is not excluded from forming a committee in accordance with the provisions of Section 130.016, RSMo, shall file a statement of organization with the BEC. In addition, Section 130.021.8, RSMo, provides upon termination of a committee, a termination statement indicating dissolution shall be filed not later than 10 days after the date of dissolution with the appropriate officer or officers with whom the committee's statement of organization was filed.

Recommendations

The BEC:

5.1 Develop a coding and index system to track failure to file and late filing of campaign finance reports; assess late filing fees as required; and notify candidates, committees, and the MEC when reports are not filed.

5.2 Ensure all candidates and committees file a statement of organization and a termination statement with the BEC as required.

Auditee's Response

The BEC provided the following written response:

The BEC agrees with the recommendations and has begun to develop a tracking system that will be implemented for the December 20, 2011 Special Election to fill a vacancy in the 5th Ward and utilized for all elections thereafter. In this regard, it should be noted that, with changes in the Campaign Finance Disclosure reporting requirements implemented by the MEC in April, 2010, the BEC's responsibility for monitoring the filing of campaign finance reports is limited to candidate committees to elect (i) party city central committeemen and women, (ii) members of the Board of Education, and (iii) trustees of the Junior College District, and committees formed to support/oppose local ballot measures.

Written procedures will be developed to track the filings required of all committees for which the BEC is responsible, and to ensure that all candidates (including those required to file their campaign finance disclosure reports with the MEC) file with the BEC a Statement of Committee Organization or Exemption Statement at the start of a campaign and a post-election Statement of Committee Termination or other document reflecting the committee's status (such as converting to a continuing committee). In the interest of transparency, the BEC will also provide a link on its website so that anyone who is interested can check the status of a committee's campaign finance report filings.

It should also be noted that the BEC did not issue to any winning candidate a certificate confirming their having won their election without verifying that all required campaign finance disclosure reports had been filed. It did, however, fail to document such compliance in each instance. Such failure will not recur with the implementation of the tracking system described above.

Board of Election Commissioners City of St. Louis
Organization and Statistical Information

The Board of Election Commissioners for the City of St. Louis exists pursuant to Section 115.017, RSMo, and was originally established under city ordinance in 1878. The four members of the board are appointed to four year terms by the Governor with the advice and consent of the Senate. Two members shall be from one major political party and two members shall be from the other major political party. The chairman and the secretary must not be from the same political party.

The board's primary duties are to conduct all elections in the City of St. Louis, maintain voter registration records, maintain and review campaign finance reports, and estimate and collect the cost of elections from the state and local political subdivisions who have candidates or issues on the ballot. The board is authorized 24 full-time employees who serve at the pleasure of the board. The board receives most of its funding from the City of St. Louis. Other revenue sources are the reimbursement of election costs from the state and other political subdivisions, and the sale of voter registration lists, precinct maps, copies, and certificates of residency. Monies received are turned over to the City of St. Louis Office of Treasurer for deposit and reported to the Office of Comptroller. Following approval of vouchers by the board, disbursements are handled through the City Comptroller and Treasurer offices. The board does not maintain separate bank accounts. The board's annual operating budgets are set by the Board of Estimate and Apportionment and the Board of Aldermen.

The city is divided into 28 wards and 203 voting precincts. The board attempts to recruit over 1,200 election judges and election day workers and uses about 120 polling places for a citywide election. The board also conducts registration and absentee voting visits to about 20 nursing homes for a citywide election. As of June 16, 2011, there were 194,330 active and 30,664 inactive voters registered in the city. The cost to conduct a citywide election is over $300,000, excluding routine full-time board personnel and operational costs. The following table shows the number of registered voters, number of ballots cast, and the voter turnout for the four elections held during the year ended June 30, 2011.

Election	August 2010	November 2010	March 2011	April 2011
Registered Voters	183,838	188,480	194,060	194,640
Votes Cast	34,152	91,907	13,094	39,474
Voter Turnout	18.58%	48.76%	6.75%	20.28%

Board Members

The board member positions and political party affiliation on June 30, 2011, are listed below:

Joan M. Burger, Chairperson (Democrat)
Jack Lary, Secretary (Republican)
Benjamin M. Phillips, Sr., Member (Democrat)
Andrew L. Schwartz, Member (Republican)

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Board of Election Commissioners did not receive any federal stimulus monies during the year ended June 30, 2011.

Missouri State Auditor

Pulaski County

November 2011

Report No. 2011-110

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Pulaski County

Prosecuting Attorney Procedures

Although prior audit reports identified inadequacies in the Prosecuting Attorney's procedures, improvements have not been made and significant weaknesses still exist. Some receipts were not recorded in the accounting system or deposited timely, and money orders are not restrictively endorsed immediately. These weaknesses increase the risk of loss, theft, or misuse of funds. Fifty-nine receipts, totaling $8,034, were not deposited or recorded in the accounting system. Auditors were eventually able to account for 40 of these receipts. However, the disposition of 19 receipts, totaling $2,777, could not be verified.

Accounting duties are not adequately segregated, and the Prosecuting Attorney does not conduct a detailed review to ensure all monies are accounted for properly. The Prosecuting Attorney's office lacks an adequate system to account for the disposition of bad check complaint forms, and the auditors identified two complaint forms for which no collection actions had begun. The Prosecuting Attorney's office did not timely perform bank reconciliations and did not follow up on unreconciled differences or outstanding checks. The county owes the Missouri Office of Prosecuting Attorneys $17,754 for fees collected on bad check cases dating back to June 2006.

Sheriff Procedures

The Sheriff's department lacks adequate controls and oversight for managing inmate monies. The cash on hand for inmates was $200 less than the amount shown on inmate account logs. Accounting duties for civil service, inmate monies, and conceal and carry monies are not adequately segregated or reviewed. Receipt slips are not always issued, some receipt slips are unnumbered, and the numerical sequence of numbered receipt slips is not accounted for properly. Civil service fee receipts and conceal and carry permit fee receipts are not deposited timely and intact, increasing the risk of loss, theft, or misuse of funds. The Sheriff's department did not promptly return monies held in trust to released inmates and did not turn certain monies over to the County Treasurer as required by state law. The Sheriff's department should close two old inactive bank accounts with a total balance of over $3,500. Our prior audit reports contained findings similar to most of the findings in this report.

Property Tax System

As noted in our prior audit report, the property tax system lacks adequate internal controls and procedures. Neither the County Clerk nor the County Commission reviews the activities of the County Collector or verifies the County Collector's monthly or annual settlements. Annual settlements do not include tourism taxes, and the County Clerk does not prepare or review the tax books. In addition, various aggregate abstract reports were not consistently prepared as required by state law.

County Procedures

The County Commission meeting minutes did not provide sufficient details to show how some issues discussed in closed meetings were allowable under the Sunshine Law. Outstanding checks are not adequately followed up.

The 2011 county budget understated the principal balance of the Neighborhood Improvement District bonds by nearly $50,000.

Additional Comments

Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Fair**.* However, the audit revealed several shortcomings within the Prosecuting Attorney's office and the Sheriff's department.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

During the 2 years ended December 31, 2010, the county was awarded the following Federal Stimulus funds:

- A $288,921 Recovery Act-Assistance to Rural Law Enforcement to Combat Crime and Drugs: Enhancing Rural Corrections, Detention and Jail Operations grant, of which $99,527 was received. The county spent $97,475 for jailor's salaries and other payroll-related expenses and $2,052 for training.
- A $170,502 Recovery Act-Assistance to Rural Law Enforcement to Combat Crime and Drugs: Improving Rural Law Enforcement Investigations grant, of which $64,862 was received. The county spent $60,963 for dispatcher and evidence technician salaries and other payroll-related expenses and $3,899 for a barcode reading program.
- A $58,610 Recovery Act-Edward Byrne Memorial Justice Assistance Grant Program Local Solicitation grant, of which $57,309 was received and expended for rifles, ammunition and other equipment.
- The Senate Bill 40 Board received $12,396 under Title V, Section 5011 of the Recovery Act which provided additional funding through the Medicaid Federal Medical Assistance Percentage grant and the Targeted Case Management Case grant for Medicaid expenditures and case management services.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 21

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Pulaski County

We have audited certain operations of Pulaski County in fulfillment of our duties under Section 29.230, RSMo. In addition, McBride, Lock and Associates, Certified Public Accountants, has been engaged to audit the financial statements of Pulaski County for the 2 years ended December 31, 2010. The scope of our audit included, but was not necessarily limited to, the 2 years ended December 31, 2010. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Pulaski County.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Randall Gordon, M.Acct., CPA, CGAP
In-Charge Auditor:	Gayle Garrison
Audit Staff:	Lori Bryant
	Wayne Kauffman, MBA
	Brian Hammann

1. Prosecuting Attorney Procedures

Prior audit reports have addressed the inadequacy of the Prosecuting Attorney's procedures. Improvements have not been made and significant weaknesses still exist. The disposition of receipts totaling $2,777 was not properly documented. Procedures related to receipts, supervisory review, accounting for bad check complaint forms, and bank reconciliations are in need of improvement. In addition, fees collected on bad check cases have not been properly disbursed. Prosecuting Attorney receipts totaled approximately $211,000 in 2010 and $186,000 in 2009.

1.1 Receipts

Accounting records were not sufficient to verify the disposition of 19 receipts totaling $2,777. The following control weaknesses were noted related to receipt records and procedures.

- Receipts are not deposited intact and some receipts were not recorded in the accounting system or deposited. While receipt slips are written when monies are received, the monies receipted are not reconciled to monies recorded in the accounting system or to monies deposited. Monies received are not always deposited intact with other receipts. Monies received from offenders are not deposited immediately upon receipt if: 1) a case has not been established, 2) the payment is a partial payment on an initial demand for payment of a bad check, 3) the offender has a zero case balance, or 4) the payment is due to another prosecuting attorney or to a court. Some receipts are deposited at later dates if a case is subsequently established.

  Our review of January 2009 through July 2011 receipts identified 59 receipts totaling $8,034 that were not deposited or recorded in the accounting system. However, the disposition of these receipts was not adequately documented. When monies received were forwarded to another Prosecuting Attorney's office or a Circuit Court, or were returned to the offender, documentation such as a receipt slip was not obtained to verify the disposition of the monies. Our review included sending confirmation requests to the offenders, calling the Prosecuting Attorney in another county, and contacting the Circuit Court. These contacts resulted in accounting for 40 of the 59 receipts. However, confirmation responses from four individuals indicated that seven payments totaling $818 were not returned as indicated in the accounting records. Confirmation requests were not returned or information was not adequate regarding the other receipts. Ultimately, documentation was not sufficient and we could not verify the disposition of 19 receipts totaling $2,777.

- Receipts are not recorded in the accounting system or deposited timely. Receipts are recorded in the accounting system when deposits are prepared. Deposits occurred approximately one or two times per week and often exceeded $1,000.

- Money orders are not restrictively endorsed immediately upon receipt. Money orders are received and recorded on a prenumbered receipt slip by one legal assistant and endorsed by a second legal assistant when the monies are recorded in the accounting system and prepared for deposit. However, the endorsement is not a restrictive endorsement and does not indicate "for deposit only."

To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds, all monies receipted should be recorded in the accounting system timely, deposited intact timely, and disbursed by official check. In addition, monies receipted should be reconciled to the accounting system and to monies deposited. Finally, money orders should be restrictively endorsed immediately upon receipt.

1.2 Supervisory review

Accounting duties are not adequately segregated. One legal assistant receipts restitution, bad checks, and delinquent income tax monies and another legal assistant accounts for the numerical sequence of receipt slips, prepares deposits, records receipts in the accounting system, prepares disbursements, and performs the bank reconciliations. The Prosecuting Attorney does not perform detailed reviews to ensure all monies received are properly deposited, recorded in the accounting system, and disbursed to the appropriate party. Because the legal assistants are primarily responsible for all accounting functions, routine and thorough supervisory reviews are essential. As indicated above, our review identified 19 receipts totaling $2,777 which were not deposited and for which the disposition could not be determined or verified.

Thorough supervisory reviews help ensure all transactions are accounted for properly and assets are adequately safeguarded. Such reviews would reduce the possibility of errors, theft, loss, or misuse of funds going undetected. Internal controls would be strengthened by the Prosecuting Attorney reviewing the receipting, recording, and disbursing functions. Documentation is necessary to demonstrate performance of the reviews.

1.3 Tracking procedures

An adequate system to account for the disposition of all bad checks submitted to the Prosecuting Attorney's office for collection has not been established. Our review identified two complaint forms in a case file that were not entered in the accounting system. As a result, the Prosecuting Attorney's office had not initiated collection on the bad checks indicated on the complaint forms. Currently, merchants complete an unnumbered complaint form when the bad check is turned over to the Prosecuting Attorney for collection. Information from the complaint form is entered into the computer system, and the complaint form and information regarding the handling of the case is maintained in the individual case file. A sequential tracking number is not assigned. Without a tracking procedure, there is no assurance all bad check complaint forms are entered into the system.

To ensure all bad checks turned over to the Prosecuting Attorney are handled and accounted for properly, a sequential number should be assigned to each bad check complaint form or bad check received. This number should be used to track the status and disposition of the corresponding bad check, either through the use of a manual log or by utilizing the computer system.

1.4 Bank reconciliations

Bank reconciliation procedures are not adequate to ensure accounting records agree with bank records, errors are discovered on a timely basis, and outstanding checks are followed up on properly.

- Bank reconciliations were not prepared timely. Most of the 2010 bank reconciliations were prepared several months after the bank statement closing dates. As a result, bank reconciliations, which are prepared using the accounting system, include numerous outstanding transactions to account for receipts and disbursements made after the bank statement closing dates and the reconciliations are unnecessarily complicated.

- Unreconciled differences on the bank reconciliations are not properly investigated and resolved. The August 26, 2011, bank reconciliation indicated the book balance exceeded the reconciled bank balance by $576 although as of December 27, 2010, there was only a $4 difference. The Prosecuting Attorney could not provide further explanations for how the unreconciled differences occurred. Our review identified the following differences between book and bank transactions which account for the $576 difference.

Transaction Description		Transaction Amount
January 26, 2011, Check order charge	$	471
July 6, 2011, Check order charge		38
July 25, 2011, Uncleared adjustment		74
August 2011, Interest earned		(7)
Total	$	576

In addition to the differences shown above, we noted other unreconciled differences occurred and were not corrected timely. For example, a $117 check cleared the bank in January 2011 but was not removed from the outstanding check list until June 2011. Also, 83 checks totaling $12,554 cleared the bank in October 2008, but were not removed from the outstanding check list until March 2009.

- Follow up on outstanding checks has not been performed. As a result, at June 27, 2011, 12 checks totaling $2,158 had been outstanding over a year. Our review identified one check for $905 had been returned to the

Prosecuting Attorney's office by the victim on May 20, 2010. However, the returned check was not canceled in the accounting system nor had the offenders account been corrected to repost the $905 in the offender's undisbursed balance as of August 2011.

Timely preparation and review of bank reconciliations including investigation and correction of unreconciled amounts is necessary to ensure accounting records agree with bank records and errors are discovered on a timely basis. The Prosecuting Attorney should follow up on outstanding checks to ensure monies are appropriately disbursed to the payee or as otherwise provided by state law.

1.5 Bad check fees

The county has not made required payments to the Missouri Office of Prosecuting Attorneys (MOPS) for fees collected on bad check cases since January 2007, and as a result, owes MOPS $17,754 as of August 31, 2011. MOPS fees collected by the Prosecuting Attorney's office between January 2007 and August 2011 were remitted to the County Treasurer for deposit in the Prosecuting Attorney User Fund. However, the current and former Prosecuting Attorney did not provide information to the County Clerk regarding the fees to be paid to MOPS. In addition, MOPS fees collected in June, July, and December 2006 were also remitted to the County Treasurer and deposited in the Prosecuting Attorney User Fund, but were not paid to MOPS.

Section 570.120.5(1), RSMo, provides for the Prosecuting Attorney to collect a fee of $5 on each bad check received for prosecution. The MOPS fee must be transmitted at least monthly by the County Treasurer to the Missouri Director of Revenue for credit to the MOPS Fund.

Similar conditions previously reported

Similar conditions to points 1.1, 1.2, and 1.4 were noted in our two prior audit reports.

Recommendations

The Prosecuting Attorney:

1.1 Ensure all monies received are recorded timely in the accounting system, deposited intact timely, and disbursed by official check. In addition, monies receipted should be reconciled to entries in the accounting system and to the monies deposited. Money orders should be restrictively endorsed immediately upon receipt.

1.2 Perform and document supervisory reviews of the receipting, recording, and disbursing functions.

1.3 Develop procedures and records that provide sufficient information to track the disposition of all bad check complaints filed.

1.4 Ensure bank reconciliations are prepared and reviewed timely. In addition, the Prosecuting Attorney should investigate and resolve unreconciled differences on the bank reconciliations and follow up on outstanding checks.

1.5 Remit $17,754 to the Missouri Director of Revenue for MOPS fees previously collected, and remit MOPS fees monthly as required by state law.

Auditee's Response

The Prosecuting Attorney provided the following written responses:

Thank you for allowing me to comment on the findings of your audit. As I took office in January 2011, and this audit primarily focuses on the years 2009 and 2010, I am only able to comment on the situation as I found it at the beginning of this year and the changes we have made and continue to make to improve the Pulaski County Prosecutor's Office.

1.1 When I assumed office in January 2011, I found significant issues and problems with the bad check program. Some of these are issues noted in the audit. The most significant issue I found was the failure to file or follow up on many of the bad checks complaints. The filing of these cases became our priority because of the possibility of the running of the statute of limitations, which would preclude us from the filing of these cases. The second problem I found was the inadequate receipting process and lack of procedures for receiving cashier's checks and money orders. For example, there were two receipt books with duplicate receipts and on one the words, "Stop due to mess on computer," written on the front. Finally, I found the accounting program that the office was using to be confusing and not adequate. This program made it difficult to reconcile the account. As was commented on in the report, these problems have resulted in many deficiencies over the past two years. However, it is important to note that despite these problems, all funds were accounted for and only .0074% of all funds collected and disbursed were not able to be verified and there is no allegation of any theft or misuse of these funds.

As a result of these problems, and at my direction, the office is now following all of the recommendations of the audit report suggested in Recommendation 1.1. All monies are recorded by sequential receipts by one clerk, and deposited by a separate clerk in order to separate duties and reduce the possibility of fraud or misappropriation of restitution monies. Secondly, the office does not accept cash but only certified checks and money orders. Upon receipt, these are stamped with a restricted endorsement of "For Deposit Only." All monies received are now disbursed by official

check. The account is reconciled on a monthly basis. Finally, the office is switching to a new and improved accounting system on January 1, 2012 that also works with the office case management system. This new program will allow the office to more easily account for all receipts and disbursements and integrate it with the case management system.

1.2 *Upon assuming office, as stated above, there were a number of problems discovered with the bad check program. Immediately, a report was developed so that I could personally review the deposits and disbursements at least twice each month. As a result of the recommendations of the audit, I now personally review each bank statement and reconciliation. On January 1, 2012, the switch to the Karpel accounting and case management program, which creates much better reports, will assist in the monitoring of deposits and disbursements. I believe these changes are in accord with the recommendations of the audit.*

1.3 *Upon taking office, we conducted an inventory of numerous boxes of records that were disorganized and in storage. We found numerous bad check complaint forms from merchants that had not been acted upon, and the primary focus has been to pursue as many of those cases as was possible prior to the statute of limitations expiring. It is impossible to assign numbers to the bad check complaint forms when they are disbursed to merchants, as many of these forms are copied by merchants and are designed to be readily available. However, when the forms are received in the office, they are now assigned a case number through the same process as occurs in all other criminal cases referred to my office. This is done through the Karpel case management system, and on January 1, 2012, the bad check function of my office will be fully integrated into the Karpel case management program. This system will allow my office to track the disposition of all bad check complaints which are submitted to my office. Through these changes, I believe all issues raised in the audit will be resolved.*

1.4 *The bank reconciliations are now prepared and reviewed on a monthly basis. The account is reconciled to date. Reconciliation reports are now presented to the Prosecuting Attorney for review and if any problems are found, they are investigated. Any outstanding checks not cashed are investigated and if the rightful owner is not found, the money will be turned over to the State unclaimed property fund in a timely fashion. On January 1, 2012, the switch to the Karpel accounting and case management system will allow for better tracking of bank reconciliations. These changes address the recommendations raised in the audit.*

1.5 It is unclear why the prior Prosecuting Attorney stopped the payments to MOPS as required by statute. Upon learning of this issue, I determined the amount owed for 2011 and a payment was immediately made to the State Treasurer. All payments for 2011 are now current. In addition, we developed a report to send to the County Treasurer informing her of the amount to pay each month. As to the payments for 2007-2010, I must leave that decision to the County Commission as all funds for those years were turned over to the County's General Revenue fund in each of those years.

2. Sheriff Procedures

Procedures related to inmate monies, supervisory reviews, receipts, deposits, disbursements, and bank accounts need improvement. Sheriff receipts totaled approximately $286,000 in 2010 and $329,000 in 2009.

2.1 Inmate monies

Cash totaling $1,392, was held in the Sheriff's vault in trust for inmates as of June 28, 2011. Cash on hand held for inmates was $200 less than the balances recorded on the inmate account logs. The lack of adequate controls and the absence of proper oversight allowed this discrepancy to remain undetected. In addition, records are inadequate to account for all inmate monies received and returned to inmates. A reconciliation of monies on hand in the inmate envelopes to the inmate manual account logs is not performed. Our review indicated cash shortages for four inmates ranging from $2 to $144 and cash balances for three additional inmates exceeded the inmate manual account logs by as much as $5.

Receipt slips are issued when inmate monies are received, and a manual account log is used to document cash held in the Sheriff's safe in trust for inmates and the release of monies from the safe to the inmates. However, all monies receipted are not recorded on the inmate logs and inmate signatures are not always obtained to document authorization to disburse monies. Some monies are released to inmates immediately upon receipt for use in the jail commissary vending machines. These receipts and disbursements are not recorded in the inmate logs or verified by inmate signatures. In addition, although inmate signatures are obtained when inmates withdraw monies for use in the jail vending machines, signatures are not obtained when monies are withdrawn to purchase prepaid telephone cards.

To reduce the risk of loss, theft, or misuse of funds, all monies received should be deposited in an official bank account. In addition, all inmate monies received should be recorded on the inmate account logs and all disbursements should be clearly documented on the log. The inmate's signature should be obtained on the log each time monies are disbursed. Any cash balances which remain on hand should be periodically reconciled to the inmate logs.

2.2 Supervisory review

Accounting duties are not adequately segregated for civil service, inmate monies, or conceal and carry monies. The duties of recording receipts in the accounting records, preparing deposits or maintaining inmate cash funds, and accounting for the numerical sequence of receipt slips are primarily performed by one individual for each of these receipt sources. The Sheriff does not perform detailed reviews to ensure all monies received are properly deposited or placed in the respective inmate's cash envelopes, recorded in the accounting records, and disbursed to the appropriate party.

To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds, the Sheriff should develop a system to review monies received that would include reconciling all monies received to deposits, transmittals, or entries on the inmate account logs.

2.3 Receipts

Receipt procedures need improvement. Various individuals collect monies for bonds, conceal and carry weapon permits, sales of prepaid telephone cards to inmates, and inmate funds and periodically remit those monies to the Chief Deputy. In addition, the Chief Deputy collects monies for serving civil papers and other miscellaneous receipts.

- The Sheriff issues unnumbered receipt slips for cash bonds received at the jail.

- Receipt slips were not issued for inmate monies until February 2011, although inmate monies were collected throughout the 2 years ended December 31, 2010. As a result, documentation is not adequate to demonstrate that inmate monies were properly maintained and distributed on behalf of the inmates.

- The numerical sequence of receipt slips for civil paper service, inmate monies, and conceal and carry permits are not accounted for properly. Three separate receipt books are maintained by various individuals for these three receipt sources. However, no one accounts for the numerical sequence of the receipts to ensure all civil paper service receipted are properly deposited, all inmate monies receipted are properly recorded in the inmate account logs, and all conceal and carry permit monies receipted are properly deposited or transmitted to the Chief Deputy.

To properly account for all monies received, the Sheriff should ensure all monies received or transmitted are recorded on prenumbered receipt slips immediately upon receipt and account for the numerical sequence of all receipt slips.

2.4 Deposits

Civil service fee receipts and conceal and carry permit fee receipts are not deposited intact.

- Civil service fee receipts, which may include payments in the form of cash, are held for long periods of time and are not deposited intact or timely. Civil service fees are paid before the civil papers are served; however, the fees are held by the Chief Deputy until the civil papers are served and are then deposited. Deposits were made on five different days during December 2010, and the amounts deposited averaged approximately $4,100. At June 15, 2011, the undeposited civil service fees receipts totaled $4,125, including $130 in cash, and 44 checks dated between January 20, 2011, and June 14, 2011.

- The deposit and transmittal of state and county conceal and carry permit fees collected are not performed at the same time. Although received on the same day, the state fee may be deposited to the conceal and carry bank account on a different day than when the county fee is transmitted. The county fee is subsequently deposited to the Sheriff's fee account but these receipts are not deposited intact. As a result, the verification of monies on hand and the ultimate disposition of monies is made more difficult.

To adequately account for collections and reduce the risk of loss, theft, or misuse of funds, deposits should be made intact and in a timely manner.

2.5 Disbursements

Monies are not disbursed on a timely basis.

- In July 2011, cash totaling $293 was held in the safe for 17 inmates that had been released from jail. The release date for one inmate could not be determined because the inmate's records could not be located by the Sheriff. The release date for six individuals was in 2010 and ten individuals in 2011. These closed account balances create additional and unnecessary record keeping responsibilities.

- A $400 electronic funds transfer was received from the Social Security Administration on October 22, 2010, due to the incarceration of an individual who was receiving Social Security benefits. However, these monies had not been turned over to the County Treasurer as of July 2011.

- Interest totaling $1,106 earned on the bank accounts has accumulated during the 2 years ending December 31, 2010, and had not been turned over to the County Treasurer as of July 2011.

To ensure monies held in trust for inmates is properly returned to inmates, an attempt should be made to disburse inmate accounts to inmates upon their release. The Sheriff should also attempt to locate prior inmates with account balances and disburse the inmate funds to the inmates. If the inmates cannot be located, the amounts should be disbursed to the state

Unclaimed Property Section as required by Sections 447.500 through 447.595, RSMo. In addition, all accountable receipts and interest earned should be turned over to the County Treasurer monthly to reduce the risk of misappropriation of assets.

2.6 Inactive bank accounts

The Sheriff has two old inactive bank accounts which should be closed.

- The old inmate account was used prior to 2010 for holding inmate monies received, and had a balance of $2,560 as of May 31, 2011. Bank reconciliations were not performed during the 2 years ended December 31, 2010, and the Sheriff is unsure when the last reconciliation was performed for this account. Our review determined there was an unidentified balance of $128 in the account at December 31, 2010.

- The old fee account had a balance of $945 as of December 31, 2010. This balance consisted of 47 checks which had been outstanding over a year.

To reduce the risk of loss, theft, or misuse of funds, inactive bank accounts should be reconciled and outstanding checks should be followed up timely. The Sheriff's Department should attempt to identify and distribute the funds held in old inactive bank accounts, dispose of any unclaimed or unidentified funds in accordance with state law, and close the accounts.

Similar conditions previously reported

Similar conditions to points 2.2 and 2.3 were noted in our prior audit report and similar conditions to points 2.4, 2.5, and 2.6 were noted in our two prior audit reports.

Recommendations

The Sheriff:

2.1 Deposit all inmate monies in an official bank account and ensure inmate monies are accounted for properly by recording all inmate monies received on the inmate account log and requiring the inmate signatures on the logs each time monies are withdrawn. In addition, the Sheriff should implement procedures to ensure independent reconciliations are periodically performed between monies held in trust for inmates and the inmate account logs.

2.2 Perform supervisory reviews to ensure receipt slips in the inmate, conceal and carry, and control receipt books are accounted for properly and agree to monies deposited, transmitted, or recorded in the inmate account logs.

2.3 Issue prenumbered receipt slips immediately on receipt of all monies received. In addition, the Sheriff should account for the numerical sequence of receipt slips.

2.4 Deposit all monies intact timely and distribute monies by official check.

2.5 Ensure attempts are made to resolve unpaid balances of closed inmate accounts and inmate account balances are disbursed when an inmate is released. If the payees cannot be located, these monies should be disposed of in accordance with state law. In addition, the Sheriff should turn over all receipts and interest to the Treasurer monthly.

2.6 Ensure bank reconciliations are prepared for all old bank accounts monthly. In addition, the Sheriff should investigate unidentified balances and follow up on old outstanding checks in the bank accounts. Unclaimed monies should be disposed of in accordance with state law, and the accounts should be closed.

Auditee's Response

The Sheriff provided the following written responses:

2.1 We will retrain the jail staff and require all money deposited by receipt on a numbered receipt. Inmates will sign for the money or it will not be given to them. The Sheriff will account for the numerical sequence of the receipts. The Sheriff will consider best practices for the office giving consideration to the use of a bank account. However, the cash envelope system currently appears to work the best.

2.2 The Sheriff and senior staff will review and reconcile receipts to deposits monthly on a test basis. The conceal and carry weapon permits (CCW) money procedure has already been changed and the County Treasurer picks up the money daily. Unfortunately due to budget issues we still only have two employees in the main office that handle our cash flow.

2.3 The numbered receipt books have been ordered for inmate accounts. The civil fee and CCW accounts have always used prenumbered receipts. The Sheriff will check the receipt number sequence on a regular basis. I have asked the Pulaski County Circuit Clerk who supplies the receipt book we use to accept cash bonds for her office via our on duty dispatch people after the courthouse has closed to give us a numbered receipt book. She agreed to do so.

2.4 As stated the CCW money is now picked up and deposited daily by the County Treasurer. The civil fee checks are immediately stamped for deposit only as we receive them. It is my policy to hold these checks in a secure location until the job is complete. Then only one accounting transaction is required to close out that case. The clerk can zero balance at any time. In your report I did not see any un-deposited civil fee checks listed for the audit years of 2009 and 2010 that were covered by this audit. This is no mention of any funds missing. The only checks listed as not deposited were active cases from 2011 that we are still working on.

2.5 We are behind in the closure of these inmate accounts. We will work to close these accounts out as soon as possible with our current budgeted personnel. The $400 has been turned over and interest has been turned over and interest will be remitted yearly.

2.6 We shall reconcile and close out the old bank accounts as soon as possible.

3. Property Tax System

The County Clerk and the County Commission do not provide adequate monitoring of property tax system activities. The County Collector's annual settlements were not complete, and aggregate abstracts were not filed with the Missouri Department of Revenue (DOR) and the State Tax Commission (STC). Annual settlements prepared by the County Collector indicated that for the years ended February 28, 2011 and 2010, approximately $16.7 million and $15.2 million, respectively, was collected.

3.1 Account book

Neither the County Commission nor the County Clerk provide a review of the activities of the County Collector. The prior County Clerk had a computer spreadsheet to summarize taxes charged and collected and had posted activity through November 2010 prior to her leaving office; however, the new County Clerk had not updated the spreadsheet since he took office. In addition, no evidence was provided to indicate procedures are performed by the County Clerk or the County Commission to verify the County Collector's monthly or annual settlements.

Section 51.150(2), RSMo, requires the County Clerk to maintain accounts with all persons chargeable with monies payable into the county treasury. An account book or other records which summarize all taxes charged to the County Collector, monthly collections, delinquent credits, additions and abatements, and protested amounts should be maintained by the County Clerk. Such records would help the County Clerk ensure taxes charged and credited to the County Collector each year are complete and accurate and could also be used by the County Clerk and County Commission to verify the County Collector's monthly and annual settlements. Such procedures are

intended to establish checks and balances related to the collection of property taxes.

3.2 Tax books

The County Clerk does not prepare or verify the accuracy of the current or delinquent tax books. The County Collector extends and prints the tax books and tax statements and verifies the accuracy of amounts to be collected. The County Collector is responsible for collecting property tax monies, and good internal controls require someone independent of that process be responsible for generating and testing the accuracy of the property tax books. Failure to perform reviews of the tax books may result in errors or irregularities going undetected. A review of the tax books should include verification of individual entries in the tax books and recalculating total tax book charges.

Sections 137.290 and 140.050, RSMo, require the County Clerk to extend the current and delinquent tax books and charge the County Collector with the amount of taxes to be collected. If it is not feasible for the County Clerk to prepare the tax books, at a minimum, the accuracy of the tax books should be verified and approval of the tax book amounts to be charged to the County Collector should be documented.

3.3 Annual settlements

Annual settlements for the 2 years ended February 28, 2011, do not include several miscellaneous taxes and fees, including tourism tax totaling approximately $666,000 in 2011 and $609,000 in 2010.

To help ensure the validity of tax book charges, collections, and credits, and for the County Clerk and the County Commission to properly verify these amounts, it is imperative the County Collector file accurate and complete annual settlements. Section 139.160, RSMo, requires the collector to settle accounts of all moneys received on account of taxes and other sources of revenue.

3.4 Aggregate abstracts

The Land and Personal Tax Aggregate Abstract and the Railroad and Utility Aggregate Abstract were not prepared for the 2010 and 2009 tax years. The Back Tax Aggregate Abstract was not prepared for the 2011 tax year. Section 137.295, RSMo, provides for the County Clerk to prepare these reports and forward them to the DOR and STC.

Similar conditions previously reported

Similar conditions to points 3.1, 3.2, and 3.3 were noted in our prior audit report.

Recommendations

3.1 The County Commission and the County Clerk monitor property tax system activities and perform a thorough review of the County Collector's settlements. In addition, the County Clerk should maintain a complete and accurate account book with the County Collector.

3.2 The County Clerk prepare the current and delinquent tax books or, at a minimum, verify the accuracy of the tax books prior to charging the County Collector with the property tax amounts.

3.3 The County Collector file complete and accurate annual settlements.

3.4 The County Clerk prepare and file the tax aggregate abstracts with the DOR and STC in a timely manner.

Auditee's Response

The County Commission provided the following response:

3.1 The County Commission agrees and will implement monthly and annual reviews of the County Collector's collection reports and the County Clerk's account book.

The County Clerk provided the following responses:

3.1 He agrees. Since assuming duties of the County Clerk's office in 2011, and becoming aware of the duties related to the account book, he has updated and maintained an account book to verify the Collector's monthly and annual collection reports.

3.2 He agrees and will implement procedures to verify the accuracy of the tax books.

3.4 He agrees and will ensure these reports are prepared and submitted in a timely manner.

The County Collector provided the following response:

3.3 She is not charged with the collection of specific amounts of Tourism Tax and had not considered the collections that were remitted to the County Treasurer each month to be reportable revenues. However, she will begin including the Tourism Tax collections and distributions in the Collector's annual settlement reports.

4. County Procedures

Procedures related to closed meetings, outstanding checks, and county budgets are in need of improvement.

4.1 Closed meetings

The County Commission meeting minutes did not provide sufficient details to show how some issues discussed in closed meetings were allowable under the Sunshine Law. We identified six instances where the closed meeting minutes disclosed some issues discussed that did not appear to be allowable under the Sunshine Law. For example, the County Commission discussed general issues about inmate medical care contracts, a

Sunshine Law document request for records on three county roads, courthouse cleaning issues, legal bills to be paid, and budget issues.

The Sunshine Law, Chapter 610, RSMo, states the specific reasons governmental bodies are allowed to close a public meeting. Issues not specifically allowed by the Sunshine Law should not be discussed in closed session.

4.2 Outstanding checks

The status of outstanding checks is not followed up. The prior County Treasurer had not performed bank reconciliations for September 2009 through December 2010. As of August 2011, the current County Treasurer had performed a reconciliation of the July 2011 bank statement but had not prepared reconciliations for the January 2011 through June 2011 bank statements. The July 2011 reconciliation indicated, at July 31, 2011, 306 checks totaling $6,434 had been outstanding over a year with one check dating back to 2001.

Procedures to routinely follow up on outstanding checks are necessary to ensure monies are appropriately disbursed to the payee or as otherwise provided by state law.

A similar condition was noted in our prior audit report.

4.3 County budgets

The payments and outstanding principal balances reflected in the county budget long-term debt schedules for 2008 through 2010 were not accurate for the Neighborhood Improvement District bonds. Beginning with the 2008 bond activity schedules, the payments reported in the county budgets incorrectly included accumulated interest amounts. The payments reported should only have included the principal portion of the payments. As a result, the principal balance reported in the 2011 county budget at December 31, 2010, was understated by nearly $50,000.

Accurate county budget information is necessary to ensure the county, its citizens, and other users of the county budgets have accurate data to assist in making properly informed decisions.

Recommendations

4.1 The County Commission ensure only allowable topics are discussed in closed meetings.

4.2 The County Treasurer routinely follow up on outstanding checks. In addition, old outstanding checks should be voided and reissued to payees who can be readily located. If the payees cannot be located, the monies should be disposed of in accordance with state law.

4.3 The County Commission and County Clerk ensure information reported in the county budget is accurate and agrees to external supporting documents when possible.

Auditee's Response

4.1 The County Commission provided the following response:

The County Commission agrees and will ensure information discussed in closed sessions is clearly documented and allowed by state law.

4.2 The County Treasurer provided the following written response:

Upon entering the Treasurer's Office on January 3, 2011, I was aware that bank statements had not been reconciled and outstanding checks as well had not been tracked.

I made it my priority with the first 60 days to start the reconciliation process (which involved the current bank account, as well as the previous bank account), by tracking the outstanding payroll, accounts payable, and Treasurer's warrant checks, jury script checks, voided checks, stop payments, and re-issued checks, from September 2009 through December 2010. I also started tracking check status from January 2011 to the present, which is the start of my term. Without the outstanding check information, I could not even begin to reconcile bank statements starting January 2011 let alone prior to my term. This resulted in 5 separate outstanding check lists from 2 separate banks and 3 separate years. To date bank accounts have been reconciled from October 2011 back to June 2011, January 2011, February 2011, and March 2011.

I took action to settle as many of the outstanding checks as possible. I first provided the banking facilities with a list of outstanding checks I compiled. These lists were verified as outstanding and stop payments were put on those checks written from the current account. The prior account list (closed on April 15, 2010), was verified as still outstanding. No additional action was taken on these checks as all county checks are printed with a 6 month void notation. As of October 5, 2011 bank correspondence showed none of the checks had cleared.

The next action taken was notifying the various entities (cities, school districts, fire districts, employees, citizens), of outstanding funds in their name. Stop payments were placed on checks, and those checks were re-issued, in the amounts of several thousands of dollars. I also began to work on locating as many persons possible with outstanding jury script checks. I sent out letters to last known

addresses on file, placed phone calls, and contacted family members to try to locate individuals. Due to a transient community, many of them Military members, persons move with no forwarding information. I currently am in the process of turning over unclaimed funds in accordance with State Statute. This process will be complete by year end 2011.

4.3 The County Commission and County Clerk provided the following response:

They agree and will ensure information reported on the county budget is accurate.

Pulaski County
Organization and Statistical Information

Pulaski County is a county-organized, third-class county. The county seat is Waynesville.

Pulaski County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 75 full-time employees and 12 part-time employees on December 31, 2010.

In addition, county operations include the Senate Bill 40 Board, the Senior Citizens Service Board, and eight Neighborhood Improvement Districts.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2011	2010
Don McCulloch, Presiding Commissioner	$	34,670
Bill Farnham, Associate Commissioner		32,670
Rickey Zweerink, Associate Commissioner		32,670
Rachelle Beasley, Circuit Clerk and Ex Officio Recorder of Deeds (1)		
Diana Linnenbringer, County Clerk		49,500
Deborah A. Hooper, Prosecuting Attorney		96,000
J. B. King, Sheriff		55,000
Morris Roam, County Treasurer		49,500
Mikel Hartness, County Coroner		16,600
Loretta Rouse, Public Administrator		49,500
Terri Mitchell, County Collector (2), year ended February 28,	56,055	
Roger Harrison, County Assessor , year ended August 31,		49,500
John Mackey, County Surveyor (3)		140

(1) Compensation is paid by the state.

(2) Includes $6,555 of commissions earned for collecting city property taxes.

(3) Compensation on a fee basis.

Financing Arrangements

The county has established eight Neighborhood Improvement Districts. The county issued general obligation bonds to finance the projects and levied special assessments on the property located in the districts to pay the debt principal and interest. The bonds are repaid for four of the eight districts as of December 31, 2010. The remaining principal due for the other four districts at December 31, 2010, was $208,000.

The county has entered into several lease purchase agreements for road and bridge equipment. At December 31, 2010, the principal balance of the leases totaled $227,438. Principal and interest payments are made from the Special Road and Bridge Fund.

The county entered into a 0 percent interest lease purchase agreement with the Missouri Department of Transportation for purchase of real estate including a maintenance shed. At December 31, 2010, the principal balance of the lease totaled $19,130. Payments are made from the Special Road and Bridge Fund.

The county entered into a loan from the Courthouse Sales Fund to the General Revenue Fund in 2008. At December 31, 2010, the principal balance of the loan totaled $100,000. Interest on the loan is charged at the same rate the county receives on its deposits.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

According to county personnel, the county was awarded the following American Recovery and Reinvestment Act of 2009 funding during the 2 years ended December 31, 2010:

A Recovery Act - Assistance to Rural Law Enforcement to Combat Crime and Drugs: Enhancing Rural Corrections, Detention and Jail Operations grant totaling $288,921 was awarded by the U.S. Department of Justice for payroll and payroll-related expenses to allow the Sheriff's Department to hire additional jailers. During the year ended December 31, 2010, $99,527 was received. The county spent $97,475 for jailors' salaries and other payroll-related expenses and $2,052 on training.

A Recovery Act - Assistance to Rural Law Enforcement to Combat Crime and Drugs: Improving Rural Law Enforcement Investigations grant totaling $170,502 was awarded by the U.S. Department of Justice for payroll and payroll-related expenses to allow the Sheriff's Department to hire additional dispatchers, hire an evidence technician, and purchase a barcode reading program to enhance the tracking of seized property. During the year ended December 31, 2010, $64,862 was received. The county spent $60,963 for dispatcher and evidence technician salaries and other payroll-related expenses, and $3,899 on a barcode reading program.

A Recovery Act - Edward Byrne Memorial Justice Assistance Grant Program Local Solicitation grant totaling $58,610 was awarded by the U.S.

Department of Justice for the purchase of equipment in the Sheriff's Department. During the year ended December 31, 2010, $57,309 was received and expended for rifles, ammunition, and other equipment.

These grants affected the local economy by providing employment for eight individuals. Per discussions with county personnel, employment is difficult to find in Pulaski County and it is a real possibility that the individuals who received employment due to these grants would not have been able to find employment elsewhere in Pulaski County. At this point in time, these positions do not appear to be sustainable and the positions may be vacant when the ARRA grant monies are fully expended. Other revenue streams to continue to employ these individuals in their current capacity have not yet been identified. The General Revenue Fund has a limited balance and it does not appear the General Revenue Fund could support the payroll costs for these individuals.

For the years ended December 31, 2010 and 2009, the Senate Bill 40 Board received $12,396 under Title V, Section 5001 of the Recovery Act which provided additional federal funding through the Medicaid Federal Medical Assistance Percentage grant and the Targeted Case Management grant. These grants were awarded by the Missouri Department of Mental Health. The payments were made for Medicaid expenditures reported between October 1, 2008, and December 31, 2010, and for case management services provided.

Report No. 2011-109

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Thirty-Eighth Judicial Circuit, City of Sparta Municipal Division

Receipting and Depositing	The audit identified significant weaknesses with receipting and depositing procedures, making it difficult to ensure all monies are accounted for properly. The municipal division does not issue receipt slips for all monies collected, does not reconcile receipt slips to deposits, and does not always note whether cash, check or money order was used for the payment. Receipts are not deposited timely and intact, and the Court Clerk often issues bond refunds in cash from municipal division receipts.
Liabilities and Disbursements	Monthly lists of liabilities are not accurate. The municipal division bank account does not have adequate funds to pay everything owed because the municipal division overpaid the Police Fund by almost $2,000. In addition, the municipal division does not timely disburse or adequately investigate bonds and partial payments remaining on the liabilities list for extended periods of time. The municipal division does not disburse fines and court costs to the city and state at least monthly as required by state law.
Segregation of Duties	The municipal division does not adequately segregate the duties of receiving and depositing monies from that of recording transactions and does not provide sufficient supervision or review of these duties. Proper segregation of duties or a documented independent review helps safeguard against possible loss or misuse of funds.
Records and Reporting Procedures	The municipal division did not prepare and file with the city a monthly list of all cases heard, as required by state law. The municipal division did not maintain a comprehensive list of all monies owed by defendants, making it difficult to monitor the amounts due and ensure payments are processed correctly. Municipal division personnel could not readily locate older case files and receipts records. Moreover, some court records were left unsecured on top of the Court Clerk's desk, which is often used by other city employees and volunteers; such records should be secured to maintain the integrity and confidentiality of the information.
Traffic Ticket Accountability	Neither the city Police Department nor the municipal division adequately accounts for the numerical sequence and ultimate disposition of traffic tickets issued. The Police Department tracks the ticket book numbers, but some ticket books were skipped and relevant information was not always recorded. In addition, voided tickets are not tracked, and the disposition of each ticket is not recorded, making it difficult to ensure all tickets issued are properly submitted for processing.

In the areas audited, the overall performance of this entity was **Poor**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	The Thirty-Eighth Judicial Circuit, City of Sparta Municipal Division did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 10

THOMAS A. SCHWEICH
Missouri State Auditor

Presiding Judge
Thirty-Eighth Judicial Circuit
and
Municipal Judge
City of Sparta, Missouri

We have audited certain operations of the City of Sparta Municipal Division of the Thirty-Eighth Judicial Circuit in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the 3 years ended June 30, 2011. The objectives of our audit were to:

1. Evaluate the municipal division's internal controls over significant financial functions.

2. Evaluate the municipal division's compliance with certain legal provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the municipal division, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the municipal division's management and was not subjected to the procedures applied in our audit of the division.

For the areas audited, we identified (1) deficiencies in internal controls, and (2) noncompliance with legal provisions. The accompanying Management Advisory Report presents our findings arising from our audit of the City of Sparta Municipal Division of the Thirty-Eighth Judicial Circuit.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Donna Christian, CPA, CGFM
In-Charge Auditor:	Natalie B. McNish, CGAP

1. Receipting and Depositing

Significant weaknesses were identified with receipting and depositing procedures of the municipal division. As a result, there is no assurance all municipal division receipts are accounted for properly.

1.1 Receipts

Receipt slips are not issued for some monies received, and the method of payment (cash, check, or money order) is not always recorded on receipt slips and reconciled to deposits.

In addition, city water/sewer manual receipt slips were issued for some municipal division monies received, but these receipts were not reconciled to municipal division receipt records to ensure the monies were recorded by the municipal division and deposited. The original copy of these receipt slips was given to the defendant and the duplicate copy was removed from the receipt book and stapled into the case file making it difficult to track municipal division receipts comingled with city receipts and ensure all monies were accounted for properly.

To ensure all receipts are properly recorded and deposited intact, receipt slips, with the method of payment documented, should be issued for all monies received, and the composition of receipt slips should be reconciled to the composition of deposits. In addition, municipal division monies collected by the city should be recorded separately from water and sewer receipts with copies of the receipt slips remaining intact in the receipt book and reconciled to municipal division receipt records to ensure the monies were properly deposited.

1.2 Deposits and cash refunds

Receipts are not deposited intact or in a timely manner, and numerous bond refunds were issued from cash receipts. Three deposits of municipal division monies were made on April 8, 2011, totaling more than $5,000 and included monies received as far back as February 22, 2011. In addition, receipts are not deposited intact because the Court Clerk often issues bond refunds in cash. For example, recorded receipts on June 1 and 2, 2011, totaled $2,190; however, only $1,790 was deposited on June 8, 2011. Upon further review, we found a $400 bond was refunded to a defendant using cash from municipal division receipts.

To ensure all receipts are accounted for properly and deposited intact, monies should be deposited timely and all refunds should be made by check. The failure to deposit timely increases the risk of theft or misuse of funds. Also, issuing cash refunds further inhibits the municipal division's ability to reconcile the composition of receipts and deposits.

Recommendations

The City of Sparta Municipal Division:

1.1 Issue receipts slips for all monies received, document the method of payment on receipt slips, and reconcile the composition of receipt

slips to the composition of deposits. Additionally, the municipal division should work with the city to ensure municipal division monies received by the city are separately recorded and reconciled to municipal division receipt records.

1.2 Deposit monies intact and in a timely manner, and discontinue the practice of issuing cash refunds for bond monies.

Auditee's Response

The Municipal Judge provided the following responses:

1.1 I will take the necessary steps to ensure receipt slips are issued for all monies received, the method of payment is documented and the composition is reconciled as recommended. Only municipal court receipt books will be utilized for recording court monies in the future.

1.2 At my instruction, the practice of issuing cash refunds for bonds was recently discontinued and I will take steps to ensure deposits are made intact and timely in the future.

2. Liabilities and Disbursements

Monthly lists of liabilities are not complete and reconciled to monies available in the municipal division bank account. Additionally, procedures have not been established to routinely investigate bonds and partial payments remaining on the liabilities list over a specified period of time. Further, court costs are not disbursed timely.

2.1 Liabilities

The monthly list of liabilities is not accurate, and because of overpayments made to the Police Fund, the municipal division bank account does not have adequate funds to pay all amounts owed. In addition, the division does not adequately follow up on bonds held for an extended period of time, forfeit bonds to the city in a timely manner, or disburse partial payments timely.

Prior to May 2011, monthly bank reconciliations for the municipal division's two bank accounts (bond account and fines/court cost account) were not performed or documented, and liabilities lists were not prepared and reconciled to the monies available in the municipal division bank accounts. In April 2011, the city hired a consultant to reconcile municipal division records and prepare a liabilities list. During this process, the bond account was closed and the balance transferred to the fines/court cost account.

As of June 30, 2011, the liabilities list included 11 bonds totaling $2,750; however, this list was incomplete and inaccurate. We identified one $200 bond on the list that was disbursed in December 2010. Also, 20 additional bonds and six partial payments totaling $3,679 should have been included on the list, making the total liabilities $6,229 as of June 30, 2011.

The municipal division bank account had a reconciled balance of $4,300 as of June 30, 2011. The shortage in this account is primarily caused by two overpayments made to the city Police Fund. In May 2010, without any documented reason, the former Court Clerk disbursed $1,000 to the Police Fund. In April 2011, the municipal division overpaid fines and costs due to the Police Fund by $964. These monies should be repaid to the municipal division bank account.

We identified 20 bonds totaling $2,900 which were held by the municipal division in excess of a year. Of these 20 bonds, 19 bonds totaling $2,850 had been ordered forfeited to the city by the Municipal Judge, but the bonds were not disbursed. We also identified six partial payments, totaling $779, which were deposited into the bond account in February 2011, but not disbursed. Of this amount, fines and costs of $744 are currently payable to the city and one $35 refund is due to a defendant.

Liabilities should be identified at each month-end and reconciled to the bank account balance to ensure accounting records are in balance and monies held in trust are sufficient to meet the payment of all liabilities. Such reconciliations would allow for prompt detection of errors. Unidentified differences should be investigated immediately and appropriate action taken. Additionally, to properly monitor liabilities and ensure monies are appropriately disbursed, procedures should be established to routinely investigate bonds and partial payments remaining on the liabilities list over a specified period of time. Further, forfeited bonds should be disbursed to the city in a timely manner.

2.2 Court costs

Fines and costs collected by the municipal division are not always disbursed to the city and state in a timely manner. For example, fines and costs collected February 22 through April 26, 2011, were not disbursed to the city until April 28, 2011.

Section 479.080, RSMo, requires the municipal division to disburse fines and court costs to the city or state, as applicable, at least monthly.

Recommendations

The City of Sparta Municipal Division:

2.1 Prepare monthly liabilities lists and reconcile lists to the balance in the municipal division bank account. In addition, the Municipal Division should disburse $1,964 from the Law Enforcement Fund to the Municipal Division bank account, and develop procedures to monitor liabilities and ensure monies are appropriately disbursed.

2.2 Disburse fines and costs in a timely manner.

Auditee's Response

The Municipal Judge provided the following responses:

2.1 I will ensure the Court Clerk performs the actions recommended to properly reconcile, monitor, and disburse court monies as required.

2.2 I will take steps to ensure monies are disbursed to the city on a monthly basis.

3. Segregation of Duties

The duties of receiving and depositing monies are not adequately segregated from recording transactions. The Court Clerk performs all duties related to collection of funds, deposit preparation, and posting fines and court costs received. Neither the Municipal Judge nor other city officials independent of the cash custody and record keeping functions provide any supervision or review of the work performed by the Court Clerk.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Internal controls could be improved by segregating duties to the extent possible. If proper segregation of duties is not possible, a documented independent review of the work performed by the Court Clerk is necessary.

Recommendation

The City of Sparta Municipal Division segregate accounting duties to the extent possible and implement appropriate reviews and monitoring procedures.

Auditee's Response

The Municipal Judge responded that he plans to discuss this issue with city officials and develop procedures for adequate independent or supervisory review.

4. Records and Reporting Procedures

The municipal division has not prepared and filed with the city a list of cases heard each month as required by state law. A comprehensive control ledger showing the total amount owed by defendants is not maintained, and other procedures for maintaining municipal division records need improvement.

4.1 Report of cases heard

A monthly list of all cases heard is not prepared and filed with the city. Without such a report, the city cannot effectively monitor municipal division activity and ensure monies are properly remitted.

Section 479.080.3, RSMo, requires the Court Clerk to prepare a monthly list of all cases heard in the municipal division court, including the names of the defendants and fines and court costs imposed, to be verified by the Court Clerk or Municipal Judge and filed with the city.

4.2 Accounts receivable

A comprehensive control ledger showing the total amount owed by defendants to the municipal division is not maintained. Defendants are allowed to pay fines and court costs over a period of time, and the Court Clerk keeps track of these payments on the docket sheet attached to the cover of each case file, or on a separate sheet in the case file. Defendants making payments on a payment plan appear on the court docket each month; however, if a defendant fails to pay and a warrant is issued, the case no longer appears on the monthly court docket and a separate list of these cases and the amounts due is not maintained.

A complete and comprehensive control (or summary) ledger showing the total amounts owed by defendants and payments would allow the municipal division to properly monitor the amounts due and ensure payments are processed correctly.

4.3 Court records

Procedures for maintaining municipal division records need improvement. Municipal division personnel were uncertain where to find older records including case files and receipt records. Records that could not be located include a receipt ledger showing the issuance of 21 receipts totaling $3,742, 11 receipt slips missing from the receipt book, and one case file.

In addition, some court records are not adequately secured. During our audit, we noted numerous traffic tickets, case files, un-receipted bond monies, and other court documents on the top of the Court Clerk's desk. Since the Court Clerk also works as the city Water Clerk, and sits at a separate desk in the office, other employees and city volunteers often use the Court Clerk's desk.

Supreme Court Rule No. 8 requires all financial records be maintained for 5 years or upon completion of an audit. Retention of applicable records is necessary to properly account for the municipal division's financial activity. In addition, court records and bond monies should be kept in a secure place to ensure the integrity and confidentiality of information is maintained and court monies are adequately secured.

Recommendations

The City of Sparta Municipal Division:

4.1 Ensure a monthly list of cases heard in the municipal division is prepared and filed with the city in accordance with state law.

4.2 Ensure a complete and comprehensive control (or summary) ledger is maintained showing the total amounts owed by defendants and payments.

4.3 Ensure division records are organized efficiently, maintained securely, and appropriately retained. In addition, municipal division bond monies should be adequately secured.

Auditee's Response

The Municipal Judge provided the following responses:

4.1 A list of cases heard by the court will be prepared by the Court Clerk and filed with the city as required.

4.2 I will take steps to ensure the Court Clerk establishes a comprehensive control ledger for accounts receivable.

4.3 I will work with the city to develop a more secure means of maintaining division records.

5. Traffic Ticket Accountability

Neither the city Police Department nor the municipal division adequately account for the numerical sequence and ultimate disposition of traffic tickets issued. The Police Department tracks the ticket book numbers assigned to each officer on a log; however, some books were skipped, and information required such as date, officer name and badge number, and ticket numbers were sometimes not recorded. The Police Chief also maintains a separate log of each citation after it has been issued; however, this log does not account for the numerical sequence and disposition of tickets. For example, voided tickets are not tracked, some tickets were not issued by officers in numerical sequence, and the disposition of each ticket is not recorded.

Without proper accounting for the numerical sequence and ultimate disposition of tickets issued, the municipal division and the Police Department cannot be assured all tickets issued are properly submitted for processing.

Recommendation

The City of Sparta Municipal Division work with the Police Department to ensure the numerical sequence and ultimate disposition of all tickets issued are accounted for properly.

Auditee's Response

The Municipal Judge responded that he will work with the city to establish procedures to monitor traffic tickets as recommended.

Thirty-Eighth Judicial Circuit
City of Sparta Municipal Division
Organization and Statistical Information

The City of Sparta Municipal Division is in the Thirty-Eighth Judicial Circuit, which consists of Christian and Taney Counties. The Honorable Mark Orr serves as Presiding Judge.

The municipal division is governed by Chapter 479, RSMo, and by Supreme Court Rule No. 37. Supreme Court Rule No. 37.49 provides that each municipal division may establish a violation bureau in which fines and costs are collected at times other than during court and transmitted to the city treasury.

Personnel

At June 30, 2011, the municipal division employees were as follows:

Title	Name
Municipal Judge	Jared Clinton
Court Clerk	Cathy Newman

Financial and Caseload Information

	Year Ended June 30,		
	2011	2010	2009
Receipts	$40,408	45,356	30,735
Number of tickets issued	302	524	196*

* Represents tickets issued January through June 2009 only. Prior to January 2009, these records were not maintained.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The City of Sparta Municipal Division did not receive any federal stimulus monies during the 3 years ended June 30, 2011.

PUBLIC SAFETY

Missouri State Highway Patrol's Use of Highway Funds

Year Ended June 30, 2011

November 2011

Report No. 2011-108

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Department of Public Safety, Missouri State Highway Patrol's Use of Highway Funds

Background	The State Auditor is required to determine whether appropriations from the State Highways and Transportation Fund (State Highway Fund) to the Missouri State Highway Patrol (MSHP) are used for administering and enforcing state motor vehicle laws and traffic regulations, as required by Article IV, Section 30(b) of the Missouri Constitution and Section 226.200.3, RSMo.
Methodology	Audit staff reviewed pertinent documents, conducted interviews, and tested selected transactions. Audit staff assessed and tested internal controls and reviewed and tested MSHP calculations.
Conclusions	During the year ended June 30, 2011, the MSHP appears to be in compliance with legal provisions related to the use of Highway Funds.

Because of the limited objective of this review, no overall rating is provided.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	Not applicable to this report.

State Auditor's Report 2

Background, Methodology, and Conclusions 3

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly
and
Jerry Lee, Director
Department of Public Safety
and
Colonel Ronald K. Replogle, Superintendent
Missouri State Highway Patrol
Jefferson City, Missouri

We have audited the Department of Public Safety, Missouri State Highway Patrol's Use of Highway Funds, as required by Section 226.200.3, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2011. The objective of our audit was to determine whether the agency is in compliance with legal provisions related to the use of Highway Funds.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The Background, Methodology and Conclusions present our comments concerning the overall compliance related to the Department of Public Safety, Missouri State Highway Patrol's Use of Highway Funds.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Dennis Lockwood, CPA
In-Charge Auditor:	Steven J. Re, CPA

Department of Public Safety
Missouri State Highway Patrol's Use of Highway Funds
Background, Methodology, and Conclusions

Background

The State Auditor is required to determine whether appropriations from the State Highways and Transportation Fund (State Highway Fund) to the Missouri State Highway Patrol (MSHP) are used for administering and enforcing state motor vehicle laws and traffic regulations pursuant to the constitution.

Limitations and requirements

Article IV, Section 30(b), Missouri Constitution, limits the MSHP's use of highway funds to activities related to administering and enforcing state motor vehicle laws or traffic regulations. In addition, Section 226.200.3, RSMo, provides, in part:

". . . Appropriations allocated from the state highways and transportation department fund to the highway patrol shall only be used by the highway patrol to administer and enforce state motor vehicle laws or traffic regulations. Beginning July 1, 2007, any activities or functions conducted by the highway patrol not related to enforcing or administering state motor vehicle laws or traffic regulations shall not be funded by the state highways and transportation department fund, but shall be funded from general revenue or any other applicable source. Any current funding from the highways and transportation department fund used for activities not related to enforcing state motor vehicle laws or traffic regulations shall expire on June 30, 2007. The state auditor shall annually audit and examine the appropriations made to the highway patrol to determine whether such appropriations are actually being used for administering and enforcing state motor vehicle laws and traffic regulations pursuant to the constitution. The state auditor shall submit its annual findings to the general assembly by January fifteenth of each year."

During the year ended June 30, 2011, the MSHP utilized appropriations from the State Highway Fund as follows:

	Appropriation Authority	Expenditures	Lapsed Balances*
Technical services personal service	$ 12,330,406	11,516,764	813,642
Administration personal service	5,331,590	5,073,083	258,507
Administration expense and equipment	430,812	410,004	20,808
Enforcement program personal service	62,205,583	57,877,756	4,327,827
Law Enforcement Academy personal service	1,390,443	1,232,672	157,771
Law Enforcement Academy expense and equipment	76,872	65,293	11,579
Vehicle and driver safety personal service	10,175,307	9,851,963	323,344
Vehicle and driver safety expense and equipment	910,032	844,039	65,993
Enforcement program expense and equipment	6,238,855	5,732,841	506,014
Technical services expense and equipment	11,691,486	11,340,642	350,844
Refund unused motor vehicle inspection stickers	40,000	32,544	7,456
Fringe benefits personal service	59,411,104	53,994,818	5,416,286
Fringe benefits expense and equipment	6,288,232	5,746,398	541,834
Vehicle replacement expense and equipment	6,222,293	5,989,144	233,149
Gasoline expenses	3,448,218	3,344,771	103,447
Crime labs personal service	3,616,622	3,474,407	142,215
Crime labs expense and equipment	895,386	868,524	26,862
Interoperable system highway	23,251,052	18,568,382	4,682,670
Interoperable ongoing highway	2,350,000	104,395	2,245,605
Total	$ 216,304,293	196,068,440	20,235,853

* The lapsed balances include withholdings made at the Governor's request totaling $4,516,950.

Methodology

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the agency; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objective and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objective, and we assessed the risk that illegal acts, including fraud, and violations of other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

To determine the MSHP complied with the limitations on the use of highway funds, we reviewed the MSHP calculations of amounts expended from the State Highway Fund for non-highway activities and the amounts

expended by the MSHP for highway-related activities from other funding sources. We compared the amounts used in the MSHP calculations to expenditures recorded in the state accounting system (SAM II) and to supporting documentation. In addition, we tested certain expenditures to determine they were properly recorded.

Conclusions

We concluded the MSHP appears to be in compliance with legal provisions related to the use of Highway Funds. During fiscal year 2011, the MSHP spent approximately $2,336,000 appropriated from the State Highway Fund that was not related to highway activities. This amount included non-highway personal service and fringe benefit expenditures made from the State Highway Fund for the Crime Laboratory Division, Training Division, Technical Services Bureau, and Administrative Services Bureau; and some gasoline and expense and equipment expenditures from the Administrative Services Bureau. However, these expenditures were more than offset by expense and equipment expenditures of approximately $4,460,000 incurred by the Crime Laboratory Division, Training Division, and Technical Services Bureau that were related to highway activities but were not paid from the State Highway Fund. As a result, approximately $2,124,000 more was spent on highway-related activities than was paid from highway funds during fiscal year 2011.

Thomas A. Schweich

Missouri State Auditor

SOCIAL SERVICES

MO HealthNet Division

Program Integrity Unit

November 2011

Report No. 2011-107

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Department of Social Services (DSS), MO HealthNet Division, Program Integrity Unit (PIU)

Background

The Program Integrity Unit (PIU) monitors MO HealthNet program compliance of providers and participants by conducting post payment reviews to determine the propriety of claims reimbursed by the Medicaid program. The PIU also reviews allegations of MO HealthNet participant fraud or abuse. Potential fraud or abuse by MO HealthNet providers is referred to the Attorney General's Medicaid Fraud Control Unit for further investigation.

State law (Section 191.909.2, RSMo) requires the DSS to report annually on certain activities related to the PIU and requires the state auditor to conduct an audit of the PIU.

Annual Reports

Annual reports did not include some information required by state law and included some inaccurate amounts and unverified data. In addition, supervisors did not conduct reviews of the information entered into the reporting subsystem to ensure the information was entered correctly. Similar findings were noted in prior audit reports.

Payment of Performance Review Costs

The DSS spent approximately $139,000 on employees' salaries and travel costs during fiscal years 2010 and 2011 for a performance review of the PIU. The DSS paid the costs of these employees even though the employees did not perform PIU functions and reported to the Office of Administration, Division of Budget and Planning Director, not to DSS personnel.

In the areas audited, the overall performance of this entity was **Good**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The MO HealthNet Division, Program Integrity Unit did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

A Recoveries - 2 Years Ended June 30, 2010 14
B Operating Costs - 2 Years Ended June 30, 2010 15

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly
and
Brian Kinkade, Interim Director
Department of Social Services
and
Dr. Ian McCaslin, Director
MO HealthNet Division
Jefferson City, Missouri

We have audited certain operations of the Department of Social Services, MO HealthNet Division, Program Integrity Unit, as required by Section 191.909.2, RSMo. The objectives of our audit were to:

1. Determine the amount of money recovered by the unit.

2. Determine the amount of money invested in the unit.

3. Evaluate the unit's compliance with certain legal provisions.

Our audit determined the amount of money recovered by and invested in the unit, and reported those amounts in Appendixes A and B. In addition, for the areas audited, we identified noncompliance with legal provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the department's management and, other than Appendixes A and B, was not subjected to the procedures applied in our audit of the Program Integrity Unit.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Douglas Porting, CPA, CFE
Audit Manager:	Susan J. Beeler, CPA, CIA
In-Charge Auditor:	Robyn Lamb
Audit Staff:	Ashley Lee, MBA

Department of Social Services, MO HealthNet Division, Program Integrity Unit
Introduction

Background

Starting in 2008, pursuant to Section 191.909.2, RSMo, the Department of Social Services (DSS) is to report annually, by January 1 of each year, the following activities related to the Program Integrity Unit (PIU):

"(1) The number of MO HealthNet provider and participant investigations and audits relating to allegations of violations under sections 191.900 to 191.910 completed within the reporting year, including the age and type of cases;

(2) The number of MO HealthNet long-term care facility reviews;

(3) The number of MO HealthNet provider and participant utilization reviews;

(4) The number of referrals sent by the department to the attorney general's office;

(5) The total amount of overpayments identified as the result of completed investigations, reviews, or audits;

(6) The amount of fines and restitutions ordered to be reimbursed, with a delineation between amounts the provider has been ordered to repay, including whether or not such repayment will be completed in a lump sum payment or installment payments, and any adjustments or deductions of future provider payments;

(7) The total amount of monetary recovery as the result of completed investigation, reviews, or audits;

(8) The number of administrative sanctions against MO HealthNet providers, including the number of providers excluded from the program."

Additionally, the state auditor is required to conduct an audit of the PIU ". . . to quantitatively determine the amount of money invested in the unit and the amount of money actually recovered by such office."

When preparing the 2010 and 2009 annual reports, the DSS interpreted Section 191.909.2, RSMo, to require all recovery activity of the MO HealthNet Division (MHD) be reported, including PIU recoveries. In addition, although not required, the DSS also reported in both the 2010 and 2009 annual reports 1) cost avoidance amounts for various MHD units for the current year, 2) cost recovery and cost avoidance amounts for the 5 previous years for the PIU and various other MHD units, and 3) recoveries of MHD monies by the DSS Division of Legal Services.

PIU personnel obtain information from other DSS units, including the Cost Recovery Unit, MO HealthNet Investigations Unit (MHIU), Welfare Investigations Unit (WIU), Institutional Reimbursement Unit, and the Pharmacy and Clinical Unit, for inclusion in the annual report. Both the MHIU and WIU are units within the DSS Division of Legal Services. The MHIU investigates fraud and abuse committed by recipients against MO HealthNet providers, such as use of multiple physicians and pharmacies, forged prescriptions, or the payment of covered medication with cash. The WIU investigates fraud and abuse committed by public assistance recipients based on eligibility issues, such as inaccurately reporting income or household composition.

The Attorney General's Medicaid Fraud Control Unit (MFCU), not the DSS, is responsible for provider investigations related to fraud and abuse. The MFCU notifies the PIU of the outcome of all investigations completed on referrals from the DSS.

Scope and Methodology

The scope of our audit included, but was not necessarily limited to, the 2 years ended June 30, 2010.

Our methodology included conducting interviews with appropriate DSS personnel; reviewing written policies and procedures; obtaining and reviewing the PIU annual reports for the years ended June 30, 2010 and 2009; reviewing applicable state law and DSS and PIU records; and testing selected transactions.

We obtained an understanding of internal controls that were significant within the context of the audit objectives and assessed whether such controls had been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that were significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

To determine the amount of monies recovered by and invested in the unit, we compared the annual report information to the revenues and expenditures recorded in the state accounting system (SAM II) and to supporting documentation. We reviewed the annual report to determine whether all amounts and information required by Section 191.909.2, RSMo, were included, and compared the amounts and information to supporting documentation to determine the completeness and accuracy of the report. We also tested the amounts and information in the case files to determine the completeness and accuracy of PIU supporting documentation.

Department of Social Services, MO HealthNet Division, Program Integrity Unit
Management Advisory Report - State Auditor's Findings

1. Annual Reports

The Department of Social Services (DSS), MO HealthNet Division (MHD), Program Integrity Unit's (PIU) annual reports for fiscal years 2010 and 2009 did not include some information required by state law. In addition, due to inadequate internal controls and procedures, some amounts in the annual reports were inaccurate, data obtained from other sources was not verified for accuracy, and supervisory reviews were not performed.

State law requires specific information be included in the annual reports (see the Background section). For these reports to be useful to the General Assembly, the required information needs to be included and its accuracy needs to be ensured.

1.1 Participant and provider investigations

Some participant and provider investigations were not included in the annual reports, as required by Section 191.909.2(1), RSMo.

WIU and MHIU participant investigations

The annual reports did not include some participant investigations completed related to allegations of violations under Sections 191.900 to 191.910, RSMo. Although the reports included the investigations completed by the Welfare Investigations Unit (WIU), the investigations completed by the MO HealthNet Investigations Unit (MHIU) were not reported. In addition, the age and type of participant investigations completed by the WIU and MHIU were not reported.

A similar condition was noted in our prior two reports. At that time, the DSS indicated the MHIU investigations would be reported in the fiscal year 2009 annual report; however, this corrective action was not taken.

Medicaid Fraud Control Unit provider investigations

The number of provider investigations, with the applicable age and type of case, conducted by the Attorney General's Medicaid Fraud Control Unit (MFCU) based on referrals from the DSS is not reported. The MFCU notifies the PIU of the outcome of all investigations completed on referrals from the DSS; however, the PIU does not report it.

A similar condition was noted in our prior two reports. In response to both reports, the DSS did not agree it should report provider investigations completed by the MFCU, because that data is reported by the MFCU pursuant to Section 191.909.1, RSMo. However, while the MFCU reports the number of referrals received as well as the number of provider investigations conducted due to allegations of violations under Sections 191.900 to 191.910, RSMo, it does not specifically identify which investigations conducted were the result of DSS referrals.

1.2 Fines and restitution

Fines and restitution ordered to be reimbursed, as well as other required information on provider investigations closed by the MFCU, are not reported as required by Section 191.909.2(6), RSMo. The MFCU provides the PIU documentation regarding fines and restitution ordered to be

reimbursed on cases referred to the MFCU by the DSS; however, the PIU does not include this information in the annual reports.

A similar condition was noted in our prior two reports.

1.3 Information obtained from other DSS units

The PIU has not established adequate procedures to ensure the accuracy of amounts obtained from other DSS units included in the annual reports and some amounts were not accurately reported.

Welfare Investigations Unit participant cases investigated

The reported number of investigations into suspicion of participant health care fraud conducted by the WIU in the fiscal year 2010 annual report was not accurate. In addition, documentation supporting the number of WIU participant cases investigated and overpayments identified by the WIU based on those investigations was not obtained and reviewed by the PIU at that time and no longer exists.

In fiscal year 2010, the WIU reported its personnel investigated 403 participant cases with 431 associated claims; however, in the 2010 annual report, PIU personnel erroneously reported 431 participant cases were investigated by the WIU.

In addition, no supporting documentation was maintained to support the number of investigations or overpayments presented in the report. The PIU did not obtain documentation from the WIU supporting the number of cases and overpayments identified at the time the amounts were received from the WIU for inclusion in the annual reports. We attempted to obtain this documentation from the WIU during our audit. However, in October 2010 (prior to the start of our audit), the WIU converted its case database system, and Division of Legal Services (DLS) personnel indicated not all data converted correctly. In addition, DLS personnel indicated adjustments may have subsequently been made to overpayment amounts after the numbers were reported to the PIU due to additional claims received from providers.

Other DSS units

We also noted additional information obtained from other DSS units, including the WIU, the Institutional Reimbursement Unit, and Pharmacy and Clinical Unit, is not verified for accuracy by the PIU prior to inclusion in the annual reports.

A similar condition was noted in our prior report.

1.4 Adjustments to overpayments

Adjustments to PIU overpayment amounts identified and tracked were not reported in the fiscal year 2010 annual report; however, the annual report stated the overpayment amount included adjustments that occurred during the reporting year.

Adjustments to overpayment amounts may occur due to additional documentation received from the provider, an Administrative Hearing Commission decision, or other administrative actions. These adjustments are tracked by the PIU and were taken into consideration when reporting overpayments in the fiscal year 2009 annual report. However, due to changes in personnel, adjustments to PIU overpayments were not taken into consideration when compiling the fiscal year 2010 annual report, resulting in the overstatement of overpayments by approximately $363,000.

A similar condition was noted in our prior two reports.

1.5 Supervisory reviews

Supervisory reviews of information included in the reports are not adequate. Information on MHD provider cases reviewed, such as number of claims examined and overpayment amounts identified, is entered into the Surveillance and Utilization Review Subsystem (SURS) by various DSS personnel from manual case cards in the case files. The SURS is a subsystem of the Medicaid Management Information System, which maintains and stores Medicaid claims data. The SURS is programmed to detect suspicious billing and service utilization patterns and is used to document MHD case reviews. Once information from the manual case cards is entered into the SURS, the PIU prints electronic SURS case cards to retain in case files. The PIU creates SURS reports containing provider case review information which are then entered in spreadsheets for the annual reports; however, there is no reconciliation between the manual and electronic case cards in the case files to ensure all information was entered correctly.

A similar condition was noted in our prior report.

Recommendations

The DSS:

1.1 Include the number of all participant and provider investigations completed by DSS units and the MFCU in the annual report. Additionally, information about the age and type of completed investigations should be included.

1.2 Include the amount of fines and restitution ordered, and other required information on cases closed by the PIU and referred to and closed by the MFCU.

1.3 Establish procedures to ensure information obtained from other DSS units other than the PIU is verified for accuracy, either by the PIU or by the other DSS units.

1.4 Establish procedures to report subsequent adjustments to overpayment amounts initially identified.

1.5 Ensure supervisory reviews of data entered into the SURS are performed.

Auditee's Response

1.1 DSS had obtained an investigations report from MHIU and the WIU for the reporting purposes of Sections 191.900 to 191.910. DSS will acquire supporting documentation from WIU which includes the age of the case and the type of case for the totals given along with the participants' names and DCNs. As of April 1, 2011, MHIU was dissolved and the duties and responsibilities are now under Missouri Medicaid Audit and Compliance (MMAC) Investigations. DSS will obtain the final MHIU report (July 1, 2010 to April 1, 2011) and will verify MMAC referrals match with the supporting documentation. The second report (April 1, 2011 to June 30, 2011) will be from MMAC Investigations and the report will also be verified.

1.2 DSS has obtained a copy of the SB577 report from MFCU. Discussions were held with MFCU staff. DSS will report fines and restitution ordered to be reimbursed, as well other required information on provider investigations closed by MFCU on a calendar year basis instead of fiscal year for this section only.

1.3 DSS will make every effort to have supporting documentation from all units providing information to MMAC for the SB577 report and verify for accuracy.

1.4 DSS acknowledges the adjustments were overlooked for state fiscal year 2010. DSS has not knowingly withheld any reporting factors to fabricate our financial status.

1.5 DSS acknowledges our responsibility for the implementation of policies and controls to prevent errors in documentation.

2. Payment of Performance Review Costs

During fiscal years 2011 and 2010, the DSS paid salary and travel expenses related to a performance review of the PIU conducted under the direction and supervision of the Office of Administration (OA) Division of Budget and Planning Director, thus circumventing the appropriation process established by the General Assembly. Related expenditures totaled approximately $80,000 and $59,000, in 2011 and 2010, respectively.

Beginning in March 2010, the salaries and fringe benefits of two persons who conducted a performance review of the PIU were paid from DSS appropriations. While these persons were placed on the DSS payroll, they did not perform PIU-related functions and did not report to the PIU Director, but instead reported to the OA Division of Budget and Planning Director. According to the OA Division of Budget and Planning Director,

the concept and development of the performance review team was a joint effort by the Governor's office and the OA Division of Budget and Planning. Through June 30, 2010, the DSS paid approximately $54,400 in salary and fringe benefit costs related to these persons. A Governor's office employee also participated in the review, but that person's payroll costs were paid from a Governor's office appropriation.

In addition to the payroll costs for two of these employees, beginning in March 2010, travel costs of one of these persons and the Governor's office employee involved in the performance review, both domiciled in St. Louis, were charged to DSS appropriations. The expenses charged included mileage to and from St. Louis, as well as lodging that was direct billed to the DSS. Through June 30, 2010, the DSS paid approximately $2,500 in mileage and $2,400 in lodging for these two employees.

The costs of the performance review of the PIU continued to be charged to the DSS during part of fiscal year 2011. From July 2010 to November 2010, at least $79,900 in additional costs of the three persons to complete the performance review of the PIU were paid from DSS appropriations. In November 2010, all three performance review team members began a performance review of the Department of Revenue and were no longer paid from DSS appropriations.

Since these persons were working on a performance review under the direction and supervision of the OA Division of Budget and Planning Director, it appears their salary and other costs should have been paid accordingly from appropriations of the OA and the Governor's office.

Recommendation

The DSS work with the Governor's office and the OA to discontinue the practice of using DSS appropriations to pay costs not directly associated with the operations of the PIU.

Auditee's Response

Health care waste, fraud and abuse costs all healthcare payers, including taxpayers, billions of dollars annually. In order to protect taxpayer resources, DSS with the approval of the Office of Administration, Division of Budget and Planning (OA B&P) determined that an extensive performance review of the PIU was needed to ensure the unit was operating as efficiently as possible and making every effort to maximize audit efforts to protect taxpayer resources.

The performance review was critically important to Director Levy. The review needed to happen quickly while using reviewers independent of the department. Just like it's essential to have an independent SAO to perform the annual PIU audit, Director Levy felt this review needed to be done completely independent of PIU management since reviewers reporting to PIU management would not have yielded independent results. Director Levy

reached out to the OA B&P to recommend non-DSS staff to perform the performance review. OA B&P identified highly qualified, independent state staff to do an exhaustive performance review and to assist with operationalizing recommendations of the Lewin Group.

The performance review in question resulted in recommendations that elevated PIU within the department and reallocated resources from the Departments of Mental Health and Health and Senior Services. The actions taken by DSS to initiate the review resulted in budget reductions that were approved by the General Assembly. Even though the reviewers didn't report to PIU management, DSS believes it was perfectly appropriate to temporarily pay salaries of state staff for work being done on behalf of the unit. Similar work performed by a contractor would certainly have been paid by DSS appropriations and likely would not have resulted in a similar finding.

Auditor's Comment

At no time during fieldwork did personnel of either the DSS or the OA Division of Budget and Planning indicate the performance review was solicited by the DSS. In addition, neither the DSS nor the OA Division of Budget and Planning could provide documentation detailing the request, scope, and/or methodology of the review, or the estimated and maximum costs the DSS was willing to pay. As a result, we cannot determine if the review was properly planned and whether the DSS received fair value for expenditures totaling approximately $139,000.

Department of Social Services, MO HealthNet Division
Program Integrity Unit
Organization and Statistical Information

The Department of Social Services (DSS) is officially designated as the single state agency charged with the administration of the Missouri Medicaid program. The Program Integrity Unit (PIU), organizationally located within the MO HealthNet Division (MHD), is responsible for monitoring compliance by providers and participants as described in federal regulations by conducting post payment reviews to determine the propriety of claims reimbursed by the Medicaid program. The Family Support Division within the DSS determines participant eligibility for the Medicaid program. The Code of Federal Regulations, 42 CFR 455.13, requires a state Medicaid agency to have "a) methods and criteria for identifying suspected fraud cases; b) methods for investigating these cases. . . ; and c) procedures, developed in cooperation with state legal authorities, for referring suspected fraud cases to law enforcement officials." During fiscal year 2011, the PIU was reorganized into the DSS, Missouri Medicaid Audit and Compliance (MMAC) Unit and is now organizationally located within the DSS Director's office.

A post-payment review of Medicaid claims reimbursed is performed on selected providers or projects to determine program compliance. Providers are selected to be reviewed from referrals, exception reports and/or other system generated reports. Referrals concerning possible misutilization may be received from providers, recipients, consultants, and division employees, as well as staff from other agencies. Exception reports are produced on providers that have unusual patterns of utilization, or that deviate from established norms. This review is completed by either a desk or field review. Programs are evaluated for adequate documentation and the appropriateness and quality of service. Reviews of allegations of participant fraud or abuse are completed for all referrals received. Participants committing fraud or abuse may be limited to using one provider, or referred to local authorities for legal action, or both.

Based on a preliminary review of reports and referrals, the PIU makes the determination on what enforcement activities to pursue. These enforcement activities may include one or more of the following administrative actions or sanctions: 1) provider education, 2) demand of repayment, 3) suspension or termination of the provider's Medicaid participation agreement, 4) transfer to closed-end agreement, 5) placement on prepayment review status, 6) participant lock-in, and 7) referral to the Attorney General, Medicaid Fraud Control Unit (MFCU) or the DSS-MO HealthNet Investigation Unit (MHIU).

At June 30, 2010 and June 30, 2009, the PIU consisted of 29 and 27 employees, respectively.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The DSS - MHD - PIU did not receive any federal stimulus monies during the 2 years ended June 30, 2010.

Appendix A
Recoveries - 2 Years Ended June 30, 2010

For the 2 years ended June 30, 2010, the PIU recovered the following funds:

		Year Ended June 30, 2010	Year Ended June 30, 2009	
Collections	$	3,507,903	3,624,598	
Adjustments		1,910,977	1,840,735	(1)
Recoupments		3,090,526	1,638,691	(1)
Overpayment memos/refunds		(59,866)	(25,533)	(1)
Total	$	8,449,540	7,078,491	

(1) Adjustments, recoupments, and overpayment memos/refunds adjust the amount of claims. Adjustments are individual claims that have been overpaid and need to be adjusted. Recoupments are accounts receivable adjustments. Overpayment memos/refunds are duplicate payments made by providers related to previous overpayments or judicial decisions.

Appendix B
Operating Costs - 2 Years Ended June 30, 2010

For the 2 years ended June 30, 2010, the costs incurred to operate the PIU were:

	Year Ended June 30,		
	2010	2009	
Salaries and wages	$ 1,071,432	929,439	
Fringe benefits	483,708	386,586	
Travel, in-state	5,081	8,399	
Travel, out-of-state	42	1,581	
Supplies	762	2,981	
Professional development	835	915	
Professional services	1,073,408	824,123	
Maintenance and repair services	762,339	1,045,340	
Office equipment	0	509	
Miscellaneous expenses	1,852	2,165	
Building lease payments	28,523	25,916	
Total	$ 3,427,982	3,227,954	(1)

(1) Some office expenses such as phone charges and office supplies related to the MHD are not allocated to individual units within the division. Thus, there are additional expenditures related to the PIU not included above.

Thomas A. Schweich

Missouri State Auditor

City of Mountain Grove

November 2011

Report No. 2011-106

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the City of Mountain Grove

Financial Condition and Monitoring	The General Fund is in poor financial condition due to operating losses of several city activities and increased health insurance costs. The city golf course lost over $100,000 in each of fiscal years 2011 and 2010, and the senior center operated at a loss of approximately $100,000 for fiscal year 2011 and $61,000 for fiscal year 2010. The city does not maintain complete, accurate, and up-to-date accounting records, so the Board of Aldermen does not receive adequate financial information to properly monitor cash balances and the financial condition of city funds. It is a concern that a city responsible for revenues of approximately $3.6 million annually for all city funds cannot produce timely basic financial reports that should be utilized regularly to manage city finances.
Budgets and Financial Reporting	Annual budgets do not contain all required elements, and the city does not publish complete, accurate, and up-to-date semi-annual financial statements, as required by state law. The Board of Aldermen does not adequately monitor budget to actual revenues and expenditures, and actual expenditures exceeded appropriated amounts for some funds, in violation of state law.
Expenditures	The city has a bid policy, but it was not followed for several purchases. The policy requires the city to advertise for bids for items or services in excess of $5,000, but the city did not advertise when it purchased chairs and tables, kitchen appliances, billiard tables, or culverts. The city needs to improve its approval process for expenditures and maintain better supporting documentation for expenditures. Vehicle mileage logs need improvement, and the city should maintain documentation to support the manner in which it allocates salaries to different funds.
Contracts and City Property	The city has entered into contracts for public services that do not adequately protect the city's financial interests by requiring the vendor to report on the services performed or provide proof of insurance. The city does not charge rent to three private entities and leases two houses to individuals for $100 and $200 per month with no written lease agreements or support for the reasonableness of the rental amounts. Additionally, the city did not solicit proposals to develop real estate owned by the city, so it cannot be sure it received the best value possible for the property.
Accounting Controls and Procedures	Receipting procedures need improvement. The city should use pre-numbered receipt slips, account for their numerical sequence, reconcile the method of payment to the composition of deposits, restrictively endorse checks immediately, and properly account for voided transactions. The city should also ensure individuals with access to city funds are bonded or insured to protect the city from loss.
Golf Course	The golf course pro shop is a private business operated on city property at city expense in violation of the Missouri Constitution's prohibition against using public funds to subsidize a private entity. The city and the pro shop

	have no written agreement, the business is operated with the help of city employees who do not track their time, the pro shop pays no rent to the city, and the city pays the pro shop's utilities and insurance. Pro shop receipts are commingled with the city's receipts, and the city does not receive adequate documentation of daily receipt activity. The pro shop cash register does not account for the composition of receipts and does not assign receipt or transaction numbers, making it harder to ensure all transactions are accounted for properly. The city needs to reexamine its employee discount policy related to golf course discounts. The city does not maintain accurate, up-to-date records of golf course membership dues, making it difficult to identify delinquent members.
Payroll	Payroll procedures need improvement. A golf course employee was allowed to accrue compensatory time in excess of the maximum allowed by law, police department employees are paid overtime not required by law, and two full-time city employees who perform janitorial duties for the city after business hours are not awarded compensatory time to which they might be entitled. The city does not require time sheets or maintain records of vacation and sick leave for some of its salaried employees. The city did not report the value of employee use of city vehicles as required by the IRS. Some employees are not paid in accordance with the city salary schedule.
Utility System Controls and Procedures	The city has not reviewed its water and sewer rates since 2008. Preparing a statement of costs would allow the city to determine the appropriate rate to charge to cover the cost of providing the service. Adjustments are sometimes posted to the utility system without adequate documentation of the reason for the adjustment and evidence of independent approval.
Sunshine Law	Closed meeting minutes lack sufficient detail of matters discussed, and the city should consider adopting a formal policy for access to city records.

In the areas audited, the overall performance of this entity was **Poor**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	The City of Mountain Grove did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
Mountain Grove, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit the City of Mountain Grove. We have audited certain operations of the city in fulfillment of our duties. The city engaged Officer CPA Firm L.L.C., Certified Public Accountants (CPAs), to audit the city's financial statements for the year ended June 30, 2011 and 2010. The audit of the city's financial statements for the year ended June 30, 2011, is not yet completed. To minimize duplication of effort, we reviewed the report and substantiating working papers of the CPA firm for the year ended June 30, 2010. The scope of our audit included, but was not necessarily limited to, the 2 years ended June 30, 2011. The objectives of our audit were to:

1. Evaluate the city's internal controls over significant management and financial functions.

2. Evaluate the city's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the city, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the city's management and was not subjected to the procedures applied in our audit of the city.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the City of Mountain Grove.

An additional report, No. 2011-23, *Forty-Fourth Judicial Circuit, City of Mountain Grove Municipal Division*, was issued in May 2011.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Donna Christian, CPA, CGFM
In-Charge Auditor:	Ted Fugitt, CPA
Audit Staff:	Michelle Crawford, M.Acct.

City of Mountain Grove
Management Advisory Report
State Auditor's Findings

1. Financial Condition and Monitoring

The fund balance of the General Fund is declining and, the Board of Aldermen does not receive timely and complete financial information to adequately monitor the city's financial condition. While the city has historically maintained a relatively low fund balance in the General Fund, some activities of the city have significant operating losses that are contributing to a further decline of the fund balance of the General Fund.

General Fund revenues, expenditures, and fund balances for the years ended June 30, 2011, 2010 and 2009, are noted below:

		Year ended June 30,		
		2011*	2010**	2009**
Beginning fund balance	$	42,385	240,379	144,895
Revenues		1,805,326	1,677,338	1,741,975
Expenditures		(1,758,931)	(1,636,712)	(1,508,990)
Other financing sources (uses)		-	(238,620)	(137,501)
Ending fund balance	$	88,780	42,385	240,379

*Information obtained from unaudited city financial records provided at our request.

**Information obtained from city's audited financial statements.

Although city financial records for June 30, 2011, reflected the General Fund as having a fund balance of $88,780 and a cash balance of $54,060, the Senior Center Fund had a negative fund balance of $79,305. In previous years, the city transferred funds from the General Fund to the Senior Center Fund to compensate for the negative balance; however, city personnel indicated they plan to carry the negative fund balance forward to 2012. The city does not have a clear plan on how to fund the continued operating losses of the Senior Center given the deteriorating financial condition of the General Fund.

Additionally, the Transportation Fund reflected a negative fund balance of approximately $140,000 at June 30, 2011, that was covered by a transfer from the Capital Improvement Sales Tax Fund. The city did not maintain supporting documentation of capital improvement related expenses paid from the Transportation Fund to ensure this transfer was appropriate.

Several factors have contributed to the decline in the fund balance of the General Fund, including operating losses of several city activities, and increased health insurance costs associated with the city self insurance fund. However, because the city does not prepare timely and accurate financial data for review by the Board of Aldermen and city administration, it is difficult for the Board to monitor the city's financial condition.

Financial information

As of June 2011, the city was 9 months behind in recording financial transactions to the accounting system and producing a complete financial statement. August 2010 was the most current financial statement the city could provide to us in June 2011. According to the City Clerk, receipt and disbursement transactions are entered monthly but other accounting entries, such as amounts due to and due from the various city funds had not been recorded. The City Clerk indicated this was due in part to the city being unable to update the accounting records for the current year until the auditor prepares year end journal entries for the preceding year.

After our request for current financial statements, the City Clerk updated city accounting records through November 30, 2010. These records showed a negative cash balance for the General Fund of ($123,611), and accumulated balances in the Due From Other Funds account of $3.3 million and the Due To Other Funds account of $3.2 million for the General Fund with no detail of what made up these amounts. According to the City Clerk, the balances in the Due To Other Funds account and Due From Other Funds account may not have been closed out properly at year end and may contain entries from the previous year. As a result, the city's financial records were not complete, accurate, and up-to-date.

In response to our request for financial statements for the year ended June 30, 2011 the city subsequently updated their accounting records and provided to us the financial data shown in the chart above in September 2011.

Monitoring by the Board

The financial information provided to the Board of Aldermen is not adequate to properly monitor cash balances and the financial condition of city funds. The Board periodically, but less frequently than monthly, is provided actual revenues by fund; however, they are only provided a list of itemized expenditures, not categorized by fund. The Board is not provided with cash balances for most city funds. Additionally, the Board of Aldermen does not receive complete and detailed financial information of several city operations, some of which are incurring losses.

Golf course

The city-owned Randel-Hinkle Municipal Golf Course historically operates at a loss; however, financial reports provided to the Board of Aldermen do not adequately report losses associated with the golf course.

Most financial activity for the golf course is accounted for in the General Fund. Amounts paid for employee wages associated with the golf course are combined with other wages and not clearly identified in financial reports. Some water costs incurred by the golf course are not calculated and allocated to the golf course. Additionally, payments for principal and interest related to the golf course are paid from the Capital Improvement Sales Tax Fund and are not clearly separated from other city debt. As a

result, the financial reports and budget do not clearly reflect all golf course related expenses.

The expenditures included in the table below have been adjusted to include approximate amounts for employees wages, water costs, and principal and interest payments attributable to golf course operations. The revenues, expenditures, and operating loss for the last 2 years are noted in the table below:

	Year ended June 30,	
	2011	2010
Revenues	$ 130,281	146,734
Expenditures	(259,614)	(263,284)
Operating Loss	$ (129,333)	(116,550)

Information obtained from city records.

Senior center

The Dora White Community Center (senior center) historically operates at a loss and is subsidized by the General Fund. Although the city maintains a separate fund for the senior center, monies are transferred from the General Fund to compensate for any operating losses. The senior center had revenues, expenditures, and operating losses for the last 2 years as noted in the table below:

	Year ended June 30,	
	2011*	2010**
Revenues	175,996	182,209
Expenditures	(276,305)	(243,539)
Operating Loss	$ (100,309)	(61,330)

* Information obtained from city records.

** Information obtained from city's audited financial statements.

The operating loss of the senior center has increased significantly. According to city personnel, food costs of the senior center have increased, even though the number of meals served has decreased. City personnel indicated the center is required to serve more frozen meals which cost more than preparing meals from scratch.

Conclusion

It is a concern that a city responsible for revenues of approximately $3.6 million annually for all city funds cannot produce timely basic financial reports that should be utilized regularly to manage city finances.

To effectively monitor cash balances and the financial condition of city funds, the Board must receive timely and complete financial information. Activities of the city that operate at a loss should be carefully analyzed for ways to make them more cost effective. While it may be desirable to fund certain operations, funding should be reviewed periodically to ensure activities are operated efficiently and continue to be in the best interest of the city.

Recommendation

The Board of Aldermen ensure timely and complete accounting information is received and reviewed for all city funds and monitor cash balances and financial condition. Additionally, the Board of Aldermen should ensure transfers between funds are supported by adequate documentation, and periodically review operations of the city to ensure activities are operated efficiently and continue to be in the best interest of the city.

Auditee's Response

The Board of Aldermen provided the following response:

We recognize that the financial reports provided us have been lacking, and we intend to ensure this gets corrected. The City Clerk has been behind in entering financial information into the city's computer system. The city's accounting software system does not provide for us to easily prepare financial statements for a current period when accounting entries for prior periods have not been completed and closed. City personnel will begin to obtain totals from the accounting system each month and manually compile financial statements for each fund. The City Administrator advises the Board on the financial status of the Golf Course and Senior Center each year at budget time; however, this review will be performed more often.

2. Budgets and Financial Reporting

The city does not comply with state law related to budget preparation, budget amendments, and published financial statements.

2.1 Budget preparation

Annual budgets do not contain all elements required by state law. Budgets for the years ended June, 30, 2011 and 2010, did not include actual revenues and expenditures for the 2 preceding years, or beginning and estimated ending cash balances. The budgets only included budgeted revenues and expenditures for the prior 2 years.

Section 67.010, RSMo, requires the preparation of an annual budget which shall represent a complete financial plan for the ensuing budget year and also sets specific guidelines for the format. A complete budget should include the beginning available resources and a reasonable estimate of the ending available resources and include comparisons of actual revenues and expenditures for the 2 preceding years. A complete and well planned

budget, in addition to meeting statutory requirements, can serve as a useful management tool.

2.2 Budget monitoring

The Board of Aldermen does not adequately monitor budget to actual revenues and expenditures. As a result, budget amendments for some city funds were approved after year end, and the city exceeded budgeted appropriations for most city funds.

On July 6, 2010, the Board of Aldermen amended the budget to increase expenditures by $124,160 for the previous year ended June 30, 2010. A budget amendment was also approved on July 7, 2009, resulting in a net increase in budgeted expenditures of $185,525 for the previous year ended June 30, 2009.

Even with the inclusions of these late budget amendments, the city's independent auditor reported for the years ended June 30, 2010 and 2009, that expenditures exceeded budgeted appropriations for all funds by $350,678 and $86,829, respectively. Further, according to city records it appears expenditures exceeded budgeted appropriations for the General Fund and the Water and Sewer Fund for the year ended June 30, 2011, by $37,451 and $320,762, respectively. It also appears actual expenditures exceeded budgeted appropriations in other city funds for the year ended June 30, 2011.

While the Board of Aldermen is periodically provided certain financial information at its meetings, the Board is not regularly requesting or provided financial information to properly monitor actual expenditures compared to budgeted amounts. See MAR finding number 1 regarding the inadequacy of financial information provided to the Board of Aldermen.

Section 67.040, RSMo, requires political subdivisions to keep disbursements within amounts budgeted and allows for budget increases, after the governing body officially adopts a resolution setting forth the facts and reasons. In addition, Section 67.080, RSMo, provides that no disbursement of public monies should be made unless it is authorized in the budget. To ensure compliance with state law, the Board should request adequate financial data to properly monitor actual expenditures compared to budgeted amounts and formally amend the budget before the related expenditures are incurred.

2.3 Financial reporting

While state law requires the city to publish financial statements at the end of each 6 month period, the city only published annual financial statements for the years ended June 30, 2009 and 2010. In addition, these financial statements were each published approximately 12 months after year end. Further, as of September 2011, the city has not published financial statements for the year ended June 30, 2011. As noted in MAR finding

number 1, the city does not produce accurate and timely financial data to properly comply with state law regarding published financial statements.

In addition, the financial statements that were published did not specify whether beginning and ending balances were cash or fund balances. For example, the financial statement published for the year ended June 30, 2010, reflected an ending balance of $3,357,313 for the Water and Sewer Fund. This balance represented the fund balance of the Water and Sewer Fund and not the cash balance which was $480,166. While either method of financial reporting is appropriate, without specifying what the ending balance represents, the financial statements can be misleading to city residents. Further, the city only publishes the total revenues and expenditures for each fund instead of a detailed account of receipts and expenditures, and the published financial statements for the year ended June 30, 2010, did not include the indebtedness of the city.

Section 79.160, RSMo, requires the Board of Aldermen to prepare and publish financial statements within 1 month of the end of each 6 month period which include a full and detailed account of the receipts, expenditures, and indebtedness of the city. Complete, accurate, and detailed financial statements are necessary to keep the citizens informed of the financial activity and condition of the city. In addition, Section 79.165, RSMo, states the city cannot legally disburse funds until the financial statements are published.

Recommendations

The Board of Aldermen:

2.1 Prepare annual budgets that contain all information as required by state law.

2.2 Obtain adequate financial information monthly and properly monitor actual expenditures compared to budgeted amounts. Also, the Board of Aldermen should ensure expenditures do not exceed budgeted appropriations.

2.3 Ensure semiannual financial statements are published which present complete and detailed financial information, as required by state law.

Auditee's Response

The Board of Aldermen provided the following responses:

2.1 We will ensure the budget prepared for the year ending June 30, 2013, complies with state law.

2.2 We will request and review budget to actual reports monthly and ensure expenditures do not exceed budgeted appropriations.

2.3 We will properly publish financial statements semiannually and ensure they clearly specify fund balance or cash balance.

3. Expenditures

Weaknesses were noted in controls and procedures related to expenditures.

3.1 Bidding

The city bid policy was not followed for several purchases, and the bid policy does not include procedures to be followed in instances of sole source procurement. The city has a procurement policy (Ordinance Nos. 2-421 through 2-437) which requires city officials to solicit bids for items or services wherever possible and advertise for bids for items or services costing more than $5,000.

Bids were not solicited for the purchase of a walk-in cooler ($10,500) and golf course chemicals ($7,088). Additionally, the city has not solicited proposals for auditing services since 2004. The city paid $17,699 and $19,665 for auditing services for the years ended June 30, 2010 and 2011, respectively.

In addition, bidding procedures used for some purchases did not comply with city policy. For example, the city obtained bids by phone and/or price comparisons for the purchase of kitchen appliances ($51,516), chairs and tables ($23,489), and billiard tables ($21,276), but did not advertise for bids as required by the city procurement policy.

The city also did not bid the purchase of culverts ($16,240). According to the City Administrator, this was due to an emergency situation. The emergency purchase policy requires a full explanation for the emergency purchase in the minutes. Minutes of the Board of Aldermen do not include documentation as to why the purchase qualified as an emergency.

Further, the procurement policy does not include procedures to be followed in instances of sole source procurement. According to the city, purchases of road oil and salt were sole source purchases; however, this was not documented. During the 2 years ended June 30, 2011, the city paid a total of $100,527 and $33,007 for road oil and salt, respectively.

Documentation of the selection process and criteria including sole source procurement should be retained to support purchasing decisions. Competitive bidding not only ensures the city is complying with city ordinances, but also helps ensure all parties are given an equal opportunity to participate in city business. Complete documentation should be maintained of all bids and proposals received including the reasons why a bid or proposal was selected.

3.2 Approval process

The approval process for expenditures is not adequate. The city ordinance requiring Board approval of expenditures of $500 or more was not always followed, and reviews of expenditures by the City Administrator and department heads are not documented. For example, a check for $7,026 was written June 30, 2010, for food and supplies for the Dora White Community Center. The check cleared the bank on July 21, 2010. The invoice for this payment was not approved by the Board until August 17, 2010. We also noted that a $10,638 expenditure for three pool tables for the senior center was not approved by the Board, and the City Administrator's approval of the expenditure was not documented.

The list of bills approved by the Board each meeting is not complete. A comparison of this list to approved invoices and the actual checks written is not performed and in some instances items are approved after the check has been disbursed. Further, the list of bills approved by the Board each meeting does not include payroll.

To ensure expenditures are an appropriate use of city funds, the City Administrator and department heads should document their review and approve purchases in accordance with city ordinances. In addition, the Board should ensure an adequate review of the list of bills approved, invoices, and checks written is performed prior to checks being disbursed. Further, city ordinance indicates purchases of less than $500 will be made under the direction and supervision of the city administrator. Therefore, it appears purchases greater than this amount require approval of the Board of Aldermen.

3.3 Supporting documentation

Invoices and supporting documentation are not canceled upon payment, and receipt of goods or services was not always documented. Of the 22 disbursements reviewed, 5 invoices were not canceled and 4 did not contain documentation of receipt of goods or services. Invoices and supporting documentation should be canceled upon payment to avoid duplicate payments. To ensure the validity and propriety of expenditures, documentation of receipt of goods should be included on all invoices and other supporting documentation.

3.4 Vehicle logs

Vehicle mileage logs for the 24 city vehicles are not adequate. The logs do not indicate daily odometer readings and the purpose of trips. Logs should provide sufficient details so the city can effectively monitor vehicle use and fuel costs.

3.5 Allocation of salaries

The city has no documentation to support the allocation of salaries between city funds. The salaries of the City Administrator and City Clerk are allocated one-half to the Transportation Fund, one-fourth to the General Fund, and one-fourth to the Water and Sewer Fund. For the year ended June 30, 2011, the salaries of the City Administrator and the City Clerk were $62,239 and $32,914, respectively. Further, the salary of the Public

Works Director is allocated three-fourths to the Transportation Fund and one-fourth to the Water and Sewer Fund. For the year ended June 30, 2011, the salary of the Public Works Director was $45,590. In addition, the salaries of the City Collector and the Court Clerk/Utility Clerk are allocated to multiple city funds.

To ensure restricted funds are used for their intended purposes, the city should allocate expenditures to city funds based upon specific criteria, such as the number of hours worked by each employee, and retain documentation to support these allocations.

Recommendations

The Board of Aldermen:

3.1 Ensure bids are solicited for all applicable purchases in accordance with city ordinances and sufficient documentation is maintained. In addition, the Board should consider expanding the purchasing policy to address sole source purchases.

3.2 Ensure review and approval procedures are followed for expenditures. Further, the Board should ensure the list of bills provided for approval at monthly meetings is complete.

3.3 Ensure all invoices are canceled upon payment and require all invoices be initialed or signed by a department head or employee to indicate acceptance of goods or services.

3.4 Ensure mileage logs document the beginning and ending odometer readings, and purpose of each trip.

3.5 Ensure salary allocations are supported by adequate documentation.

Auditee's Response

The Board of Aldermen provided the following response:

3.1 We will review the city's bid policy for any potential amendments and ensure compliance with the policy for all future expenditures.

3.2 We will comply with this recommendation.

3.3 This recommendation has been implemented.

3.4 This recommendation has been implemented. Mileage logs now contain odometer readings and the purpose of each trip.

3.5 We will perform a time study to document salary allocations.

4. Contracts and City Property

Contracts with private entities for public services lack adequate provisions to protect the financial interests of the city, and do not adequately document the benefit to the city. Additionally, the city did not solicit proposals to develop real estate owned by the city.

4.1 Contracts

The city contracts with several entities to provide services for the public. Some contracts do not adequately protect the financial interests of the city.

- The city contracts with the Ozarks Family YMCA to provide recreational services to the community. These services include promoting and organizing various sports, operating the municipal swimming pool, and promoting and organizing senior adult programs. The city pays the YMCA $15,000 per year for these services, provides indoor and outdoor recreational facilities, and pays certain other expenses related to the YMCA providing services such as lifeguards for the pool. The contract does not provide for the YMCA to retain fees charged to citizens for these recreational services, and does not require any reporting to the Board of Aldermen on the use of the $15,000 or the fulfillment of contract terms. Further, although the contract contains a provision to protect the city against liability claims related to the recreational services offered by the YMCA, there is no provision requiring the YMCA to show proof of liability insurance.

- The city contracts annually with the Mountain Grove Chamber of Commerce and the Mountain Grove Central Business District Association paying them $11,000 and $3,500, respectively, for various public services including promoting the city and organizing several events. Although the City Clerk indicated a representative from the organization will periodically report to the Board of Aldermen on its activities, there is no provision in the contract requiring such reporting or a contract provision requiring documentation on how the funds were spent.

To provide proper accountability, city management should review future contracts to ensure city financial exposure is adequately limited and all contractual obligations are met. Further, future contracts should address who will receive fees collected for services provided. In addition, the city should establish formal procedures to monitor the use of monies paid to these entities and require financial reporting of how the city funds are used.

4.2 Lease contracts

The city leases property to the Arts Council, the Pregnancy Resource Center, and the Tri-County Fair with no lease payments required. Two of these lease contracts do not document any benefit to be received by the city, and one lease is not in writing. Additionally, the city owns two houses that are leased to individuals for $100 and $200 monthly without written lease

agreements outlining the terms of the lease and without documentation to support the reasonableness of the monthly rent amount.

The Missouri Constitution prohibits the use of public money or property to benefit any private individual, associations, or corporations except as provided in the constitution. Written contracts are necessary to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings. Section 432.070, RSMo, requires contracts for political subdivisions to be in writing. In addition, to ensure monthly rent amounts charged to tenants are reasonable, the city should maintain documentation of how the rent amount was determined.

4.3 Real estate procedures

The city did not solicit proposals to develop real estate owned by the city. In December 2007, a building that appraised at $900,000 was donated to the city for $1. The city then sold the building to a local business for $50,000 to be developed. The development included construction of a bowling alley and theaters completed in 2009, and additional development is ongoing. The city did not solicit any other proposals for the development of the building or bids for the sale of the property.

To ensure the best value is received or paid for property sold or purchased and all interested parties are given equal opportunities to participate, the city should solicit proposals for future real estate sales and development projects.

Recommendations

The Board of Aldermen:

4.1 Ensure future contracts address who will receive fees charged for services, require proof of liability insurance when applicable, and provide for periodic reporting to ensure all contractual obligations are met and city funds are accounted for properly.

4.2 Evaluate leasing property without a documented financial or service benefit to the city, and enter into written contracts/agreements defining services provided and benefits received. In addition, the Board of Aldermen should ensure documentation is maintained to support how the monthly rent amount is determined and its reasonableness.

4.3 Solicit proposals for future real estate sales and development projects.

Auditee's Response

The Board of Aldermen provided the following responses:

4.1 We will review all contracts and make the appropriate changes to comply with this recommendation.

4.2 The home that is leased for $200 per month is leased to an individual who also helps to watch over the city walking trail which is located near this residence. We will document this in a lease agreement. The city no longer leases the other home for $100. We will also ensure all written agreements define the services provided and benefits received.

4.3 We agree with this recommendation.

5. Accounting Controls and Procedures

Accounting controls and procedures need improvement.

5.1 Receipting procedures

A review of receipting procedures identified numerous weaknesses.

- The City Clerk and police department do not issue receipt slips for some monies received. Receipt slips are not always issued for monies received for police reports and amounts transmitted to the City Clerk by other city departments. In some instances, an invoice is issued by the City Clerk in place of a receipt slip; however, the invoice is not pre-numbered, does not indicate the method of payment, does not indicate who received the monies, and does not indicate the purpose for which the monies were received.

- Police department receipt slips do not indicate the method of payment.

- Receipt numbers are not accounted for in the computerized receipt system. During a cash count, we identified two missing receipt numbers on the daily cash drawer report. The computer system does not maintain a record of voided receipts and no copies of the receipt were retained.

- The Collector's office issues manual receipt slips for city licenses, ATV permits, animal licenses, and new water meter deposits. The corresponding computer receipt slip number is not recorded on the manual receipt slip after the information is entered into the city computer system, and there is no independent review to ensure all manual receipts are properly entered into the computer and subsequently deposited.

- The police department, City Clerk, and golf course do not endorse checks immediately upon receipt.

To properly account for all receipts and ensure monies are properly deposited, prenumbered receipt slips should be recorded in numerical order

for all monies received, the method of payment should be recorded for each receipt record and reconciled to the composition of deposits, and checks should be restrictively endorsed immediately upon receipt. Further, all voided transactions should be accounted for properly.

5.2 Bond coverage

Although the Mayor is an authorized signature on the bank accounts, he is not covered by a bond. Additionally, the Senior Center Director and volunteers at the Senior Center all handle monies and are not bonded or covered by a blanket insurance policy. Failure to properly bond or insure individuals who have access to funds exposes the city to risk of loss.

Recommendations

The Board of Aldermen:

5.1 Require receipt slips be issued in numerical order for all monies received with the method of payment indicated on the receipt slip and reconcile the composition of the amounts recorded to deposits. Additionally, the Board of Aldermen should take steps to ensure checks are endorsed upon receipt, and voided transactions are accounted for properly.

5.2 Obtain bond coverage or insurance for all officials and employees with access to city assets.

Auditee's Response

The Board of Aldermen provided the following responses:

5.1 All these recommendations have now been implemented.

5.2 We have discussed coverage for all these employees and officials with our bonding company and will obtain coverage as recommended.

6. Golf Course

Concerns relating to the golf course pro-shop, the handling of receipts, discount policies, and membership tracking were noted. The golf course processes membership fees, greens fees, cart rentals, shed rentals, and other miscellaneous receipts of approximately $139,000 annually, according to city accounting records.

6.1 Pro-shop

The golf course pro shop is a private business operated on city property at city expense. There is no written agreement between the city and the Golf Club House Manager for operation of the pro shop. The golf course pro shop, called The First Tee, is a private business inside the golf course club house and is personally owned by the Golf Club House Manager who is a city employee. This business is operated with the help of other city employees. The city requires no rent payment, pays utilities and insurance for the pro shop, and has not solicited proposals for its operation. Further,

the amount of city employee time spent to operate the pro shop is not tracked.

If the city continues to allow the Golf Club House Manager to own and operate the pro shop as a private business on city property, it should enter into a written agreement establishing appropriate terms for the operation of this private business on city property. The city should cease using city resources to subsidize the operation of the privately owned pro shop and periodically solicit proposals for the operation of the pro shop, if it is to continue being operated as a private business. Article VI, Section 25, Missouri Constitution, prohibits the use of public money or property to benefit an individual, except as provided in the constitution. Without a written agreement that clearly indicates the governmental purpose provided to the city, this could be considered a violation of the constitution. In addition, Section 432.070, RSMo, requires all contracts be in writing.

6.2 Receipts

Concerns were noted regarding golf course procedures related to receipts.

- Receipts of the pro shop, a private business, are comingled with city receipts. All receipts collected at the golf course, both for the pro shop and the city, are receipted using one cash register. If the city continues to allow the pro shop to operate as a private business, it should cease the comingling of city and private business receipts to ensure all public monies are accounted for properly.

- The city does not receive adequate documentation of daily receipt activity at the golf course. A daily report and receipt tape are submitted to City Hall with the city receipts; however, the city does not receive a copy of the daily report and register tape on days that only pro shop monies are received and no city fees are collected. As a result, there are some days that the city does not receive any reports from the golf course. To ensure all city fees collected are turned over, the city should receive a copy of the daily report and register tape for each day the golf course is open. Without obtaining and properly reviewing adequate documentation, the city cannot ensure all monies are transmitted.

- The cash register does not account for the composition of receipts or assign receipt or transaction numbers; and, golf course monies are not transmitted to the city intact. When the pro shop has credit card sales, an equal amount of cash is taken out of monies to be transmitted to the city since all credit card payments automatically post to a city bank account. When there is not enough cash to cover the credit card payments for pro shop items, the city issues a check to the employee who owns the pro shop for the amount of credit card sales. In addition, the city pays the credit card company fees for each credit card transaction and these fees are not considered when pro shop sales are withheld. The failure to account for the composition of receipts, assign receipt or transaction

numbers, and transmit intact increases the risk of theft or misuse of funds going undetected.

6.3 Policy

The city approved a golf course use policy that gives a 50 percent discount to city employees. The golf course also applies the discount to family members of city employees; however, the city policy does not clearly state if the discount applies to family members. To ensure all fees due the golf course are received and city policy is followed, the city should reexamine the policy and clarify who should receive a discount.

6.4 Membership billings

The city does not adequately track amounts due for golf course memberships. In response to a recommendation by its independent auditor, the city began maintaining a spreadsheet of amounts billed by the golf course for membership fees and amounts paid. However, we noted a $790 payment for a membership and shed rental received by check on January 28, 2011, had not been recorded on the spreadsheet as of May 26, 2011. The city should maintain adequate up to date, records to ensure all golf course membership dues are paid and to facilitate contacting delinquent members.

Recommendations

The Board of Aldermen:

6.1 Evaluate the current arrangement of allowing the Golf Club House Manager to operate the pro shop as a private business, and if the city decides to continue this arrangement, enter into a written agreement establishing appropriate terms for the operation of the business on city property. Further, the Board should cease using city resources to subsidize the operation of the privately owned pro shop and periodically solicit proposals for the operation of the pro shop, if it is to continue being operated as a private business.

6.2 Require copies of all daily reports and register tapes from the golf course, evaluate the practice of allowing the Golf Club House Manager to withdraw city cash receipts for pro shop credit card transactions, ensure the composition of all receipts is indicated, and evaluate the possibility of adding receipt/transaction numbers to the cash register at the golf course to properly account for all transactions.

6.3 Review the golf use policy and clarify whether the 50 percent discount includes family members of city employees.

6.4 Ensure billings and collections of golf memberships are adequately monitored.

Auditee's Response

The Board of Aldermen provided the following responses:

6.1 We will review the current situation and make changes as recommended. A written agreement will be prepared that complies with the State Auditor's recommendations.

6.2 A new cash register will be purchased that will track transactions and all reports will be reviewed. All receipts will be deposited and any funds owed to the Golf Club House Manager will be paid by check from the city.

6.3 We will review the policy and amend it as appropriate.

6.4 This recommendation has been implemented. The spreadsheet maintained by the City Clerk is reconciled to records maintained at the Golf Course.

7. Payroll

Procedures over compensatory time, timesheets and leave records, and commuting miles need improvement.

7.1 Compensatory time

Several areas of concern were noted with compensatory time.

- A golf course employee was allowed to accrue compensatory time in excess of the maximum allowed by the Fair Labor Standards Act (FLSA) of 1938. City payroll records indicate one golf course employee had a compensatory time balance of 595 hours at November 30, 2010. According to city officials, golf course employees work long hours during nice weather and receive compensatory time at the rate of time and one-half for hours worked in excess of 40 hours per week. The compensatory time is used by the employees during winter months when the golf course is closed. However, the FLSA states covered employees may accumulate a maximum of 480 hours (for seasonal personnel) of compensatory time. Hours in excess of this maximum are to be paid to or taken off by the employee in the next pay period.

- Overtime is paid to police department employees when not required by the FLSA. The city currently pays overtime to police department employees for any time worked over 40 hours in one week; however, the FLSA only requires police department employees to be compensated at time and one-half for work hours in excess of 171 hours in a 28-day pay period, not including holiday, vacation, or sick leave hours. Paying overtime for law enforcement based on a 40 hours week results in higher police department payroll costs.

- Compensatory time is not calculated for two full time city employees who performed janitorial duties after business hours. Two full-time city

employees are also employed by the city as janitors at city hall and the senior center. The janitor at city hall is the Fire Chief, a salaried city employee who does not prepare a time sheet and who as fire chief is exempt from overtime provisions. The janitor at the senior center is the cook and prepares one time sheet for her duties as cook and another time sheet for her duties as janitor; however, her timesheet as janitor only documents the days she cleans and not the hours she spends cleaning. Both employees receive two W-2 forms annually from the city for their separate duties. The city personnel policy and the FLSA require any time worked over 40 hours in a week (for non-emergency personnel such as the cook and janitorial services) to be paid at time and one-half. Because the city Fire Chief and the senior center cook are full time city employees, it is likely their time working as janitors would cause them to exceed 40 hours during the week.

To ensure the city complies with the FLSA, the city should establish better controls over the management of compensatory time balances. This would include evaluating balances for reasonableness, reviewing the reasons for large or increasing balances, and providing solutions to prevent excessive balances. Additionally, to limit city liability for overtime costs for law enforcement officers and ensure compliance with the FLSA and the city personnel policy, the city should review the method in which overtime is computed for law enforcement officers and require adequate documentation from the Fire Chief and the senior center cook for all time worked to ensure compensatory time is awarded as appropriate.

7.2 Timesheets and leave records

The city does not require timesheets be prepared for its seven salaried employees and the city hall janitor. Additionally, the city does not maintain records of vacation and sick leave for one of the salaried employees, the Golf Club House Manager (owner of the pro shop business referred to in MAR finding number 6).

Timesheets are necessary to document hours worked, substantiate payroll expenditures, and provide the city with a method to monitor hours worked and leave taken. In addition, without leave records, the city cannot ensure vacation and sick leave balances are accurate and all employees are treated equitably. Leave records also help the city in determining unused leave upon termination of employment.

7.3 Commuting miles

The commuting use of city vehicles is not reported to the Internal Revenue Service (IRS) and city vehicle logs do not distinguish between business and personal use. The City Administrator, Parks Supervisor, and Public Works Director take city vehicles home.

With certain exceptions, such as law enforcement personnel, the IRS reporting guidelines provide that personal commuting mileage is a

reportable fringe benefit. Furthermore, IRS guidelines require the full value of the provided vehicle be reported on the employee W-2 forms if the employer does not require submission of detailed logs which distinguish between business and personal use. Additionally, the city may be subject to penalties and/or fines for failure to report all taxable benefits.

7.4 Compensation

Some employees are not paid in accordance with the city salary schedule. We noted several positions, including the City Administrator, Police Chief, and Golf Club Manager, for which the salary amount paid was less than the amount on the salary schedule. According to the City Administrator, salary amounts for a few employees are not calculated using the salary schedule even though their position is specifically listed on the schedule. While the salaries of these employees are also specifically listed in the city budget which is approved by the Board of Aldermen, the salary schedule is also approved by the Board of Aldermen and there is no documentation indicating why the salary amount paid does not agree to the schedule.

To ensure salary amounts paid to employees are accurate, authorization of employee compensation by the Board of Aldermen should be consistent or adequate documentation should be maintained to document reasons why salaries for some city positions do not agree with approved salary schedules.

Recommendations

The Board of Aldermen:

7.1 Closely monitor compensatory time of city employees to limit potential city liabilities and ensure the maximum allowable balance is not exceeded. In addition, the Board of Aldermen should review the method in which overtime is computed for law enforcement officers and require adequate documentation from the Fire Chief and the senior center cook for all time worked for the city to ensure overtime is awarded as appropriate.

7.2 Require timesheets and leave records be maintained for all employees.

7.3 Comply with IRS guidelines for reporting fringe benefits related to commuting in city owned vehicles.

7.4 Ensure authorization of employee compensation is consistent or adequate documentation is maintained to document reasons why salaries for some city positions do not agree with approved salary schedules.

Auditee's Response

The Board of Aldermen provided the following responses:

7.1 Comp time for Golf Course employees no longer exceeds 480 hours. We will contact the Department of Labor regarding the employment arrangements with the Fire Chief and the Senior Center Cook. We have already implemented the new comp time calculations for police department personnel.

7.2&3 We will comply with these recommendations.

7.4 Beginning this year we discontinued approving a separate salary schedule. All employee salaries are detailed in the city's budget and approved when the budget is approved.

8. Utility System

The city has not reviewed water and sewer rates since 2008, and significant weaknesses were noted in control procedures over utility system adjustments.

8.1 Water and sewer rates

According to the City Clerk, there has not been a review of utility rates since 2008, and per the audited financial statements, the Water and Sewer Fund had net income of only $382 for the year ended June 30, 2010. Further, the Board does not receive and review timely financial information necessary to adequately monitor fund balances (see MAR finding number 1).

Water and sewer fees are user charges which should cover the cost of providing the related services. The city should perform a detailed review of its water and sewer costs, including depreciation and debt service costs, and set rates to cover the total cost of operation. Preparing a statement of costs would not only allow the city to determine the rates necessary to support current and future operations, but also provide documentation to customers of the rationale behind the rates. Such rate studies should be performed periodically.

8.2 Adjustments

Independent approval is not always obtained and documented for adjustments posted to the utility system, and the justification and reasons for the adjustments are not always adequately documented.

Adjustments to customer water accounts are authorized by the City Administrator; however, his approval and reasons for adjustments are not always documented. In addition, adjustments to customer sewer accounts are authorized only by the utility clerk, who also prepares utility bills and posts adjustments to utility accounts. Utility adjustments for the year ended June 30, 2011, decreased amounts owed by $8,609.

Proper authorization and adequate documentation, which fully explains the reason for adjustments to customer accounts, are necessary to ensure only the proper accounts and amounts are adjusted and to reduce the risk of theft, loss, or misuse of funds.

Recommendations

The Board of Aldermen:

8.1 Review water and sewer rates periodically to ensure receipts are sufficient to cover all costs of providing these services.

8.2 Require an independent review and approval of all utility system adjustments and ensure adequate documentation is retained to support such adjustments.

Auditee's Response

The Board of Aldermen provided the following responses:

8.1 We reviewed rates in July and we are considering an increase because of additional cost requirements.

8.2 This recommendation has been implemented.

9. Sunshine Law

Closed meeting minutes did not include sufficient detail, and the city did not always comply with the Sunshine Law and city ordinances.

9.1 Meeting minutes

Closed meeting minutes did not include sufficient detail of matters discussed. For example, some closed session minutes stated topics such as litigation and personnel were discussed but provided no further detail as to the specifics of the discussions. Further, no minutes were taken for a budget workshop held by a quorum of the Board in a conference room off the back of Council Chambers on July 5, 2011. Due to lack of documentation, it is unclear whether the workshop was an open meeting.

To ensure compliance with Chapter 610, RSMo (the Sunshine Law), the Board should adequately document discussions held in closed meetings and maintain minutes for all meetings of the Board of Aldermen, including workshops.

9.2 Public access policy

The city has not adopted a policy regarding public access to city records. A formal policy regarding access to city records would establish guidelines for the city to make the records available to the public. This policy should establish a person to contact, an address to mail requests for access to records, and a fee schedule for document retrieval and research. Section 610.023, RSMo, lists requirements of making city records available to the public, and Section 610.026, RSMo, establishes the fees for copying public records.

Recommendations

The Board of Aldermen:

9.1 Ensure closed meeting minutes contain sufficient detail of all significant matters discussed and minutes are maintained for all meetings of the Board of Aldermen, including workshops.

9.2 Establish written policies and procedures regarding public access to city records.

Auditee's Response

The Board of Alderman provided the following responses:

We will comply with these recommendations.

City of Mountain Grove
Organization and Statistical Information

The City of Mountain Grove is located in Wright County. The city was incorporated in 1886 and is currently a fourth-class city. The city employed 47 full-time employees and 7 part-time employees on June 30, 2011.

City operations include law enforcement services, utilities (water and sewer), street maintenance, fire protection, planning and zoning, and recreation services.

Mayor and Board of Aldermen

The city government consists of a mayor and eight-member board of aldermen. The members are elected for 2-year terms. The mayor is elected for a 4-year term, presides over the board of aldermen, and votes only in the case of a tie. The Mayor and Board of Aldermen, at June 30, 2011, are identified below. The Mayor is paid $500 per month and members of the Board of Aldermen are paid $100 per month. The compensation of these officials is established by ordinance.

Delbert Crewse, Mayor
Glenn Kemper, Alderman
Amber Raney, Alderwoman
Dan Bartlett, Alderman
Victor Richards, Alderman
Kay Rogers, Alderwoman
Wayne Jones, Alderman
Jeff Holman, Alderman
Bill Davault, Alderman

Other Elected Official

The City Marshall/Ex Officio Collector at June 30, 2011, was Daniel Parker and his annual compensation was $2. The City Marshall/Ex Officio Collector 's compensation is established by ordinance. Daniel Parker also serves as the chief of police, an appointed position, at an annual salary of $37,226.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The City of Mountain Grove did not receive any federal stimulus monies during the 2 years ended June 30, 2011.

Thomas A. Schweich

Missouri State Auditor

City of Lanagan

November 2011

Report No. 2011-105

auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the City of Lanagan

Missing Funds	Thousands of dollars of city monies are missing, and the city should work with law enforcement to prosecute the person(s) responsible and recover the missing amounts. The auditors identified over $13,600 in missing cash receipts and believe another $2,800 in property tax receipts is missing, and it is likely additional monies are missing.
Excess Court Revenues	The city failed to turn over approximately $36,000 in excess traffic ticket revenues to the Missouri Department of Revenue, as is required by state law, and the Police Chief continued to report certain traffic stops as being on city streets even after the audit staff informed him it was improper.
Financial Condition	The city is in poor financial condition, and elected officials are not taking the necessary steps to address the city's finances. At December 31, 2010, the city owed almost $84,000, and only had approximately $17,600 in available funds. Despite this, the city hired a new employee and gave raises to existing employees.
Accounting Controls and Procedures	The city's poor accounting controls and procedures, including the lack of segregation of duties, inadequate controls and absence of proper oversight allowed the missing funds to go undetected. The city lacks procedures to properly account for licenses and fees, accurate accounting records are not maintained, and $805 was removed from the petty cash fund but there is no documentation to show what happened to it. The city should consider reducing the number of bank accounts it maintains (nine checking and three savings) to reduce the number of transfers between accounts and opportunities for error. The city does not regularly backup its computer system and store the backups offsite.
Water and Trash Services	The city's water supply infrastructure has severely deteriorated, and the city lacks the resources to upgrade it. The city should segregate utility system accounting duties, investigate large water losses, review its water rates, and enforce delinquent penalties. The city used refundable water deposits to pay city expenses, and the fund is short by more than $10,000.
City Disbursements	The city did not solicit bids for trash services and does not have an adequate written agreement with this vendor. The city contracted with an engineering firm, but had no documentation showing it evaluated and considered competitors. The city lacks procedures to properly calculate, collect and remit sales taxes, and does not adequately document and approve disbursements. The city does not pay its bills on time and has been charged late fees, finance charges, and overdraft fees.

Restricted Funds	The city does not properly allocate expenses among its restricted funds and has spent Law Enforcement Training fees on items not allowed by state law.
Property Tax Collections	The Board of Aldermen did not properly protect city records, and the tax records disappeared from City Hall. The city paid the former City Clerk $802 in property tax commissions, but it is not clear whether these payments were appropriate. The Board of Aldermen does not review and approve property tax reports, and accurate delinquent tax lists are not maintained.
Payroll Procedures	The city does not maintain personnel files for its employees, and some time records were not available. The city does not maintain adequate documentation of leave balances, and the Police Chief and the former City Clerk both received unsupported payments for leave. The city did not properly report all wages on W-2 forms and paid its federal payroll taxes late, which cost the city $885 in penalties and interest.
Financial Statements, Budgets, and Audits	The city does not regularly publish semi-annual financial statements, submit annual financial statements to the State Auditor's office, or obtain annual audits.
Ordinances and Meetings	The city does not maintain a complete and orderly set of ordinances. The city needs to improve meeting minutes and ensure Sunshine Law compliance by limiting closed meeting discussions to allowable topics.
Capital Assets	The city does not maintain capital asset inventory records, tag assets for identification, or conduct annual physical inventories. The city had no documentation to support how it disposed of three city vehicles.

In the areas audited, the overall performance of this entity was **Poor**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	The City of Lanagan received a $7,671 Recovery Act: Edward Byrne Memorial Justice Assistance Grant Program Local Law Enforcement Block Grant, which was expended during the 2 years ended December 31, 2010, for officer safety equipment.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
City of Lanagan, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit the City of Lanagan. We have audited certain operations of the City of Lanagan in fulfillment of our duties. The scope of our audit included, but was not necessarily limited to, the 2 years ended December 31, 2010. The objectives of our audit were to:

1. Evaluate the city's internal controls over significant management and financial functions.

2. Evaluate the city's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the city, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the city's management and was not subjected to the procedures applied in our audit of the city.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the City of Lanagan.

An additional report, 2011-12, *Fortieth Judicial Circuit, City of Lanagan Municipal Division*, was issued in March 2011.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Donna Christian, CPA, CGFM
In-Charge Auditor:	Candi Copley
Audit Staff:	Michelle Crawford, M.Acct.

1. Missing Funds

Between January 1, 2009, and December 31, 2010, utility receipts collected for water and trash services totaling at least $13,520 and other cash receipts totaling at least $158 were received but not deposited and are missing. Additionally, when this audit began, property tax books and receipts records were discovered to be missing from city hall, and property tax receipts totaling approximately $2,800 also appear to be missing.

Some other essential records could not be located by the current City Clerk, and as a result, it is likely additional funds are missing. After our initial visit to the city on Wednesday, September 22, 2010, to begin the audit of the City of Lanagan Municipal Division, the former City Clerk, Peggy Gilliam, ended her employment. The Board of Aldermen appointed Monica Blue as City Clerk on October 12, 2010.

Water and trash receipts

Water and trash receipts totaling $171,928 were recorded as received during the 2 years ended December 31, 2010, but only $163,908 was deposited in the bank account, resulting in a shortage of $8,020. In addition, some adjustments posted to water customer accounts indicate specifically that payments were received but not posted. These adjustments total at least $5,500 and should have been included in total receipts but were not. As a result, at least $13,520 was received but not deposited, and is missing.

Recorded receipts	$ 171,928
Adjustments posted to customer accounts (labeled as payments received but not posted)	5,500
Total receipts	$ 177,428
Total deposits	163,908
Missing cash receipts	$ 13,520

Water/trash receipts are posted to the computer system in batches, and deposit amounts should agree to batch totals. A detailed comparison of each individual receipt and deposit was performed for 4 months (May, October, and November, 2009, and February, 2010). This detailed review identified significant amounts of cash receipts missing from city deposits. As a result, the remaining 20 months of the audit period were reviewed by comparing total recorded receipts to total deposits to arrive at the above amounts and the amounts reported on the Documentation of Missing Cash Receipts Schedule at the end of this report.

Missing water/trash monies were concealed in several ways:

- Numerous adjustments were posted to customer accounts to reduce the amount owed; however, payments were made by these customers and the monies were not deposited. These adjustments contained explanations in the memo line such as, "payment not posted" identifying that a payment was, in fact, received. Manual receipt slips or billing stubs marked paid were found for many of these adjustments. However, these payments were not posted as a receipt in the utility accounting system and were not deposited.

- Numerous instances were noted where checks were recorded as received in the utility accounting system, but the manually issued receipt slip or billing stub indicated the monies were received in cash and these monies were not deposited into the city's account.

- Numerous instances were noted where checks received were not recorded in the utility system and were substituted into deposits for recorded cash receipts that were not deposited into the city's account. Adjustments were also posted for these payments to reduce the customer's liability.

- Several instances were identified where a customer made multiple payments to their water/trash account and some payments were not posted or deposited, and are missing. As a result, some customers overpaid the city.

Because of the lack of availability of some receipt records, additional cash receipts may be missing that are not reflected in this report. The Documentation of Missing Cash Receipts Schedule at the end of this report provides detail regarding the missing cash receipts.

Property tax receipts

Approximately $2,800 in property tax monies may be missing. City officials indicate the city tax books and tax receipt information disappeared from City Hall shortly after our audit began in September 2010. As a result, detailed receipt information was not available for our review. However, according to city bank deposit records approximately 32 percent less was deposited for property tax receipts in 2009 than in 2010.

		2010	2009
Property taxes charged	$	9,148	9,148
Property tax deposits		7,479	4,602
Difference	$	1,669	4,546
Collection percentage		82%	50%

During our audit, we observed instances where residents brought their paid property tax receipt into City Hall to prove to the new City Clerk property taxes had been paid and were not delinquent. Deposits could not be located for these receipts.

Assuming the 2010 collection percentage of 82 percent is reasonable for the City of Lanagan then an additional $2,877 should have been collected during 2009.

Other receipts

During our detailed review of receipt records for 4 months (May 2009, October 2009, November 2009, and February 2010), we identified some manual receipt slips for cash that should have been deposited in the General Fund and Water Deposit Fund; however, the cash was not deposited.

Month and type of receipt	Receipt slip numbers	Cash received	Cash deposited	Cash shortage
May 2009				
Property tax and dog tag	142091, 198008	$ 63	20	43
October 2009				
Partial water deposit	198119	35	0	35
November 2009				
Water deposit	198112	80	0	80
Total		$ 178	20	158

Since manual receipts and deposit records were only reviewed for 4 months it is likely additional monies are missing.

Overall conclusion

The lack of segregation of duties, inadequate controls, and the absence of proper oversight by the Board of Aldermen, as discussed in the remainder of this report, resulted in the missing cash receipts being undetected. Given the varying methods in which receipts are missing from the city, it is apparent city financial activity was not adequately monitored.

Report No. 2011-12, *Fortieth Judicial Circuit, City of Lanagan Municipal Division*, issued in March 2011 also identified at least $521 missing in municipal court cash receipts between July 1, 2009, and December 31, 2009.

Recommendation

The Board of Aldermen work with law enforcement officials regarding criminal prosecution for the missing cash receipts and take the necessary actions to recover restitution for amounts missing.

Auditee's Response

The Board of Aldermen provided the following response:

We will work with law enforcement officials regarding the criminal prosecution of the individual responsible for the missing cash receipts and we will take any action necessary to recover restitution. We will also consult with our city attorney regarding any civil action.

2. Excess Court Revenues

Procedures are not in place to track tickets issued on state and federal highways and related fines and costs collected to determine the excess revenues to be distributed to the Missouri Department of Revenue (DOR). Additionally, the Chief of Police did not properly report the location of vehicle stops to the Missouri Attorney General.

2.1 Monitoring

Tickets issued on state and federal highways and the related fines and costs collected are not properly tracked to determine the excess revenues to be distributed to the DOR. Section 302.341.2, RSMo, requires municipalities deriving more than 45 percent prior to August, 2009, and more than 35 percent after August, 2009, of their annual general operating revenue from fines and costs for traffic violations occurring on a state or federal highway to turn the excess amount over to the DOR, to be distributed to schools of the county.

The city police department issued 1,163 traffic tickets in 2010 and 541 tickets in 2009. Since the city and the municipal division do not track the amount of fines and costs collected on tickets issued on state and federal highways, we reviewed all 555 tickets issued by the police department between January 1, 2010, and June 30, 2010. This review determined 5 tickets were issued for non-traffic violations, 4 tickets were issued on city streets, the location stop of 3 tickets issued could not be determined, and the remaining 543 tickets (98 percent) were issued on state highway 59 (Main Street) or state highway EE, within the city limits.

Based on city receipt records, 35 percent of the 2010 annual general operating revenue ($117,868) was $41,254. Annual receipts received from the municipal division totaled $76,364 and, based on our review of 2010 tickets, estimated receipts for violations on state and federal highways would be $74,837 (98 percent), resulting in excess monies to be turned over to the DOR of approximately $33,583 ($74,837 less $41,254). In addition, we calculated excess revenues for 2009 to be $2,698. As a result, total excess revenues for 2010 and 2009 are $36,281.

To ensure monies are properly disbursed to the DOR and to comply with state law, the city should establish procedures to track tickets issued on state and federal highways, determine the excess revenue collected, and submit the excess to the DOR.

2.2 Reporting

The city did not properly report the location of vehicle stops to the Missouri Attorney General for the 2010 and 2009 Missouri Vehicle Stops Annual Report prepared by the Chief of Police. A review of the city's submission reported all vehicle stops made by the police department for 2010 and 2009 were on city streets.

The Missouri Attorney General's web site instructions indicate state highway should be reported for the location of vehicle stops on a state highway that runs through a city. In October 2010, audit staff advised the Police Chief of this requirement and he responded that according to Google Maps the road is titled Main Street and therefore, he reported it as a city street. In February 2011, the Police Chief submitted the 2010 data and again reported all vehicle stop locations occurred on a city street.

To ensure vehicle stop locations are accurately reported to the Missouri Attorney General, vehicle stops occurring on a state highway that runs through the city should be reported as occurring on a state highway, not a city street.

Recommendations

The Board of Aldermen

2.1 Properly track collections from fines and court costs for traffic violations on state and federal highways and distribute excess revenues to the DOR. In addition, the Board of Aldermen should pay the DOR $36,281 for 2010 and 2009 excess revenues or review all tickets for 2010 and 2009 to determine the exact amount of excess revenues collected and disburse that amount to the DOR.

2.2 Ensure the Missouri Vehicle Stops Annual Report submissions to the Missouri Attorney General are correctly completed and all traffic stops on state highways are properly reported.

Auditee's Response

The Board of Aldermen provided the following responses:

2.1 The Board will make every effort to abide by state law. The current Board was not aware of this liability and will attempt to remedy the situation.

2.2 All vehicle stops from this point forward will be properly reported.

3. Financial Condition

The City of Lanagan is in poor financial condition and there is no evidence elected officials are providing the guidance and controls necessary to ensure the continuing operations of the city.

The city did not have adequate cash at year end to pay all city liabilities. At December 31, 2010, the cash balance of the General Fund and Water Fund

were $10,172 and $7,501, respectively. Our review indicated the city owed at least $83,994 at December 31, 2010, as follows:

Description		Amount
CPA services	$	1,438
Utility repairs		3,331
Trash services (see MAR finding number 6)		7,000
Insurance		1,935
Water utility supplies		2,529
Engineering services		17,708
Legal services		1,943
Delinquent vehicle lease payments (6 months behind)		2,964
Due to Water Deposit Fund (see MAR finding number 5)		8,865
Department of Revenue (see MAR finding number 2)		36,281
Total	$	83,994

The city routinely receives past due notices from vendors and incurs penalties and finance charges for the late payment of invoices (see MAR finding number 6). At December 31, 2010, the city was six payments behind on the vehicle lease for the police car and negotiated with the lease company to avoid the assessment of late charges. Shutoff notices for utilities have been received from utility companies on several occasions because bills are not paid timely.

In addition, the water system has severely deteriorated and water quality violations have been referred to the Missouri Attorney General by the Missouri Department of Natural Resources (DNR). As a result, court fees and related penalties for violations may be assessed and could be substantial. City officials have not secured funding or developed a plan to make repairs to the water system. Additionally, water rates have not been properly reviewed to ensure rates are sufficient to cover costs and there is a significant amount of water loss monthly without adequate follow-up by city officials (see MAR finding number 5).

Further, city officials continue to increase spending without regard to the poor financial condition of the city. According to the 2011 budget, wages for city and court personnel will increase from approximately $77,500 in 2010 to approximately $118,000 in 2011. Raises were given to most employees and one additional employee was hired. To fund this $40,500 increase in wages, city officials estimated revenues from water/trash services on the 2011 budget would increase; however, water rates have not been increased in several years and the number of water customers did not increase. As a result, it is unclear how city officials determined such an increase in revenue will occur.

Poor management practices exhibited by city officials, numerous internal control weaknesses, and inaccurate accounting records, as well as the

missing cash receipts of at least $13,678 have contributed to the poor financial condition.

It is essential the Board address the situation both in the immediate- and long-term future. To improve the financial condition of the city, the Board should review disbursements and reduce spending as much as possible, evaluate controls and management practices to ensure efficient use of city resources, and attempt to maximize all sources of revenue. In addition, to effectively monitor the available cash and financial condition of each fund, the city needs complete and accurate financial reports.

Recommendation

The Board of Aldermen closely monitor and take the necessary steps to improve the financial condition of the General and Water Funds. The Board should perform adequate short-term and long-term planning that include implementing internal controls and monitoring procedures, accurate accounting records, and proper budgeting procedures. Additionally, the Board should contact creditors and negotiate payment plans to reduce city liabilities, and work with the DNR to repair the deteriorated water system.

Auditee's Response

The Board of Aldermen provided the following response:

We will implement procedures to better monitor the financial condition of the city. Recommendations in this audit report will be taken seriously by the Board and addressed. We have been working toward reducing some of our liabilities, but additional steps will be taken to reduce all liabilities. We are currently working with the DNR to arrive at a remedy to address the city's water system deficiencies.

4. Accounting Controls and Procedures

Numerous weaknesses were identified with accounting controls and procedures. Extremely poor accounting controls and procedures allowed the missing funds identified in MAR finding number 1 to occur and go undetected.

4.1 Segregation of duties

The Board of Aldermen has not established adequate segregation of duties or supervisory review over the accounting functions performed by the City Clerk. Weaknesses identified in the utility, payroll, and property tax systems, and overall receipting and disbursing procedures are significant and demonstrate a lack of proper oversight by the Board.

The City Clerk is responsible for receiving, recording, and depositing monies; reconciling bank accounts; preparing invoices for payment; issuing checks; and posting entries into the accounting system. Additionally, the City Clerk performs all utility billing procedures and payroll related duties. Many of these duties would normally be performed by a City Treasurer and City Collector; however, the city does not have individuals serving in these

positions, and in November 2010, the Board approved City Ordinance No. 10-08 combining the offices of City Clerk and City Tax Collector.

Proper segregation of duties helps ensure all transactions are accounted for properly and assets are adequately safeguarded. Attorney General's Opinion No. 24, 1955 to Dodds, concluded that in a fourth-class city, the holding of the positions of City Clerk, City Treasurer, and City Collector, or any two of these offices, by the same person at the same time would be incompatible. The current procedures jeopardize the system of independent checks and balances intended by state law. If segregating these duties is not possible, at a minimum, a timely supervisory review by the Board of Aldermen should be performed and documented. Had adequate oversight procedures been in place, some of the missing funds noted in this report may have been prevented.

4.2 Receipting and depositing procedures

The city does not maintain adequate records of receipts, and depositing procedures are poor. As a result, there is no assurance all monies collected were properly handled, recorded, or deposited to city bank accounts.

- Receipt slips are not issued for some monies received. Receipt slips are not always issued for business licenses, fire dues, park fees, cemetery plot sales, and franchise fees received from electric and gas companies. Additionally, water/trash services payments were not always properly or consistently recorded on manual receipt slips or billing stubs.

- Manually issued receipt slips and utility stubs do not always indicate the method of payment, and the city does not reconcile the method of payment recorded on the receipt slips and utility stubs to the composition of receipts recorded in the computerized accounting system or to the deposit.

- Receipt slips are not issued in numerical sequence. Multiple receipt slip books are used to record various types of receipts and the city could not locate all receipt slip books used. Additionally, some receipt slips were not properly voided and retained, and all copies of some receipt slips were missing from the receipt slip books.

- Monies deposited are not reconciled to receipt records. Water/trash monies collected are posted to the computerized utility system and a deposit report is generated daily; however, amounts deposited into the bank account did not always agree with the deposit report. Instances were identified where monies deposited were less than the amount on the deposit report and monies were missing (see MAR finding number 1). Also, instances were noted where monies deposited were more than amounts recorded on the deposit report, and some monies received and deposited were not recorded on the deposit report.

- Monies collected are not always deposited intact or in a timely manner. For example, a check received on May 8, 2009, from an alderwoman for water/trash services was not deposited until May 20, 2009, even though several deposits were made by the city between these dates. A hand written note requesting the check be held was attached to the receipt slip. Several other examples of monies held from deposits were also noted.

- Checks and money orders received are not restrictively endorsed immediately upon receipt. The endorsement is applied when the deposit is prepared or in some instances no endorsement was applied.

- Access to monies received is not properly restricted. While monies are placed in the city safe at night, access is not limited, as several city employees know the combination to the safe and have access.

Poor receipting and depositing procedures resulted in missing funds not being detected timely (see MAR finding number 1). In addition, we identified one instance where the city received a check from the State of Missouri for $516 issued in September 2010 for Peace Officer Standard Training fees and the check was never receipted or deposited by the city. According to state records, the check remains outstanding and the city has not made an effort to request the state reissue the check.

To adequately safeguard receipts and reduce the risk of loss or misuse of funds, receipt slips or utility billing stubs should be issued and maintained for all monies received, the numerical sequence of receipt slips should be accounted for properly, the method of payment should be documented, and the composition of receipts should be reconciled to the composition of deposits. Additionally, all receipt slip books should be retained, voided receipt slips should be properly defaced and retained, all monies should be deposited intact and in a timely manner, and checks should be restrictively endorsed immediately upon receipt.

4.3 City licenses and fees

Procedures have not been implemented to properly account for various city licenses and fees. According to city deposit records, approximately $30,000 was deposited related to various city fees during the 2 years ended December 31, 2010.

Business licenses

Documentation of business license fees charged and paid was not adequate. A computerized list of city businesses is printed and when a business pays the license fee, the payment is manually noted on the printout; however, the 2010 printout did not indicate a fee was paid by several businesses and one business was included on the list twice. According to the City Clerk, several businesses on the list are no longer open and the list has not been updated since 2008.

Additionally, the amount charged to at least one vendor is questionable. Three business licenses were issued in 2010 to one local vendor with a $10 fee listed for each license; however, the vendor was charged and paid $160. The City Clerk indicated she believed the additional cost was because the vendor sold alcohol, but this is not clearly documented on the license, in city ordinance, or other city documents.

Pet licenses

Tag numbers issued with pet licenses are not accounted for properly, the license fee charged does not agree to city ordinance, and some fees collected could not be accounted for in the accounting records.

The city tracks the sale of pet license fees collected on a plain piece of paper, listing the pet owner, date of tag purchase, and amount collected. The record is unorganized and in some instances not legible. A review of the 2010 pet license record indicated that tag numbers were not listed, and the numerical sequence was not accounted for properly. Additionally, the amount charged for an animal not neutered was $7.50 instead of $7 as specified in city ordinance. Further, the record indicated $110 was collected for pet licenses in May 2010, but according to city accounting records only $73 was receipted and deposited.

Park fees

Park fee receipt slips do not include the year on the date line, only the month and day, making it difficult to determine the amount of park fees collected in a specific year. Additionally, there are no procedures in place to document the transfer of park fees collected by the park attendant to the City Clerk.

Fire membership dues

No accounting of fire membership dues or insurance reimbursement claims billed or collected is maintained. Varying amounts ranging from $25 to $100 identified as membership dues were collected by the city and deposited in the fire department bank account. The city was unable to provide documentation of fire membership monies received; documentation, such as an ordinance or bylaw, of a basis for charging the dues; or a list of which residents owed the dues. Additionally, amounts billed to insurance companies for responding to a fire were not maintained by the city to ensure all amounts billed were collected.

Cemetery plot fees

City cemetery plot sales records are poorly maintained in a spiral notebook. While official cemetery plot receipt slips are available, they are not used. The date of the last receipt recorded in the receipt slip book was November 2009. Additionally, some individuals appear to have made partial payments on their cemetery plots; however, no payment plan records were provided to document the amount owed, amount paid, and balance due.

To ensure all city fees are accounted for properly, adequate records and procedures should be established to ensure amounts are properly collected, recorded, and deposited.

4.4 Accounting records

Accounting records are not accurately maintained. As a result, reports generated from the accounting system cannot be relied upon by city officials when making decisions.

- Some disbursements are inaccurately classified in the accounting system. For example, accounting records for the year ended December 31, 2009, report wages paid to law enforcement employees totaled $4,803; however, 2009 federal and state wage reports indicate approximately $30,000 was paid to law enforcement officers.

- Some receipts are not consistently classified in the accounting records. For example, various city fees were sometimes recorded as "other revenue" instead of as city fees. In one instance, $160 collected for a licensing fee was recorded as a property tax receipt.

- Transfers between bank accounts were sometimes recorded as a receipt and not properly classified in the accounting records. For example, a check for $710 issued from the Water/Trash Fund account to the General Fund account was incorrectly recorded as a property tax receipt in the accounting system.

- Numerous additional errors, such as check issue dates and deposit dates were posted incorrectly in the accounting records. In one instance, a payroll check was recorded in the accounting records to the wrong payee. In a similar instance, a check for $500 was posted to the accounting records as issued to the Internal Revenue Service; however, the payee on the check was the water supply vendor.

Accurate and complete financial information is necessary to provide the Board with sufficient information to make informed decisions and to provide residents with reliable information about city finances.

4.5 Petty cash fund

A petty cash balance of $805 was removed from the accounting records without documentation of the disposition of the funds. The 2009 computer generated financial statements indicate the city maintained a cash fund of $805 used for small purchases and to make change. During 2009, an adjustment was made in the computerized accounting records to remove the cash balance of $805 at the direction of the Board of Aldermen. To ensure monies are accounted for properly, documentation should be maintained to provide accountability as to the disposition of the $805.

4.6 Bank accounts and transfers

The city has nine checking accounts and three savings accounts, resulting in excessive transfers between accounts and cumbersome recordkeeping. Numerous checks are issued to make transfers from one checking account to another. During our review of transfers between city accounts, we identified several instances where checks were issued from one account and then directly re-deposited into the same account in error, and some transfer checks were deposited into the wrong city account and required another transfer check to correct the error. Also, several deposits were made into the wrong city account requiring transfer checks to be issued from city accounts. Checks totaling approximately $302,000 were issued for transfers between city bank accounts during the 2 years ended December 31, 2010.

To help simplify city records and reduce the number of transfers between bank accounts that must be monitored and controlled, the Board should consider reducing the number of bank accounts.

4.7 Backups

Regular and timely backup copies of computer information are not maintained. The computer system crashed in 2009 and information had to be reentered. Backups are necessary to provide a means for recreating destroyed data. Backup copies should be maintained and stored off-site to provide increased assurance that city computerized records can be recreated.

Recommendations

The Board of Aldermen:

4.1 Consider appointing separate individuals to the position of City Clerk, City Collector, and City Treasurer to adequately segregate duties. If this is not possible, at a minimum, the Board of Aldermen should perform and document reviews of the City Clerk's work.

4.2 Require receipt slips or billing stubs be issued or maintained for all monies received and the numerical sequence of receipt slips be accounted for properly. The method of payment should be documented and the composition of receipts reconciled to the composition of deposits. Additionally, voided receipt slips should be properly defaced and retained, all monies should be deposited intact and in a timely manner, and checks should be restrictively endorsed immediately upon receipt.

4.3 Establish adequate records and procedures to ensure all city fees are properly collected, recorded, and deposited.

4.4 Ensure accounting records are accurately maintained.

4.5 Maintain documentation to provide accountability of the disposition of the petty cash/change fund.

4.6 Consider reducing the number of bank accounts.

4.7 Maintain backups of computer information and store the backups in a secure, offsite location.

Auditee's Response

The Board of Aldermen provided the following responses:

4.1 The Board has attempted to segregate some duties with the addition of another clerical staff person. As a Board, we will request more financial information and provide additional oversight of city operations. We will comply with the Attorney General's opinion.

4.2 These recommendations have been implemented. Receipt records are now agreed to amounts deposited.

4.3 This recommendation has been implemented. Spreadsheets have now been developed for most of the various city licenses and fees. In addition, during 2011 the year was included with the date on receipt slips issued for park fees.

4.4 The current City Clerk balances bank accounts with the city's accounting records monthly. The City Clerk will begin providing bank reconciliations and bank statements along with monthly financial statements to the Board for their review to help ensure the accuracy of these records.

4.5 As the Board now has several new members, we are not responsible for practices of past administrations. The city now maintains a small change fund for utility payments. A petty cash fund is not maintained.

4.6 We agree and will review current city needs and consider reducing the number of bank accounts held by the city.

4.7 This recommendation has been implemented.

5. Water and Trash Services

The city water system is failing and city officials do not have a plan to finance and repair the system. Additionally, significant weaknesses exist in control procedures related to the water system and trash service. As a result of these weaknesses, there is less assurance all utility monies have been accounted for properly, water and trash services have been billed properly, and user charges are set at the appropriate level to cover the cost of providing the related service.

The city provides water and trash services to its residents and maintains approximately 170 utility accounts. According to city records, water and trash sales totaled $97,417 and $102,487, for the years ended December 31, 2010 and 2009, respectively.

5.1 Deterioration of water system

The city water supply infrastructure has deteriorated and was referred to the Missouri Attorney General by the DNR on January 3, 2011, for violations of National Primary Drinking Water Regulations and Missouri Safe Drinking Water Regulations.

City officials entered into a Bilateral Compliance Agreement (BCA) with the DNR on December 20, 2005, and extended in 2007 requiring completion of water system upgrades by 2010. Several conditions required by the BCA have not been fulfilled, and the city has not taken appropriate action to eliminate the violations and comply with the agreement. As a result, formal enforcement action was initiated by the DNR and court fees and related penalties could be substantial.

The city lacks adequate resources required for the upgrades without passing additional costs on to utility customers, and as a result, will need substantial financial help from external sources to keep the water utility system in operation and avoid complete failure. Although a $100,000 bond issue was approved by voters on November 3, 2009, bonds have not been issued and this funding alone will not provide adequate funds to repair or replace the system.

The city has attempted to obtain public assistance grants and/or loans to fund water system upgrades, but lacks complete and accurate financial statements, an audit of financial activities, and a long-term capital improvement plan, all of which are typically required for public funding. City efforts have been unsuccessful and funding for improvements has not been obtained. Additionally, according to minutes of the Board of Aldermen meetings, the Board does not appear to have a clear understanding of how to resolve the issues with the water system. In September 2010, the Board voted unanimously to obtain water from a neighboring city, and then in May 2011, the minutes indicate the Board discussed retaining the current water system.

It is apparent the Board of Aldermen has not adequately addressed the problems with the water system. As a result, the deteriorating system has significantly impacted the city's financial condition. To successfully address water system issues, the Board of Aldermen should prepare short-term and long-term plans that outline the repair/replacement project and funding sources.

5.2 Adjustments

City Clerk duties include all utility billing, receipting, and recording functions, as well as posting adjustments to the utility computer system without obtaining independent approval or adequate documentation to support the reason for the adjustments. During 2010 and 2009, adjustments were made resulting in an overall reduction to utility account balances of approximately $56,800. While some of these adjustments may be legitimate,

numerous adjustments allowed the concealment of missing monies (see MAR finding number 1).

Requiring someone independent of receipting and recording functions to review and approve adjustments, and requiring proper supporting documentation be maintained for such adjustments would help ensure all adjustments are valid. If these procedures had been in place, missing monies may have been identified timely.

5.3 Water loss

Critical information used to monitor the water system distribution efficiency is not always recorded, and the city has not documented efforts to resolve significant water losses. Although the computerized water billing system automatically compares the total water pumped to the total water billed to customers, monthly water system data to perform this calculation is not always recorded or recorded correctly in the water accounting system, and there is no documentation the Board investigates and resolves significant water losses.

Incomplete or inaccurate information was entered into the water accounting system for 7 months during 2010, preventing the calculation of an accurate water loss percentage. During December 2010, reasonably accurate information appeared to have been entered into the water system showing approximately 3 million gallons of water was pumped and approximately 716,000 gallons was billed or used by the city, resulting in a water loss of 76 percent. City officials indicated that because of the serious deterioration of the water system, significant losses, such as the loss calculated in December 2010, are routine. While the city believes most of the monthly water loss represents water lost between the well and customer meters, some of the loss could represent unbilled water usage. As a result, the city is incurring higher costs to operate the system which contributes to the poor financial condition of the city.

To help detect significant water loss and ensure all water use is properly billed, accurate water system information should be obtained and entered into the water system. The Board should review the reconciliation of gallons of water pumped to gallons of water billed monthly and document its efforts to resolve the differences. According to the U.S. Environmental Protection Agency, the water industry goal for unaccounted for water is 10 percent or less. [1]

5.4 Water rates

The city has not performed a review of water rates for several years, and documentation officials provided to support the last rate increase from 2008 was not adequate. Additionally, accounting records are not accurately

[1] http://www.epa.gov/watersense/pubs/utilities.html, Last updated on Monday, October 10, 2011.

maintained to provide the financial data necessary to calculate the cost of operating the water system (see MAR finding number 4). As a result, water rates may not be sufficient to cover the costs of operating the system.

Water fees are user charges which should cover the cost of providing the related services. The city should perform a detailed review of its water costs, including depreciation, and set rates to cover the total costs of operation. Preparing a statement of costs would not only allow the city to determine the rates necessary to support current and future operations, but also provide documentation to customers of the rationale behind the rates. Such rate studies should be performed periodically.

5.5 Refundable water deposits

Refundable water deposit monies are not properly restricted and have been used to pay city expenses. Additionally, some water deposit monies received were deposited into the wrong bank account, some were not posted to the computerized utility accounting system, and some cash received for water deposits could not be traced to a bank deposit and is missing.

New customers are required to pay an $80 refundable deposit before receiving water services. According to the water deposit report for October 31, 2010, the city should be holding at least $14,225 in refundable water deposits; however, the balance of the Water Deposit Fund bank account at this date is only $4,052, a difference of $10,173.

- Restricted water deposit monies totaling $8,865 were transferred from the Water Deposit Fund bank account to the Payroll Fund bank account ($1,246), Water/Trash Fund bank account ($3,254), and General Fund bank account ($4,365) during 2009 and 2008 for payment of city expenses. Board of Aldermen meeting minutes indicate a payment plan of $390 for 24 months was approved in 2009 to repay the water deposit loan with interest, but no payments have been made.

- During 2009 and 2010, refundable water deposits of $1,640 were deposited into the Law Enforcement Training (LET) Fund bank account and only $1,320 was disbursed from this account to correct the error. As a result, $320 is due from the LET Fund bank account to the Water Deposit Fund bank account.

  A limited review of water deposit records revealed that not all payments for refundable water deposits are properly posted to customer accounts and therefore, are not included in the water deposit report total of $14,225 noted above. During July and August 2010, two receipt slips for the $80 cash payment of refundable water deposits were not posted to the utility computer system or reflected in the appropriate customer account. In addition, one of the $80 cash payments could not be traced to a deposit.

Refundable water deposit monies are restricted funds. Borrowing from these funds to pay city expenses is not an appropriate use of these funds, and is not an appropriate way to finance funding shortfalls. To ensure the city is properly holding sufficient water deposits on behalf of customers, the Board should prepare a plan to repay the Water Deposit Fund bank account and prepare a budget that reflects this plan. In addition, to ensure all water deposit monies received from customers are accounted for properly, the Board should review water deposit records to ensure all monies received were deposited and posted to the appropriate customer account, and prepare an accurate list of water deposits held by the city and reconcile the list monthly to monies held in the Water Deposit Fund bank account.

5.6 Delinquent accounts

Penalties are not always properly assessed on delinquent water and trash accounts. City Ordinance No. 24.01 states any payment not received by the 21st day of each following month after water and trash billing is delinquent. A late penalty of 15 percent of the bill is to be added to each delinquent bill; however, we identified some customers with penalties of 5 percent and one with 0.5 percent. In addition, penalties were not charged for some customers with delinquent bills.

Recommendations

The Board of Aldermen:

5.1 Prepare short-term and long-term plans that outline the repair/replacement project and funding sources for addressing all water system deterioration issues.

5.2 Require someone independent of the utility system review and approve all adjustments, and ensure adequate documentation is retained supporting such adjustments.

5.3 Ensure complete and accurate data is entered into the water accounting system to calculate the monthly water loss percentage and document any effort to resolve significant water losses.

5.4 Perform a documented review of water rates periodically to ensure receipts are sufficient to cover all costs of providing these services.

5.5 Develop a plan to repay the Water Deposit Fund bank account, review water deposit records to ensure all monies received were deposited and posted to the appropriate customer account, and prepare an accurate list of water deposits held and reconcile the list monthly to monies in the Water Deposit Fund bank account. Any discrepancies should be investigated and resolved.

5.6 Ensure penalties are assessed on delinquent water and trash accounts in accordance with city ordinance.

Auditee's Response

The Board of Aldermen provided the following responses:

5.1 We understand the implications of the current condition of the city's water system. Past administrations have failed to properly address this area. We will discuss all available options and prepare a plan to address and remedy the problems with the city's water system.

5.2 All future monthly adjustment reports will be provided to the Board by the City Clerk for approval.

5.3 The new City Clerk is now entering all information and she will provide all water system reports to the Board for review and action in the future.

5.4 Once the water system repairs are completed and the city's water system is in compliance, we will review rates.

5.5 The new City Clerk has started reviewing all water deposit information. Once this review is complete and an accurate listing is prepared, we will work to ensure adequate funds are set aside and labeled as customer water deposits.

5.6 The new City Clerk believes part of the problem results from a computer programming issue. She will contact the system programmer to resolve any issues to ensure penalties will be assessed in accordance with city ordinance.

6. City Disbursements

Controls and procedures over city disbursements are in need of significant improvement.

6.1 Trash service

The city failed to solicit bids for trash services, does not have an adequate written agreement with the trash service vendor, and is delinquent in paying for this service.

In April 2007, the city extended an existing 5 year contract for trash services for another 5 years without evidence of bidding. Additionally, the contract on file with the city was not signed by city officials and did not specify the amount to be retained by the city for commissions. Charges for trash services are included on customer water bills, collected by the city, and remitted to the trash service vendor monthly with the exception of a commission retained by the city. The City Clerk indicated the city retained $1 per customer per month for trash collection services; however, the trash service vendor indicated the city was to retain only 50 cents per customer, per month. Without a commission amount specified in the written agreement, it is not clear if the city is withholding the proper amount.

Further, the city does not remit payment monthly to the trash service vendor and does not document calculations of amounts due. During 2010, the city made only 7 monthly payments totaling $9,675 to the trash vendor without evidence of how these amounts were calculated. According to the trash service vendor, the city owes approximately $7,000 as of December 31, 2010.

Soliciting bids periodically for trash services helps ensure the city has made every effort to obtain the lowest and best price for this service, and all interested parties are given an equal opportunity to participate in city business. To ensure amounts paid to the trash service vendor are properly calculated, documentation should be maintained of payment calculations and the written contract should specify the amount of commissions retained by the city.

6.2 Water sales taxes

Procedures are not in place to ensure the amount of quarterly sales tax is properly calculated and remitted to the DOR. For example, the computerized water billing system indicates sales taxes of approximately $400 were charged to customers during October, November, and December 2010; however, the sales tax return completed by the city and submitted to the DOR showed sales tax of approximately $800 was due and paid by the city. Based upon water sales amounts reported on the sales tax return, it appears the city may have over reported the amount of water sold to businesses.

To ensure sales tax amounts are properly charged, collected, and remitted to the DOR, quarterly sales tax returns should be compared to amounts charged and collected per the computerized water billing system and any differences should be investigated.

6.3 Supporting documentation

Adequate supporting documentation was not maintained for many city disbursements. Of 25 disbursements reviewed, we identified 11 without adequate supporting documentation. Additionally, procedures are not in place to document receipt of goods and services and cancel invoices when payment is made.

Our review identified payments to a lumber company ($490), discount store ($1,050), and an individual ($500) without documentation of goods purchased or services rendered. In addition, the city failed to retain the grant application, time reports, documentation of bids received, and invoices paid for disaster clean up expenses funded through federal and state grant monies totaling approximately $55,000. Although we subsequently obtained this information from the state agency administering the federal funds, copies of the documentation should have been retained by the city.

Invoices for pump repair services ($981), fuel ($723), and water products ($500) were not marked paid to prevent duplicate payments and there was no indication the goods or services were received by the city. Numerous other instances were noted where the city failed to retain documentation to support payments, failed to mark invoices paid, and failed to indicate goods and services were received.

To ensure obligations were actually incurred and amounts paid were proper, all disbursements should be supported by paid receipts, itemized vendor invoices, or other detailed documentation with payment information and receipt of goods or services information clearly indicated. Additionally, all documentation related to federal and state grant monies should be retained by the city to document the propriety of related expenses.

6.4 Approval process

The Board of Aldermen does not have adequate controls over the approval process for disbursements. Additionally, the list of bills approved each month is not complete, and a comparison of this list to actual checks written is not performed.

For example, the July 2010 list of bills to be paid totaled $4,704; however, Board meeting minutes indicate the Board approved bills totaling $7,880 at the July 2010 meeting. There is no explanation for the difference. In addition, the monthly list of bills is not always a complete list of all amounts to be paid. For example, in February 2010, two checks totaling $652 issued to the former City Clerk for property tax commissions were not included on a list of bills approved by the Board.

Further, the Board routinely approves a total amount of bills to pay that exceeds the available cash balance. For example, on June 8, 2009, the Board approved payment of bills totaling $28,633 when funds became available; however, according to city records, available cash balances of the General and Water Funds on this date totaled only approximately $6,000, and funds were not available to make these payments for several months. The determination of which city obligations are paid is made by the City Clerk, and no one compares the list of approved disbursements to amounts actually disbursed.

To ensure disbursements are properly approved, the Board of Aldermen should ensure the list of bills to be paid is complete and accurate, ensure adequate funds are available to pay amounts approved, and compare checks written to the list of bills approved for payment.

6.5 Engineering services

The city contracted with an engineering firm in June 2009 and then renegotiated the contract in April 2010 without documentation of the evaluation and consideration of other firms.

Sections 8.289 and 8.291, RSMo, provide guidance on the selection of engineering services.

6.6 Late fees, overdraft fees, and finance charges

Because of the city's poor financial condition, bills are not paid timely and late fees and/or finance charges are often incurred. In addition, city bank accounts have been overdrawn on several occasions incurring overdraft fees.

- Late fees and finance charges totaling $720 were paid in 2010 and 2009 to a credit card company, $326 to the city accountant, and $254 on a tractor loan.

- The bank statement for the General Fund bank account reflected a negative balance five times during 2010 with overdraft charges totaling at least $255.

Several other instances were noted where late fees and finance charges were assessed for untimely payments. To prevent unnecessary fees and finance charges, procedures should be in place to ensure bills are paid timely. Additionally, to prevent bank account overdraft charges, the city should more closely monitor bank account balances.

Recommendations

The Board of Aldermen:

6.1 Solicit bids periodically for trash services, maintain a signed agreement with the trash service vendor detailing city commission amounts, document the calculation of the fees paid, and determine the amount of delinquent charges and remit unpaid amounts to the trash service vendor timely.

6.2 Compare quarterly sales tax returns to amounts charged and collected per the computerized water billing system and investigate any differences.

6.3 Maintain adequate supporting documentation for all disbursements. Such documentation should be clearly marked as paid to avoid duplicate payments and receipt of goods or services should be indicated. In addition, the Board of Aldermen should ensure documentation related to state and federal grant funds is retained by the city.

6.4 Ensure the list of bills to be paid is complete and accurate and adequate funds are available to pay amounts approved, and compare checks written to the list of bills approved for payment.

6.5 Comply with state law regarding the selection of engineering services.

6.6 Implement procedures to ensure bills are paid timely and bank account balances are properly monitored to avoid late fees, finance charges, and bank overdraft fees.

Auditee's Response

The Board of Aldermen provided the following responses:

6.1 We agree and will consider bidding for trash services in the near future. An adequate contract that contains all necessary information and is signed by both parties will be obtained. The city is currently including a partial payment of delinquent amounts owed along with our current payments in an effort to reduce this liability.

6.2 City officials will review the utility accounting system to make sure taxes are properly charged. Sales tax returns will be reviewed for accuracy before filing.

6.3 This recommendation has been implemented. Documentation is now maintained for all city disbursements.

6.4 The list of bills provided to the Board is now accurate and complete. We will ensure adequate funds are available when bills are approved and we will begin comparing checks written to bills approved.

6.5 We will comply with this recommendation.

6.6 We agree and believe bills are now paid in a timely manner. We are also currently working on paying delinquent bills from past administrations.

7. Restricted Funds

Expenses are not properly allocated among city funds, and law enforcement training (LET) fees are not properly restricted to training related expenses.

7.1 Allocation of expenses

No documentation was maintained to support the allocation of expenses among funds.

- It is not clear how payroll related expenses for employees performing multiple functions are allocated among the various city funds. Monies are transferred from the various bank accounts to the Payroll Fund bank account periodically as payroll checks are issued or payroll taxes are paid; however, there is no documentation to support how amounts transferred are calculated. During the years ended December 31, 2010 and 2009, the city transferred monies to the Payroll Fund bank account as follows:

Transferred from		Year Ended December 31, 2010	2009
General Fund Account	$	53,784	41,305
Water Fund Account		29,523	36,579
LET Fund Account		0	1,302
	$	83,307	79,186

In addition, approximately $8,000 was disbursed directly from the General Fund account for payroll related liabilities. It is not clear why some payroll expenses were paid from the Payroll Fund bank account and allocated among other city funds and some were paid directly from the General Fund bank account.

- Expenses (other than payroll) are not properly allocated among the various city funds. Most city disbursements are made from the General Fund bank account, and transfers are made from restricted accounts, such as the Water/Trash Fund bank account, to the General Fund bank account to cover expenses related to the restricted funds. Documentation is not maintained on how transfer amounts are calculated. In addition, based upon the timing and amount of the transfers, it appears some transfers were made to avoid a negative General Fund bank account balance. A total of $113,771 was transferred from restricted city funds to the General Fund bank account during the 2 years ended December 31, 2010.

Proper allocation of expenses, including payroll, is necessary for the city to accurately determine the results of operations of specific activities thus enabling the city to establish the level of taxation and/or user charges necessary to meet all operating costs. Documentation should be maintain to support the allocation of expenses.

7.2 Law Enforcement Training Fund

LET monies are not always used for purposes allowed by state law. During the 2 years ended December 31, 2010, the city disbursed approximately $1,740 for salaries, $270 for uniforms, and $330 for police supplies (gun holster, magazine case, swat knife) from the LET Fund. Section 488.5336, RSMo, requires LET fees to be used only for the training of law enforcement officers.

Recommendations

The Board of Aldermen:

7.1 Properly allocate expenses among city funds and maintain documentation to support the allocation.

7.2 Ensure LET funds are expended in accordance with state law.

Auditee's Response

The Board of Aldermen provided the following responses:

7.1 We will review the allocation of payroll expenses. The City Clerk is currently documenting the allocation of other city expenses.

7.2 We will comply with this recommendation.

8. Property Tax Collections

Numerous concerns were noted with reporting and monitoring procedures of property tax collections. As a result, the Board has little assurance property taxes, which the City Clerk/City Collector has been charged to collect, have been properly recorded and deposited. According to city deposit slips, tax collections totaled $7,479 and $4,602 for 2010 and 2009, respectively.

8.1 Tax books

The Board of Aldermen did not properly protect city records and as a result, the 2009 property tax book and related property tax receipts disappeared from City Hall shortly after our audit began in September 2010.

Property taxes collected and deposited during 2009 are significantly less than amounts typically collected and it appears some property tax monies are missing (see MAR finding number 1). The former Mayor indicated the tax books were at city hall before the audit started but disappeared shortly after the audit began. Although city officials were aware records were missing from city hall, a formal report to local law enforcement was not filed and an investigation was not conducted. City officials incurred additional charges totaling $300 from the county to reprint the tax books.

City officials have a fiduciary duty to protect city records and investigate the circumstances surrounding missing records and report the situation to law enforcement.

8.2 Property tax commissions

The city had no documentation to support the calculation of $802 in property tax commissions paid to the former City Clerk. In addition, there is no city ordinance authorizing these commissions, and payroll taxes were not withheld or paid on the compensation, nor was the amount reported on the former City Clerk's W-2 form. As a result, it is not clear whether or not these payments were appropriate.

To ensure property tax commission payments are proper, the city should adopt an ordinance authorizing the commissions and documentation should be maintained to support the amounts paid. Additionally, Section 105.300, RSMo, defines an appointive officer or employee of a political subdivision as an employee for payroll tax purposes. To comply with state and federal payroll laws, payroll taxes should be withheld and paid on commissions.

8.3 Monthly and annual reports

Monthly and annual reports were not prepared and presented to the Board of Aldermen summarizing the amount of property taxes collected.

Additionally, tax records are not reviewed by someone independent of the tax collection and reporting process.

Section 79.310, RSMo, requires the City Collector to make a detailed report to the Board of Aldermen stating monies collected, the amounts uncollected, and the names of the persons from which amounts are uncollected. Detailed reports, which comply with state law, classified by type of tax and reviewed by the Board of Aldermen would provide greater assurance taxes have been properly collected, abated, or determined delinquent.

8.4 Delinquent taxes

The delinquent tax list is not accurate and included some individuals and amounts as delinquent when the taxes had been paid. Additionally, the current City Clerk/Collector made corrections to the delinquent tax list but did not always obtain proof of payment from taxpayers when removing them from the list and did not obtain approval by the Board of Aldermen.

Section 94.320, RSMo, provides the Board of Aldermen shall require the City Collector, at the first meeting of the Board in April each year, to prepare lists of delinquent taxes for the Board of Aldermen to examine and approve and charge the City Collector with the amount of taxes due. Any changes to the delinquent tax lists should be approved by the Board of Aldermen, and charged to the City Clerk/Collector.

Recommendations

The Board of Aldermen:

8.1 Take steps to investigate missing property tax records.

8.2 Maintain documentation to support payment of commissions on property tax collections, including an ordinance authorizing such compensation, and withhold and pay applicable payroll taxes on commissions.

8.3 Require the City Clerk/Collector to prepare detailed monthly and annual reports as required by state law. The Board should examine the reports for propriety and accuracy.

8.4 Require the City Clerk/Collector to submit a list of all taxes remaining due and uncollected at the first meeting of the Board in April for the Board to review and approve.

Auditee's Response

The Board of Aldermen provided the following responses:

8.1 We will work with law enforcement to recover missing property tax records. A possible civil action will also be considered.

8.2 The city is no longer paying commissions on property taxes collected.

8.3&4 The Board will comply with these recommendations.

9. Payroll Procedures

Controls and procedures related to employee records, employee leave, and payroll taxes and reporting need improvement.

9.1 Personnel records

The city does not maintain personnel files for current city employees, and the current City Clerk could not locate personnel records of past city employees. As a result, pay rates and other personnel information was not adequately documented.

For example, meeting minutes of the Board of Aldermen indicate an employee was hired on January 12, 2010, at $7.50 per hour, but computerized payroll records indicate this employee was paid $10 per hour. The Mayor indicated this employee did not accept employment at $7.50 per hour, and a second offer of $10 per hour was made and accepted. There was no documentation of Board approval of this rate increase.

Personnel files are necessary to document hire/termination dates, pay rates, promotions, or disciplinary actions. Without adequate personnel records, there is less assurance payments to employees are properly authorized.

9.2 Time records

Some employee time records were either lost, misfiled, or not prepared.

Time records are necessary to document hours worked by employees, substantiate payroll disbursements, and provide the city with a method to monitor hours worked and leave taken.

9.3 Employee leave benefits

Documentation of leave benefits accumulated and used, and remaining balances are not properly maintained, and sick leave payments were made to employees without adequate documentation.

Computerized payroll records reflect balances for vacation and sick leave for employees; however, it appears amounts earned and used were not properly posted and reflected in these balances. During 2010, the Police Chief and the former City Clerk were paid $448 and $324, respectively, for sick leave; however, computerized leave records do not reflect adequate unused sick leave balances to warrant these payments. As a result, it is not clear whether or not these payments were appropriate.

Accrued leave represents a potential liability to the city, and balances should be properly maintained and monitored to ensure employees are properly compensated.

9.4 Wage reporting

The city does not have adequate procedures in place to ensure payroll and withholding amounts are properly reported and paid in a timely manner.

Wages totaling at least $3,618 paid to employees in 2009 and $360 in 2010 were not generated through the payroll accounting system and as a result, were not reported on W-2 forms. Additionally, federal and state payroll taxes withheld from these wages and the city share of payroll taxes on these wages were not remitted to the state and federal government. Unpaid payroll taxes for these wages totals approximately $970.

Additionally, the city failed to deposit federal payroll taxes in a timely manner resulting in the assessment and payment of penalties and interest totaling $885 in 2009.

To ensure all employee wages are properly reported and the appropriate taxes are paid, all wages should be paid through the payroll accounting system and the total amount paid should be reconciled to amounts reported on payroll tax forms. Additionally, the timely payment of payroll tax withholdings prevents unnecessary penalties and interest.

Recommendations

The Board of Aldermen:

9.1 Maintain personnel files of all city employees.

9.2 Ensure time records are prepared and retained for all employees.

9.3 Ensure employee leave balances are properly tracked and monitored.

9.4 Ensure compensation amounts reported on W-2 forms are accurate and reconcile these forms to amounts paid to employees. Amended W-2 forms should be filed for payments made in 2010 and 2009 and unpaid payroll taxes remitted to the state and federal government. Additionally, the Board should ensure payroll taxes are paid timely.

Auditee's Response

The Board of Aldermen provided the following responses:

9.1&3 These recommendations have been implemented.

9.2 City employees are now required to submit time sheets. All time sheets are signed and approved, and will be retained.

9.4 We will review 2009 and 2010 payroll records and file corrected W-2 forms and remit taxes as required. Payroll taxes for 2011 are being paid timely.

10. Financial Statements, Budgets, and Audits

The city does not comply with state law regarding financial reporting and budgeting. In addition, the city does not have annual audits.

10.1 Financial statements

The city did not comply with state law regarding publishing financial statements and submitting financial statements to the State Auditor's office. The city failed to publish semi-annual financial statements for the 6 months ended December 31, 2010, and financial statements published for other time periods contained errors and were incomplete. For example, the city published a financial statement for the 6 months ended June 30, 2010, which contained calculation errors and did not include indebtedness of the city. Additionally the city has not submitted annual financial statements to the State Auditor's office since 2007.

Section 79.160, RSMo, requires the Board of Aldermen to prepare and publish semiannually, a full and detailed account of the receipts, disbursements and indebtedness of the city. Further, Section 105.145, RSMo, requires political subdivisions to file annual reports of financial transactions with the State Auditor's office.

10.2 Budgets

City budgets do not comply with state law. The budgets do not include the beginning and estimated ending cash balances, and do not include actual receipts and disbursements for the 2 preceding years. Additionally, the budgets do not include indebtedness.

Further, the city approved deficit budgets for several city funds for 2010 and 2009. The 2010 budget for the General and Fire Funds reflect budgeted deficit fund balances of $27,921 and $18,686, respectively.

Sections 67.010 to 67.080, RSMo, set specific guidelines for the format of the annual operating budget and prohibit deficit budgeting. A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific financial expectations for each area of city operations and provides a means to effectively monitor actual costs and receipts. Considering the city's poor financial condition, it is imperative the city prepare a complete and accurate budget and periodically compare actual results to budgeted amounts.

10.3 Annual audits

The city does not obtain an annual audit. While an annual audit is not required by law, an audit of the city's funds would help ensure financial transactions are properly recorded and monies are accounted for properly. Additionally, an audit of the city's water fund may assist the city in obtaining outside funding sources to improve the water system. Further,

considering the significant problems identified in this report, an annual audit of city funds should be considered by the Board of Aldermen.

Recommendations

The Board of Aldermen:

10.1 Ensure complete and accurate financial statements are published and submitted to the State Auditor's office as required by state law.

10.2 Ensure budgets comply with state law.

10.3 Consider obtaining annual audits.

Auditee's Response

The Board of Aldermen provided the following responses:

10.1 The city has now published financial statements for the 6 months ended December 31, 2010. We will ensure financial statements for the 6 months ended June 30, 2011, are published as soon as possible. In the future, complete and accurate financial statements will be published and submitted to the State Auditor as required by law.

10.2 We will approve a budget for 2012 that complies with state law.

10.3 The city has been in contact with a CPA firm to perform an annual audit.

11. Ordinances and Meetings

Improvement is needed with ordinances, and the city did not always ensure compliance with the Sunshine Law.

11.1 Ordinances

Significant problems were noted with procedures for establishing and maintaining ordinance records.

- A complete orderly set of ordinances is not maintained and ordinances are not properly updated. Some ordinances could not be located and some ordinances were not properly signed and dated. In March 2009, the Board of Aldermen approved a code of ordinances for the city; however, according to documentation from the city legal counsel, the approved code book was intended as a preliminary draft and not intended to be a complete set of ordinances for the city. The Board repealed the code of ordinances on February 16, 2011, and adopted only the chapter for traffic code ordinances.

- The city has not adopted ordinances to adequately establish guidelines for operation of the fire department and cemetery. Varying amounts are

collected by the city for fire dues and cemetery plot sales and these fees are not established by ordinance.

- The rate charged to customers for trash pick-up is not set by ordinance.

Since ordinances represent legislation passed by the Board of Aldermen to govern the city and its residents, it is important the ordinances be maintained in a complete, well-organized, and up-to-date manner. In addition, such items as cemetery plot fees, fire dues, and trash rates should be set forth by ordinance to provide residents information about the amount of fees to be collected.

11.2 Meetings

Procedures for complying with the Sunshine Law and maintaining minutes of meetings need improvement.

- Meeting minutes were not always sufficient to demonstrate how some issues discussed in closed meetings were allowable under the Sunshine Law. For example, the resignation of an alderman and an appointment to fill the vacated position was conducted in a closed meeting on June 24, 2009.

- Open meeting minutes do not record a roll call vote of the Board of Aldermen to enter into closed session.

- Some open meeting minutes did not include the time and place of the meeting.

- Meeting minutes were not always prepared and approved in a timely manner. For example, the meeting minutes for February 9, 2010, were not approved by the Board until September 20, 2010.

- Meeting minutes were not always filed in an organized manner. Some minutes were not filed in date order making it difficult to ensure the city had minutes for all Board of Aldermen meetings.

- No records are maintained of meetings held by the park, fire, or cemetery committees.

The Sunshine Law, Chapter 610, RSMo, limits discussions in closed meetings to only those specifically allowed by law; requires governmental bodies to prepare and maintain minutes of open and closed meetings; and requires minutes to include at a minimum the date, time, place, members present, members absent and votes taken, including roll call votes before closing a meeting. Further, to ensure all decisions are properly documented and minutes are properly maintained, meeting minutes should be prepared

for committee meetings and filed with the city, and all minutes should be prepared and approved timely, and filed in an orderly manner.

Recommendations

The Board of Aldermen:

11.1 Maintain a complete updated set of city ordinances in an organized manner and adopt ordinances addressing the operation of the fire department and cemetery, and an ordinance setting the rate for trash pick-up services.

11.2 Limit discussions in closed meetings to only those specifically allowed by law and record roll call votes to enter closed session in open meeting minutes. Additionally, the Board of Aldermen should ensure meeting minutes are properly and timely prepared and approved for all meetings (including committee meetings), and filed in an orderly manner.

Auditee's Response

The Board of Aldermen provided the following responses:

11.1 We are in the process of reviewing city ordinances and have been in contact with a company to codify our ordinances.

11.2 This recommendation will be implemented.

12. Capital Assets

The city does not maintain capital asset inventory records, and documentation was not maintained of the disposition of some city vehicles.

12.1 Asset records

The city does not maintain records for its capital assets including buildings, water system infrastructure, equipment, and other property. Additionally, assets are not tagged for specific identification, and an annual physical inventory is not performed.

Adequate capital asset records are necessary to provide better controls over city property and provide a basis for proper financial reporting. Without these records, the city does not have a reliable record of property owned. Further, city assets should be tagged to document ownership and a physical inventory should be performed periodically and compared to capital asset records to ensure records are kept up to date.

12.2 Vehicles

City officials were not able to provide documentation of the disposition of some city vehicles. City insurance documents indicate the city maintained insurance on seven city vehicles (including emergency response vehicles) in March 2009. As of September 2010, the city insured only three vehicles. According to city officials, the other four vehicles were disposed of; however, the city could provide documentation of the sale of only one of the vehicles. The Mayor indicated two of the remaining vehicles were traded to

a local mechanic for repairs made to a fire department vehicle, but no documentation was maintained to document this disposition. According to the Mayor, the fourth vehicle was sold for $500; however, no documentation of the disposition (such as date sold and name of purchaser) and no deposit of the sale proceeds could be located.

To ensure city vehicles are properly disposed, documentation should be maintained of Board approval to dispose of vehicles, and the method of disposition (sale, trade, etc). Further, the Board should ensure proceeds from the sale of vehicles is properly deposited and recorded in the accounting records.

Recommendations

The Board of Aldermen:

12.1 Ensure property records are maintained that include all pertinent information for each asset such as tag number, description, cost, acquisition date, location and subsequent disposition. The Board should also properly tag, number, or otherwise identify all applicable city property and conduct and document an annual inventory.

12.2 Maintain documentation to support the disposition of all city assets and follow up to determine the disposition of the $500 vehicle sale proceeds.

Auditee's Response

The Board of Aldermen provided the following responses:

12.1 The City Clerk is currently in the process of preparing a new city asset listing.

12.2 We agree and will follow up on the disposition of these vehicles.

City of Lanagan
Organization and Statistical Information

The City of Lanagan is located in McDonald County. The city was incorporated in 1963 and is currently a fourth-class city. The city employed two full-time employees and three part-time employees on December 31, 2010.

City operations include utility services, police, fire services, recreational services, and the operation of a city cemetery.

Mayor and Board of Aldermen

The city government consists of a Mayor and four-member Board of Aldermen. The members are elected for 2-year terms. The mayor is elected for a 2-year term, presides over the Board of Aldermen, and votes only in the case of a tie. The Mayor and Board of Aldermen, at December 31, 2010, are identified below. The Mayor and Board of Aldermen do not receive compensation.

Edna Billups, Mayor
Carol O'Roake, Mayor Protem, North Ward Alderman
Dan Hudgens, North Ward Alderman
Amber Stryffeler, South Ward Alderman
Pat Walker, South Ward Alderman

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

According to city personnel, the city was awarded the following American Recovery and Reinvestment Act of 2009 funding during the 2 years ended December 31, 2010:

A $7,671 Recovery Act: Edward Byrne Memorial Justice Assistance Grant Program Local Law Enforcement Block Grant was awarded by the U.S. Department of Justice to the Missouri Department of Public Safety and was passed through and received by the city in 2009 for the purchase of law enforcement officer safety gear, mobile radios, and radio and emergency lighting equipment for the patrol vehicle. During the years ended December 2010 and 2009, $3,871 and $3,800 was expended, respectively.

Financial Activity

A summary of the city's financial activity for the 2 years ended December 31, 2010 follows:

City of Lanagan
Year Ended December 31, 2010

	General Account	Payroll Account	Cemetery Account	Park Account	Fire Department Account	Water and Trash Account	LET Account	Utility Deposit Account	Total

* May and November 2009 include $274 and $50, respectively, for manually issued cash receipt slips not posted to the utility computer system.

The following tables represent an example reconciliation of receipts recorded in a batch report to amounts deposited in the city's bank account. The left side of the table compares total recorded receipts to the total deposit and the right side of the table compares recorded cash receipts to cash deposited.

Batch Titled: 2009Nov06-01-peggy

Date	Reconciliation of Total Amounts on Batch Report to Corresponding Deposit	Amount	Reconciliation of Cash Amounts on Batch Report to Corresponding Deposit	Amount
11/6/2009	Total Receipts Recorded in Batch	$ 326.50	Cash Receipts Recorded in Batch	$ 32.88
11/12/2009	Corresponding Deposit	378.23	Cash in Corresponding Deposit	0.00
	Difference (amount deposited appears greater than amount recorded)	51.73	Difference (obvious cash shortage)	(32.88)
	Adjustment for 5 checks included in deposit, but not posted on this batch. Checks were posted on subsequent batch report.	(166.68)	Single receipt posted to batch report as a check, but utility stub indicates payment was made in cash and no check found in deposit records.	(19.76)
			Check recorded on batch report, but not located on city deposit records, may be a cash receipt.	(62.31)
	Total Deposit Shortage	$ (114.95)	Total Estimated Cash Shortage	$ (114.95)

Thomas A. Schweich

Missouri State Auditor

City of Pacific

November 2011

Report No. 2011-104

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the City of Pacific

Legal Services	The city has not obtained proposals for legal services and has not performed a cost analysis to determine if legal services should be performed in-house instead of being contracted. In fiscal year 2011, the city paid approximately $171,000 for contracted City Attorney services.
Property Records	The city did not ensure it obtained the best possible price when it disposed of two police vehicles. The city auctioned one police vehicle for $2,200 and traded another for $9,700 worth of lights and sirens installed on a new vehicle, but it could not provide documentation showing how much the vehicles were worth at the time of disposal. The city also needs to ensure property records contain sufficient detail and city property is tagged and properly identified.
Sewer Rates	The city does not charge enough in sewer fees to cover the cost of operating the sewer system.
Senior Center	The city has not adequately monitored the Senior Center's operations, and it cannot ensure city funds are spent properly, because it has not required supporting documentation of disbursements.

In the areas audited, the overall performance of this entity was **Good**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	The City of Pacific received the following Federal Stimulus funding: A $93,750 Wastewater and Water Treatment Efficiency Grant, $79,958 of which was received during fiscal year 2011 and expended for a new blower. A $709,891 Highway Planning Construction Grant, $347,640 of which was received during fiscal year 2011 and expended for sidewalk and street light construction.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

2. Property Records 5
3. Sewer Rates 6
4. Senior Center 7

Organization and Statistical Information 9

THOMAS A. SCHWEICH
Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
City of Pacific, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit the City of Pacific. We have audited certain operations of the city in fulfillment of our duties. The city engaged Tochtrop and Associates, P.C., Certified Public Accountants (CPAs), to audit the city's financial statements for the year ended June 30, 2011. To minimize duplication of effort, we reviewed the report of the CPA firm for the June 30, 2010 audit, since the June 30, 2011, audit had not been completed. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2011. The objectives of our audit were to:

1. Evaluate the city's internal controls over significant management and financial functions.

2. Evaluate the city's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the city, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the city's management and was not subjected to the procedures applied in our audit of the city.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the City of Pacific.

An additional report, 2011-84, Twentieth Judicial Circuit, City of Pacific Municipal Division, was issued in October 2011.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Debra S. Lewis, CPA
In-Charge Auditor:	Carl Zilch Jr., CIA
Audit Staff:	Jay Dowell, MBA
	Kenneth Erfurth

1. Legal Services

Legal services are procured without a competitive process, and the city has not performed a cost analysis to determine if outsourcing legal services is cost beneficial. The city paid the City Attorney approximately $171,000 for the year ended June 30, 2011.

1.1 Proposals for legal services

The city has not obtained proposals for legal services. As a result, the city cannot ensure it has the best qualified individual at the lowest and best cost for the position. The city engaged the City Attorney and his law firm based on the type of specialized services needed. The City Attorney is considered a contracted position and paid at an hourly rate. The city has used the same individual as City Attorney since 2002, without periodically soliciting proposals for this position.

While professional services, such as attorneys, may not be subject to standard bidding procedures, the city should solicit proposals for legal services to the extent practical. Soliciting proposals and subjecting such services to a competitive selection process does not preclude the city from selecting the vendor or individual best suited to provide the service required. Such practices help provide a range of possible choices and allow the city to make a better-informed decision to ensure necessary services are obtained from the best-qualified vendor at the lowest and best cost.

1.2 Cost analysis

The city has not performed a cost analysis to determine if legal services should be performed in-house or continue to be outsourced. As a result, the city cannot ensure the services are obtained in the most economical way. All legal services are outsourced including general services provided by the City Attorney.

Recommendations

The City of Pacific Board of Aldermen:

1.1 Periodically solicit proposals for legal services and maintain all related documentation, including reasons for the city's decisions.

1.2 Perform a cost analysis to determine the most cost effective method of obtaining legal services.

Auditee's Response

The Board of Aldermen and the Mayor provided the following written responses:

1.1 The City's ordinances regarding bidding and purchasing Section 105.080, states that the "the competitive bidding requirement of this Article shall not apply to professional services" including in the hiring of "physicians, attorneys, engineers, certified public accountants, planners and auditors." This public policy reflects the importance of trust, reliability and quality as factors as well as cost that preclude effective competitive bidding on price or rates for such services. The City has contracted or been represented by other

counsel during the current City Attorney contract period and has received information regarding the qualifications, performance and cost of other counsel.

1.2 The City routinely reviews its contracting services and makes adjustments where appropriate. Hiring a full-time attorney to replace contracted fees has been determined not to be viable for numerous reasons, including that no one attorney has the experience or competence to provide the services used by the City, such as bond counsel, litigation counsel, general municipal, employment, economic development financing, and otherwise. In addition, the cost of insurance, benefits, payroll taxes, legal libraries, and office space, among other costs, would substantially increase the non- contracted costs if in-house counsel was used, and still not fully eliminate the need for contracted services. This practical assessment is shared by virtually all cities of our size in the entire state, and the City has confirmed that not one of the 91 cities in St. Louis, County, for example, uses a full-time in- house attorney rather than contracting for legal services.

Auditor's Comment

1.1 The State Auditor's office agrees that professional services such as attorney services do not require competitive bidding; however, a periodic review of potential alternative providers for attorney services would ensure the city has contracted with the vendor or individual best suited to provide the service required.

2. Property Records

The city did not ensure the best possible price was obtained when disposing of city vehicles. In addition, various city property records and procedures need improvement.

2.1 Disposal of city property

The city did not ensure the best possible price was obtained when it disposed of two police vehicles. One vehicle was given away in a raffle which raised $2,200, of which $1,100 was given to the senior center. The city gave the other vehicle to a vendor in exchange for the installation of sirens and lights on new police vehicles, invoiced at approximately $9,700. The city could not provide documentation of the value of the vehicles at the time of disposal and therefore, could not document an equitable amount was received.

Disposing of vehicles through a bid process helps ensure the city is receiving the best possible price for the assets sold. If other disposal methods are used, the city should clearly document the estimated value of the vehicles to ensure an equitable amount is received.

2.2 Property records

City property records maintained do not include all necessary information such as date and method of disposal. In addition, city property is not tagged and properly identified.

Adequate city property records and procedures are necessary to secure better internal control over city property, and provide a basis for determining proper insurance coverage. Property control tags should be affixed to all property, including capital assets, to help improve accountability and ensure assets are properly identified as belonging to the city. Property records should also include information such as acquisition/disposition dates.

Recommendations

The City of Pacific Board of Aldermen:

2.1 Ensure dispositions of city property such as vehicles is handled in a manner that ensures the best possible price.

2.2 Ensure property records for city property are maintained and include all pertinent information for each asset, such as cost, acquisition date, and subsequent disposition, if applicable.

Auditee's Response

The Board of Aldermen and the Mayor provided the following written responses:

2.1 The City has on occasion disposed of property by raffle or other means other than bid, that has resulted in increased revenue for the taxpayer. These means are fully compliant with law and no law prohibits these methods. The alternative means such as raffle are open to all in the public, are available for public scrutiny, and the net price resulted in a greater than market value return for the public as well as positive publicity. The City acknowledges that a lower value is possible if minimum dollar amounts are not set, but the City has been aware of market value prior to engaging in these successful property sale methods. Although not required by law, the documentation of property value reviews will be maintained as public record to have duplicative proof of the success of these measures.

2.2 Certain measures, such as use of property control tags, has now been implemented consistent with the Auditor suggestion.

3. Sewer Rates

The sewer rates charged to customers are insufficient to cover sewer operations. As a result, the 2011 budget for the Sewer Fund indicates a deficit of approximately $7,300 and contains a note indicating any deficit in the Sewer Fund would be covered by the Water Fund. The city received a

study of water and sewer rates in August 2011, and the Board of Aldermen was still considering possible action as of August 11, 2011.

Rates for utility services should be set to cover the costs of producing and delivering services (including administrative costs) and maintain reserves adequate to sustain the system. Section 67.042, RSMo, provides that fees may be increased if supported by a statement of the costs necessary to maintain the funding of such service.

Recommendation

The City of Pacific Board of Aldermen review sewer rates periodically to ensure receipts are sufficient to cover all costs of providing this service.

Auditee's Response

The Board of Aldermen and the Mayor provided the following written response:

The City is currently reviewing its recent rate study to determine what action if any is needed regarding utility rates.

4. Senior Center

The city has not received or reviewed invoices and supporting documentation from the Senior Center as required by contract. As a result, the city cannot ensure city funds are spent appropriately. In April 2011, the city entered into a formal written agreement with the Senior Center to collect $1 donations for the center from residents through water bills and to pay a portion of the city recycling rebate (received as part of its recycling contract) to the center. The agreement requires the Senior Center to submit invoices with any necessary supporting documentation for these monies and keep complete and accurate records of expenditures, which are open to the city for inspection. During the year ended June 30, 2011, the city paid $5,000 to the Senior Center under this contract.

A periodic review of the accounting records and invoices with supporting documentation would help ensure the monies are spent for the benefit of senior citizens residing in the city.

Recommendation

The City of Pacific Board of Aldermen should monitor the operations of the Senior Center to ensure city funds are spent appropriately.

Auditee's Response

The Board of Aldermen and the Mayor provided the following written response:

The City agrees that accountability for any City expenditures is essential and has included such accountability and requirements for public uses as a condition of payments to the Senior Center and other private organizations, including non-profit organizations. The City monitors Senior Center activities, has received reports reflected in the minutes, and has also requested that the contract requirement for

documentation be provided so that our monitoring may be available as a public record. Similar accounting and cost requirements are also required of other parties receiving public funds.

City of Pacific
Organization and Statistical Information

The City of Pacific is located in Franklin and St. Louis Counties. The city was incorporated in 1859 and is currently a fourth-class city. The city employed 47 full-time employees and 15 part-time employees on June 30, 2011.

City operations include water, sewer, and law enforcement services; operation and maintenance of city parks; economic development; and street maintenance.

Mayor and Board of Aldermen

The city government consists of a mayor and six-member board of aldermen. The members are elected for 2-year terms. The mayor is elected for a 4-year term, presides over the board of aldermen, and votes only in the case of a tie. The Mayor and Board of Aldermen, at June 30, 2011, are identified below. The Mayor is paid $641 per month and Board of Aldermen members $366 per month. The compensation of these officials is established by ordinance.

Herbert Adams, Mayor
Mike Bates, Alderman
Edward O. Gass, Alderman
Jerry Eversmeyer, Alderman
Brad Reed, Alderman
Walter Arnette, Alderman
Mike Pigg, Alderman

Other Elected Officials

Name and Title	Compensation Paid for the Year Ended June 30, 2011
Matt Mansell, City Marshal	$54,334
Debbie Kelley, Collector	33,500
Ronald F. Reed, Municipal Judge	6,495

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

According to city personnel, the city was awarded the following American Recovery and Reinvestment Act of 2009 funding:

A $93,750 Wastewater and Water Treatment Efficiency Grant was awarded by the Missouri Department of Natural Resources for sewer plant efficiency. During the year ended June 30, 2011, $79,958 was received and expended for a new blower.

A $709,891 Highway Planning and Construction Grant was awarded by the Missouri Department of Transportation for sidewalk and street light construction. During the year ended June 30, 2011, $347,640 was received and expended by the city related to this grant.

REVENUE

Willow Springs Contract License Office

November 2011

Report No. 2011-103

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Willow Springs Contract License Office

Background

The Department of Revenue has appointed 183 contract agents to operate contract license offices. These offices issue driver licenses; titles for motor vehicles, trailers, and marine craft; and license plates. Contract agents are compensated through transaction-based processing fees. Under a state law which became effective in 2009, the State Auditor may audit contract license offices. This audit is one of the initial 10 contract license offices audited by the State Auditor.

Prepayment Void Transactions

The Willow Springs contract license office did not maintain proper documentation of prepayment void transactions. Prepayment void transactions occur when a transaction is entered into the processing system but is voided before payment is made. Department of Revenue official procedures require license offices to document the reason for any void, obtain the customer's signature acknowledging the void, and have a supervisor and/or manager review and approve the void. The Willow Springs contract license office lacked documentation of customer acknowledgment for 5 of 10 (50 percent) void transactions occurring in a six month period and had no documentation for two other void transactions.

Statutory Compliance

The Willow Springs contract license office is not complying with statutory requirements to inquire whether customers wish to make a $1 donation to the Blindness Education, Screening, and Treatment Program Fund and the Organ Donor Program Fund, and to inform customers of the ability to be included in the organ donor registry and to consent to organ donation. An answer to these questions must be entered into the computer system to complete the transaction, so it appears staff frequently just entered "No."

In the areas audited, the overall performance of this entity was **Good**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Willow Springs contract license office did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

and
Willow Springs Chamber of Commerce, Contract Agent
Willow Springs Contract License Office
Willow Springs, Missouri

We have audited certain operations maintained and established by the Willow Springs Contract License Office, as provided by Section 136.055, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2011. The objectives of our audit were to:

1. Evaluate the office's internal controls related to the handling of various fee and tax transactions.

2. Evaluate the office's compliance with certain contractual and statutory provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the office, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the Department of Revenue's management and was not subjected to the procedures applied in our audit of the contract office.

For the areas audited, we identified (1) a deficiency in internal controls and (2) noncompliance with statutory provisions.

The accompanying Management Advisory Report presents our findings arising from our audit of the Willow Springs Contract License Office.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Toni Crabtree, CPA
In-Charge Auditor:	Katie Twiehaus
Audit Staff:	Corey McComas, M.Acct., CPA

1. Prepayment Void Transactions

The Willow Springs license office needs to improve controls over prepayment void transactions.

A prepayment void transaction occurs when a transaction is entered in the Titling and Registration Intranet Processing System (TRIPS) but is voided before payment is made. Valid reasons for prepayment void transactions include entries that contain an incorrectly spelled name, a transfer on death erroneously left off the title, an incorrect address or date of purchase; and when customers lack sufficient funds to pay the transaction.

The license office did not maintain customer acknowledgment documentation for 5 of 10 (50 percent) void transactions that occurred between February and July 2011. In addition, the license office did not maintain any documentation, such as the reason for the void, customer acknowledgement of the void, and management review of the transaction, for two other void transactions.

Department of Revenue (DOR) official procedures provide that the reason for the void should be documented along with the customer's signature acknowledging the void, and the void transaction be reviewed and approved by a supervisor and/or manager. Obtaining a customer's acknowledgement and documenting the reason for voiding the transaction help ensure the transaction actually was voided, and a review by office management also helps ensure transactions were properly handled and are valid.

Recommendation

The Willow Springs Contract License Office ensure all prepayment void transactions are supported by customer acknowledgment of the void transaction, along with the reason for the void. In addition, office management should review all prepayment void transactions and document its review.

Auditee's Response

The Willow Springs License Office concurs with the State Auditor's recommendation for the deficiency in our internal controls. We are now ensuring all prepayment voids are supported by customer acknowledgement of the voided transaction along with a reason for the void. The office manager is reviewing all prepayment voids daily. This implementation is immediate.

2. Statutory Compliance

The Willow Springs license office does not always inquire if customers want to donate to the Blindness Education, Screening, and Treatment Program Fund and the Organ Donor Program Fund, or inform customers of the ability to be included in the organ donor registry and to consent to organ donation, as required by state law.

During our audit work in the office, we noted that office staff frequently did not ask customers if they wanted to donate to these funds, or inform

customers about organ donation. A Yes or No to the donation questions must be recorded in TRIPS in order to complete the transactions. As a result, staff appear to be automatically entering a No to those questions.

Sections 301.020 and 302.171, RSMo, require personnel to inquire whether customers registering a motor vehicle and applying for a driver's license are interested in making a $1 donation to the Blindness Education, Screening, and Treatment Program Fund and to the Organ Donor Program Fund. In addition, Section 302.171, RSMo, requires personnel to inform customers applying for a driver's license of the ability to be included in the organ donor registry and to consent to organ donation by completing the form on the back of the driver's license.

Recommendation

The Willow Springs Contract License Office ensure office staff inquire of each customer whether the customer is interested in making a $1 donation to the Blindness Education, Screening, and Treatment Program Fund and the Organ Donor Program Fund, and inform customers of the ability to be included in the organ donor registry and to consent to organ donation, as required by state law.

Auditee's Response

The Willow Springs License Office concurs with the State Auditor's recommendation to ensure office staff inquire of each customer whether they are interested in making a $1 donation to the Blindness Education, Screening, and Treatment Program Fund and the Organ Donor Program Fund, and to inform customers of their ability to be included in the Missouri Organ and Tissue Donor Registry. This implementation is immediate.

Department of Revenue
Willow Springs Contract License Office
Organization and Statistical Information

Pursuant to Section 136.030(2), the Department of Revenue (DOR) has the authority and responsibility for the collection of motor vehicle registration fees, driver license fees, motor vehicle sales and use tax, and all other taxes. Pursuant to Section 136.055, RSMo, the director of the DOR has appointed 183 contract agents to operate contract license offices. This section also provides that the state auditor may audit the contract license offices. The DOR, License Office Bureau, under the management of the Motor Vehicle and Driver Licensing Division, is responsible for administering contract license offices throughout the state.

Starting in January 2009, the DOR began awarding license offices through a competitive bidding process. Effective August 2009, Section 136.055.2, RSMo, requires contract license offices to be awarded through a competitive bidding process. This bidding process must give priority to organizations and entities that are exempt from taxation (not-for-profit) under the Internal Revenue Code, and political subdivisions such as municipalities, counties, and fire protection districts. Contracts for the license offices are typically for one year, with three one-year renewal periods. The contract may be canceled at the discretion of the DOR.

The contract license offices issue titles for all Missouri motor vehicles, trailers, and marine craft; and issue and sell over 500 different types of license plates which can be classified into 6 major categories: passenger, truck, trailer, motorcycle, bus, and dealer. In addition, the contract license offices issue 5 basic types of driver licenses: Intermediate License (GDL), Class F (Operator), Class E (For-Hire), Class A, B, and C (Commercial), and Class M (Motorcycle). The licensing process also includes allowing customers to contribute to the organ donor program or blindness awareness fund, register with the selective services, add endorsements or restrictions to licenses, and an opportunity to register to vote.

The contract agents do not receive compensation from the DOR, but do receive the following fees, allowed by Section 136.055.1, RSMo, from customers for each type of transaction processed by the office.

Agent Fees

Transaction Type	Fee
License renewal	$3.50 one year
	$7.00 two years
Transfer of registration	$3.50
Application or transfer of title	$2.50
Driver, operator or chauffeur license	$2.50 three years or less
	$5.00 exceeding three years
Notice of lien	$2.50

In August 2009, the bid solicitation for the Willow Springs Contract License Office was issued. The office was awarded to the Willow Springs Chamber of Commerce, effective October 22, 2009. At June 30, 2011, the contract

and office managers for the license office were John Bailey and Jane Gibbons, respectively.

For the year ended June 30, 2011, the office collected and remitted to the DOR $636,489, and retained processing fees totaling $37,110. Additionally, as part of the bidding process, the office agreed to return .25 percent of its processing fees to the state. For the year ended June 30, 2011, the office returned processing fees, totaling $93, to the state.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Willow Springs Contract License Office did not receive any federal stimulus monies during the year ended June 30, 2011.

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the South Fremont (Springfield) Contract License Office

Background

The Department of Revenue has appointed 183 contract agents to operate contract license offices. These offices issue driver licenses; titles for motor vehicles, trailers, and marine craft; and license plates. Contract agents are compensated through transaction-based processing fees. Under a state law which became effective in 2009, the State Auditor may audit contract license offices. This audit is one of the initial 10 contract license offices audited by the State Auditor.

Accounting Controls and Procedures

The South Fremont (Springfield) contract license office needs to improve its accounting controls and procedures. The license office did not always accurately record the method of payment, such as cash or check, and did not reconcile the composition of monies received to deposits, as required by Department of Revenue procedures.

In the areas audited, the overall performance of this entity was **Good**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The South Fremont (Springfield) contract license office did not receive any federal stimulus monies during the audited time period.

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Alternative Opportunities, Inc., Contract Agent
South Fremont (Springfield) Contract License Office
Springfield, Missouri

We have audited certain operations maintained and established by the South Fremont (Springfield) Contract License Office, as provided by Section 136.055, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2011. The objectives of our audit were to:

1. Evaluate the office's internal controls related to the handling of various fee and tax transactions.

2. Evaluate the office's compliance with certain contractual and statutory provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the office, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the Department of Revenue's management and was not subjected to the procedures applied in our audit of the contract office.

For the areas audited, we identified (1) a deficiency in internal controls and (2) no significant noncompliance with contractual and statutory provisions.

The accompanying Management Advisory Report presents our finding arising from our audit of the South Fremont (Springfield) Contract License Office.

Audit Staff:	Corey McComas, M.Acct., CPA
	Kelli Oldham

Department of Revenue
South Fremont (Springfield) Contract License Office
Management Advisory Report - State Auditor's Finding

Accounting Controls and Procedures

The South Fremont license office needs to improve controls and procedures over monies collected. For the year ended June 30, 2011, the office collected and remitted to the Department of Revenue (DOR) approximately $15.4 million.

The license office did not always accurately record the method of payment (cash, check, and credit card) in the accounting records and did not reconcile the composition of monies received to deposits. For example, the composition of deposits did not agree to the composition of receipts recorded for the three deposits made from August 5 to August 8, 2011. A review of these deposits identified transactions marked as paid with cash when actually paid for by check and/or credit card, and checks recorded as credit card charges.

DOR official procedures for license offices provide that the composition of monies received should be reconciled to the accounting records and to deposits. Discrepancies between accounting records and deposits result in less assurance of proper handling.

Recommendation

The South Fremont (Springfield) Contract License Office ensure the correct method of payment is recorded in the accounting records, and the composition of monies received be reconciled to the accounting records and to deposits.

Auditee's Response

We agree with the Auditor's recommendation and have already implemented the procedure.

Department of Revenue
South Fremont (Springfield) Contract License Office
Organization and Statistical Information

Pursuant to Section 136.030(2), the Department of Revenue (DOR) has the authority and responsibility for the collection of motor vehicle registration fees, driver license fees, motor vehicle sales and use tax, and all other taxes. Pursuant to Section 136.055, RSMo, the director of the DOR has appointed 183 contract agents to operate contract license offices. This section also provides that the state auditor may audit the contract license offices. The DOR, License Office Bureau, under the management of the Motor Vehicle and Driver Licensing Division, is responsible for administering contract license offices throughout the state.

Starting in January 2009, the DOR began awarding license offices through a competitive bidding process. Effective August 2009, Section 136.055.2, RSMo, requires contract license offices to be awarded through a competitive bidding process. This bidding process must give priority to organizations and entities that are exempt from taxation (not-for-profit) under the Internal Revenue Code, and political subdivisions such as municipalities, counties, and fire protection districts. Contracts for the license offices are typically for one year, with three one-year renewal periods. The contract may be canceled at the discretion of the DOR.

The contract license offices issue titles for all Missouri motor vehicles, trailers, and marine craft; and issue and sell over 500 different types of license plates which can be classified into 6 major categories: passenger, truck, trailer, motorcycle, bus, and dealer. In addition, the contract license offices issue 5 basic types of driver licenses: Intermediate License (GDL), Class F (Operator), Class E (For-Hire), Class A, B, and C (Commercial), and Class M (Motorcycle). The licensing process also includes allowing customers to contribute to the organ donor program or blindness awareness fund, register with the selective services, add endorsements or restrictions to licenses, and an opportunity to register to vote.

The contract agents do not receive compensation from the DOR, but do receive the following fees, allowed by Section 136.055.1, RSMo, from customers for each type of transaction processed by the office.

Agent Fees

Transaction Type	Fee
License renewal	$3.50 one year
	$7.00 two years
Transfer of registration	$3.50
Application or transfer of title	$2.50
Driver, operator or chauffeur license	$2.50 three years or less
	$5.00 exceeding three years
Notice of lien	$2.50

In December 2009, the bid solicitation for South Fremont (Springfield) Contract License Office was issued. The office was awarded to Alternative Opportunities, Inc., effective September 9, 2010. At June 30, 2011, the

contract and office managers were Steve Gray and Kelsey Elliott, respectively.

For the year ended June 30, 2011, the office collected and remitted to the DOR $15,399,875, and retained processing fees totaling $620,707. Additionally, as part of the bidding process, the office agreed to return 13.6 percent of its processing fees to the state. For the year ended June 30, 2011, the office returned processing fees, totaling $73,423, to the state.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The South Fremont (Springfield) Contract License Office did not receive any federal stimulus monies during the year ended June 30, 2011.

Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Raytown Contract License Office

Background

The Department of Revenue has appointed 183 contract agents to operate contract license offices. These offices issue driver licenses; titles for motor vehicles, trailers, and marine craft; and license plates. Contract agents are compensated through transaction-based processing fees. Under a state law which became effective in 2009, the State Auditor may audit contract license offices. This audit is one of the initial 10 contract license offices audited by the State Auditor.

Prepayment Void Transactions

The Raytown contract license office did not maintain proper documentation of prepayment void transactions. Prepayment void transactions occur when a transaction is entered into the processing system but is voided before payment is made. Department of Revenue official procedures require license offices to document the reason for any void, obtain the customer's signature acknowledging the void, and have a supervisor and/or manager review and approve the void. The Raytown contract license office lacked documentation of manager approval for 16 of 29 (55 percent) void transactions occurring over 3 days in July 2011, did not document the reason for voiding 1 of the 16 transactions, and did not maintain documentation of customer acknowledgment for 1 other voided transaction.

Accounting Controls and Procedures

The Raytown contract license office needs to improve its accounting controls and procedures. The license office did not always accurately record the method of payment, such as cash or check, and did not reconcile the composition of monies received to deposits, as required by Department of Revenue procedures.

In the areas audited, the overall performance of this entity was **Good**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Raytown contract license office did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

	Kelli Oldham

Department of Revenue
Raytown Contract License Office
Management Advisory Report - State Auditor's Findings

1. Prepayment Void Transactions

The Raytown license office needs to improve controls over prepayment void transactions.

A prepayment void transaction occurs when a transaction is entered in the Titling and Registration Intranet Processing System but is voided before payment is made. Valid reasons for prepayment void transactions include entries that contain an incorrectly spelled name, a transfer on death erroneously left off the title, an incorrect address or date of purchase; and when customers lack sufficient funds to pay the transaction.

The license office manager did not document her approval for 16 of 29 (55 percent) void transactions that occurred from July 18 to July 20, 2011. According to the office manager, her policy is to sign each individual void transaction and also sign the void report. Additionally, the license office did not document the reason for voiding the transaction for 1 of the 16 transactions, and did not maintain customer acknowledgment documentation for 1 other void transaction.

Department of Revenue (DOR) official procedures provide that the reason for the void should be documented along with the customer's signature acknowledging the void, and the void transaction be reviewed and approved by a supervisor and/or manager. Obtaining a customer's acknowledgement and documenting the reason for voiding the transaction help ensure the transaction actually was voided, and a review by office management also helps ensure transactions were properly handled and are valid.

Recommendation

The Raytown Contract License Office ensure all prepayment void transactions are supported by customer acknowledgment of the void transaction, along with the reason for the void. In addition, the license office should ensure documentation of the approval of all prepayment void transactions is maintained.

Auditee's Response

I do not agree with the finding, but I will make sure that I follow the correct procedure and will make the adjustments to the way we handle this procedure. I have sent a memo out to my clerks explaining that the signature of the applicant has to be on the application and the reason needs to be noted. Every time a void is made one of the management team will verify the application.

2. Accounting Controls and Procedures

The Raytown license office needs to improve controls and procedures over monies collected. For the year ended June 30, 2011, the office collected and remitted to the Department of Revenue (DOR) almost $16 million.

The license office did not always accurately record the method of payment (cash, check and credit card) in the accounting records and did not reconcile the composition of monies received to deposits. For example, the

composition of deposits did not agree to the composition of receipts recorded for the three deposits made from July 18 to July 20, 2011. A review of these deposits identified transactions marked as paid with cash when actually paid for by check and/or credit card, checks recorded as cash and credit card payments, and credit card payments recorded as cash payments.

DOR official procedures for license offices provide that the composition of monies received should be reconciled to the accounting records and to deposits. Discrepancies between accounting records and deposits result in less assurance of proper handling.

Recommendation

The Raytown Contract License Office ensure the correct method of payment is recorded in the accounting records and the composition of monies received be reconciled to the accounting records and to deposits.

Auditee's Response

I do not agree with the finding, but I will send a letter out to my clerks also on this issue explaining the seriousness of this and to make sure at all cost please validate the checks for checks, cash for cash, and credit card for credit card. We will ask for cash only on the driver records and failure to appear in court for traffic (FACT) violations, if necessary.

Department of Revenue
Raytown Contract License Office
Organization and Statistical Information

Pursuant to Section 136.030(2), the Department of Revenue (DOR) has the authority and responsibility for the collection of motor vehicle registration fees, driver license fees, motor vehicle sales and use tax, and all other taxes. Pursuant to Section 136.055, RSMo, the director of the DOR has appointed 183 contract agents to operate contract license offices. This section also provides that the state auditor may audit the contract license offices. The DOR, License Office Bureau, under the management of the Motor Vehicle and Driver Licensing Division, is responsible for administering contract license offices throughout the state.

Starting in January 2009, the DOR began awarding license offices through a competitive bidding process. Effective August 2009, Section 136.055.2, RSMo, requires contract license offices to be awarded through a competitive bidding process. This bidding process must give priority to organizations and entities that are exempt from taxation (not-for-profit) under the Internal Revenue Code, and political subdivisions such as municipalities, counties, and fire protection districts. Contracts for the license offices are typically for one year, with three one-year renewal periods. The contract may be canceled at the discretion of the DOR.

The contract license offices issue titles for all Missouri motor vehicles, trailers, and marine craft; and issue and sell over 500 different types of license plates which can be classified into 6 major categories: passenger, truck, trailer, motorcycle, bus, and dealer. In addition, the contract license offices issue 5 basic types of driver licenses: Intermediate License (GDL), Class F (Operator), Class E (For-Hire), Class A, B, and C (Commercial), and Class M (Motorcycle). The licensing process also includes allowing customers to contribute to the organ donor program or blindness awareness fund, register with the selective services, add endorsements or restrictions to licenses, and an opportunity to register to vote.

The contract agents do not receive compensation from the DOR, but do receive the following fees, allowed by Section 136.055.1, RSMo, from customers for each type of transaction processed by the office.

Agent Fees

Transaction Type	Fee
License renewal	$3.50 one year
	$7.00 two years
Transfer of registration	$3.50
Application or transfer of title	$2.50
Driver, operator or chauffeur license	$2.50 three years or less
	$5.00 exceeding three years
Notice of lien	$2.50

In January 2009, the bid solicitation for Raytown Contract License Office was issued. The office was awarded to Sharp Services, effective October 22,

2009. At June 30, 2011, the contract and office managers were Ben Sharp and Doris Young, respectively.

For the year ended June 30, 2011, the office collected and remitted to the DOR $15,959,421 and retained processing fees totaling $567,159. Additionally, as part of the bidding process, the office agreed to return 10 percent of its processing fees to the state during the first year of the contract and 6 percent during the renewal periods. For the year ended June 30, 2011, the office returned processing fees, totaling $41,288 to the state.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Raytown Contract License Office did not receive any federal stimulus monies during the year ended June 30, 2011.

Thomas A. Schweich

Missouri State Auditor

Princeton Contract License Office

November 2011

Report No. 2011-100

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Princeton Contract License Office

Background

The Department of Revenue has appointed 183 contract agents to operate contract license offices. These offices issue driver licenses; titles for motor vehicles, trailers, and marine craft; and license plates. Contract agents are compensated through transaction-based processing fees. Under a state law which became effective in 2009, the State Auditor may audit contract license offices. This audit is one of the initial 10 contract license offices audited by the State Auditor.

Prepayment Void Transactions

The Princeton contract license office did not maintain proper documentation of prepayment void transactions. Prepayment void transactions occur when a transaction is entered into the processing system but is voided before payment is made. Department of Revenue official procedures require license offices to document the reason for any void, obtain the customer's signature acknowledging the void, and have a supervisor and/or manager review and approve the void. The Princeton contract license office lacked documentation of customer acknowledgment for the 6 void transaction occurring between April and June 2011, did not document manager approval of these transactions, and did not document the reason for voiding 3 of these transactions.

Contract Compliance

The Princeton contract license office is not complying with the agent contract requirement to update inventory records on a daily basis. Inventory records were incorrect for 5 of the 40 items we reviewed, which increases the risk of theft and/or impropriety.

Accounting Controls and Procedures

The Princeton contract license office needs to improve its accounting controls and procedures. The license office did not always accurately record the method of payment, such as cash or check, and did not reconcile the composition of monies received to deposits, as required by Department of Revenue procedures.

In the areas audited, the overall performance of this entity was **Fair**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Princeton contract license office did not receive any federal stimulus monies during the audited time period.

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 7

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Alana M. Barragán-Scott, Director
Department of Revenue
Jefferson City, Missouri
and
Donna Place Herdrich, Contract Agent
Princeton Contract License Office
Princeton, Missouri

We have audited certain operations maintained and established by the Princeton Contract License Office, as provided by Section 136.055, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2011. The objectives of our audit were to:

1. Evaluate the office's internal controls related to the handling of various fee and tax transactions.

2. Evaluate the office's compliance with certain contractual and statutory provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the office, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the Department of Revenue's management and was not subjected to the procedures applied in our audit of the contact office.

For the areas audited, we identified (1) deficiencies in internal controls and (2) noncompliance with a contractual provision.

The accompanying Management Advisory Report presents our findings arising from our audit of the Princeton Contract License Office.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA

Audit Manager:	Toni Crabtree, CPA
In-Charge Auditor:	Katie Twiehaus
Audit Staff:	Corey McComas, M.Acct., CPA

Department of Revenue
Princeton Contract License Office
Management Advisory Report - State Auditor's Findings

1. Prepayment Void Transactions

The Princeton license office needs to improve controls over prepayment void transactions.

A prepayment void transaction occurs when a transaction is entered in the Titling and Registration Intranet Processing System (TRIPS) but is voided before payment is made. Valid reasons for prepayment void transactions include entries that contain an incorrectly spelled name, a transfer on death erroneously left off the title, an incorrect address or date of purchase; and when customers lack sufficient funds to pay the transaction.

The license office did not maintain customer acknowledgment documentation for the six void transactions that occurred in April, May, and June 2011, and did not document the reason for voiding three of these transactions. Additionally, the office manager did not document her approval of these void transactions.

Department of Revenue (DOR) official procedures provide that the reason for the void should be documented along with the customer's signature acknowledging the void, and the void transaction be reviewed and approved by a supervisor and/or manager. Obtaining a customer's acknowledgement and documenting the reason for voiding a transaction helps ensure the transaction actually was voided, and a review by office management also helps ensure transactions were properly handled and are valid.

Recommendation

The Princeton Contract License Office ensure all prepayment void transactions are supported by customer acknowledgment of the void transaction, along with the reason for the void. In addition, office management should review all prepayment void transactions and document its review.

Auditee's Response

The recommendation has been implemented. My office now has a voided transaction file and all voids are stored in this file in order. Each void is signed by the customer, both on the signature line and at the bottom of the form, and the words voided transaction are written across the paperwork.

2. Contract Compliance

The Princeton license office does not always accurately update inventory records on a daily basis, as required by its agent contract with the DOR. According to DOR personnel, the Princeton license office typically has approximately 1,500 inventory items on hand on any given day. The inventory items include items such as license plates, tabs, decals, and permits.

The license office did not properly record the inventory for 5 of 40 (13 percent) items reviewed in June 2011. We observed a personalized license plate which was not recorded in the inventory log. According to the office manager, a personalized license plate is not recorded in the inventory log

until the plate is sold. Additionally, a license plate tab was marked as sold in the log, but was still on hand; a truck plate was shown as sold in TRIPS, but not marked as sold in the log; and a passenger license plate had not been recorded in the log as transferred to another license office. In addition, several license plates were sold out of sequence.

The license office increases the risk of undetected theft and/or impropriety when inventory records are not updated accurately and on a timely basis. In addition, the agent contract requires the license office to maintain up-to-date perpetual inventory records.

Recommendation

The Princeton Contract License Office maintain accurate perpetual inventory records, as required by the agent contract.

Auditee's Response

The recommendation has been implemented. My office now records all inventory in the inventory log, including personalized plates as they arrive in the office. The old DOR policy was to record personalized plates as they were sold but that policy has been changed. All inventory is recorded in the inventory log and the log is kept up to date.

3. Accounting Controls and Procedures

The Princeton license office needs to improve controls and procedures over monies collected. For the year ended June 30, 2011, the office collected and remitted to the DOR approximately $678,000.

The license office did not always accurately record the method of payment (cash, check, and credit card) in the accounting records and did not reconcile the composition of monies received to deposits. For example, the composition of deposits did not agree to the composition of receipts recorded for two of three deposits made from May 17 to May 19, 2011. A review of these deposits identified transactions marked as paid with cash when actually paid for by check, and checks recorded as cash payments.

DOR official procedures for license offices provide that the composition of monies received should be reconciled to the accounting records and to deposits. Discrepancies between accounting records and deposits result in less assurance of proper handling.

Recommendation

The Princeton Contract License Office ensure the correct method of payment is recorded in the accounting records, and the composition of monies received is reconciled to the accounting records and to deposits.

Auditee's Response

The recommendation has been implemented. My office is accurately recording transactions as cash, check, credit card or combination of methods of payment. In the past, customers could write one check for both motor vehicle and driver's transaction and I would divide it between the drawers. In order to keep the composition of the drawers correct, customers

are now required to write separate checks for drivers and motor vehicle transactions.

Department of Revenue
Princeton Contract License Office
Organization and Statistical Information

Pursuant to Section 136.030(2), the Department of Revenue (DOR) has the authority and responsibility for the collection of motor vehicle registration fees, driver license fees, motor vehicle sales and use tax, and all other taxes. Pursuant to Section 136.055, RSMo, the director of the DOR has appointed 183 contract agents to operate contract license offices. This section also provides that the state auditor may audit the contract license offices. The DOR, License Office Bureau, under the management of the Motor Vehicle and Driver Licensing Division, is responsible for administering contract license offices throughout the state.

Starting in January 2009, the DOR began awarding license offices through a competitive bidding process. Effective August 2009, Section 136.055.2, RSMo, requires contract license offices to be awarded through a competitive bidding process. This bidding process must give priority to organizations and entities that are exempt from taxation (not-for-profit) under the Internal Revenue Code, and political subdivisions such as municipalities, counties, and fire protection districts. Contracts for the license offices are typically for one year, with three one-year renewal periods. The contract may be canceled at the discretion of the DOR.

The contract license offices issue titles for all Missouri motor vehicles, trailers, and marine craft; and issue and sell over 500 different types of license plates which can be classified into 6 major categories: passenger, truck, trailer, motorcycle, bus, and dealer. In addition, the contract license offices issue 5 basic types of driver licenses: Intermediate License (GDL), Class F (Operator), Class E (For-Hire), Class A, B, and C (Commercial), and Class M (Motorcycle). The licensing process also includes allowing customers to contribute to the organ donor program or blindness awareness fund, register with the selective services, add endorsements or restrictions to licenses, and an opportunity to register to vote.

The contract agents do not receive compensation from the DOR, but do receive the following fees, allowed by Section 136.055.1, RSMo, from customers for each type of transaction processed by the office.

Agent Fees

Transaction Type	Fee
License renewal	$3.50 one year
	$7.00 two years
Transfer of registration	$3.50
Application or transfer of title	$2.50
Driver, operator or chauffeur license	$2.50 three years or less
	$5.00 exceeding three years
Notice of lien	$2.50

In July 2009, the bid solicitation for the Princeton Contract License Office was issued. The office was awarded to Donna Place Herdrich, effective

November 19, 2009. At June 30, 2011, the contract/office manager was Donna Herdrich.

For the year ended June 30, 2011, the office collected and remitted to the DOR $678,084, and retained processing fees totaling $24,599. Under the terms of the contract, the office was not required to return a percentage of its processing fees to the state.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Princeton Contract License Office did not receive any federal stimulus monies during the year ended June 30, 2011.

Missouri State Auditor

REVENUE

Paris Contract License Office

November 2011

Report No. 2011-99

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Paris Contract License Office

Background

The Department of Revenue has appointed 183 contract agents to operate contract license offices. These offices issue driver licenses; titles for motor vehicles, trailers, and marine craft; and license plates. Contract agents are compensated through transaction-based processing fees. Under a state law which became effective in 2009, the State Auditor may audit contract license offices. This audit is one of the initial 10 contract license offices audited by the State Auditor.

Prepayment Void Transactions

The Paris contract license office did not maintain proper documentation of prepayment void transactions. Prepayment void transactions occur when a transaction is entered into the processing system but is voided before payment is made. Department of Revenue official procedures require license offices to document the reason for any void, obtain the customer's signature acknowledging the void, and have a supervisor and/or manager review and approve the void. The Paris contract license office lacked any documentation for 5 out of 10 of the void transactions we reviewed and lacked documentation of customer acknowledgment for 1 out of 5 other transactions.

Segregation of Duties

The Paris contract license office does not adequately segregate duties, and there is no documented oversight by the contract agent. The office has 1 employee who is responsible for multiple duties, including receiving monies, depositing receipts, and reconciling the bank account to the accounting records. There is no evidence that the contract agent reviews this work, which increases the risk of loss or misuse.

In the areas audited, the overall performance of this entity was **Good**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Paris contract license office did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Alana M. Barragán-Scott, Director
Department of Revenue
Jefferson City, Missouri
and
Christy Barton, Contract Agent
Paris Contract License Office
Paris, Missouri

We have audited certain operations maintained and established by the Paris Contract License Office, as provided by Section136.055, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2011. The objectives of our audit were to:

1. Evaluate the office's internal controls related to the handling of various fee and tax transactions.

2. Evaluate the office's compliance with certain contractual and statutory provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the office, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the Department of Revenue's management and was not subjected to the procedures applied in our audit of the contract office.

For the areas audited, we identified (1) deficiencies in internal controls and (2) no significant noncompliance with contractual and statutory provisions.

The accompanying Management Advisory Report presents our findings arising from our audit of the Paris Contract License Office.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Audit Staff:	Corey McComas, M.Acct., CPA
	Kelli Oldham

Department of Revenue
Paris Contract License Office
Management Advisory Report - State Auditor's Findings

1. Prepayment Void Transactions

The Paris license office needs to improve controls over prepayment void transactions.

A prepayment void transaction occurs when a transaction is entered in the Titling and Registration Intranet Processing System (TRIPS) but is voided before payment is made. Valid reasons for prepayment void transactions include entries that contain an incorrectly spelled name, a transfer on death erroneously left off the title, an incorrect address or date of purchase; and when customers lack sufficient funds to pay the transaction.

The license office did not maintain any documentation for 5 of 10 (50 percent) void transactions that occurred during the months of April, May, and June 2011. Additionally, the office did not maintain customer acknowledgment documentation for 1 of 5 other void transactions.

Department of Revenue (DOR) official procedures provide that the reason for the void should be documented along with the customer's signature acknowledging the void, and the void transaction be reviewed and approved by a supervisor and/or manager. Obtaining appropriate documentation including a customer's acknowledgement helps ensure the transaction actually was voided, and a review by office management also helps ensure transactions were properly handled and are valid.

Recommendation

The Paris Contract License Office ensure all prepayment void transactions are supported by customer acknowledgment of the void transaction, along with the reason for the void. In addition, office management should review all prepayment void transactions and document its review.

Auditee's Response

I have reviewed your finding and agree with your recommendation. Per your recommendation, employees will ensure that all prepayment void transactions are supported by a customer acknowledgement of the voided transactions with their signature or initials, and a reason will be documented on the voided transaction. To ensure proper oversight, the contracted agent will review and initial daily void reports in an effort to strengthen internal controls and ensure employee compliance.

2. Segregation of Duties

The Paris license office does not have adequate segregation of duties and there is no documented oversight by the contract agent.

The office has one employee who is responsible for the operation and management of the office, including receiving monies, recording receipts and transactions in TRIPS, depositing receipts, reconciling the bank account to the accounting records, and maintaining the inventory, such as license plates and tabs. Although DOR personnel periodically review and evaluate the contract office procedures and records, there is no evidence the contract

agent provides adequate supervision or review of the work performed by the employee.

To reduce the risk of loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. If proper segregation of duties is not possible, the contract agent should review the work performed and investigate any unusual transactions.

Recommendation

The Paris Contract License Office ensure timely supervision or independent review of the work performed by the office employee and investigate unusual items and variances.

Auditee's Response

I have reviewed your finding and agree with your recommendation. Per your recommendation to segregate duties, the contracted agent will reconcile bank statements monthly, review daily transactions weekly to safeguard against possible loss or misuse of funds, and will oversee daily inventory and general operations. In order to document the agent's oversight, I will initial all appropriate documents as needed.

Department of Revenue
Paris Contract License Office
Organization and Statistical Information

Pursuant to Section 136.030(2), the Department of Revenue (DOR) has the authority and responsibility for the collection of motor vehicle registration fees, driver license fees, motor vehicle sales and use tax, and all other taxes. CITIZENS SUMMARY

Findings in the audit of the Kansas City-Fletcher Daniels Building Contract License Office

Background

The Department of Revenue has appointed 183 contract agents to operate contract license offices. These offices issue driver licenses; titles for motor vehicles, trailers, and marine craft; and license plates. Contract agents are compensated through transaction-based processing fees. Under a state law which became effective in 2009, the State Auditor may audit contract license offices. This audit is one of the initial 10 contract license offices audited by the State Auditor.

Prepayment Void Transactions

The Kansas City-Fletcher Daniels Building contract license office did not maintain proper documentation of prepayment void transactions. Prepayment void transactions occur when a transaction is entered into the processing system but is voided before payment is made. Department of Revenue official procedures require license offices to document the reason for any void, obtain the customer's signature acknowledging the void, and have a supervisor and/or manager review and approve the void. The Kansas City-Fletcher Daniels Building contract license office did not maintain any documentation for 9 of 29 (31 percent) void transactions occurring between August 25 and August 29, 2011, making it difficult to ensure these transactions were voided for a valid reason and properly handled.

Accounting Controls and Procedures

The Kansas City-Fletcher Daniels Building contract license office needs to improve its accounting controls and procedures. The license office did not always accurately record the method of payment, such as cash or check, and did not reconcile the composition of monies received to deposits, as required by Department of Revenue procedures.

In the areas audited, the overall performance of this entity was **Good**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Kansas City-Fletcher Daniels Building contract license office did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. We have audited certain operations maintained and established by the Kansas City-Fletcher Daniels Building Contract License Office, as provided by Section 136.055, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2011. The objectives of our audit were to:

1. Evaluate the office's internal controls related to the handling of various fee and tax transactions.

2. Evaluate the office's compliance with certain contractual and statutory provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the office, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the Department of Revenue's management and was not subjected to the procedures applied in our audit of the contract office.

For the areas audited, we identified (1) deficiencies in internal controls and (2) no significant noncompliance with contractual and statutory provisions.

The accompanying Management Advisory Report presents our findings arising from our audit of the Kansas City-Fletcher Daniels Building Contract License Office.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Toni Crabtree, CPA
In-Charge Auditor:	Katie Twiehaus
Audit Staff:	Corey McComas, M.Acct., CPA
	Kelli Oldham

1. Prepayment Void Transactions

The Kansas City-Fletcher Daniels Building license office needs to improve controls over prepayment void transactions.

A prepayment void transaction occurs when a transaction is entered in the Titling and Registration Intranet Processing System but is voided before payment is made. Valid reasons for prepayment void transactions include entries that contain an incorrectly spelled name, a transfer on death erroneously left off the title, an incorrect address or date of purchase; and when customer lack sufficient funds to pay the transaction.

The license office did not maintain any documentation, such as the reason for the void, customer acknowledgment of the void, and management review of the transaction, for 9 of 29 (31 percent) void transactions that occurred from August 25 to August 29, 2011. As a result, there is little assurance that these transactions were voided for a valid reason and properly handled.

Department of Revenue (DOR) official procedures provide that the reason for the void should be documented along with the customer's signature acknowledging the void, if necessary, and the void transaction be reviewed and approved by a supervisor and/or manager. Obtaining appropriate documentation including a customer's acknowledgement and documenting the reason for voiding the transaction help ensure the transaction actually was voided, and a review by office management also helps ensure transactions were properly handled and are valid.

Recommendation

The Kansas City-Fletcher Daniels Building Contract License Office ensure all prepayment void transactions are supported by customer acknowledgment of the void transaction, along with the reason for the void. In addition, office management should review all prepayment void transactions and document its review.

Auditee's Response

The manager does and did document the voided transaction summary in front of the auditor the date of the audit. On a daily basis, the manager verifies each voided transaction. On the transaction report, the manager notes if the transaction was reran. The manager double checks all voided transactions to make sure there is no fraud in the office.

2. Accounting Controls and Procedures

The Kansas City-Fletcher Daniels Building license office needs to improve controls and procedures over monies collected. For the year ended June 30, 2011, the office collected and remitted to the DOR approximately $7.6 million.

The license office did not always accurately record the method of payment (cash, check, and credit card) in the accounting records and did not reconcile the composition of monies received to deposits. For example, the

composition of deposits did not agree to the composition of receipts recorded for the three deposits made from August 25 to August 29, 2011. A review of these deposits identified transactions marked as paid with cash when actually paid for by check, checks recorded as cash payments, and credit card charges recorded as cash and/or check.

DOR official procedures for license offices provide that the composition of monies received should be reconciled to the accounting records and to deposits. Discrepancies between accounting records and deposits result in less assurance of proper handling.

Recommendation

The Kansas City-Fletcher Daniels Building Contract License Office ensure the correct method of payment is recorded in the accounting records, and the composition of monies received be reconciled to the accounting records and to deposits.

Auditee's Response

The method of payment will never add up correctly. The driving records and failure to appear in court for traffic (FACT) violation receipts cannot be processed in the system.

Department of Revenue
Kansas City-Fletcher Daniels Building Contract License Office
Organization and Statistical Information

Pursuant to Section 136.030(2), the Department of Revenue (DOR) has the authority and responsibility for the collection of motor vehicle registration fees, driver license fees, motor vehicle sales and use tax, and all other taxes. Pursuant to Section 136.055, RSMo, the director of the DOR has appointed 183 contract agents to operate contract license offices. This section also provides that the state auditor may audit the contract license offices. The DOR, License Office Bureau, under the management of the Motor Vehicle and Driver Licensing Division, is responsible for administering contract license offices throughout the state.

Starting in January 2009, the DOR began awarding license offices through a competitive bidding process. Effective August 2009, Section 136.055.2, RSMo, requires contract license offices to be awarded through a competitive bidding process. This bidding process must give priority to organizations and entities that are exempt from taxation (not-for-profit) under the Internal Revenue Code, and political subdivisions such as municipalities, counties, and fire protection districts. Contracts for the license offices are typically for one year, with three one-year renewal periods. The contract may be canceled at the discretion of the DOR.

The contract license offices issue titles for all Missouri motor vehicles, trailers, and marine craft; and issue and sell over 500 different types of license plates which can be classified into 6 major categories: passenger, truck, trailer, motorcycle, bus, and dealer. In addition, the contract license offices issue 5 basic types of driver licenses: Intermediate License (GDL), Class F (Operator), Class E (For-Hire), Class A, B, and C (Commercial), and Class M (Motorcycle). The licensing process also includes allowing customers to contribute to the organ donor program or blindness awareness fund, register with the selective services, add endorsements or restrictions to licenses, and an opportunity to register to vote.

The contract agents do not receive compensation from the DOR, but do receive the following fees, allowed by Section 136.055.1, RSMo, from customers for each type of transaction processed by the office.

Agent Fees

Transaction Type	Fee
License renewal	$3.50 one year
	$7.00 two years
Transfer of registration	$3.50
Application or transfer of title	$2.50
Driver, operator or chauffeur license	$2.50 three years or less
	$5.00 exceeding three years
Notice of lien	$2.50

In April 2009, the bid solicitation for the Kansas City-Fletcher Daniels Building Contract License Office was issued. The office was awarded to the

DTC-DMV, Inc., effective August 13, 2009. At June 30, 2011, the contract and office managers were Julie Shippy and Jennifer Rodriguez, respectively.

For the year ended June 30, 2011, the office collected and remitted to the DOR $7,584,582, and retained processing fees totaling $350,804. Under the terms of the contract, the office was not required to return a percentage of its processing fees to the state.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Kansas City-Fletcher Daniels Building Contract License Office did not receive any federal stimulus monies during the year ended June 30, 2011.

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Imperial Contract License Office

Background

The Department of Revenue has appointed 183 contract agents to operate contract license offices. These offices issue driver licenses; titles for motor vehicles, trailers, and marine craft; and license plates. Contract agents are compensated through transaction-based processing fees. Under a state law which became effective in 2009, the State Auditor may audit contract license offices. This audit is one of the initial 10 contract license offices audited by the State Auditor.

Accounting Controls and Procedures

The Imperial contract license office needs to improve its accounting controls and procedures. The license office did not always accurately record the method of payment, such as cash or check, and did not reconcile the composition of monies received to deposits, as required by Department of Revenue procedures.

In the areas audited, the overall performance of this entity was **Good**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Imperial contract license office did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Alana M. Barragán-Scott, Director
Department of Revenue
Jefferson City, Missouri
and
Paul R. Schmidt, Sr., Contract Agent
Imperial Contract License Office
Imperial, Missouri

We have audited certain operations maintained and established by the Imperial Contract License Office, as provided by Section 136.055, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2011. The objectives of our audit were to:

1. Evaluate the office's internal controls related to the handling of various fee and tax transactions.

2. Evaluate the office's compliance with certain contractual and statutory provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the office, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the Department of Revenue's management and was not subjected to the procedures applied in our audit of the contract office.

For the areas audited, we identified (1) a deficiency in internal controls and (2) no significant noncompliance with contractual and statutory provisions.

The accompanying Management Advisory Report presents our finding arising from our audit of the Imperial Contract License Office.

Department of Revenue
Imperial Contract License Office
Management Advisory Report - State Auditor's Finding

Accounting Controls and Procedures

The Imperial license office needs to improve controls and procedures over monies collected. For the year ended June 30, 2011, the office collected and remitted to the Department of Revenue (DOR) approximately $7.8 million.

The license office did not always accurately record the method of payment (cash, check, and credit card) in the accounting records and did not reconcile the composition of monies received to deposits. For example, the composition of deposits did not agree to the composition of receipts recorded for the three deposits made from August 12 to August 15, 2011. A review of these deposits identified transactions marked as paid with cash when actually paid for by check and/or credit card, and checks recorded as cash payments.

DOR official procedures for license offices provide that the composition of monies received should be reconciled to the accounting records and to deposits. Discrepancies between accounting records and deposits result in less assurance of proper handling.

Recommendation

The Imperial Contract License Office ensure the correct method of payment is recorded in the accounting records, and the composition of monies received be reconciled to the accounting records and to deposits.

Auditee's Response

Frequently as my clerks are working on the counter the type of payment will be changed by the customer. They may present a credit card which is not able to be processed or after reflecting on the fee of $1 or 2.75 percent decide to use another payment. I believe that the clerks on my counter are moving one step too far before actually having the payment in hand. If this occurs the clerk would need to process a manual void in order to complete the transaction with the proper payment, this would involve voiding inventory that was to be issued, stopping the transaction on the computer system and adjusting the accounting report manually to correctly reflect the proper form of payment collecting. I have had clerks that have asked me about this and frankly have made this error while working the counter myself. My response to the clerks and my own action has been to allow the transaction to stand and as long as the overall drawer was in balance take no further action. I was not aware and was not made aware by the Department of Revenue (DOR) that it was critical that the accounting report be reconciled regarding the number of checks/credit cards or the amount of checks/cash/credit cards.

After speaking with my clerks regarding this matter and my wife, who often handles the deposits and preparation of the shipmen/accounting report, discrepancies were found regarding the identification of transactions as check/cash/credit card by our field representative from DOR. A recommendation was made by her to note the audit copy kept in the office that the correct form of payment was not recorded and what form of payment was received. After reviewing the audit copies and accounting reports it does not appear that that was adequately communicated with my

staff, nor was it followed up on after the recommendation was made by myself.

In conclusion, we had only been using the check/cash/credit card designation for the purposes of reconciling a possible incorrect or missing payment and did not understand the gravity of its accuracy for final accounting by the State. After reading the State Auditor's finding I have sent a memo to each of the clerks in my office and are making certain that each clerk pays attention to this detail on each transaction, allowing each transaction sufficient time to be processed reflecting the correct payment. I will also inquire with our field representative as to how the DOR wishes us to inform them of corrections on her next visit which should be the last week of October.

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Downtown (St. Louis) Contract License Office

Background	The Department of Revenue has appointed 183 contract agents to operate contract license offices. These offices issue driver licenses; titles for motor vehicles, trailers, and marine craft; and license plates. Contract agents are compensated through transaction-based processing fees. Under a state law which became effective in 2009, the State Auditor may audit contract license offices. This audit is one of the initial 10 contract license offices audited by the State Auditor.
Prepayment Void Transactions	The Downtown (St. Louis) contract license office did not maintain proper documentation of prepayment void transactions. Prepayment void transactions occur when a transaction is entered into the processing system but is voided before payment is made. Department of Revenue official procedures require license offices to document the reason for any void, obtain the customer's signature acknowledging the void, and have a supervisor and/or manager review and approve the void. The Downtown (St. Louis) contract license office lacked documentation of customer acknowledgment for 6 of 22 (27 percent) void transactions occurring between June 21 and June 22, 2011, and did not document the reason for voiding two other transactions.
Statutory Compliance	The Downtown (St. Louis) contract license office is not complying with statutory requirements to inquire whether customers wish to make a $1 donation to the Blindness Education, Screening, and Treatment Program Fund and the Organ Donor Program Fund, and to inform customers of the ability to be included in the organ donor registry and to consent to organ donation. An answer to these questions must be entered into the computer system to complete the transaction, so it appears staff frequently just entered "No." The Downtown (St. Louis) contract license office's donor registry enrollment average for the year ending June 30, 2011, was only 28 percent, compared to a statewide average of 37 percent.

In the areas audited, the overall performance of this entity was **Good**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	The Downtown (St. Louis) contract license office did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Alana M. Barragán-Scott, Director
Department of Revenue
Jefferson City, Missouri
and
City of St. Louis, Collector of Revenue, Contract Agent
Downtown (St. Louis) Contract License Office
St. Louis, Missouri

We have audited certain operations maintained and established by the Downtown (St. Louis) Contract License Office, as provided by Section 136.055, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2011. The objectives of our audit were to:

1. Evaluate the office's internal controls related to the handling of various fee and tax transactions.

2. Evaluate the office's compliance with certain contractual and statutory provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the office, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the Department of Revenue's management and was not subjected to the procedures applied in our audit of the contract office.

For the areas audited, we identified (1) a deficiency in internal controls and (2) noncompliance with statutory provisions.

The accompanying Management Advisory Report presents our findings arising from our audit of the Downtown (St. Louis) Contract License Office.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA

Audit Staff:	Corey McComas, M.Acct., CPA

Department of Revenue
Downtown (St. Louis) Contract License Office
Management Advisory Report - State Auditor's Findings

1. Prepayment Void Transactions

The Downtown license office needs to improve controls over prepayment void transactions.

A prepayment void transaction occurs when a transaction is entered in the Titling and Registration Intranet Processing System (TRIPS) but is voided before payment is made. Valid reasons for prepayment void transactions include entries that contain an incorrectly spelled name, a transfer on death erroneously left off the title, an incorrect address or date of purchase; and when customers lack sufficient funds to pay the transaction.

The license office did not maintain customer acknowledgment documentation for 6 of 22 (27 percent) void transactions that occurred from June 21 to June 22, 2011. In addition, the reason for voiding the transaction was not documented for two other transactions.

Department of Revenue (DOR) official procedures provide that the reason for the void should be documented along with the customer's signature acknowledging the void, and the void transaction be reviewed and approved by a supervisor and/or manager. Obtaining a customer's acknowledgement and documenting the reason for voiding the transaction helps ensure the transaction actually was voided and was for a valid reason.

Recommendation

The Downtown (St. Louis) Contract License Office ensure all prepayment void transactions are supported by customer acknowledgement of the void transaction, along with the reason for the void.

Auditee's Response

On the dates June 21 and June 22, 2011 for the audit copies that were reviewed, we did not keep accurate records on prepayment voids. On October 12, 2010, we hired a new supervisor with 15 years of fee office experience and one of the first things she did was implement new procedures on how we handle and keep and all prepayment voids. They are being kept in a separate folder and are signed by customers and herself with an explanation for the voided transaction.

2. Statutory Compliance

The Downtown license office does not always inquire if customers want to donate to the Blindness Education, Screening, and Treatment Program Fund and the Organ Donor Program Fund, or inform customers of the ability to be included in the organ donor registry and to consent to organ donation, as required by state law.

During our audit work in the office, we noted that office staff frequently did not ask customers if they wanted to donate to these funds, or inform customers about organ donation. A Yes or No to the donation questions must be recorded in TRIPS in order to complete the transactions. As a result, staff appear to be automatically entering a No to these questions. According to the state Donor Registry System, the enrollment average for

the Downtown license office was 28 percent of transactions for the year ended June 30, 2011. The state-wide average for license offices was 37 percent.

Sections 301.020 and 302.171, RSMo, require personnel to inquire whether customers registering a motor vehicle and applying for a driver's license are interested in making a $1 donation to the Blindness Education, Screening, and Treatment Program Fund and to the Organ Donor Program Fund. In addition, Section 302.171, RSMo, requires personnel to inform customers applying for a driver's license of the ability to be included in the organ donor registry and to consent to organ donation by completing the form on the back of the driver's license.

Recommendation

The Downtown (St. Louis) Contract License Office ensure office staff inquire of each customer whether the customer is interested in making a $1 donation to the Blindness, Education, Screening and Treatment Program Fund and the Organ Donor Program Fund, and inform customers of the ability to be included in the organ donor registry and to consent to organ donation, as required by state law.

Auditee's Response

We have a number of homeless people that rely on a voucher program that come in with no money to even pay for the transactions themselves. So, we may not ask every customer for a donation because they are paying with a voucher that we cannot change because it has been approved for a certain dollar amount. I have spoke to all clerks and have asked them to ask questions where applicable for all donations.

Department of Revenue
Downtown (St. Louis) Contract License Office
Organization and Statistical Information

Pursuant to Section 136.030(2), the Department of Revenue (DOR) has the authority and responsibility for the collection of motor vehicle registration fees, driver license fees, motor vehicle sales and use tax, and all other taxes. Pursuant to Section 136.055, RSMo, the director of the DOR has appointed 183 contract agents to operate contract license offices. This section also provides that the state auditor may audit the contract license offices. The DOR, License Office Bureau, under the management of the Motor Vehicle and Driver Licensing Division, is responsible for administering contract license offices throughout the state.

Starting in January 2009, the DOR began awarding license offices through a competitive bidding process. Effective August 2009, Section 136.055.2, RSMo, requires contract license offices to be awarded through a competitive bidding process. This bidding process must give priority to organizations and entities that are exempt from taxation (not-for-profit) under the Internal Revenue Code, and political subdivisions such as municipalities, counties, and fire protection districts. Contracts for the license offices are typically for one year, with three one-year renewal periods. The contract may be canceled at the discretion of the DOR.

The contract license offices issue titles for all Missouri motor vehicles, trailers, and marine craft; and issue and sell over 500 different types of license plates which can be classified into 6 major categories: passenger, truck, trailer, motorcycle, bus, and dealer. In addition, the contract license offices issue 5 basic types of driver licenses: Intermediate License (GDL), Class F (Operator), Class E (For-Hire), Class A, B, and C (Commercial), and Class M (Motorcycle). The licensing process also includes allowing customers to contribute to the organ donor program or blindness awareness fund, register with the selective services, add endorsements or restrictions to licenses, and an opportunity to register to vote.

The contract agents do not receive compensation from the DOR, but do receive the following fees, allowed by Section 136.055.1, RSMo, from customers for each type of transaction processed by the office.

Agent Fees

Transaction Type	Fee
License renewal	$3.50 one year
	$7.00 two years
Transfer of registration	$3.50
Application or transfer of title	$2.50
Driver, operator or chauffeur license	$2.50 three years or less
	$5.00 exceeding three years
Notice of lien	$2.50

In April 2009, the bid solicitation for the Downtown (St. Louis) License Office was issued. The office was awarded to City of St. Louis, Collector of Revenue, effective December 9, 2009. At June 30, 2011, the contract and

office managers were Gregory Daly (Collector of Revenue) and Thomas Vollmer, respectively. The clerk supervisor was Rita Lahr.

For the year ended June 30, 2011, the office collected and remitted to the DOR $8,338,515, and retained processing fees totaling $279,890. The retained fees are used to pay the office expenses, with any excess fees remitted to the Collector's Office. Under the terms of the contract, the office was not required to return a percentage of its processing fees to the state.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Downtown (St. Louis) Contract License Office did not receive any federal stimulus monies during the year ended June 30, 2011.

REVENUE

Columbia Contract License Office

November 2011

Report No. 2011-95

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Columbia Contract License Office

Background

The Department of Revenue has appointed 183 contract agents to operate contract license offices. These offices issue driver licenses; titles for motor vehicles, trailers, and marine craft; and license plates. Contract agents are compensated through transaction-based processing fees. Under a state law which became effective in 2009, the State Auditor may audit contract license offices. This audit is one of the initial 10 contract license offices audited by the State Auditor.

Prepayment Void Transactions

The Columbia contract license office did not maintain proper documentation of prepayment void transactions. Prepayment void transactions occur when a transaction is entered into the processing system but is voided before payment is made. Department of Revenue official procedures require license offices to document the reason for any void, obtain the customer's signature acknowledging the void, and have a supervisor and/or manager review and approve the void. For the 29 void transactions that occurred over a 3-day period, the Columbia contract license office lacked documentation of customer acknowledgment for 83 percent and lacked documentation of manager approval for 21 percent.

Contract Compliance

The agent contract provides that if there is a shortage in the daily balance, the contract agent must make up the difference, but, if there is an overage in the daily balance, the amount of the overage must be deposited in the Department of Revenue bank account. Instead of depositing overages as required, the Columbia contract license office retained overages to cover future shortages.

In the areas audited, the overall performance of this entity was **Good**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Columbia contract license office did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

We have audited certain operations maintained and established by the Columbia Contract License Office, as provided by Section 136.055, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2011. The objectives of our audit were to:

1. Evaluate the office's internal controls related to the handling of various fee and tax transactions.

2. Evaluate the office's compliance with certain contractual and statutory provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the office, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the Department of Revenue's management and was not subjected to the procedures applied in our audit of the contract office.

For the areas audited, we identified (1) a deficiency in internal controls and (2) noncompliance with a contractual provision.

The accompanying Management Advisory Report presents our findings arising from our audit of the Columbia Contract License Office.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Toni Crabtree, CPA
In-Charge Auditor:	Katie Twiehaus
Audit Staff:	Corey McComas, M.Acct., CPA
	Kelli Oldham

1. Prepayment Void Transactions

The Columbia license office needs to improve controls over prepayment void transactions.

A prepayment void transaction occurs when a transaction is entered in the Titling and Registration Intranet Processing System but is voided before payment is made. Valid reasons for prepayment void transactions include entries that contain an incorrectly spelled name, a transfer on death erroneously left off the title, an incorrect address or date of purchase; and when customers lack sufficient funds to pay the transaction.

The license office did not maintain customer acknowledgment documentation for 24 of 29 (83 percent) void transactions that occurred from June 6 to June 8, 2011. Additionally, the office manager did not document approval for 6 (21 percent) of the 29 transactions. According to the office manager, she performs a daily review of prepayment void transactions, but does not always document her review.

Department of Revenue (DOR) official procedures provide that the reason for the void should be documented along with the customer's signature acknowledging the void, and the void transaction be reviewed and approved by a supervisor and/or manager. Obtaining a customer's acknowledgement helps ensure the transaction actually was voided, and a review by office management also helps ensure transactions were properly handled and are valid.

Recommendation

The Columbia Contract License Office ensure all prepayment void transactions are supported by customer acknowledgment of the void transaction, along with the reason for the void. In addition, the license office should ensure documentation of the approval of all prepayment void transactions is maintained.

Auditee's Response

It has always been our practice for clerks to explain to customers why a transaction is being voided. Additionally, it has always been our practice for an office manager to review all prepayment void transactions to ensure that they were handled appropriately. In order to document these procedures and to implement your recommendation, we are now requiring the signature of any customer or representative for whom we need to issue a prepayment void on their transaction. We are also requiring that the manager reviewing the void transaction initial their review. Many prepayment void transactions are the result of a customer not realizing that payment would be required and not having any means to pay for the service. For example, many customers are unaware that there is a fee associated with issuing a new title or with transferring license plates from one vehicle to another. As an additional step and in order to minimize prepayment void transactions, we are requiring our clerks to politely inquire of all customers what means of payment they wish to use prior to processing their

transaction. In that manner, it is hoped that we can both improve customer service and minimize void transactions. We recognize that some prepayment voids are unavoidable, however, we will endeavor to do what we can in order to keep these void transactions to as small a number as possible.

2. Contract Compliance

The Columbia license office does not deposit overages of revenue collected in the DOR bank account, as required by its agent contract with the DOR.

The office policy, when the daily revenue accounting reports indicate total collections are less than the actual monies collected (overage), is to place the excess money in a specific box in the office. Then, if an accounting report indicates total collections are greater than the actual monies collected (shortage), monies from the box are used to cover the difference.

The agent contract provides that if the daily balance reflects a shortage, the agent should pay the difference prior to the deposit. However, if the daily balance reflects an overage, the amount of the overage should be deposited in the DOR bank account.

Recommendation

The Columbia Contract License Office comply with contractual provisions requiring any overages of daily funds to be deposited in the DOR bank account.

Auditee's Response

We take very seriously our responsibility for accurate accounting-for the customer, for the state, and for our own office. There are times when our receipts may vary slightly from what they should be and that variance is typically very minor-frequently just a few cents. We have always understood that any significant overage would belong to the state and that all shortages, no matter how small or large, would always be ours. We have never had any significant overages, although admittedly we have had overages of less than a dollar on numerous occasions. In terms of shortages, last calendar year we absorbed $289.50, and this calendar year to date we have absorbed $287.51 in shortages. In order to completely account for all funds, no matter how small, this office will ensure that all overages, regardless of amount, will be deposited into the state account. We will continue to absorb all shortages and report accordingly.

Department of Revenue
Columbia Contract License Office
Organization and Statistical Information

Pursuant to Section 136.030(2), the Department of Revenue (DOR) has the authority and responsibility for the collection of motor vehicle registration fees, driver license fees, motor vehicle sales and use tax, and all other taxes. Pursuant to Section 136.055, RSMo, the director of the DOR has appointed 183 contract agents to operate contract license offices. This section also provides that the state auditor may audit the contract license offices. The DOR, License Office Bureau, under the management of the Motor Vehicle and Driver Licensing Division, is responsible for administering contract license offices throughout the state.

Starting in January 2009, the DOR began awarding license offices through a competitive bidding process. Effective August 2009, Section 136.055.2, RSMo, requires contract license offices to be awarded through a competitive bidding process. This bidding process must give priority to organizations and entities that are exempt from taxation (not-for-profit) under the Internal Revenue Code, and political subdivisions such as municipalities, counties, and fire protection districts. Contracts for the license offices are typically for one year, with three one-year renewal periods. The contract may be canceled at the discretion of the DOR.

The contract license offices issue titles for all Missouri motor vehicles, trailers, and marine craft; and issue and sell over 500 different types of license plates which can be classified into 6 major categories: passenger, truck, trailer, motorcycle, bus, and dealer. In addition, the contract license offices issue 5 basic types of driver licenses: Intermediate License (GDL), Class F (Operator), Class E (For-Hire), Class A, B, and C (Commercial), and Class M (Motorcycle). The licensing process also includes allowing customers to contribute to the organ donor program or blindness awareness fund, register with the selective services, add endorsements or restrictions to licenses, and an opportunity to register to vote.

The contract agents do not receive compensation from the DOR, but do receive the following fees, allowed by Section 136.055.1, RSMo, from customers for each type of transaction processed by the office.

Agent Fees

Transaction Type	Fee
License renewal	$3.50 one year
	$7.00 two years
Transfer of registration	$3.50
Application or transfer of title	$2.50
Driver, operator or chauffeur license	$2.50 three years or less
	$5.00 exceeding three years
Notice of lien	$2.50

In January 2009, the bid solicitation for the Columbia Contract License Office was issued. The office was awarded to the Columbia Licensing

Services, LLC, effective April 24, 2009. At June 30, 2011, the contract and office managers were Patricia Wilson and Diana Thomas, respectively.

For the year ended June 30, 2011, the office collected and remitted to the DOR $18,660,289, and retained processing fees totaling $703,218. Additionally, as part of the bidding process, the office agreed to return one percent of its processing fees to the state. For the year ended June 30, 2011, the office returned processing fees, totaling $7,032, to the state.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Columbia Contract License Office did not receive any federal stimulus monies during the year ended June 30, 2011.

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Aurora Contract License Office

Background

The Department of Revenue has appointed 183 contract agents to operate contract license offices. These offices issue driver licenses; titles for motor vehicles, trailers, and marine craft; and license plates. Contract agents are compensated through transaction-based processing fees. Under a state law which became effective in 2009, the State Auditor may audit contract license offices. This audit is one of the initial 10 contract license offices audited by the State Auditor.

Accounting Controls and Procedures

The Aurora contract license office needs to improve its accounting controls and procedures. The license office did not always accurately record the method of payment, such as cash or check, and did not reconcile the composition of monies received to deposits, as required by Department of Revenue procedures.

In the areas audited, the overall performance of this entity was **Good**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Aurora contract license office did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Accounting Controls and Procedures 4

Organization and Statistical Information 5

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Alana M. Barragán-Scott, Director
Department of Revenue
Jefferson City, Missouri
and
Denise Blauvelt, Contract Agent
Aurora Contract License Office
Aurora, Missouri

We have audited certain operations maintained and established by the Aurora Contract License Office, as provided by Section 136.055, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2011. The objectives of our audit were to:

1. Evaluate the office's internal controls related to the handling of various fee and tax transactions.

2. Evaluate the office's compliance with certain contractual and statutory provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the office, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the Department of Revenue's management and was not subjected to the procedures applied in our audit of the contract office.

For the areas audited, we identified (1) a deficiency in internal controls and (2) no significant noncompliance with contractual and statutory provisions.

The accompanying Management Advisory Report presents our finding arising from our audit of the Aurora Contract License Office.

In-Charge Auditor:	Katie Twiehaus
Audit Staff:	Kelli Oldham

Department of Revenue
Aurora Contract License Office
Management Advisory Report - State Auditor's Finding

Accounting Controls and Procedures

The Aurora license office needs to improve controls and procedures over monies collected. For the year ended June 30, 2011, the office collected and remitted to the Department of Revenue (DOR) approximately $1.7 million.

The license office did not always accurately record the method of payment (cash, check and credit card) in the accounting records and did not reconcile the composition of monies received to deposits. For example, the composition of deposits did not agree to the composition of receipts recorded for the three deposits made from June 29 to July 5, 2011. A review of these deposits identified transactions marked as paid with cash when actually paid for by check and/or credit card, and checks recorded as cash payments.

DOR official procedures for license offices provide that the composition of monies received should be reconciled to the accounting records and to deposits. Discrepancies between accounting records and deposits result in less assurance of proper handling.

Recommendation

The Aurora Contract License Office ensure the correct method of payment is recorded in the accounting records and the composition of monies received be reconciled to the accounting records and to deposits.

Auditee's Response

The Aurora License Office has already implemented the procedure that the clerk writes down if she enters a check as cash or vice versa, and the amount of said check or cash. This information will be kept with the clerk's daily reports.

Department of Revenue
Aurora Contract License Office
Organization and Statistical Information

Pursuant to Section 136.030(2), the Department of Revenue (DOR) has the authority and responsibility for the collection of motor vehicle registration fees, driver license fees, motor vehicle sales and use tax, and all other taxes. Pursuant to Section 136.055, RSMo, the director of the DOR has appointed 183 contract agents to operate contract license offices. This section also provides that the state auditor may audit the contract license offices. The DOR, License Office Bureau, under the management of the Motor Vehicle and Driver Licensing Division, is responsible for administering contract license offices throughout the state.

Starting in January 2009, the DOR began awarding license offices through a competitive bidding process. Effective August 2009, Section 136.055.2, RSMo, requires contract license offices to be awarded through a competitive bidding process. This bidding process must give priority to organizations and entities that are exempt from taxation (not-for-profit) under the Internal Revenue Code, and political subdivisions such as municipalities, counties, and fire protection districts. Contracts for the license offices are typically for one year, with three one-year renewal periods. The contract may be canceled at the discretion of the DOR.

The contract license offices issue titles for all Missouri motor vehicles, trailers, and marine craft; and issue and sell over 500 different types of license plates which can be classified into 6 major categories: passenger, truck, trailer, motorcycle, bus, and dealer. In addition, the contract license offices issue 5 basic types of driver licenses: Intermediate License (GDL), Class F (Operator), Class E (For-Hire), Class A, B, and C (Commercial), and Class M (Motorcycle). The licensing process also includes allowing customers to contribute to the organ donor program or blindness awareness fund, register with the selective services, add endorsements or restrictions to licenses, and an opportunity to register to vote.

The contract agents do not receive compensation from the DOR, but do receive the following fees, allowed by Section 136.055.1, RSMo, from customers for each type of transaction processed by the office.

Agent Fees

Transaction Type	Fee
License renewal	$3.50 one year
	$7.00 two years
Transfer of registration	$3.50
Application or transfer of title	$2.50
Driver, operator or chauffeur license	$2.50 three years or less
	$5.00 exceeding three years
Notice of lien	$2.50

In May 2009, the bid solicitation for the Aurora Contract License Office was issued. The office was awarded to the Denise Blauvelt, effective October 15, 2009. At June 30, 2011, the contract and office managers were

Denise Blauvelt and Amy High, respectively. Ashley Bowling was appointed office manager in July 2011.

For the year ended June 30, 2011, the office collected and remitted to the DOR $1,707,093, and retained processing fees totaling $84,824. Additionally, as part of the bidding process, the office agreed to return 1 percent of its processing fees to the state during the first year of the contract and 1.1 percent, 1.2 percent, and 1.3 percent during the first, second, and third renewal period, respectively. For the year ended June 30, 2011, the office returned processing fees, totaling $907, to the state.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Aurora Contract License Office did not receive any federal stimulus monies during the year ended June 30, 2011.

Thomas A. Schweich

Missouri State Auditor

Phelps County

November 2011

Report No. 2011-93

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Phelps County

Unemployment Fund	The balance of the county Unemployment Fund is large enough to cover 5 years of expected unemployment claims. Keeping a large balance in this fund prevents these monies from being used for other purposes. In addition, because some of the monies in this fund come from restricted funds, the county should properly document the basis for administrative transfers from this fund to the General Revenue Fund.
Sheriff's Controls and Procedures	As noted in prior audits, the Sheriff's accounting controls and procedures need improvement. Jail commissary monies of approximately $32,000 are missing, and the failure to segregate duties, reconcile liabilities to cash balances, timely transmit receipts to the County Treasurer, and conduct adequate supervisory reviews allowed the missing funds to go undetected.
Prosecuting Attorney's Controls and Procedures	The Prosecuting Attorney's accounting controls and procedures need improvement. Accounting duties are not adequately segregated, the bad check clerk makes adjusting entries to the accounting system without documented supervisory approval, and, as noted in prior audit reports, receipting and depositing procedures need improvement.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Good**.* However, the audit revealed serious shortcomings within the Sherriff's Department.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

All reports are available on our website: http://auditor.mo.gov

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

Phelps County received the following Federal Stimulus monies:

A $528,202 Homelessness Prevention and Rapid Re-housing Program grant, of which $79,059 was spent in 2009, $418,770 in 2010, and $30,373 is expected to be spent in 2011.

A $77,164 Recovery Act-Edward Byrne Memorial Justice Assistance Grant, of which $66,107 was spent on crime control and prevention in 2010 and the remaining $11,057 is expected to be spent in 2011.

Organization and Statistical Information 11

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Phelps County

We have audited certain operations of Phelps County in fulfillment of our duties under Section 29.230, RSMo. In addition, Daniel Jones & Associates, P.C., Certified Public Accountants, was engaged to audit the financial statements of Phelps County for the 2 years ended December 31, 2010. The scope of our audit included, but was not necessarily limited to, the 2 years ended December 31, 2010. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Phelps County.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Mark Ruether, CPA
In-Charge Auditor:	Joyce Thomson
Audit Staff:	Terese Summers, MSAS, CPA
	Mariam Ahmedbani

1. Unemployment Fund

The balance of the county Unemployment Fund has increased signficantly over the past several years. In addition, the county makes annual administrative transfers from the Unemployement Fund to the General Revenue Fund but has not prepared any documentation to show that amounts transferred represent actual or estimated unemployment-related expenses incurred in the General Revenue Fund. Because the county transfers monies to the Unemployment Fund from various restricted-use funds, it is important that administrative transfers to the General Revenue Fund represent actual costs incurred.

As allowed by law, the county has elected to not pay quarterly unemployment contributions to the Missouri Department of Labor and Industrial Relations (DLIR) and instead is responsible for the payment of unemployment claims as they occur. Although there are no statutory or regulatory requirements to establish such a fund, the county has voluntarily elected to set monies aside in the Unemployment Fund to pay unemployment claims.

Annually, the county contacts the DLIR and obtains the rates which would be paid if the county was making quarterly unemployment contributions. The county computes the amounts which would be paid in quarterly unemployment contributions and transfers these amounts to the Unemployment Fund. The transfers are made from all county funds from which employees are paid, including the restricted-use Special Road and Bridge, Assessment, Health Department, and Law Enforcement Sales Tax Funds. The county uses this fund to reimburse the DLIR for any unemployment benefits paid to eligible former county employees.

Increasing fund balance

The balance of the Unemployment Fund has increased significantly over the past 4 years:

		2010	2009	2008	2007
Beginning balance, January 1	$	222,193	190,624	150,282	101,430
Transfers in from various funds		69,930	87,288	69,499	69,362
Claims paid		(24,676)	(45,720)	(19,158)	(10,510)
Administrative transfers out		(10,000)	(10,000)	(10,000)	(10,000)
Ending balance, December 31	$	257,447	222,193	190,624	150,282

While the county budgeted $55,000 in unemployment claims for 2011, the county expects the balance of the fund to increase to $270,000 at the end of 2011. However, unemployment claims averaged about $25,000 annually from 2007 to 2010. Even if annual claims increase to $55,000, the expected balance of the fund at the end of 2011 would be sufficient to pay expected claims expenses for up to 5 years.

Administrative transfers

Since 1997, the county has transferred monies from the Unemployment Fund to the General Revenue Fund to cover administrative costs incurred in the General Revenue Fund. The amount transferred annually has been $10,000 since 2000 (as approved in the annual budgets); however, no calculation is performed to support the amount transferred. The County Clerk indicated a calculation was prepared many years ago, but the county has no documentation to support the $10,000 annual transfer.

While it is commendable for the county to set aside monies for the payment of unemployment claims, maintaining large balances in the Unemployment Fund does not allow these funds to be used for other purposes. In addition, the county transfers funds restricted for various purposes, such as road and bridge, assessment, health department, and law enforcement, to the Unemployment Fund. To ensure these restricted funds are used properly, administrative transfers from the Unemployment Fund should approximate administrative costs incurred in the General Revenue Fund.

Recommendation

The County Commission and County Clerk review the Unemployment Fund balance and determine methods to reduce the balance in the fund. In addition, calculations of the costs associated with the administrative functions related to the handling of the Unemployment Fund should be prepared to support administrative transfers from the Unemployment Fund.

Auditee's Response

The County Commission provided the following written response:

The balance of the Unemployment Fund has increased in recent years due to nearly doubling employee payroll when the new jail opened. The County Commission will review this matter during the 2012 budget process and either cease contributions to the fund as necessary to reduce the balance, or return a portion of the funds proportionately to the contributing funds. The administrative transfers to the General Revenue Fund have been made for many years. During the 2012 budget process, the County Commission will review this practice and either tie the transfer directly to expenses, or assess a percentage, such as that allowed for road & bridge administration in the future.

2. Sheriff's Controls and Procedures

As similarly noted in prior audits, the Sheriff's accounting controls and procedures need improvement. Due to inadequate supervisory review, lack of segregation of duties, no reconciliation between liabilities and cash balances, and inadequate implementation of prior findings, missing jail commissary monies of approximately $32,000 were not detected on a timely basis. The Sheriff's office discovered the missing monies in March 2011, and the employment of the Jail Administrative Assistant was terminated. The Missouri State Highway Patrol is conducting a criminal investigation of this matter.

The Sheriff's department maintains three bank accounts and received fees, seized monies, and commissary proceeds totaling approximately $370,000 and $297,000 for the years ended December 31, 2010 and 2009, respectively.

2.1 Segregation of duties

Accounting duties are not adequately segregated, and adequate supervisory reviews of the accounting records are not performed. Prior to March 2011, the Jail Administrative Assistant was primarily responsible for receiving, recording, and depositing commissary monies, preparing and signing checks, and reconciling the commissary bank account.

The Sheriff's Administrative Assistant assumed responsibility for both the fee account and commissary account in March 2011, and performs most of the accounting duties with very little supervisory review of her work. There are quarterly independent reviews of the fee account bank reconciliations and receipts and deposits. There are periodic (not regular) independent reviews of commissary receipts and deposits, but no reviews of the commissary account bank reconciliations.

Proper segregation of duties helps ensure all transactions are accounted for properly and assets are safeguarded. Internal controls would be improved by segregating accounting duties among available employees or by implementing monthly documented independent or supervisory reviews of the accounting records.

2.2 Liabilities

Procedures do not exist to identify month-end liabilities and reconcile liabilities to cash balances for the commissary account. Sheriff's personnel indicated they were unaware the commissary computer system was capable of producing liabilities lists; however, upon our request, the Sheriff's office generated a liabilities list as of December 31, 2010. The total of this list was approximately $48,625 and the cash balance was $16,493. Therefore, liabilities exceeded the commissary account cash balance by approximately $32,000, which was caused by the missing commissary monies described above. Had proper reconciliations of liabilities and cash balances been performed, the missing monies could have been prevented or detected more timely.

Identification and reconciliation of month-end liabilities is necessary to ensure the accounting records are in balance and sufficient funds are available for payment of all liabilities.

2.3 Outstanding checks

Procedures have not been established to investigate and resolve outstanding checks in a timely manner. At December 31, 2010, approximately $2,100 in checks dating back to 2008 were outstanding in the fee account. Many of the checks were small; however, there was one larger check totaling $2,024 issued in December 2008 which was still outstanding.

Proper follow-up procedures are necessary to prevent the accumulation of old outstanding checks and ensure monies are appropriately disbursed to the payee or as otherwise provided by state law. Old outstanding checks should be voided and reissued to those payees who can be readily located, and amounts remaining unclaimed should be disposed of in accordance with state law.

2.4 Monthly transmittals

The Sheriff does not transmit commissary profits to the County Treasurer on a timely basis. In 2010, only one transmittal totaling $14,885 for commissary profits was turned over to the County Treasurer. Section 50.370, RSMo, requires every county official who receives fees for official services to pay such monies monthly to the County Treasurer.

Recommendations

The Sheriff:

2.1 Segregate accounting duties to the extent possible, or at a minimum, ensure independent or supervisory reviews of the accounting records are performed and documented on a monthly or more frequent basis.

2.2 Prepare monthly lists of liabilities for the commissary account and reconcile the lists to the bank account balance.

2.3 Establish procedures to routinely follow up and reissue old outstanding checks and dispose of unclaimed monies in accordance with state law.

2.4 Transmit commissary profits monthly to the County Treasurer.

Auditee's Response

The Sheriff provided the following written response:

2.1 Accounting duties are segregated to the fullest possible extent. Upon the auditor's suggestion, independent reviews of receipts, deposits, and bank reconciliations are now performed monthly instead of quarterly.

2.2 From this point forward, a monthly listing of liabilities for the commissary account will be prepared each month and reconciled to the bank balance.

2.3 Outstanding checks related to the fee account are now followed up on, voided, and reissued if necessary. Since March 2011, old outstanding checks on the commissary account have been voided, reissued, or added back to the account. There is an ongoing process of closing out old inmate accounts and turning the related funds over to the State Unclaimed Property Section.

2.4 Commissary profits since March 2011 are being turned over as required and in a timely manner. Past amounts will be turned over upon receipt of funds deposited into the commissary account that cover the missing money.

Although the issues brought to light by this audit primarily address the administration prior to me taking office, we believe we have adequately addressed the auditor's recommendations which illustrates this department's willingness to meet all guidelines related to adequate controls and procedures.

In a further effort to implement stricter internal controls, a kiosk has been installed in the jail lobby to allow visitors/family to deposit monies directly into the inmates' account thereby reducing the need for employees to handle money. This process will also include armored car service. Additionally, a booking kiosk will be installed and jail staff will deposit the inmates' money directly into the kiosk. All transactions will be recorded via video monitoring.

3. Prosecuting Attorney's Controls and Procedures

The Prosecuting Attorney's accounting controls and procedures need improvement. The Prosecuting Attorney's office deposited and disbursed approximately $285,000 and $314,000 in 2010 and 2009, respectively, in bad check fees and court-ordered restitution. In addition, the office reported over $56,000 in 2010 of delinquent taxes collected for the Missouri Department of Revenue (DOR).

3.1 Segregation of duties

Accounting duties are not adequately segregated, and adequate supervisory reviews of accounting records are not performed and documented. The bad check clerk is primarily responsible for receiving, recording, and depositing monies; and preparing checks. Office personnel indicated some of the accounting records are reviewed by other individuals, but there are no documented supervisory reviews of the accounting records.

Proper segregation of duties helps ensure all transactions are accounted for properly and assets are safeguarded. Internal controls would be improved by segregating accounting duties among available employees or by implementing documented independent or supervisory reviews of the accounting records.

3.2 Receipts and deposits

As noted in prior audits, receipting and depositing procedures continue to need improvement.

- Receipts are not deposited timely and money orders and cashier checks are not restrictively endorsed immediately upon receipt. Deposits in 2010 were generally made every 2 weeks. While the current Prosecuting Attorney implemented weekly deposits in 2011,

more frequent deposits appear necessary since monies are generally received daily and deposits average between $2,500 and $5,000.

- The numerical sequence of computer-generated receipt slips is not accounted for properly. Our review noted several receipt slip numbers were skipped and not issued, mainly due to adjusting entries in the computer system. A list of these adjustments is not prepared, making it difficult to ensure all receipt slip numbers are accounted for adequately.

- Receipts are not reconciled to deposits. Manual prenumbered receipt slips are prepared by the receptionist when payments are received at the reception window, and these monies are transmitted to the bad check clerk for deposit. The bad check clerk issues computer-generated receipt slips for mail receipts and prepares all bank deposits. There are no documented reconciliations between receipt slips and deposits, making it difficult to trace specific receipts to deposits.

- For delinquent taxes collected, receipt slips are not prepared and the monies are not turned over to the DOR on a timely basis. These monies are not deposited into the Prosecuting Attorney's bank account and are transmitted to the DOR approximately once a month.

The weaknesses in procedures noted above provide less assurance that receipts are adequately safeguarded and properly recorded and deposited.

3.3 Accounting adjustments

The bad check clerk makes adjusting entries to the computerized accounting system without documented supervisory approval. Our review noted adjustments to increase receipts were posted to the system. While the system has the capability to print all adjusting entries, there are no procedures to require supervisory approval of the adjustments. Lack of supervisory approval of adjusting entries increases the possibility of improper recording and handling of receipts.

Recommendations

The Prosecuting Attorney:

3.1 Segregate accounting duties to the extent possible, or at a minimum, ensure independent or supervisory reviews of the accounting records are performed and documented.

3.2 Restrictively endorse checks and money orders immediately upon receipt, deposit all monies intact and in a timely manner, account for the numerical sequence of receipt slips, and reconcile receipt slips issued to deposits. In addition, receipt slips should be issued

for delinquent tax receipts and monies transmitted to the DOR on a timely basis.

3.3 Require supervisory review and approval for all accounting adjustments and retain adequate documentation to support adjustments.

Auditee's Response

The Prosecuting Attorney provided the following written response:

3.1 As of January 1, 2011, I or the office manager have signed all checks issued, after verifying them against a printed spreadsheet from the computer system. We have now implemented the office manager verifying reconciliations of the account. Our receptionist has always prepared receipts for any payments being made in person, but we now also have receipts issued by the receptionist for all payments received, whether by mail or in person. Any adjustments made by the bad check clerk are also approved by the office manager and initialed accordingly.

3.2 As stated above, receipts have been issued by the receptionist for any payments made in person since January 1, 2011. We have now taken the additional step of having the receptionist issue receipts for all payments received. Those payments are immediately restrictively endorsed and given, along with the receipt, to the bad check clerk. Due to the size of our office staff, it is not practical to make deposits more than weekly, but we do endeavor to make additional deposits when a substantial payment is received. We are also now transmitting DOR payments twice a month. If the amount of those payments should increase, we will begin to submit them weekly.

3.3 Although adjustments and the corresponding documentation were reviewed by the office manager after I took office, those adjustments and attachments are now initialed as well. The documentation is retained indefinitely.

Phelps County
Organization and Statistical Information

Phelps County is a county-organized, third-class county. The county seat is Rolla.

Phelps County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 167 full-time employees and 33 part-time employees on December 31, 2010.

In addition, county operations include the Senate Bill 40 Board**.**

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2011	2010
Randy Verkamp, Presiding Commissioner	$	37,640
Charles (Bud) Dean, Associate Commissioner		35,640
Larry J. Stratman, Associate Commissioner		35,640
Robin Kordes, Recorder of Deeds		54,000
Carol Bennett, County Clerk		54,000
Courtney M. George, Prosecuting Attorney		96,000
Richard Lisenbe, Sheriff		62,400
Carol Green, County Treasurer		54,000
Larry Swinfard, County Coroner		19,200
Kathleen S. Oliver, Public Administrator		54,000
Davis R. Haas, County Collector (1), year ended February 28,	61,780	
Kevin D. Rasmussen, County Assessor, year ended August 31, (2)		60,400
Louis Gilbert, County Surveyor (3)		

(1) Includes $5,567 of commissions earned for collecting city property taxes.

(2) Includes $4,375 of annual compensation for E911 addressing services.

(3) Compensation on a fee basis.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

According to county personnel, the county was awarded the following American Recovery and Reinvestment Act of 2009 funding during the 2 years ended December 31, 2010:

- A Homelessness Prevention and Rapid Re-housing Program grant was awarded by the U.S. Department of Housing and Urban Development to the Missouri Department of Social Services and $528,202 was passed through to Phelps County. The county spent $418,770 and $79,059 in 2010 and 2009, respectively, on this program which provides homelessness prevention assistance to households that would otherwise become homeless and rapid re-housing assistance to persons who are homeless. The remaining $30,373 is planned to be spent in 2011.

- A Recovery Act - Edward Byrne Memorial Justice Assistance Grant was awarded by the U.S. Department of Justice to the Missouri Department of Public Safety and $77,164 was passed through to Phelps County. The county spent $66,107 during 2010 on crime control and prevention and to improve the criminal justice system. The remaining $11,057 is planned to be spent in 2011.

Thomas A. Schweich

Missouri State Auditor

Village of Rayville

November 2011

Report No. 2011-92

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Village of Rayville

Accounting Controls and Procedures

The village has not set up separate funds for the cleanliness user (trash) fees or the motor vehicle-related monies. Separate funds would help determine if fees charged are sufficient without being excessive and ensure restricted funds are spent only on allowable expenses. Also, monthly receipt and disbursements ledgers are prepared from the monthly bank statement rather than actual receipts and disbursements made during the month.

Monthly bank reconciliations are inadequate; the village does not keep a running cash balance, so it does not know what balance to reconcile to when preparing the bank reconciliation.

The duties of the Village Collector are not adequately segregated, and the Board of Trustees does not provide adequate supervision or review, making it difficult to ensure all transactions are accounted for properly and assets are protected.

The Board does not always approve payments before they are made. During October, November, and December 2010, the village disbursed $4,682 (21 percent of its annual disbursements), but the Board did not meet during this time, so Board approval was not obtained.

Village officials are not bonded. State law requires at least $1,000 in bond coverage for the village collector, and all personnel with access to village assets should be bonded to protect the village from losses.

Meetings, Minutes, and Ordinances

Formal meeting minutes were not maintained for the July, August, and September 2010 Board meetings. The Chairman indicated the July 2010 meeting was null and void due to an error in voting; however, such action would not make a meeting null and void. State law requires complete and accurate meeting minutes be maintained.

In April 2009, August 2010, and January 2011, closed meetings were held, but there is no documentation a vote to go into a closed meeting was taken, as required by state law. Also, it appears topics beyond those allowed by the Sunshine Law were discussed during closed meetings.

Village ordinances are not complete, well-organized, and up-to-date. For example, one ordinance says the fiscal year ends on August 31, but financial statements and budgets are prepared on a calendar year; the ordinance granting the Chairman powers to act as Chief of Police was not in the ordinance book; and several ordinances refer to the "city" and "Mayor" rather than the "village" and "Chairman."

Trustee Campbell voted to appoint his wife Village Clerk in April 2011. Although this is an unpaid position, the Missouri Constitution requires any public official who names or appoints to public office or employment any relative within four degrees of consanguinity to forfeit his office.

Police Vehicle	The village needs to decide whether or not to keep its police vehicle. The vehicle was purchased in November 2007, with plans to hire a police officer but a police officer was not hired. The vehicle has a flat tire, it has not been started since 2009, its keys are missing, and the village could not determine how many miles it had been driven.
Budgets	Budgets did not contain all elements required by state law, and meeting minutes did not document approval of the budget. A complete and well-planned budget is a useful tool for setting funding expectations, monitoring costs, and keeping the public informed about village operations and current finances.
Contracts	The village did not have current formal written agreements with its trash collection vendor or the Richmond Rural Fire Protection Association, which provides fire protection services to the village. State law requires all contracts of political subdivisions be in writing.

In the areas audited, the overall performance of this entity was **Poor**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	The Village of Rayville did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 12

THOMAS A. SCHWEICH
Missouri State Auditor

To the Chairman and Members of the Board of Trustees
Village of Rayville, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit the Village of Rayville. We have audited certain operations of the village in fulfillment of our duties. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2010. The objectives of our audit were to:

1. Evaluate the village's internal controls over significant management and financial functions.

2. Evaluate the village's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the village, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the village's management and was not subjected to the procedures applied in our audit of the village.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the Village of Rayville.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Randall Gordon, M.Acct., CPA, CGAP
In-Charge Auditor:	Rex Murdock, M.S.Acct.

1. Accounting Controls and Procedures

Accounting controls and procedures utilized by the village need improvement.

1.1 Fund accounting

The village does not have an adequate and complete financial accounting system. The following concerns were noted:

- Monthly receipt and disbursement ledgers are prepared from the monthly bank statement rather than actual receipts and disbursements made during the month.

  Fund ledgers and summary reports showing receipt sources and disbursement types should be prepared for each fund on a monthly basis and should be used for comparison to budgeted amounts and overall review of village operations. Complete, organized, and timely accounting records are necessary to provide accurate and timely financial information to village officials upon which effective management decisions may be made.

- The village has not established a separate fund or separate accounting for its cleanliness user (trash) fees. In addition, the village does not have documentation to justify the trash fee assessed to ensure the fee is sufficient to cover the costs of the trash operations, but is not excessive. A fund ledger is not maintained to track the operations of the village's cleanliness financial activities. All cleanliness user fees are accounted for in the General Revenue Fund ledgers and presented in the General Revenue Fund on the financial statements. During the year ended December 31, 2010, the village received $10,995 and disbursed $8,866 in cleanliness user fees.

  A Cleanliness User Fees Fund would help the village track the cost of providing trash services to the residents and help ensure a fee could be developed to recoup all costs of operation, without being excessive. Without proper allocations of expenses and recognition of all receipts and disbursements, operations cannot be properly measured and evaluated to ensure funding levels are met.

- The village has not established a separate fund or separate accounting for motor vehicle-related monies received from the state, and does not monitor the use of these funds to ensure compliance with state law. During the year ended December 31, 2010, the village received motor-vehicle monies of $7,805, and made motor-vehicle disbursements of $3,466.

Article IV, Section 30, Missouri Constitution, requires motor-vehicle related revenues apportioned by the state of Missouri be expended on street-related purposes including construction, maintenance, repair, policing, signing, lighting, and cleaning of roads and streets.

1.2 Bank reconciliations

Monthly bank reconciliations are not adequate. The village does not maintain a running cash balance, so the village does not know the applicable balance to reconcile to when preparing the reconciliation. The village bank reconciliation only includes a list of outstanding checks in the monthly fund ledgers. However, this was not always properly indicated and our review of 2 months identified outstanding checks that were not indicated on the fund ledger. Also, deposits in transit were identified that were not indicated on the fund ledger.

Preparation of monthly bank reconciliations and maintaining records of cash balances is necessary to ensure the bank account is in agreement with the accounting records and to detect and correct errors.

1.3 Segregation of duties

The duties of the Village Collector are not adequately segregated, and the Board of Trustees does not provide adequate supervision or review of the work performed by the Village Collector. The Village Collector is responsible for receipting and disbursing monies, performing bank reconciliations, and preparing financial reports. The bank statements are provided to the Board for review; however there is no documentation of Board review.

Proper segregation of duties helps ensure all transactions are accounted for properly and assets are adequately safeguarded. If proper segregation of duties cannot be achieved, at a minimum, periodic supervisory or independent reviews of the records should be performed and documented.

1.4 Disbursements

Disbursements are not always approved by the Board before payment is made. Board meetings were not held during October, November, or December 2010. The village disbursed $4,682 during those 3 months or approximately 21 percent of the disbursements made during the year ended December 31, 2010, without the approval of the Board. During this period, some checks were signed by the Collector or the Village Clerk, and approved by only one board member.

Disbursements should be reviewed and approved by the Board of Trustees before payment is made to ensure all disbursements represent valid operating costs. To adequately document Board review and approval, a complete list of all bills (including each check number) to be paid should be prepared and included with the meeting minutes. The list should be signed after review by the Collector and the Chairman of the Board of Trustees to

provide an independent attestation that the disbursements are a correct record of the village's financial obligations.

1.5 Bonds

Village officials are not bonded. Section 80.250, RSMo, requires bond coverage of at least $1,000 for the village collector. Failure to properly bond all persons with access to assets exposes the village to risk of loss.

Recommendations

The Board of Trustees:

1.1 Ensure a complete financial accounting system is established. Funds should be established for the village's cleanliness user fees and motor vehicle receipts. Summaries should be prepared documenting monthly receipts sources and disbursements types. In addition, the Board of Trustees should document how village cleanliness user fees were determined and ensure the fees are sufficient to cover costs without being excessive.

1.2 Ensure complete bank reconciliations are performed, and account balances are maintained in the check book register.

1.3 Segregate accounting duties to the extent possible. If proper segregation of duties cannot be achieved, an independent review of the work performed is necessary.

1.4 Review and approve all disbursements, and ensure the review and approval is documented.

1.5 Obtain bond coverage for all officials with access to village assets.

Auditee's Response

The Board of Trustees provided the following written responses:

1.1 It was recommended that the Village establish accounting procedures that ensure the monies received are maintained in separate accounts. The Village hired a new Collector to establish a separate fund accounting system and keep track of the separate funds. The Board will review the funds and accounts at regular meetings. The Board will also determine the appropriate amount of fees charged for trash service when the next budget is approved.

1.2 It was recommended that the Village ensure that proper bank reconciliations are completed. The Village Collector will ensure that the bank reconciliation will be prepared using Quickbooks, and upon completion the bank reconciliation will be presented to the Board.

1.3 It was recommended that an independent review of the reconciliations be done. The Village will have a Board Trustee or someone else review the bank reconciliation to ensure accuracy.

1.4 It was recommended that all disbursements of Village funds be approved. The Board will document approval of all disbursements.

1.5 It was recommended that the Village obtain bond coverage for all officials. The Village has contacted an Insurance Company to provide bond coverage.

2. Meetings, Minutes, and Ordinances

Procedures for conducting and documenting meetings need improvement, village ordinances are not up to date, and an issue of nepotism occurred.

2.1 Minutes

Formal minutes were not maintained for the July, August, and September 2010 meetings. We determined meetings were held during these months as financial records indicate payments were made to trustees for attending meetings. The Chairman indicated the July 2010 meeting was null and void because during the meeting he believed he could only vote in case of a tie, which was later determined to be incorrect. However, such action would not make a meeting null and void, and minutes of the meeting should have been prepared and maintained. Notes from the August meeting were obtained from a Board Trustee, and no minutes were kept for the September meeting, although a former Board Trustee indicated a meeting was held.

Section 610.020, RSMo, requires complete and accurate meeting minutes be maintained to retain a record of business conducted and to provide an official record of board actions and decisions.

2.2 Closed meetings

Three closed meetings were held without a vote to close the meeting. These closed meetings were held in April 2009, August 2010, and January 2011. Additionally, minutes maintained for the closed meetings indicated topics discussed (for example, having an opening prayer at each future meeting) did not appear to be allowable by state law.

Section 610.022, RSMo, requires that before any meeting may be closed, the question of holding the closed meeting and the reason for the closed meeting, including reference to a specific section of the law, shall be voted on at an open session. In addition, this law provides that the board shall not discuss any other business during the closed meeting that differs from the specific reasons used to justify such meeting, record, or vote. Section 610.021, RSMo, list the topics which may be discussed in closed session.

2.3 Ordinances

Ordinances of the village are not complete, well organized, and up to date. In addition, the following concerns were noted:

- Ordinance number 22.010 refers to the village fiscal year as ending on August 31, however financial statements and budgets are prepared for a calendar year.

- Ordinance Number 707 which grants the Chairman powers to act as the Chief of Police if a police officer is not on the payroll was not contained in the village ordinance book.

- Numerous ordinances indicate city and Mayor instead of indicating village and Chairman.

Since ordinances represent legislation which has been passed by the Board of Trustees to govern the village and its residents, it is important that village ordinances be maintained in a complete and up-to-date manner.

2.4 Nepotism

According to Board minutes, in April 2011, Trustee Campbell voted to appoint his wife as the Village Clerk. Although the Village Clerk is currently an unpaid position, the appointment is nepotism.

Article VII, Section 6, Missouri Constitution, provides that any public official who names or appoints to public office or employment any relative within the fourth degree shall forfeit his office. Because of the serious consequences which result by appointing a relative, the Board should ensure its members abstain from any decision to appoint a relative and ensure that action is fully documented in the meeting minutes. Discussions and decisions concerning situations where potential nepotism or conflicts of interest exist should be completely documented so the public has assurance no village official has benefited improperly.

Recommendations

The Board of Trustees:

2.1 Ensure meeting minutes are maintained as required by state law.

2.2 Ensure the vote to close a session is documented in open minutes, along with the reason for closing the session. In addition, the Board of Trustees should ensure only allowable subjects are discussed in closed sessions.

2.3 Ensure ordinances are maintained in a complete, and up to date manner.

2.4 Ensure Board trustees abstain from voting when a relative's appointment is involved, and consult legal counsel regarding the nepotism issue.

Auditee's Response

The Board of Trustees provided the following written responses:

2.1 It was recommended that the Village strive to ensure better public meeting records are maintained. The Village hired a Collector to maintain better record keeping and minutes.

2.2 It was recommended that the Village strictly adhere to the legal requirements of the closed session meetings and that only allowable subjects are discussed in those closed meetings. The Village agreed and retained an Attorney to ensure compliance with closed minutes.

2.3 It was recommended that the Village ensure that all ordinances are maintained up to date and complete. The Village has updated the ordinance correcting the fiscal year end, and is working on updating all other ordinances which are found to be out of date or no longer necessary.

2.4 It was recommended that the Village ensure that the State Constitutional mandates concerning nepotism are known and followed by members of the Board of Aldermen. While the Board understands the inherent consequences that nepotism and its related distrust of governmental bodies for insider dealings, it also is faced with being a small community where a majority of its citizens are interrelated to one another. In order to ensure public confidence with future appointments to vacancies, the board will ensure that all discussions concerning situations where potential nepotism or conflicts of interest exist will be completely documented to establish that no public office holder has improperly benefited from an appointment.

3. Police Vehicle

The village has not determined a plan for the use of a police vehicle. In November 2007, the village purchased a police vehicle and equipment for the vehicle for approximately $7,000. At the time of purchase, the village planned to hire a police officer to enforce village ordinances; however, a police officer was not hired. The police vehicle is currently located outside the village hall, with a flat tire, and according to the current Chairman, has not been started since early 2009. Village officials were not able to locate the keys to the police vehicle. The village did not maintain vehicle logs and could not determine the number of miles the police vehicle had been driven. Discussions have been held about potentially selling the police vehicle, or placing the police vehicle in operation; however, no decision has been made.

A decision needs to be made regarding the police vehicle. Items to consider include the costs to maintain and operate the vehicle, cost/benefit of a police officer, and financial condition of the village.

Recommendation

The Board of Trustees should make a decision regarding the police vehicle.

Auditee's Response

The Board of Trustees provided the following written response:

It was recommended that the Village determine the future use of the police car that is not currently being used. The Board will take this recommendation into consideration.

4. Budgets

While budgets are prepared, they do not contain all elements required by state law, and the adoption of budgets is not documented. The following concerns were noted for the 2011, 2010, and the 2009 budgets:

- Budgets did not contain a budget message.
- Budgets did not contain the actual receipts and disbursements for the 2 preceding budget years.
- Budgets did not separate the General Revenue Fund and the Fire Fund.
- Budgets did not include a summary which included the beginning available cash balance, and estimated ending cash balance by fund.
- The meeting minutes did not document the approval of the budget. The Village Collector indicated she prepared the 2011 budget once she learned of our audit, which occurred after the beginning of the year. The Board did not review and approve the 2011 budget, and minutes do not indicate the approval of the 2010 budget.

Section 67.010, RSMo, requires the preparation of an annual budget which shall present a complete financial plan for the ensuing budget year. Sections 67.010 to 67.080, RSMo, set specific guidelines for the format, approval, and amendment of the annual budget. A complete budget should include separate receipt and disbursement estimations by fund, the beginning available resources, and a reasonable estimate of the ending available resources. The budget should also include a budget message and comparisons of actual receipts and disbursements for the 2 preceding years. In addition, Section 67.030, RSMo, requires the budget be approved prior to the beginning of the fiscal year.

A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific funding expectations for the village's operations, and a means to effectively monitor actual costs by periodically comparing budgeted to

actual disbursements. It will also assist in informing the public about the village's operations and current finances.

Recommendation

The Board of Trustees prepare annual budgets which contain all information required by state law, and approve and document its approval of budgets prior to the beginning of the fiscal year.

Auditee's Response

The Board of Trustees provided the following written response:

It was recommended that the Village maintain proper annual budgets in order to ensure adequate funding of Village projects. The Village will ensure final budgets are in compliance with state law, and will be approved before the beginning of the new year.

5. Contracts

The village does not have current formal written agreements with the company providing trash collection services and the Richmond Rural Fire Protection Association for fire protection services. During the year ended December 31, 2010, the village disbursed $8,866 to the trash collection vendor. During the year ended December 31, 2010, the village disbursed $2,690 for fire protection services.

Section 432.070, RSMo, required contracts of political subdivisions be in writing. Written contracts are necessary to ensure all parties are aware of their duties and responsibilities and to provide protection to both parties.

Recommendation

The Board of Trustees obtain formal written agreements that specify the services to be rendered and the manner and amount of compensation to be paid.

Auditee's Response

The Board of Trustees provided the following written response:

It was recommended that the Village obtain and retain formal agreements that will specify the services to be rendered and the compensation to be paid. The Village will work to obtain a contract with the trash company and consider a new contract for fire protection.

Village of Rayville
Organization and Statistical Information

The Village of Rayville is located in Ray County. The village was incorporated in 1903. The village had two part-time volunteers on December 31, 2010.

Village operations include trash collection, providing street lights, maintenance of the village park, and fire protection.

Board of Trustees

The village government consists of a five-member board of trustees. The members are elected for 2-year terms. The Chairman is appointed by the board from the members. The Board of Trustees at December 31, 2010 are identified below. The Chairman is paid $10 per meeting and other trustees are paid $5 per meeting.

Robert Campbell, Chairman
Art Morrill
Betty Mitchell
James Ketchum
Richard Wyse

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Village of Rayville did not receive any federal stimulus monies during the year ended December 31, 2010.

Financial Activity

A summary of the village's financial activity for the year ended December 31, 2010, follows:

Village of Rayville
Year Ended December 31, 2010

	General Revenue Fund	Fire Fund	Total
RECEIPTS			
Property tax	$ 4,907	524	5,431
Motor fuel and vehicle fees	7,805	0	7,805
Franchise tax	4,779	0	4,779
Cleanliness user fees	10,995	0	10,995
Charges for services	95	0	95
Interest	26	0	26
Other	30	0	30
Total Receipts	28,637	524	29,161
DISBURSEMENTS			
General government	7,125	0	7,125
Fire protection	0	2,690	2,690
Streets and roads	3,466	0	3,466
Trash collection	8,866	0	8,866
Total Disbursements	19,457	2,690	22,147
			0
RECEIPTS OVER (UNDER) DISBURSEMENTS	9,180	(2,166)	7,014
CASH, JANUARY 1, 2010	(1,918)	7,932	6,014
CASH, DECEMBER 31, 2010	$ 7,262	5,766	13,028

Dunklin County

October 2011

Report No. 2011-91

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Dunklin County

Emergency Cash Withdrawal	The Presiding Commissioner withdrew $50,000 cash after a severe ice storm left the area without electrical service for several days. Although he obtained approval from the Associate Commissioners, this withdrawal resulted in taxpayer monies not being properly secured or disbursed, and authorization for the withdrawal was not documented. The Collector-Treasurer was not notified of the transaction, the Presiding Commissioner was not bonded, and there was inadequate support for the use of the monies.
One-Time Salary Payments	Instead of making cost of living adjustments, the county made one-time payments to employees based on year-end funds available, which may have violated the Missouri Constitution. In addition, these payments violated state statutes requiring all elected officials salary increases to be the same percentage and the prosecuting attorney's compensation to be equal to an associate circuit judge.
Sheriff Accounting Controls	The Sheriff's office does not adequately pursue collection of delinquent court-ordered board bills (prisoner housing costs). As of March 2011, the county is owed over $375,000 and some bills date as far back as 2003. There are many old inmate commissary accounts and the Sheriff should attempt to return these monies to the former inmates and dispose of any remaining monies in accordance with state law. The Sheriff's office does not reconcile a list of liabilities to the remaining cash balance in the Sheriff's fee account at the end of each month.
Property Tax and County Collector-Treasurer Procedures	The County Collector-Treasurer does not complete annual settlements of property taxes promptly and accurately, as is required by state law. The County Collector-Treasurer does not reconcile a list of liabilities to the bank account balance each month, and the amount by which the bank account exceeds liabilities has grown by almost $10,000 since 2007. The County Clerk does not maintain an adequate account book, and neither the County Clerk nor the County Commission verifies the accuracy of the County Collector-Treasurer's monthly settlements. We had similar findings in our prior audit report (2007-40).
Prosecuting Attorney Accounting Controls and Procedures	The Prosecuting Attorney does not reconcile a list of liabilities to the bank account balance each month, and the account contains nearly $37,000 of unidentified monies. The Prosecuting Attorney does not routinely follow-up on outstanding checks, and $7,764 had been outstanding in the bad check and restitution account for over one year, with some dating back to 2003. We had similar findings in our prior audit report.
Lease Revenue	Although state law requires contracts of political subdivisions be in writing, the county was unable to produce any current lease agreements with the county's tenants and could not provide any documentation to show the county is charging an appropriate amount for rent on these properties.
Capital Assets	As noted in our prior audit report, the county does not adequately protect its capital assets. The County Clerk lacks procedures to identify property purchased and disposed of during the year, and assets susceptible to theft are not always tagged for identification or included on the inventory list.

Additional Comments

Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Fair**.* However, the audit revealed several shortcomings in the office of the Collector-Treasurer.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

During the two years ended December 31, 2010, the county was awarded:

A $208,261 Recovery Act: Assistance to Rural Law Enforcement to Combat Crime and Drugs: Enhancing Rural Corrections, Detention and Jail Operations grant. In 2010, $84,279 was received and expended to hire three additional full-time correction officers. The county is not required to maintain these positions after the grant period ends on July 31, 2011.

The Dunklin County Senate Bill 40 Board received a $51,318 Medicaid Federal Medical Assistance Percentage grant which it used for general operations.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 16

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Dunklin County

We have audited certain operations of Dunklin County in fulfillment of our duties under Section 29.230, RSMo. In addition, Devereux and Krauss, LLP, Certified Public Accountants, has been engaged to audit the financial statements of Dunklin County for the 2 years ended December 31, 2010. The scope of our audit included, but was not necessarily limited to, the 2 years ended December 31, 2010. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Dunklin County.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast CPA, CGFM, CIA
Audit Manager:	Susan J. Beeler, CPA, CIA
In-Charge Auditor:	Steven Re', CPA
Audit Staff:	Richard Mosha, MBA
	Ashley Lee, MBA
	Corey McComas, M.Acct., CPA

1. Emergency Cash Withdrawal

A $50,000 emergency cash withdrawal authorized by the County Commission resulted in taxpayer monies not being properly secured or disbursed appropriately. In addition, the authorization for this withdrawal was not documented, resulting in a violation of the Sunshine Law.

On January 27 and 28, 2009, the county experienced a severe ice storm which left the entire area without electrical service for several days. The Presiding Commissioner called each of the Associate Commissioners and was authorized by them to make an emergency bank withdrawal of $50,000 in cash on January 29, 2009. The Presiding Commissioner, who was an authorized signatory on the bank account but was not bonded, obtained the cash from the bank on Friday, January 30, 2009, and kept it at his personal residence. The County Commission did not document these telephone conversations in the commission meeting minutes or notify the County Collector-Treasurer of the transaction. The Presiding Commissioner indicated the monies were to be used to provide employees the opportunity to cash personal checks and for the county to make emergency purchases as needed. However, it is unclear why employees would need to cash personal checks or why the county would have to make emergency purchases in cash instead of through the normal disbursement process.

The Presiding Commissioner made several purchases, totaling $1,265, for generators, fuel, and other miscellaneous items; however, he did not submit any invoices to the County Clerk to support the purchases. In addition, the Presiding Commissioner indicated he cashed several personal checks for employees; however, a list of those checks was not prepared or recorded on the related deposit slip. The County Clerk deposited the remaining balance of the cash and personal checks, totaling $48,735, on Monday, February 2, 2009. We obtained the bank backup for this deposit and determined it included seven personal employee checks totaling $2,335, and cash totaling $46,400.

To reduce the risk of misuse or fraud from occurring, all disbursements should be made by check through the county's disbursement system, contain the required signatures (including the Collector-Treasurer's signature), and be supported by adequate documentation. While it is the County Commission's duty to authorize disbursements, commissioners do not have the statutory authority to make disbursements. Section 54.140, RSMo, provides that it shall be the duty of the county treasurer to pay out the revenues on warrants issued by the commission. Further, all county receipts/monies should be maintained in a secure location and all unusual disbursements should be documented in the county commission meeting minutes. Section 610.020, RSMo, provides that governing bodies of all political subdivisions are required to conduct business in regular open meetings. Any time a quorum of board members meets in person or by

phone and transacts public business, it is subject to the Sunshine Law, including the requirement to keep minutes of such meetings.

When the current Collector-Treasurer took office in April 2009, she removed the other authorized signatures from the bank accounts and she is now the only authorized signatory for disbursements.

Recommendation

The County Commission should ensure all disbursements are reasonable, made through the county's disbursement system, and supported by adequate documentation. In addition, the County Commission should ensure all county monies are properly secured and all unusual disbursements are properly documented in meeting minutes.

Auditee's Response

The County Commission provided the following written response:

An ice storm on January 27 and 28, 2009 resulted in our County being declared a Federal Disaster Area. Dunklin County was shut down with estimates on getting power restored at a week to three weeks. The County's monthly payroll was direct deposited into employees' accounts on January 29, 2009. There was not one bank open in the Kennett area on that day for the employees to make withdrawals. The stores that were open would only take cash due to the lack of electricity. The Commission decided to obtain enough cash to allow 100 employees to cash up to a $500 check with the Commissioners. Special arrangements were made with their bank to make the withdrawal. The Commissioners were available at the Emergency Operations Center at City Hall to cash employees' checks. The money was kept with the Presiding Commissioner at all times and stored in a safe at his house overnight. The money was also used to purchase two generators and a gas can from Wal-Mart. The Wal-Mart Store was only taking cash at the time. The generators were loaned to two cities in the County during the ice storm. They are presently stored at the Dunklin County Justice Center and were inspected by the State Auditor's Office during their audit.

The Commissioners did fail to document the authorization in their minutes once business resumed. The Commissioners disagree with the Auditor's Office opinion that the monies were not secure and that they were disbursed inappropriately.

Auditor's Comment

We understand this was an emergency situation and extraordinary measures were required; however, adequate controls should not be compromised. The County Treasurer is the bonded custodian of county monies, monies should be kept in a secure location, and supporting documentation retained.

2. One-Time Salary Payments

The county made one-time payments in lieu of permanent cost of living adjustments (COLAs) to employees and elected officials which may be in conflict with the Missouri Constitution. These payments totaled $52,813, $96,021, and $114,000 for 2011, 2010, and 2009, respectively.

The following table shows the one-time payment amounts the county paid to each full-time employee, part-time employee, and elected official:

	2011	2010	2009
Full-time employees	$ 650	1,250	1,500
Part-time employees	250	500	750
Elected officials	650	1,250	0

The payments were prorated if the employee or official had not worked a full year for the county. The payments were not based on additional duties performed or performance appraisals. In addition, the payments were not considered raises or added to the base compensation of employees. The County Commission indicated COLAs were handled in this manner to be fiscally responsible by not permanently increasing employee salaries and waiting until each budget year had ended to determine how much the county could afford to pay each employee. These payments were made in January of each year based on the prior year's fiscal outcome.

However, awarding additional pay to employees and officials on a discretionary basis appears to conflict with Article III, Section 39, Missouri Constitution, which prohibits granting any extra compensation, fee, or allowance to employees for services already rendered. In addition, Section 50.333.12, RSMo, allows a COLA that is the same percentage for all county officials; however, since most county officials' salaries are not the same, the one-time payment amounts would constitute different percentages of the elected officials' salaries and could be a violation of state law. Further, the COLA received by the Prosecuting Attorney appears to conflict with Section 56.265.1, RSMo, which states a full-time prosecuting attorney's compensation should be equal to an associate circuit judge. When we brought this to the attention of the Prosecuting Attorney, he stated it was an oversight and he would pay back the one-time payments he received. To pay back the overpayment, from May through December 2011, $237.50 will be deducted from the Prosecuting Attorney's paycheck each month.

Recommendation

The County Commission discontinue one-time payments in lieu of COLA salary increases to employees and ensure employee compensation is in compliance with state law.

Auditee's Response

The County Commission provided the following written response:

In efforts to keep the County's budget balanced, the Commissioners wait until the County's financial year is completed and base one-time COLA

raises on the outcome. The raise is given the following year. This prevents the County from deficit spending due to giving too large of a COLA increase. The Commission will ask the Prosecuting Attorney if there is a way to continue this procedure and be in compliance with the State Law.

The Prosecuting Attorney provided the following written response:

At the time the one time salary payment was received, I made inquiry of the Commission and the County Clerk about it and was advised that since the Prosecuting Attorney salary was set by statute, not the Salary Commission, it would have to be deducted for the remaining paychecks for the year. I did not follow up on this, believing that such deductions were being taken, but apparently they were not. I have communicated with the County Clerk's Office regarding this and have been assured that they will be recovered by amortized deductions for the rest of this year.

3. Sheriff Accounting Controls

The Sheriff's accounting controls and procedures for pursuing collection of inmate board bills, disbursing inmate monies, and preparing month-end liabilities are not adequate.

3.1 Inmate board bills

The Sheriff's office does not adequately pursue collection of board bills or notify the Associate Circuit Court of delinquent accounts. The Associate Circuit Judge orders some inmates to pay their accumulated board bills (i.e., housing costs) as a condition of their release. The Associate Circuit Court notifies the Sheriff's office, and the office either gives the bill to the inmate at the time of release or later mails it to the inmate. However, Sheriff's office personnel indicated due to a lack of time, they do not review inmate balances to determine nonpayment. As a result, as of March 31, 2011, outstanding court ordered inmate board bills totaled $375,551. No payments have been made on 334 of these cases, totaling $254,173, and some cases date back to 2003. New board bills assessed to inmates during the 2 years ended December 31, 2010, totaled $80,782, of which only $2,473 has been collected, resulting in an outstanding balance of $78,309 as of March 31, 2011.

When we brought this to the attention of the Associate Circuit Judge, he indicated he would work with the Sheriff to assist in the collection of past due accounts if the Sheriff notified the court of delinquent accounts. To maximize revenues, the Sheriff should pursue collections of these court ordered costs.

3.2 Inmate commissary balances

The Sheriff's office does not make adequate efforts to review the status of old inmate commissary accounts. As of December 31, 2010, 634 inmates had inactive accounts totaling approximately $5,449. These inmates were released from the county justice center, but the balance of their commissary account was not claimed. In addition, there were 712 inmate accounts

totaling $7,156 that were listed as "active". Because the justice center averages approximately 90 inmates a month, it appears the current status of inmates is not updated timely.

Follow up on inactive accounts is necessary to ensure monies are appropriately disbursed to the former inmates or as otherwise provided by state law. An attempt should be made to locate former inmates with commissary account balances. In addition, prior to disbursing any monies, the Sheriff should review outstanding board bill costs due and apply those monies to the balance owed. If the inmate cannot be located, or the check to the former inmate is not cashed, the Sheriff should dispose of the monies according to state law. Routine procedures should be established to update inmate status in a timely manner to expedite disbursement of the inmate monies.

3.3 Liabilities

The Sheriff's office does not prepare a list of liabilities at the end of the month and reconcile the list to the remaining cash balance for the Sheriff's fee account. As a result, the Sheriff's office is unable to agree the reconciled cash balance to the related liabilities.

Our review of the Sheriff's fee account identified liabilities totaling $13,078 at December 31, 2010, which consisted of civil fee receipts, concealed weapon permits, and Sheriff fees. The reconciled bank balance of $17,161 exceeded identified liabilities by $4,083.

To ensure records are in balance, errors are detected and corrected on a timely basis, and sufficient cash is available for the payment of all amounts due, liabilities should be identified monthly and reconciled to cash balances. Prompt follow up on discrepancies is necessary to identify and resolve errors and ensure monies are properly disbursed.

Recommendations

The Sheriff:

3.1 Adequately pursue court-ordered charges billed to former inmates. If payments are not made timely, the Sheriff should notify the Associate Circuit Judge. In addition, the Sheriff should work with the court to determine the amounts which are uncollectible.

3.2 Attempt to resolve unclaimed balances of closed inmate accounts and establish routine procedures to review and update the status of active inmates no longer held at the justice center. In addition, the Sheriff should review inmate records for outstanding court ordered costs and apply any remaining commissary monies to reduce the balance owed.

3.3 Prepare monthly lists of liabilities, reconcile the lists to the reconciled bank balance, and investigate any differences. After sufficient efforts are made to resolve discrepancies, any remaining unidentified monies should be disposed of in accordance with state law.

Auditee's Response

The Sheriff provided the following written responses:

3.1 We have begun going through our list of inmates alphabetically and have sent past due notices. In addition, a list of the inmates' names, case numbers, and the letters are sent to the Associate Circuit Judge if no response is received by the Sheriff's office by the date indicated on the letter.

3.2 The cost of refunding inmate balances is greater than the remaining balance in many cases, and therefore, the amount is retained and applies as a credit if the inmate returns. In addition, we have applied several balances to the outstanding board bills.

3.3 We have started investigating the difference, but have not yet been able to determine what it relates to. If we cannot determine it, we will discuss with the Prosecuting Attorney how to dispose of it.

4. Property Tax and Collector-Treasurer Controls and Procedures

The County Collector-Treasurer's accounting and reporting procedures are not sufficient and do not provide adequate assurance that all property tax receipts and disbursements are accounted for properly. In addition, the County Clerk does not maintain an adequate account book or other records summarizing all property tax transactions each month. The County Collector-Treasurer's office processed collections totaling approximately $33 million for the 2 years ended February 28, 2011.

4.1 Annual settlements

As of the completion of our fieldwork on May 5, 2011, the County Collector-Treasurer had not prepared annual settlements of property taxes since taking office in April 2009. The County Clerk had partially completed the annual settlements for the years February 28 (29), 2008, 2009, and 2010. However, our review of the February 28, 2010, annual settlement noted several problems, including activity not included, and unidentified differences between charges and credits. The County Clerk later indicated the annual settlements for 2008, 2009, 2010, and 2011 were completed on May 31, 2011. We obtained copies of the 2011 and 2010 settlements and noted significant differences. By not preparing timely and accurate annual settlements, the County Collector-Treasurer has not provided the County Commission or the taxpayers with a complete accounting of property tax transactions.

Section 139.160, RSMo, requires the County Collector-Treasurer to annually settle with the County Commission the accounts of all monies received from taxes and other sources. To help ensure the validity of tax book charges, collections, and credits, and for the County Clerk and County Commission to properly verify these amounts, it is imperative the County Collector-Treasurer file annual settlements on a timely basis.

4.2 Liabilities

The Collector-Treasurer's office does not prepare a list of liabilities at the end of the month and reconcile the list to the cash balance. As a result, the County Collector-Treasurer's office is unable to agree reconciled cash balances to related liabilities. Based on a review of the County Collector-Treasurer's records, we identified liabilities totaling $906,507 at February 28, 2011, which consisted of February tax collections, undistributed surtax, protested taxes, and interest. The reconciled bank balance of $952,895 exceeded identified liabilities by $46,388. Our prior audit of the County Collector-Treasurer noted the reconciled bank balance exceeded identified liabilities by $36,592 at February 28, 2007. The County Collector-Treasurer could not determine the reasons for the fluctuation between identified liabilities and the reconciled bank balances.

To ensure records are in balance, errors are detected and corrected on a timely basis, and sufficient cash is available for the payment of all amounts due, liabilities should be identified monthly and reconciled to cash balances. Prompt follow up on discrepancies is necessary to identify and resolve errors.

4.3 Account book

The County Clerk does not maintain an adequate account book or other records summarizing all property tax transactions each month. The County Clerk maintains spreadsheets which include beginning tax book totals, monthly collections, and monthly totals for additions and abatements, but does not include protested taxes or delinquent balances. In addition, the County Clerk and County Commission do not perform procedures to verify the accuracy of the County Collector-Treasurer's monthly settlements.

Section 51.150.1(2), RSMo, requires the County Clerk to maintain accounts with all persons chargeable with monies payable into the county treasury. An account book or other records which summarize all tax charges and credits should be maintained by the County Clerk. Such records could be used by the County Clerk and the County Commission to verify the County Collector-Treasurer's monthly and annual settlements. Such procedures are intended to establish checks and balances related to the collection of property taxes.

Similar conditions previously reported

Similar conditions were noted in our prior audit report.

Recommendations

4.1 The County Collector-Treasurer prepare and file annual settlements as required by state law.

4.2 The County Collector-Treasurer prepare monthly lists of liabilities, reconcile the lists to the reconciled bank balance, and investigate any unreconciled differences. After sufficient efforts are made to resolve discrepancies, any remaining unidentified monies should be disposed of in accordance with state law.

4.3 The County Clerk maintain an account book of all property tax transactions with the County Collector-Treasurer. Additionally, the County Commission and County Clerk should perform a thorough review of the County Collector-Treasurer's monthly and annual settlements.

Auditee's Response

The County Collector provided the following written responses:

4.1 I have completed the annual settlements and submitted them to the County Commission. I will prepare annual settlements timely in the future.

4.2 I have begun completing a listing of open liabilities each month. I am currently researching the unreconciled balance and will disburse it accordingly to the tax entities or the state.

The County Clerk provided the following response:

4.3 We will start working on getting the report as recommended and prepare reports of all property transactions monthly on the collector's property collections. And go back to March 2011 and work forward to the present.

The County Commission provided the following response:

4.3 The Commission will work with the County Clerk to obtain an account book from the County Collector-Treasurer.

5. Prosecuting Attorney Accounting Controls and Procedures

Improvement is needed over various accounting controls and procedures in the Prosecuting Attorney's office. The Prosecuting Attorney's office collected bad check restitution and fees and court-ordered restitution totaling approximately $315,000 and $432,000 during the years ended December 31, 2010 and 2009, respectively.

5.1 Liabilities

The Prosecuting Attorney's office does not prepare a list of liabilities at the end of the month and compare it to the remaining cash balance. As a result, the Prosecuting Attorney's office is unable to agree the reconciled cash balances to the related liabilities. Office personnel indicated amounts collected are normally disbursed to victims in the week following receipt and county fees are disbursed at the end of each month. Our review of the Prosecuting Attorney's records identified liabilities totaling $15,255 at March 31, 2011, which consisted of bad check receipts, restitution collections, and interest. The reconciled bank balance of $52,233 exceeded identified liabilities by $36,978. Our prior audit of the Prosecuting Attorney noted the reconciled bank balance exceeded identified liabilities by $7,863 at April 24, 2007. The Prosecuting Attorney indicated his employees have identified approximately $4,000 which was erroneously deposited into this account several years ago. However, approximately $33,000 remains unidentified.

To ensure records are in balance, errors are detected and corrected on a timely basis, and sufficient cash is available for the payment of all amounts due, liabilities should be identified monthly and reconciled to cash balances. Prompt follow up on discrepancies is necessary to identify and resolve errors and ensure monies are properly disbursed to individuals and/or entities for which the monies were collected.

5.2 Outstanding checks

The Prosecuting Attorney has not established procedures to routinely follow up on outstanding checks. As a result, at December 31, 2010, 119 checks totaling $7,764 had been outstanding in the bad check and restitution account for over a year, with some dating back to 2003.

Follow up on outstanding checks is necessary to ensure monies are appropriately disbursed to the payees or as otherwise provided by state law.

Similar conditions previously reported

Similar conditions were noted in our prior audit report.

Recommendations

The Prosecuting Attorney:

5.1 Prepare monthly lists of liabilities, reconcile the lists to the reconciled bank balance, and investigate any unreconciled differences. After sufficient efforts are made to resolve discrepancies, any remaining unidentified monies should be disposed of in accordance with state law.

5.2 Routinely follow up on outstanding checks. Old outstanding checks should be voided and reissued to payees who can be readily located.

If the payees cannot be located, the amount should be disbursed in accordance with state law.

Auditee's Response

The Prosecuting Attorney provided the following written responses:

5.1 The recommendations have already been implemented. We are working with a representative from Karpel (the computer program designer) to identify the source of the unidentified funds in the restitution account. There was a program error that has allowed these funds to accumulate without identification of the payee to whom they are due. As indicated at the time the funds were discovered, the program is designed to automatically create checks for payment of funds received each week, and it is still under review by Karpel employees to determine how these funds were not paid out and to whom they are owed.

There are funds which have been carried for over five years which will be turned over to unclaimed property as soon as the unidentified funds that are under review have been cleared. The remaining recommendations have been implemented.

5.2 The Prosecuting Attorney's office has implemented procedures to make sure that old outstanding items are followed and, if no contact can be made with the payee within six months, the funds will be turned over to the County Treasurer for payment to the State Treasurer as unclaimed property.

6. Lease Revenue

The County Clerk could not locate current lease agreements for any lessees of county owned property nor has the county done anything to determine if lease rates are appropriate. The county receives lease revenue from one individual who leases farmland and six entities that lease office space in the county annex building and Justice Center. The county is responsible for paying all insurance and utility costs, except phone service. The county received lease revenue totaling $42,252 and $55,577 in 2010 and 2009, respectively.

The County Clerk indicated the county has not maintained active lease agreements with any of the current lessees, and she was only able to locate two lease agreements, both of which had expired (one in 2007 and one in 2009). The County Commission indicated the lease charges cover the costs to maintain the offices and these prices are what the market would bear. However, the county has no documentation to support these statements.

Formal written agreements are necessary to document each party's duties and responsibilities and to prevent misunderstandings. Also, Section 432.070, RSMo, requires contracts for political subdivisions to be in

writing. In addition, to ensure property leases are advantageous for the county or represent fair market value, the county should establish procedures to determine the monthly lease amounts and maintain the related documentation.

Recommendation

The County Commission obtain written agreements with all entities leasing office space or farmland to ensure the rights and responsibilities of all parties are specifically outlined. In addition, the County Commission should conduct a formal cost study to ensure the amount of the monthly lease charges is sufficient.

Auditee's Response

The County Commission provided the following written response:

The Commission has obtained written agreements with all entities leasing office space and farmland as of this date.

7. Capital Assets

The County Clerk does not have procedures in place to identify property purchases and dispositions throughout the year. Tags identifying property items as county property are not always assigned and affixed to the items at the time of purchase. The county has also not established a minimum amount or equipment classifications to be included on property records. At the beginning of January 2011, county-owned property was valued at approximately $790,000 on the county insurance policy.

Based on prior audit recommendations, the county began inventorying capital assets during the last quarter of 2010. During our review of the county's capital asset records for 2010, annual inventory count sheets of several officials indicated items were not tagged and various property was not included on the sheets. In addition, although the county includes many small dollar items such as tires, storage cases, signs, and a portable welder on the property list, the determination of which items should be tracked is not consistent. For example, the Sheriff's office purchased two notebook computers at a cost of $850 each; however, only one was tagged and recorded on the inventory list. The county's information technology employee stated the second notebook computer was located at his residence, which he uses to access the Sheriff's computer system after hours.

Section 49.093, RSMo, requires counties to account for personal property costing $1,000 or more, assigns responsibilities to each county department officer, and describes details to be provided in the inventory records. In addition, it is the county's informal capital asset policy to include some items under $1,000 on the list. Adequate county property records and procedures are necessary to ensure effective internal controls, meet statutory requirements, and provide a basis for determining proper insurance coverage. These records should be updated for any property additions and approved dispositions as they occur. Physical inventories, proper tagging of

county property items, and periodic comparisons of inventories to overall county property records are necessary to evaluate the accuracy of the records, and deter and detect theft.

Similar condition previously reported

A similar condition was noted in our prior audit report.

Recommendation

The County Commission and County Clerk work with other county officials to ensure complete and accurate inventory records are maintained and annual physical inventories are conducted, and implement procedures for tracking and tagging capital asset purchases throughout the year. In addition, the County Commission should establish a minimum amount for items to be included on the list.

Auditee's Response

The County Commission provided the following written response:

The Commission has set an inventory minimum of $1,000. The Commission will work with the County Officials to maintain accurate inventory records.

The County Clerk provided the following written response:

The County Asset book, listing of owned property, has been updated and completed and number tags in place. As new items are purchased, the Asset book will be updated when items are run through for payment.

Dunklin County
Organization and Statistical Information

Dunklin County is a township-organized, third-class county. The county seat is Kennett.

Dunklin County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 81 full-time employees and 20 part-time employees on December 31, 2010. The townships maintain approximately 790 miles of county roads.

In addition, county operations include the Senate Bill 40 Board and the 911 Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2011	2010
Don Collins, Presiding Commissioner	$	31,630
Jeanie Moore Herbst, Associate Commissioner		29,630
Patrick McHaney, Associate Commissioner		29,630
Susan Luce, Recorder of Deeds		44,250
Carol Hinesly, County Clerk		44,250
Stephen Sokoloff, Prosecuting Attorney		110,615
Robert Holder, Sheriff		49,250
Jack Adkins, County Coroner		16,250
Shawnee Trowbridge, Public Administrator		44,250
Kathy Rasberry, County Collector-Treasurer (1), year ended March 31, 2011	50,985	
Karen Vandiver, County Assessor, year ended August 31, 2010		43,417

(1) Includes $7,335 of commissions earned for collecting drainage property taxes.

Financing Arrangements

The county entered into a lease agreement with UMB Bank (the trustee) on December 1, 2004. The terms of the agreement call for the trustee to provide funding for the costs of acquiring, constructing, furnishing, and equipping the justice center and for the county to lease the justice center from the trustee for lease payments equal to the amount due to retire the trustee's indebtedness. Certificate of Participation bonds totaling $9,260,000 were issued by the trustee, on December 1, 2004, on behalf of the county.

Construction was completed in 2006 and the lease is scheduled to be paid off in 2024. The remaining principal and interest due at December 31, 2010, was $10,002,545. The lease payments are anticipated to be paid with revenue generated from the county's law enforcement sales tax passed in August 2003.

The county entered into a lease agreement valued at $1,250,000 with Kennett National Bank (the bank) on March 1, 2006. The terms of the agreement call for the bank to provide funding for the remainder of the costs of acquiring, constructing, furnishing, and equipping the justice center and for the county to lease the justice center from the bank for lease payments. Construction was essentially completed during 2006 and the lease is scheduled to be paid off in 2021. The remaining principal and interest due at December 31, 2010, was $1,011,114. The lease is anticipated to be paid with revenue generated from the county's law enforcement sales tax passed in August 2003.

The county entered into an interest-free loan agreement with the Missouri Department of Natural Resources on August 17, 2006, valued at $22,531. The proceeds were used to implement Energy Conservation Measures. The county used the funds to replace the windows in the courthouse annex. Repayment began in February 2008, and the loan is scheduled to be paid off in August 2018. The remaining principal due at December 31, 2010, was $16,171.

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

According to county personnel, the county was awarded the following American Recovery and Reinvestment Act of 2009 funding during the 2 years ended December 31, 2010:

A $208,261 Recovery Act: Assistance to Rural Law Enforcement to Combat Crime and Drugs: Enhancing Rural Corrections, Detention and Jail Operations grant was awarded by the U.S. Department of Justice for the support of jail operations. This grant, which runs from August 1, 2009, through July 31, 2011, has been used to hire and retain three new additional full-time correctional officers. These positions are not required to be maintained after the end of the grant period. During the year ended December 31, 2010, $84,279 was expended and received by the Sheriff's office related to this grant. No grant monies were expended or received during the year ended December 31, 2009.

The Dunklin County Senate Bill 40 Board received $51,318 under Title V, Section 5001 under Division B of the Recovery Act which provided additional federal funding in the Medicaid Federal Medical Assistance Percentage (FMAP). The grant was awarded by the U.S. Department of Health and Human Services and passed through by the Missouri Department of Social Services. The payments were made for Medicaid expenditures reported between October 1, 2008, and December 31, 2010. For the years

ended December 31, 2010 and 2009, $51,318 was received by the Senate Bill 40 Board. This money is being used for general operations; therefore, related expenditures have not been tracked separately.

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the City of Howardville

Building Lease	The city leases the Public Safety and Service Building from the non-profit Howardville Development Corporation (HDC). At the time the city entered into the lease, the HDC Board of Directors consisted of the then mayor and two aldermen, and these individuals continue to serve on the HDC Board. Since the inception of the lease in 2006, the city has paid approximately $10,000 to the HDC for building operation and maintenance and there is no evidence any of these monies have been used for this purpose. Under the terms of the lease, the HDC is responsible for insurance on the building and is responsible for maintenance and utilities to the extent the HDC has funds available. The city has paid all insurance, maintenance, and utilities since April 2008, and the HDC has not provided financial information, as required, to enable the city to determine if HDC funds are available. The city deeded the land on which this building is located to the HDC for $10 and, even though the city will pay the full cost of the building, the city does not get ownership of the building at the end of the lease. In addition, the lease agreement does not contain a clause to allow the city to cancel the lease, which may violate state law prohibiting long-term debt without voter approval.
Accounting Controls and Procedures	Accounting duties are not adequately segregated, and accountability over city receipts and deposits is inadequate. The city does not always abide by its dual signature requirement on city checks, and formal bank reconciliations are not performed. Several checks were filled out and signed but not distributed or processed by the bank, some voided checks were still on hand and only marked "void" in pencil, and the city does not account for the numerical sequence of checks. The city did not properly retain some records, and officials authorized to sign checks were not bonded, exposing the city to risk of loss.
Accounting Records and Financial Reporting	Some accounting records are not accurate and are not reviewed by the Board of Aldermen or other city employees. The city does not prepare budgets for any city funds, publish semi-annual financial statements, submit annual financial reports to the State Auditor's office, or obtain annual audits of its sewer system, all of which are required by state law.
Payroll and Related Matters	Timesheets were not always signed by employees or reviewed or signed by supervisors. The city does not maintain records of vacation and sick time earned and taken, and it appears the former city clerk was paid for unused leave which did not comply with city policies. Personnel files are not maintained or are incomplete for some employees. The city classifies some maintenance workers as independent contractors rather than employees, but it does not maintain adequate justification for this classification. The city advanced former Alderwoman Johnson her October 2009 compensation resulting in her being overpaid $75.
Disbursement and Related Matters	The city did not solicit and/or advertise for bids, as required by its procurement policy, and disbursed monies to charitable organizations without receiving adequate documentation of the services provided. The city has no written agreement with its bank and has not solicited proposals for banking services. The city does not always prepare or retain monthly disbursement lists, and for 60 percent of the disbursements reviewed the city could not locate invoices or other supporting documentation. The city paid invoices without requiring proof

	of receipt of goods or services, did not mark invoices as paid, and paid over $300 in interest and fees because a payment was late.
Sewer and Sanitation Services	The city has no written agreement with the public water supply district regarding the collection of sewer and sanitation fees. The city does not maintain separate accounting records for each individual sewer and sanitation customer and does not have procedures to bill delinquent accounts, assess delinquent penalties, or shutoff service for nonpayment.
Restricted Monies	Monies restricted for certain use, including motor-vehicle, law enforcement training, and State Emergency Management Agency monies, were deposited in the General Fund and not tracked separately. Therefore, the city could not determine the amount of monies in the General Fund required by law to be restricted for specific purposes. In December 2009, the city transferred over $10,000 in sewer fees to the General Fund to cover general operating costs, but sewer fees are restricted for operation of the sewer system and cannot be used for general city operations.
Meeting Minutes and Ordinances	Meeting minutes were not maintained in an orderly manner or a centralized location and could not be readily located. Open meeting minutes do not document the reason for closing a meeting, the law allowing the meeting to be closed, or evidence of votes taken. Ordinances are not complete, up-to-date and maintained in an organized manner, and the city has not adopted ordinances establishing the compensation for city officials and employees.
Capital Assets and Vehicle Use	The city does not maintain records for its capital assets, did not carry insurance on some city assets, does not tag assets for identification, and does not conduct annual physical inventories of its assets. The city does not maintain fuel and usage logs for its two city-owned vehicles and does not reconcile fuel use to fuel purchases to ensure the vehicles and city-purchased fuel are used appropriately.

In the areas audited, the overall performance of this entity was **Poor**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	The City of Howardville did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 22

THOMAS A. SCHWEICH
Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
City of Howardville, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit the City of Howardville. We have audited certain operations of the city in fulfillment of our duties. The scope of our audit included, but was not necessarily limited to, the 2 years ended June 30, 2011. The objectives of our audit were to:

1. Evaluate the city's internal controls over significant management and financial functions.

2. Evaluate the city's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the city, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the city's management and was not subjected to the procedures applied in our audit of the city.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our finding(s) arising from our audit of the City of Howardville.

An additional report, No. 2011-39, *Thirty-Fourth Judicial Circuit, City of Howardville Municipal Division* was issued in August 2011.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Mark Ruether, CPA
In-Charge Auditor:	Heather R. Stiles, MBA, CPA
Audit Staff:	Janielle Robinett

1. Building Lease

Significant concerns were noted regarding the lease of the Public Safety and Service Building, which currently houses all city offices. The Public Safety and Service Building was constructed in 2005 and is owned by the Howardville Development Corporation (HDC). The HDC was organized as a nonprofit corporation in June 2003, primarily for the purpose of improving conditions of public facilities of Howardville; however, as of August 30, 2011, the HDC had not participated in any other projects. In 2004 and 2005, the HDC secured financing for the building, consisting of $172,000 in grants and $51,600 in loans from the United States Department of Agriculture (USDA), Rural Development. The city owned the land on which the building is located, and in March 2005, the city deeded the land to the HDC for $10.

In August 2005, the city entered into a 25-year lease agreement with the HDC. The lease agreement is structured to ensure lease payments are sufficient to repay amounts borrowed from the USDA and additional amounts to cover building operation and maintenance costs. The city makes monthly payments of $500, or $6,000 annually, which consist of $3,612 in loan payments to the USDA, $720 to two reserve accounts held by the HDC as required by loan provisions, and the remainder ($1,668) to the HDC for building operation and maintenance and other HDC operating costs.

The HDC Board of Directors consists of Clennon Farr, the former Mayor, and Tommie Fountain and Mary Johnson, two former Aldermen, who held their city offices and positions on the HDC Board when the HDC was organized, the building lease was executed, and the city moved into the building. These three individuals served as the president, vice-president, and secretary of the HDC while also serving the city in their elected positions.

1.1 Building operating costs

Since the inception of the lease in 2006, the city has paid approximately $10,000 to the HDC for building operation and maintenance, and there is no evidence any of these monies have been used for the intended purpose. The lease agreement requires the HDC to provide property insurance coverage on the building; however, the city provides all insurance coverage for the building. Additionally, the lease indicates the HDC is responsible for maintaining the premises and providing utilities to the extent funds are available in the HDC Operations and Maintenance Account. According to city personnel, all utilities and building maintenance and repair costs have been paid by the city since April 2008.

In addition, the city has not obtained financial information from the HDC, even though the lease agreement allows for the city to request and receive HDC financial statements. City personnel indicated requests for such information were made but the requested information was not provided.

To ensure the HDC is meeting its financial obligations to the city, the city should require the HDC submit periodic financial information. HDC financial information would allow the city to determine if funds are available in the HDC Operations and Maintenance Account to pay for building operating and utility costs and appropriate funds have been set aside in the reserve accounts required by the loan agreement.

1.2 Building ownership

The lease agreement does not provide for transfer of ownership of the building to the city upon payoff of the loan. The lease agreement requires the city to pay all loan principal and interest; however, the building will remain the property of HDC. As a result, the city will have used public funds of approximately $90,000 to fully pay for this asset but will have failed to obtain ownership. Typically, a municipality entering into a lease associated with financing a purchase would obtain ownership when all payments under the lease are complete.

1.3 Nonappropriation clause

The lease agreement does not contain a "walk away" or nonappropriation clause which would allow the city to cancel its lease with the HDC. As a result, the city may have incurred long-term debt without voter approval.

Article VI, Section 26(a), Missouri Constitution, requires a public vote before cities may become indebted in an amount exceeding in any year the income and revenue provided for such year plus any unencumbered balances from previous years. Since this issue was not put to a public vote, it appears the Board of Aldermen may have exceeded its authority when it entered into the lease agreement with the HDC.

Recommendations

The City of Howardville Board of Aldermen:

1.1 Request and obtain financial information from the HDC and ensure the HDC provides insurance on the building, pays building utility and maintenance costs, and sets aside the required loan reserve amounts as required by the lease agreement.

1.2 Work with the HDC to amend the lease agreement to provide the city with ownership interest upon the payoff of the building loan.

1.3 Work with the HDC to amend the lease agreement to provide for a nonappropriation cancellation clause.

Auditee's Response

The Board of Aldermen provided the following written response:

We agree with these recommendations and will work with the HDC to determine whether the HDC should be responsible for the payment of certain costs related to the city hall building, as well as obtaining periodic financial information from the HDC. We will also work with the HDC to

ensure the city will obtain ownership of the building and to add a nonappropriation clause to the lease.

2. Accounting Controls and Procedures

Accounting controls and procedures utilized by the city need improvement.

2.1 Segregation of duties

The Board of Aldermen has not established adequate segregation of duties or supervisory review over the accounting functions performed by the City Clerk. The City Clerk is responsible for most record keeping duties including duties which would normally be performed by a city treasurer. These duties include receiving, recording, and depositing monies; preparing invoices for payment; preparing checks; and performing bank reconciliations. Additionally, the City Clerk provides one of the two required signatures on checks.

Proper segregation of duties helps ensure all transactions are accounted for properly and assets are adequately safeguarded. Attorney General's Opinion No. 24, 1955 to Dodds, concluded that in a fourth-class city, the holding of the positions of the city clerk, city treasurer, and city collector, or any two of these offices, by the same person at the same time would be incompatible. The current procedures jeopardize the system of independent checks and balances intended by state law. If proper segregation of duties is not possible, a timely supervisory review of the work performed is necessary.

2.2 Receipt and deposit procedures

Accountability over city receipts and deposits is inadequate.

- Receipt slips are not issued timely for some monies received. In addition, receipts are not always deposited intact in a timely manner. For example, five property tax distributions received from the County Collector totaling $5,519 for the months of August to December 2010, were not recorded or deposited until December 14, 2010.

- Receipt slips are sometimes used as notations to support payments made to vendors. As a result, the city does not account for the numerical sequence of receipt slips.

- While the method of payment received is generally documented on receipt slips, the composition (total cash and checks) recorded on receipt slips is not reconciled to the composition of bank deposits.

- The original copy of voided receipt slips is not always retained.

- Checks are not always restrictively endorsed immediately upon receipt.

Without proper receipt procedures, there is little assurance all receipts are properly recorded and deposited.

2.3 Dual signatures

The city issued several checks with only one signature of either the Mayor or former City Clerk although dual signatures are required by the banking agreement. Dual signatures help provide assurance that checks represent payment for legitimate city disbursements.

2.4 Bank reconciliations

Formal bank reconciliations are not performed. The city has four checking accounts which totaled approximately $225,000 at June 30, 2011. In addition, some receipts are not recorded at all in the check register and some disbursements are not recorded accurately in the check register. As a result, accurate cash balances are not maintained by the city.

The city has contracted with a CPA firm to prepare certain accounting records, and the CPA firm indicated it performs monthly bank reconciliations; however, these reconciliations are not provided to the city, and our review noted certain errors on the CPA's bank reconciliations (See MAR finding number 3).

Maintaining accurate book balances and recording receipts and disbursements promptly to the check register or other control ledger are necessary to allow proper reconciliation between book and bank balances. Complete and accurate bank reconciliations are necessary to ensure accounting records are in agreement with the bank, and errors or discrepancies are detected and corrected timely.

2.5 Voided checks

Our review noted ten city checks totaling $2,633 filled out and signed by the former City Clerk but not distributed or processed by the bank, and three checks totaling $791 canceled only by "VOID" written in pencil. It is unclear whether the city made appropriate adjustments to the accounting records to indicate whether these checks were voided or considered outstanding checks, or if there is some plausible explanation for these checks to be on hand.

To ensure accounting records are accurate and to reduce the risk of unauthorized transactions, the city should ensure all voided checks are properly defaced and maintained, and the accounting records are properly adjusted.

2.6 Numerical sequence of checks

The city does not always issue checks in numerical sequence and does not account for their numerical sequence. For example, the city issued check numbers 7571 through 7573 prior to issuing check numbers 7532 to 7570. To account for all disbursements, the numerical sequence of checks issued should be accounted for properly and any skipped checks should be voided.

2.7 Record retention

Some city records were not properly retained. The city could not provide original invoices or other supporting documentation for several city disbursements (see MAR finding number 5). In addition, some deposit slip copies were not retained, and several monthly bank statements could not be located. Proper record retention is necessary to ensure the propriety of all financial transactions.

2.8 Bonding

The Mayor and Alderman serving as Mayor Pro Tem are authorized to sign checks but are not bonded. Failure to properly bond individuals who have access to funds exposes the city to risk of loss.

Recommendations

The City of Howardville Board of Aldermen:

2.1 Segregate the City Clerk's accounting duties and consider appointing a city treasurer. If proper segregation of duties cannot be achieved, timely independent reviews of the accounting records should be performed and documented.

2.2 Ensure official pre-numbered receipt slips are issued timely for all monies received in numerical sequence, monies are deposited in a timely manner, checks and money orders are restrictively endorsed immediately upon receipt, and the composition of receipts is reconciled to the composition of bank deposits. Additionally, the city should retain the original copies of voided receipt slips.

2.3 Ensure dual signatures are on all checks.

2.4 Maintain accurate cash balances in the check registers or on a cash control ledger, and ensure monthly bank reconciliations are prepared for all city accounts.

2.5 Establish procedures to properly deface and retain all voided checks. The city should investigate the un-negotiated checks and dispose of or void as appropriate.

2.6 Issue checks in numerical sequence and account for the numerical sequence of checks.

2.7 Ensure city records are properly retained.

2.8 Maintain bond coverage for all officials with access to city assets.

Auditee's Response

The Board of Aldermen provided the following written response:

We agree with these recommendations. We will consider appointing a city treasurer to provide proper segregation of duties and monthly bank

reconciliations. Receipt and deposit recommendations have already been implemented, and all applicable records are now being maintained. Checks are now issued in numerical sequence, require two signatures, and are properly voided when necessary. We will follow up on the 10 checks filled out but not distributed. We will consider bonding all city officials who are authorized to sign checks.

3. Accounting Records and Financial Reporting

Significant improvement is needed in the preparation of accounting records and financial reporting practices.

3.1 Accounting records

Some accounting records maintained by the city accountant are not accurate. In addition, the accounting records are not reviewed by the Board of Aldermen or other city employees for errors or omissions. The city contracts with an accountant to maintain the city general ledger and to prepare monthly and annual financial statements. At the end of each month, the City Clerk submits copies of all checks issued, receipt slips issued, and bank statements received to the accountant for preparation of the general ledgers and financial statements.

Our review noted errors on the December 31, 2010, balance sheet prepared by the accountant. The balance sheet included the following over (under) statements of various city bank accounts:

General Fund Account[1]	$ (3,632)
Special Account[2]	5,546
CDBG Account	44
Municipal Court Account	(3,469)
Savings Account[2]	5,424
Sewer Account	(14,195)
DNR Grant Account[3]	(172,000)

[1] The outstanding check list included $1,616 in checks which cleared in 2009 and seven voided checks totaling $2,016.
[2] These accounts were closed in July 2010.
[3] This account was opened in December 2010, but was not included on the balance sheet.

The city does not maintain any records summarizing receipt slips and checks issued or any account balance information beyond copies of bank statements. City employees and officials rely on the accountant to prepare accurate financial statements but have no procedures to reconcile the statements to receipts and disbursements processed by the city.

Accurate financial information is necessary to provide the Board of Aldermen with sufficient information to make informed decisions and to provide residents with reliable information about city finances.

3.2 Budgets

The city does not prepare annual budgets for any of the city funds. Section 67.080, RSMo, provides that no expenditure of public monies shall be made unless it is authorized in a budget. Additionally, Section 67.010, RSMo, requires the preparation of an annual budget which shall represent a complete financial plan for the ensuing budget year and also sets specific guidelines for the format.

A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific financial expectations for each area of city operations and provide a means to effectively monitor actual costs by periodically comparing budgeted to actual disbursements. The budget should also include a budget message and comparison of actual receipts and disbursements for the 2 preceding years.

3.3 Published financial statements

The city does not publish semiannual financial statements in accordance with state law. Section 79.160, RSMo, requires the Board of Aldermen to prepare and publish semiannually, a full and detailed account of the receipts, disbursements, and indebtedness of the city.

3.4 Financial reporting

The city does not submit annual financial reports to the State Auditor's office. Section 105.145, RSMo, requires each political subdivisions to file annual reports of its financial transactions. In addition, 15 CSR 40-3.030 requires the annual financial report to be filed within 4 months after the end of the political subdivision's fiscal year if an unaudited financial report is filed and within 6 months after the end of the political subdivision's fiscal year if an audit report prepared by a certified public accountant is filed.

3.5 Audits

The city has not obtained annual audits of its sewer system as required by state law. Section 250.150, RSMo, requires the city obtain annual audits of the sewer system and the cost be paid from revenues received from the system.

Recommendations

The City of Howardville Board of Aldermen:

3.1 Adopt procedures to review and ensure the accuracy of the financial records prepared by the accountant.

3.2 Prepare annual budgets which include all information required by state law.

3.3 Publish semiannual financial statements as required by state law.

3.4 Submit an annual financial report to the State Auditor's office as required by state law.

3.5 Obtain annual audits of the sewer system as required by state law.

Auditee's Response

The Board of Aldermen provided the following written response:

We agree with these recommendations and plan to implement them. We will consider appointing a city treasurer to prepare the required accounting records. If a treasurer cannot be appointed, we will work with the accounting firm to ensure accurate records are prepared. We are already working on a city budget.

4. Payroll and Related Matters

Several concerns were noted regarding payroll policies and procedures.

4.1 Timesheets

Timesheets were not signed by some employees and were not always reviewed or signed by a supervisor to ensure their accuracy. In addition, some time records were not accurate or complete. For example, some timesheets included the time the employees checked in but not when they checked out.

The lack of adequate review procedures increases the potential for errors to go undetected. Time records are necessary to document hours worked, substantiate payroll disbursements, and provide the city with a method to monitor hours worked and leave taken. In addition, timesheets should be signed by the employee and the employee's supervisor to indicate their agreement to the actual time reported each week and to ensure the accuracy of time worked and leave taken.

4.2 Leave records

Records of vacation and sick leave earned and used are not maintained for city employees, and the former city clerk received payments for unused leave which were not adequately documented and do not appear to comply with city leave policies. The former city clerk was paid for 2 weeks of vacation in 2009. The city could not locate any leave records to support this payment, and the city leave policy does not address whether leave earned can be paid out. City policy states employees earn 1 week of vacation per year and 1 day of sick leave per month of employment with the city.

Adequate leave records and strict compliance with leave policies are necessary to ensure employees are treated equitably and are properly compensated.

4.3 Personnel files

Personnel files are not maintained for some city employees and some personnel files were incomplete. Some files did not contain documentation

of the authorization for the hiring of the employee, the pay rate at which the employee was hired, and any subsequent changes in pay rate. Personnel files for all employees are necessary to provide documentation of personnel actions and to provide readily accessible work histories.

4.4 Employment classification

The city did not adequately document why some maintenance workers are classified as independent contractors instead of city employees. In addition, the city failed to withhold and report payroll and income taxes on payments to these maintenance workers and compensation paid to the Board of Aldermen. These payments were reported by the city to the Internal Revenue Service (IRS) on 1099 forms.

The city considers individuals hired for maintenance purposes to be independent contractors; however, these individuals submit weekly timesheets, are paid weekly, and utilize equipment owned by the city, so it appears these individuals should be considered city employees. In addition, city officials indicated these maintenance workers do not own or work for companies that are in the business of providing maintenance services.

Section 105.300, RSMo, defines an elected or appointed officer or employee of a political subdivision as an employee for Social Security and Medicare tax purposes. For employees, the IRS requires employers to report compensation on W-2 forms and withhold and remit income and payroll taxes. Similarly, Chapter 143, RSMo, includes requirements for reporting wages and withholding state income taxes. State and federal laws require employers to pay the employer's share of Social Security and Medicare on the compensation paid to employees.

4.5 Advance

In September 2009, the city advanced former Alderwoman Johnson her monthly compensation for October 2009, without documentation of board approval. She also received her regular compensation in October 2009. As a result, she was overpaid $75. There is no record Alderwoman Johnson repaid the advance to the city, or that the city withheld this amount from future payments. The city did not enter into a written agreement with the Alderwoman for the repayment of this advance.

Loans or advances of public funds are prohibited by Article VI, Section 23, Missouri Constitution, which states no city shall lend its credit or grant public money or thing of value to or in aid of any individual.

Recommendations

The City of Howardville Board of Aldermen:

4.1 Ensure timesheets are prepared by all employees, properly signed and approved, and reviewed for accuracy.

4.2 Ensure adequate leave records are maintained for all employees and are periodically reviewed to ensure compliance with city leave policies. In addition, leave payments should not be made unless allowed by city policy.

4.3 Ensure complete personnel files are maintained for all employees.

4.4 Ensure all persons hired by the city are clearly documented as employees or contract employees in compliance with IRS rules and regulations. In addition, the Board should ensure all compensation paid to board members and all employees is subject to income and payroll taxes and properly reported on W-2 forms.

4.5 Discontinue the practice of making pay advances to employees or officials and require repayment of the advance made to the Alderwoman.

Auditee's Response

The Board of Aldermen provided the following written response:

We agree with these recommendations and plan to implement them.

5. Disbursements and Related Matters

Concerns were noted related to bidding, approval of payments, and other items related to city disbursements.

5.1 Bidding

Although the city has a procurement policy which requires city officials to solicit bids for all items or services when possible and advertise for bids for items or services costing more than $5,000, the city did not solicit bids, advertise for bids, retain sufficient bid documentation, or document sole source procurement for most purchases.

In addition to complying with the city ordinance, competitive bidding helps ensure all parties are given an equal opportunity to participate in city business. Complete documentation of all bids and proposals received and reasons why a bid or proposal was selected helps ensure the city pays a reasonable amount for all major purchases.

5.2 Donations

In September 2009, the city disbursed $300 to a local non-profit organization and $300 to a local church as donations for volunteer services provided to the city during an ice storm. While the board approved these payments, the city had no documentation of the services provided by these organizations. These disbursements were from federal monies received from the State Emergency Management Agency (SEMA).

Donations of public funds are prohibited by Article VI, Section 25, Missouri Constitution. To ensure city funds are spent properly, all payments for

services should be supported by original invoices or other documentation of services provided to the city.

5.3 Banking services

The city has not solicited proposals from various banking institutions for the deposit of city monies and does not have a written agreement with its depository bank. The city was charged account maintenance fees totaling $1,700 during the year ended June 30, 2011. Periodically soliciting proposals for banking services helps ensure banking services received, as well as the costs for these services, are reasonable and competitive. Further, written contracts are necessary to document all related fees for services and to prevent misunderstandings. Section 432.070, RSMo, requires contracts of political subdivisions to be in writing.

5.4 Approval process and missing invoices

Monthly disbursement lists are not always prepared and are not retained with meeting minutes or compared to supporting invoices. City procedures require the City Clerk to prepare a list of disbursements and present the list and supporting invoices at the monthly meetings for board approval. Lists for several months during 2010 could not be located. While meeting minutes include a statement that disbursements are approved, disbursement lists are not included with meeting minutes to document specific disbursements approved by the Board of Aldermen.

For 32 of 53 disbursements reviewed (60 percent), the city was unable to locate invoices or other supporting documentation. These 32 disbursements were for various supplies and services totaling approximately $17,500. By not comparing the disbursement lists to invoices, there is less assurance the city has retained adequate supporting documentation for each disbursement.

A complete and accurate list of disbursements approved by the board and retained with meeting minutes, along with invoices or other supporting documentation, reduces the possibility of unauthorized payments and helps ensure disbursements represent appropriate uses of public funds.

5.5 Receipt of goods or services

The city does not require documentation of receipt of goods or services prior to payment of invoices. In addition, our review noted several invoices were not marked paid or otherwise canceled upon payment. Canceling invoices and other supporting documentation reduces the likelihood of duplicate payments, and requiring acknowledgement of receipt of goods or services prior to payment helps ensure the city actually received all items.

5.6 Late payments

The city does not always pay invoices timely. For example, the city incurred $321 in interest and late payment fees associated with financing a lawnmower because the final payment was not made timely. Procedures should be in place to ensure bills are paid timely to avoid late charges and interest.

Recommendations

The City of Howardville Board of Aldermen:

5.1 Ensure bids are solicited for all applicable purchases in accordance with city ordinances and sufficient documentation is maintained.

5.2 Refrain from donating city funds or ensure adequate documentation is retained to ensure the city receives actual goods or services in return for the donation.

5.3 Solicit proposals for banking services on a periodic basis.

5.4 Ensure complete disbursement lists are prepared, approved, and retained with meeting minutes. The lists should be compared to invoices to ensure supporting documentation is obtained and retained for all disbursements.

5.5 Ensure all paid invoices are marked as such to prevent reuse and require documentation of receipt of goods and/or services prior to payment of invoices.

5.6 Implement procedures to ensure bills are paid timely.

Auditee's Response

The Board of Aldermen provided the following written response:

We agree with these recommendations and plan to implement them. We will consider amending city policy to require bids on purchases which exceed a minimum dollar amount. We have been in contact with the bank to determine if certain fees can be waived or reduced. We are signing and approving all invoices prior to payment, and all bills have been paid in a timely manner.

6. Sewer and Sanitation Services

There are significant weaknesses in controls and procedures related to sewer and sanitation services. As a result of these weaknesses, there is less assurance all utility services are billed properly and all utility monies are accounted for properly.

The city has an arrangement with the local public water supply district to bill and collect city sewer fees for all properties connected to the city sewer system, and sanitation fees for all properties located within the city. The water district issues monthly checks to the city for sewer and sanitation fees collected and provides a monthly list of individuals who paid the applicable city fees. The city pays a monthly fee of $110 for these services. The water district bills approximately 100 sewer and sanitation customers.

6.1 Written contract

The city does not have a written contract with the public water supply district regarding the collection of sewer and sanitation fees. As a result,

there appears to be a lack of understanding of the duties of each party. For example, city officials indicated delinquent billings and cancellation of service is the district's responsibility, while district officials indicated this is the city's responsibility.

Written contracts are necessary to define the services and compensation to be provided by each party and to prevent misunderstandings. Section 432.070, RSMo, requires contracts of political subdivisions to be in writing.

6.2 Fee collections

The city does not maintain separate accounting records for each individual sewer and sanitation customer, making it difficult to track payments received from each customer or to determine customers who are delinquent. In addition, the city does not have policies or procedures requiring customers to establish sewer or sanitation accounts with the city. Services are automatically added to properties when the district connects water service to properties in the city limits.

The only record maintained by the city is the monthly collection list provided by the district which lists each individual who has made a sewer or sanitation payment. However, it appears the city does not review these listings for mathematical accuracy or duplicate payments. Our review of collection lists for the months of November and December 2010 noted some customer names were listed multiple times, which would appear to indicate fees were collected for more than 1 month, but the lists do not contain sufficient detail to indicate to which month(s) the payments apply.

Detailed records of customer accounts and payments are necessary to ensure the city is receiving the proper amount of sewer and sanitation fees and to ensure there is proper follow up on delinquent accounts.

6.3 Delinquent billing and shutoff procedures

The city does not have procedures to bill delinquent accounts, assess delinquent penalties, or shutoff or discontinue service for nonpayment of sewer and sanitation fees. District officials indicated water service is shutoff for nonpayment of district water fees; however, neither the city nor the district bill or pursue collection of delinquent city sewer fees nor initiate sewer shutoff procedures. In addition, neither the city nor the district bill delinquent sanitation fees or initiate procedures to discontinue trash pickup for nonpayment of fees.

The lack of billing delinquent accounts, assessing delinquent penalties, or initiating shutoff procedures for nonpayment allows customers to receive services without paying and may result in a loss of revenue to the city.

Recommendations

The City of Howardville Board of Aldermen:

6.1 Enter into a written agreement with the public water supply district for the collection of sewer and sanitation fees which defines the responsibilities of each party and the compensation to be paid for services provided.

6.2 Maintain accounting records for each sewer and sanitation customer listing all amounts billed and collected. In addition, the city should develop procedures to ensure sewer and sanitation accounts are established for all customers, applicable fees are billed monthly, collections are accounted for properly, and account balances are monitored.

6.3 Ensure delinquent sewer and sanitation fees are properly billed and monitored. In addition, the board should consider adopting policies to assess penalties and service discontinuation for customers with delinquent accounts.

Auditee's Response

The Board of Aldermen provided the following written response:

We agree and will contact the water district to enter into a written contract. We will also work with the district to ensure all customers are properly billed and collected, delinquent accounts are properly monitored, and shutoff procedures are implemented.

7. Restricted Monies

The city has not established adequate procedures to ensure restricted monies are recorded appropriately and disbursed only for intended purposes. Some transfers of restricted monies between city funds did not appear appropriate and were not adequately documented.

7.1 Tracking and recording restricted monies

The city is not properly tracking and recording various restricted monies. For the year ended June 30, 2011, the city received approximately $13,000 in state motor vehicle-related monies and $600 in Law Enforcement Training monies. Additionally, approximately $14,250 in disaster assistance monies from SEMA were distributed to the city in 2009. While these monies are restricted for specific purposes, they were deposited into the General Fund and the related disbursements or balances were not tracked separately. As a result, the city cannot determine at a point in time what portion of the General Fund represents restricted street, training, or grant monies.

Article IV, Section 30, Missouri Constitution, requires motor vehicle-related receipts apportioned by the state of Missouri be disbursed for street related purposes only. Section 488.5336, RSMo, requires law enforcement training fees to be used only for the training of law enforcement officers. The grant

agreement with SEMA provides restrictions for the use of these funds. Separate accounting of restricted monies is necessary to ensure compliance with state law and grant requirements.

7.2 Transfers

In December 2009, the city transferred approximately $10,850 of restricted sewer fees from the Sewer Fund to the General Fund. According to the Mayor, this transfer was made to cover general operating costs because the balance of the General Fund was low; however, sewer fees are restricted for operation of the city sewer system and cannot be used for general city operations. In addition, there was no documentation of board approval to transfer these funds.

Receipts of the Sewer Fund represent user fees restricted for the operation of the sewer system. The lack of board approval and adequate documentation for this transfer lessens assurance that these restricted monies were appropriately spent for sewer operating costs and not to subsidize general operations of the city.

Recommendations

The City of Howardville Board of Aldermen:

7.1 Determine the amount of restricted monies in the General Fund and establish separate funds or a separate accounting of these monies as required by state law and grant agreements.

7.2 Ensure sewer funds are used for their intended purposes. In addition, the board should ensure authorizations for and approval of transfers between funds is obtained and clearly documented and should consider repaying the monies transferred improperly into the General Fund.

Auditee's Response

The Board of Aldermen provided the following written response:

We agree and will ensure restricted monies are accounted for separately. We will follow up on the transfer to the Sewer Fund; however, it appears that certain expenses incurred in the General Fund are for sewer purposes, and we will determine which expenses should be allocated to the Sewer Fund.

8. Meeting Minutes and Ordinances

Several concerns were noted with meeting minutes and Sunshine Law compliance. The city does not maintain a complete set of ordinances, and the compensation of elected and appointed officials is not established by ordinance.

8.1 Meeting minutes

Several concerns were identified regarding meeting minutes.

- Minutes are not maintained in an orderly manner or in a centralized location. Some minutes were maintained in a handwritten journal, some minutes were maintained electronically, and some minutes were located on loose paper in a file cabinet. In addition, minutes are not signed by any city official. As a result, personnel had difficulty locating some minutes, and it is unclear whether some minutes were officially approved by the board.

- Open meeting minutes do not document reasons for closing the meeting or the specific section of law that allows for closed meetings.

- Minutes were not maintained for some closed meetings, and in one instance closed session discussions were documented as part of the open meeting minutes.

- There was no evidence votes were taken during open meetings to close certain meetings, nor was there evidence of votes taken for other various motions passed in open meetings.

The Sunshine Law, Chapter 610, RSMo, requires governmental bodies to prepare and maintain minutes of open and closed meetings, and requires records of votes, including roll call votes before closing a meeting. Additionally, the Sunshine Law requires open minutes to document the reason for closing a meeting and limits discussions in closed meetings to only those specifically allowed by law. The lack of complete minutes filed in an orderly manner lessens assurance that the city has complied with the Sunshine Law.

8.2 Ordinances

Ordinances are not complete, up-to-date, and maintained in an organized manner. While ordinances appear to have been codified in the mid-1970s, the ordinances are maintained in a file folder and there is no official ordinance book. An index of all ordinances passed and rescinded by the city is not maintained, and some sections of the code could not be found.

Since ordinances represent legislation which has been passed by the board to govern the city and its residents, it is important ordinances be maintained in a complete and up-to-date manner. The lack of an ordinance index makes it difficult for the city to determine which ordinances are active or have been rescinded.

8.3 Officials' compensation

The city has not adopted ordinances to establish the compensation paid to city officials and employees. While the city has adopted general ordinances for elected and appointed officials that state the "Board of Aldermen shall fix compensation by ordinance," the ordinances do not address the specific compensation to be paid.

Section 79.270, RSMo, provides the compensation of city officials and employees be set by ordinance. Establishing an ordinance to set the compensation rates, in addition to meeting statutory requirements, documents the approved amounts to be paid and eliminates misunderstandings. Also, Section 79.270, RSMo, states "… the salary of an officer shall not be changed during the time for which he was elected or appointed."

Recommendations

The City of Howardville Board of Aldermen:

8.1 Ensure meeting minutes are prepared, signed, and maintained in an orderly manner for all open and closed meetings, and the minutes include records of all votes taken. In addition, reasons for going into closed meetings should be documented in the open minutes.

8.2 Update ordinances, ensure a complete set of ordinances is maintained, and prepare an index of all city ordinances passed and rescinded.

8.3 Establish the compensation of all city officials and employees by ordinance in accordance with state law.

Auditee's Response

The Board of Aldermen provided the following written response:

We agree with these recommendations. Meeting minutes have already been improved and are properly prepared and retained. We will consider updating all city ordinances and preparing an ordinance for city officials' compensation.

9. Capital Assets and Vehicle Use

The city does not maintain records of capital assets or vehicle use.

9.1 Capital asset records

The city does not maintain records for its capital assets, including land, buildings, infrastructure, equipment, and other property. The city's property insurance policy did not include a city vehicle and some land owned by the city. Also, property is not tagged for specific identification, and annual physical inventories are not performed.

Along with providing a basis for obtaining proper insurance coverage, adequate capital asset records and procedures are necessary to secure better internal controls and safeguard city assets that are susceptible to loss, theft, or misuse. A detailed capital asset list should include all pertinent information for each asset, including description, cost, acquisition date, identification number, and location; date and method of disposition; and accumulated depreciation, if applicable.

9.2 Fuel and usage logs

Fuel and usage logs are not maintained for the two city vehicles, and fuel use is not reconciled to fuel purchases. Fuel charges for fiscal year 2011 totaled approximately $2,000. Fuel and usage logs are necessary to document the appropriate use of vehicles and to support fuel charges. The logs should include sufficient documentation to determine reasonableness of miles driven and allow reconciliation of fuel use to fuel purchases.

Recommendations

The City of Howardville Board of Aldermen:

9.1 Ensure adequate capital asset records are maintained, assets are tagged as owned by the city, annual physical inventories are performed, and records are periodically compared to the city's insurance coverage.

9.2 Require fuel and usage logs be maintained for all city-owned vehicles. The logs should be reviewed to ensure vehicle use is reasonable and to reconcile fuel use to fuel purchases.

Auditee's Response

The Board of Aldermen provided the following written response:

We agree and plan to implement these recommendations.

City of Howardville
Organization and Statistical Information

The City of Howardville is located in New Madrid County. The city was incorporated in 1962 and is currently a fourth-class city. The city employed 2 full-time employees and 2 part-time employee on June 30, 2011.

City operations include law enforcement services, utilities (sewer and sanitation), street maintenance, park services, and volunteer fire services.

Mayor and Board of Aldermen

The city government consists of a mayor and a four-member board of aldermen. The members are elected for 2-year terms. The mayor is elected for a 2-year term, presides over the board of aldermen, and votes only in the case of a tie. The Mayor and Board of Aldermen, at June 30, 2011, are identified below. The mayor is paid $300 per month and Board of Aldermen members $75 per month. The compensation of these officials is not established by ordinance.

Jessie Newson, Mayor
Jim Daniel, Alderman
Georgia Kirby, Alderwoman
Keith Word, Alderman
Curtis Williams, Alderman

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The City of Howardville did not receive any federal stimulus monies during the 2 years ended June 30, 2011.

Financial Activity

A summary of the city's unaudited financial activity, as prepared by the city's CPA firm with some adjustments, for the 2 years ended June 30, 2011, follows:

City of Howardville
Schedule of Receipts, Disbursements, and Changes in Cash Balances

THOMAS A. SCHWEICH
Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
City of Pine Lawn, Missouri

We have conducted follow-up work pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program on certain audit report findings contained in Report No. 2011-29, *City of Pine Lawn*, issued in June 2011. The objectives of the AFTER program are to:

1. Identify audit report findings that require immediate management attention and any other findings for which follow up is considered necessary at this time, and inform the Mayor and Board of Aldermen of the City of Pine Lawn about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

   - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
   - In Progress: Auditee has begun to implement and intends to fully implement the recommendation.
   - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
   - Not Implemented: Auditee has not implemented the recommendation and indicates that it will not do so.

Our methodology included working with the city prior to completion of the audit report, to develop a timeline for the implementation of corrective action related to the audit recommendations. We reviewed documents and other evidence indicating the level of implementation for each recommendation reviewed.

As part of the AFTER work conducted, we reviewed a report summarizing the status of our recommendations and supporting documentation provided by the city, and held discussions with city officials. Documentation included copies of contracts, budgets, ordinances, board meeting minutes, and invoices. This report is a summary of the results of this follow-up work, which was substantially completed during September 2011.

Thomas A. Schweich
State Auditor

City of Pine Lawn
Follow-Up Report on Prior Audit Findings
Status of Findings

1. Financial Condition

The General Fund and Trash Fund were in poor financial condition and were not expected to improve significantly, which could put citizens at risk of reduction or loss of some services.

The Trash Fund was in poor financial condition due to several factors. The city did not charge residents a rate sufficient to cover costs, nor did the city actively pursue delinquent accounts, which totaled approximately $1.4 million as of January 4, 2011. As a result, the city was unable to pay its trash vendor on time, and had incurred late fees.

The condition of the Trash Fund affected the financial condition of the General Fund. The city made several transfers from the General Fund to cover shortages in the Trash Fund. The city also made transfers from the General Revenue Fund to the Capital Improvement Fund to repay a portion of a loan, further straining the condition of the city's funds.

The city did not have a specific plan to improve its financial condition.

Recommendation

The Board of Aldermen should closely monitor the financial condition of the city and develop a long-term plan to ensure receipts are maximized, disbursements are closely monitored, and bills are paid in a timely manner.

Status

In Progress

City officials stated the Board of Aldermen have become more involved in the finances and operations of the city. The Board is asking questions about city procedures and options for reducing city expenditures. They are also attempting to plan for an anticipated decrease in sales tax revenue due to the decline in population following the 2010 census. In addition, the city is making various changes to the trash service in an effort to increase revenues (see MAR finding number 2).

The city has hired a certified public accounting firm to conduct an audit for the year ended June 30, 2011. City officials stated they plan to implement any recommendations from the audit in an effort to improve the city and its finances.

2. Trash Services

The city did not charge customers a rate sufficient to cover the costs of providing trash service or actively pursue collection of delinquent trash accounts.

2.1 Trash Rate

The trash rate charged to city residents did not cover amounts paid to vendors for trash hauling and payment collection services. As a result, the city was forced to cover the difference using other revenue sources.

Recommendation

The Board of Aldermen evaluate ways to increase fees for trash services to a level sufficient to cover the costs of the service.

Status

In Progress

City officials indicated an increase in the trash rate will require a vote of city residents, which they anticipate will be difficult to accomplish due to the current economic conditions of the area. The city is hoping to reduce costs by handling trash billings and collections in-house. Currently, the vendor handling these duties retains 8 percent of the monies collected. In addition, the vendor is unable to provide collection services for delinquent accounts which could be performed in-house. However, the City Administrator indicated he has not performed an analysis of potential savings from performing these services in-house.

2.2 Delinquent Accounts

The city did not adequately pursue collection of delinquent trash accounts, which affected the financial condition of the city. As of January 4, 2011, the delinquent accounts list included 799 of the total 1,266 customers, and totaled approximately $1.4 million.

Recommendation

The Board of Aldermen discuss with legal counsel options available to ensure collection of delinquent trash accounts.

Status

In Progress

The city has hired an attorney to provide assistance in collecting delinquent accounts. The attorney has experience handling collections at the municipal level, and city officials believe progress can be made through this means. The city is also reviewing individual accounts to ensure active collection site data, as well as all financial and billing information, is accurate.

The city also passed a new ordinance to assist in collecting delinquent accounts by requiring landlords and multiple-property owners to pay all delinquent trash accounts for all properties before the city will issue any new occupancy permits.

3. Budget Procedures

Budget procedures were in need of improvement. Actual disbursements exceeded budgeted disbursements in the General Fund, and the budget was missing many key elements required by state law.

3.1 Budget overspending

Actual disbursements exceeded budgeted disbursements by $309,768 for the General Fund for the year ended June 30, 2010. The Board did not review budget to actual statements on a regular basis to properly monitor city finances. The majority of the overspending was due to the police department overspending its budget by $255,855 and the city transferring $59,055 more than budgeted from the General Fund to various city funds.

Recommendation

The Board of Aldermen review budget to actual statements on a monthly basis to improve monitoring of city finances and refrain from approving disbursements in excess of budgeted amounts.

Status

Implemented

The city now prepares budget-to-actual reports for use by the city staff and Board of Aldermen. City staff review the reports on a weekly basis, and the Board of Aldermen receives the reports monthly. City officials hope the reports improve monitoring of the budget and reduce future overspending. However, the city spent approximately $284,000 more than budgeted during the year ended June 30, 2011, as noted in the city's audit report for that year.

3.2 Budget preparation

The city did not prepare a new budget for the year ended June 30, 2010. The budget for the year ended June 30, 2009, was used; however, it was not approved until November 30, 2009. Additionally, the budget was only for the General Fund, and did not include several elements required by state law.

Recommendation

The Board of Aldermen develop policies and procedures to ensure budgets are prepared for all funds in a timely manner and contain all information required by state law.

Status

Implemented

The city passed a budget for all funds for the year ended June 30, 2012, in June 2011, which included actual amounts for the previous 2 years.

4. Closed Meetings

The city frequently failed to document compliance with the Missouri Sunshine Law. The following information was omitted from open meeting minutes:

- A roll call vote to go into a closed meeting was not always taken and/or recorded in the minutes of the open meeting.
- The minutes for open meetings did not always document the specific reasons for closing the meeting.

Recommendation

The Board of Aldermen ensure the vote to close a meeting and reasons for going into closed meetings are documented in open meeting minutes.

Status

Implemented

The city provided an example of a recent closed meeting in which a roll call vote was properly taken. The reason for closing the meeting appeared proper and specific reasons for closing the meeting were cited.

6. Payroll and Fringe Benefits

The city gave salary advances to employees and aldermen and could not provide an ordinance establishing compensation for city officials and employees. In addition, the city did not report the Mayor's commuting miles to the Internal Revenue Service (IRS).

6.1 Salary advances

The city paid $4,212 in payroll advances to various aldermen and employees from June 2009 through November 2010. All advances reviewed were deducted from the employees' next paycheck.

Recommendation

The Board of Aldermen discontinue allowing payroll advances.

Status

Implemented

The city provided an internal memo informing city employees that payroll advances were no longer provided.

6.2 Compensation ordinances

The city could not provide ordinances establishing the compensation of city officials and employees.

Recommendation

The Board of Aldermen establish compensation of all city officials and employees by ordinance.

Status

Implemented

The city passed an ordinance establishing the compensation of city officials and employees.

6.3 Commuting miles

The Mayor was allowed to use a city vehicle to commute between home and work; however, the amount of personal (commuting) mileage was not recorded on his W-2 forms as required by IRS guidelines. The Mayor was not required to maintain a mileage log indicating business and personal use.

Recommendation

The Board of Aldermen comply with IRS guidelines for reporting fringe benefits related to commuting in city-owned vehicles. In addition, mileage logs should be required when vehicles are used for commuting.

Status

Not Implemented

City officials indicated they disagree with the recommendation. As indicated in the city's original response, they believe the commuting mileage incurred through the use of the city vehicle is de minimis (minimal) and thus not required to be reported under IRS regulations.

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Henry County, Missouri

The Office of the State Auditor is responsible under Section 29.230, RSMo, for auditing certain operations of Henry County, and issues a separate report on that audit. In addition, in cooperation with the county, the Office of the State Auditor has contracted for an audit of the county's financial statements for the 2 years ended December 31, 2010, through the state Office of Administration, Division of Purchasing and Materials Management. A copy of this audit, performed by Daniel Jones & Associates, Certified Public Accountants, is attached.

INDEPENDENT AUDITOR'S REPORT

To the County Commission
The County of Henry, Missouri

We have audited the accompanying financial statements of the County of Henry ("County"), Missouri, as of and for the years ended December 31, 2010 and 2009, which collectively comprise the County's financial statements as listed in the table of contents. These financial statements are the responsibility of the County's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Governmental Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As described more fully in Note I, these financial statements were prepared using accounting practices prescribed or permitted by Missouri law, which practices differ from accounting principles generally accepted in the United States of America. The effects on the financial statements of the variances between these regulatory accounting practices and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

In our opinion, because of the effects of the matter discussed in the preceding paragraph, the financial statements referred to above do not present fairly, in conformity with accounting principles generally accepted in the United States of America, the financial position of the County of Henry, Missouri, as of December 31, 2010 and 2009, or the changes in its financial position for the years then ended.

In our opinion, the financial statements referred to above present fairly, in all material respects, the cash and investment balances of the governmental and agency funds of the County of Henry, Missouri, as of December 31, 2010 and 2009, and the receipts, disbursements and budgetary results of the governmental funds for the years then ended, on the basis of accounting described in Note I.

As described in Note XI, the County of Henry has converted from a modified cash (GASB 34) basis of accounting to the regulatory basis of accounting which differs from accounting principles generally accepted in the United States of America, as of and for the years ended December 31, 2010 and December 31, 2009.

In accordance with *Government Auditing Standards*, we have also issued our report dated September 15, 2011 on our consideration of the County's internal control over financial reporting and on our tests of its

3510 JEFFCO BOULEVARD • SUITE 200 • ARNOLD, MISSOURI 63010-3999 • 636-464-1330 • FAX 636-464-3076

compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

Our audit was conducted for the purpose of forming an opinion on the financial statements, taken as a whole that are referred to in the first paragraph. The accompanying Schedule of Expenditures of Federal Awards is presented for purposes of additional analysis as required by the U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profits Organizations,* and is not a required part of the financial statements. Such information has been subjected to the auditing procedures applied in the audit of the financial statements and, in our opinion, is fairly stated in all material respects in relation to the financial statements taken as a whole, that were prepared on the basis of accounting described in Note I.

The accompanying notes to the financial statements are an integral part of this statement.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The County of Henry, Missouri ("the County"), which is governed by a three-member board of commissioners, was established in 1833 by an Act of the Missouri Territory. In addition to the three Commissioners, there are ten elected Constitutional Officers: County Clerk, Collector, Treasurer, Circuit Clerk, and ex officio Recorder of Deeds, Sheriff, Assessor, Coroner, Public Administrator and Prosecuting Attorney.

As discussed further in Note I, these financial statements are presented on the regulatory basis of accounting. This basis of accounting differs from accounting principles generally accepted in the United States of America (GAAP).

A. Reporting Entity

As required by generally accepted accounting principles, as applicable to the regulatory basis of accounting, these financial statements present financial accountability of the County.

The County's operations include tax assessments and collections, state/county courts, county recorder, police protection, transportation, economic development, and social and human services.

The financial statements referred to above include only the primary government of Henry County, Missouri, which consists of all funds, organizations, institutions, agencies, departments, and offices that comprise the County's legal entity. The financial statements do not include financial data for the County's legally separate component unit, which accounting principles generally accepted in the United States of America, as applicable to the regulatory basis of accounting require to be reported with the financial data of the County. In accordance with accounting principles generally accepted in the United States of America, as applicable to the regulatory basis of accounting, the Henry County Health Center has issued separate reporting entity financial statements. For information on this component unit, please contact the Henry County Health Center at (660) 885-8193 (or write to 306 South 2nd Street Clinton, MO 64735).

B. Basis of Presentation

The financial statements are presented using accounting practices prescribed or permitted by Missouri law, which include a Statement of Receipts, Disbursements and Changes in Cash and Investment Balances – All Governmental Funds, a Comparative Statement of Receipts and Disbursements – Budget and Actual – All Governmental Funds, and a Statement of Assets and Liabilities Arising from Cash Transactions – Agency Funds.

Governmental resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled. A fund is considered a separate accounting entity with self-balancing accounts. The following fund types are used by the County:

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

B. Basis of Presentation (concluded)

Governmental Fund Types

Governmental funds are those through which most governmental functions are financed. The County's expendable financial resources are accounted for through governmental funds. The measurement focus is upon determination of and changes in financial position rather than upon net income.

Fiduciary Fund Types

Agency – Agency funds are used to account for assets held by the County in a trustee capacity as an agent of individuals, private organizations, other funds or other governmental units. Agency funds are accounted for and reported similar to the governmental funds. Agency funds are custodial in nature (assets equal liabilities) and do not involve the measurement of results of operations. These funds account for activities of collections for other taxing units by the Collector of Revenue and other agency operations.

C. Basis of Accounting

Basis of accounting determines when transactions are recorded in the financial records and reported on the financial statements.

The financial statements are prepared on the regulatory basis of accounting. This basis of accounting recognizes amounts when received or disbursed in cash and differs from accounting principles generally accepted in the United States of America.

As a result of the use of this regulatory basis of accounting, certain assets (such as accounts receivable and capital assets), certain revenues (such as revenue for billed or provided services not yet collected), certain liabilities (such as accounts payable, certificates of participation bonds and obligations under capital leases) and certain expenditures (such as expenditures for goods or services received but not yet paid) are not recorded in these financial statements.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

D. Budget and Budgetary Accounting

The County follows these procedures in establishing the budgetary data reflected in the financial statements:

1. In accordance with Chapter 50 RSMo, the County adopts a budget for each governmental fund.

2. On or before January 15th, each elected officer and department director will transmit to the County Clerk, who serves as budget officer, the budget request and revenue estimates for their office or department for the budget year.

3. The County Clerk submits to the County Commission a proposed budget for the fiscal year beginning the following January 1. The proposed budget included estimated revenues and proposed expenditures for all budgeted funds. Budgeted expenditures cannot exceed beginning available monies plus estimated revenues for the year. Budgeting of appropriations is based upon an estimated unencumbered fund balance at the beginning of the year as well as estimated revenues to be received. The budget to actual comparisons in these financial statements, however, do not present encumbered fund balances, but only compare budgeted and actual revenues and expenditures.

4. A public hearing is conducted to obtain public comment. Prior to its approval by the County Commission, the budget document is available for public inspection.

5. Prior to February 1, the budget is legally enacted by a vote of the County Commission.

6. Subsequent to its formal approval of the budget, the County Commission has the authority to make necessary adjustments to the budget by formal vote of the Commission. Adjustments made during the year are reflected in the budget information in the financial statements.

   Budgeted amounts are as originally adopted, or as amended by the County Commission throughout the year. Individual amendments were not material in relation to the original appropriations which were adopted.

7. Budgets are prepared and adopted on the cash basis of accounting.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

E. Property Taxes

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on October 1 and tax bills are mailed to taxpayers in November, at which time they are payable. All unpaid property taxes become delinquent as of January 1, of the following year.

The assessed valuation of the tangible taxable property, included within the County's boundaries for the calendar year 2010 and 2009, for purposes of taxation was:

	2010	2009
Real Estate	$ 197,325,760	$ 194,946,820
Personal Property	70,325,131	68,777,902
Railroad and Utilities	17,026,270	14,509,473
	$ 284,677,161	$ 278,234,195

During 2010 and 2009, the County Commission approved a $.1036 and $.1220, respectively, tax levy per $100 of assessed valuation of tangible taxable property for the calendar year 2010 and 2009, for purposes of County taxation, as follows:

	2010	2009
General Revenue Fund	$ .0536	$ .0720
Senior Citizens Service Fund	.0500	.0500
	$ .1036	$ .1220

F. Cash Deposits and Investments

Deposits and investments are stated at cost, which approximates market. Cash balances for all the County Treasurer Funds are pooled and invested to the extent possible. Interest earned from such investments is allocated to each of the funds based on the funds' average daily cash balance. Cash equivalents include any instruments with an original maturity of ninety days or less. State law authorizes the deposit of funds in banks and trust companies or the investment of funds in bonds or treasury certificates of the United States, other interest bearing obligations guaranteed as to both principal and interest by the United States, bonds of the State of Missouri or other government bonds, or time certificates of deposit, provided, however, that no such investment shall be purchased at a price in excess of par. Funds in the form of cash on deposit or time certificates of deposit are required to be insured by the Federal Deposit Insurance Corporation (FDIC) or collateralized by authorized investments held in the County's name at third-party banking institutions. Details of these cash balances are presented in Note II.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (concluded)

G. Interfund Transactions

During the course of operations, numerous transactions occur between individual funds for goods provided or services rendered. These receivables and payables, if applicable, are eliminated due to reporting the financial statements on the regulatory basis of accounting.

Legally required transfers are reported as “transfers in” by the recipient fund and as “transfers out” by the disbursing fund.

II. DEPOSITS AND INVESTMENTS

The County maintains a cash and temporary investment pool that is available for use by all funds. Deposits with maturities greater than three months are considered investments. Each fund type's portion of this pool is displayed as "Cash and Equivalents" under each fund's caption.

Deposits - Missouri statutes require that all deposits with financial institutions be collateralized in an amount at least equal to uninsured deposits. At December 31, 2010 and 2009, the carrying amount of the County's deposits was $2,341,111.16 and $2,431,814.69, the bank balance was $11,546,916.47 and $10,579,414.88 respectively. As of December 31, 2010 and 2009, 100% of the County’s investments were guaranteed by the U. S. Government.

SUMMARY OF CARRYING VALUES

The carrying values of deposits and investments shown above are included in the financial statements at December 31, 2010, as follows:

Included in the following fund financial statement captions:

Statements of Receipts, Disbursements and Changes in Cash and Investments:		
Deposits	$	1,691,111.16
Investments		650,000.00
Total Deposits & Investments as of December 2010	$	2,341,111.16

The carrying values of deposits and investments at December 31, 2009, are as follows:

Included in the following fund financial statement captions:

Statements of Receipts, Disbursements and Changes in Cash and Investment Balances		
Deposits	$	1,381,814.69
Investments		1,050,000.00
Total Deposits & Investments as of December 31, 2009	$	2,431,814.69

II. DEPOSITS AND INVESTMENTS (continued)

Custodial Credit Risk – Deposits

For a deposit, custodial credit risk is the risk that in the event of a bank failure, the government's deposits may not be returned to it. The County's investment policy does include custodial credit risk requirements. The County's deposits were not exposed to custodial credit risk for the year end December 31, 2010 and 2009.

Custodial Credit Risk – Investments

Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government, and are held by the party who sold the security to the County or its agent but not in the government's name. The County does have a policy for custodial credit risk relating to investments.

All investments, evidenced by individual securities, are registered in the name of the County or of a type that are not exposed to custodial credit risk.

Investment Interest Rate Risk

Investment interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The County does have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

Concentration of Investment Credit Risk

Concentration of credit risk is required to be disclosed by the County for any single investment that represents 5% or more of total investments (excluding investments issued by or explicitly guaranteed by the U.S. Government, investments in mutual funds, investments in external investment pools and investments in other pooled investments). The County has a policy in place to minimize the risk of loss resulting from over concentration of assets in specific maturity, specific issuer or specific class of securities. The County's deposits were not exposed to concentration of investment credit risk for the year end December 31, 2010 and 2009.

III. LONG-TERM DEBT

The County issued Certificates of Participation to finance the construction of a detention center. The Certificates of Participation are solely payable from rents paid by the County to the trustee under the lease purchase agreement. The County's obligations under the lease purchase agreements do not extend beyond the amount budgeted for any respective fiscal year. The County has the option to purchase the trustee's interest in the leased property on any date at an amount necessary to provide for the rent payments on each rent payment date through the end of the leases. The Certificates of Participation are secured by an interest in the leased property. Certificates of participation payable at December 31, 2010 and 2009, are as follows:

As of December 31, 2010:	
$10,845,000 - 2009 Series Certificates of Participation, due in varying installments through 2029, interest rates ranging from 2.5% - 5.375%	$10,450,000
Certificates of Participation Issued	-
Certificates of Participation Retired	(325,000)
Certificates of Participation Payable as of December 31, 2010	$10,125,000
As of December 31, 2009:	
Certificates of Participation Payable as of January 1, 2009	-
Certificates of Participation Issued $10,845,000 - 2010 Series Certificates of Participation, due in varying instatements through 2029, interest rates ranging from 2.5% - 5.375%	$10,450,000
Certificates of Participation Retired	-
Certificates of Participation as of December 31, 2009	$10,450,000

III. LONG-TERM DEBT (Continued)

The annual requirements to amortize all bonds outstanding as of December 31, 2010, including interest payments are as follows:

Fiscal Year Ending June 30,	Principal	Interest	Total
2011	$ 325,000.00	$ 442,750.00	$ 767,750.00
2012	350,000.00	434,625.00	784,625.00
2013	375,000.00	425,525.00	800,525.00
2014	375,000.00	415,025.00	790,025.00
2015	400,000.00	403,400.00	803,400.00
2016-2020	2,275,000.00	1,786,987.50	4,061,987.50
2021-2026	3,650,000.00	1,408,575.00	5,058,575.00
2027-2029	2,375,000.00	256,287.50	2,631,287.50
Totals	$ 10,125,000.00	$ 5,573,175.00	$ 15,698,175.00

The annual requirements to amortize all bonds outstanding as of December 31, 2009, including interest payments are as follows:

Fiscal Year Ending June 30,	Principal	Interest	Total
2010	$ 325,000.00	$ 450,875.00	$ 775,875.00
2011	325,000.00	442,750.00	767,750.00
2012	350,000.00	434,625.00	784,625.00
2013	375,000.00	425,525.00	800,525.00
2014	375,000.00	415,025.00	790,025.00
2015-2019	2,175,000.00	1,868,425.00	4,043,425.00
2020-2025	3,450,000.00	1,570,225.00	5,020,225.00
2026-2029	3,075,000.00	416,600.00	3,491,600.00
Totals	$ 10,450,000.00	$ 6,024,050.00	$ 16,474,050.00

CAPITAL LEASE:

Henry County entered into a lease-purchase agreement with Ford Motor Credit Company for six 2008 Chevrolet Impala police sedans in November 2007. Initial term is 36 months. Henry County also entered into a lease-purchase agreement with Security Leasing Services for records management software in January 2008. Initial term is 36 months. The Ford Motor Credit and Security Leasing Services lease-purchase agreements were paid off as of December 31, 2010.

III. LONG-TERM DEBT (Concluded)

The following is a schedule of future minimum lease payments at December 31, 2009:

	FORD	SECURITY LEASING	TOTAL
2010	20,330.72	10,940.28	31,271.00
2011	-	-	-
	$ 20,330.72	$ 10,940.28	$ 31,271.00

IV. INTERFUND TRANSFERS

Transfers between funds for the years ended December 31, 2010 and 2009 are as follows:

	2010		2009	
	Transfers In	Transfers Out	Transfers In	Transfers Out
General Fund	$ 54,500.00	$ 150,687.00	$ 106,000.00	$ 113,858.00
Special Road and Bridge Fund	-	50,000.00	-	50,000.00
Central Emergency Communications Fund	277,500.00	-	290,000.00	-
Corp of Engineers Fund	7,400.00	-	5,700.00	6,000.00
Assessment Fund	23,519.00	-	-	-
Enhanced 911 Fund	-	187,500.00	-	200,000.00
Victim's Advocate Fund	6,550.00		-	
Tri-County Child Support Fund	5,060.00	-	-	
Election Service Fund	-	4,500.00	-	
Local Use Tax Fund	-	-	-	50,000.00
Sheriff Special Project Fund	18,158.00	-	18,158.00	-
TOTAL	**$** 392,687.00	**$** 392,687.00	**$** 419,858.00	**$** 419,858.00

IV. INTERFUND TRANSFERS (Concluded)

Transfers are used to (1) move receipts from the fund that statute or budget requires to collect them to the fund that statute or budget requires to disburse them, and (2) use unrestricted receipts in the General Fund to finance various programs accounted for in other funds in accordance with budgetary authorizations.

V. COUNTY EMPLOYEES' RETIREMENT FUND (CERF)

The County Employees' Retirement Fund was established by the State of Missouri to provide pension benefits for County officials and employees.

A. Plan Description

The Retirement Fund is a cost-sharing multiple employer defined benefit pension plan covering any county elective or appointed officer or employee whose performance requires the actual performance of duties during not less than (1,000) one thousand hours per calendar year in each county of the state, except for any city not within a county and any county of the first classification having a charter form of government. It does not include county prosecuting attorneys covered under Sections 56.800 to 56.840, RSMo, circuit clerks and deputy circuit clerks covered under the Missouri State Retirement System, county sheriffs covered under Sections 57.949 to 57.997, RSMo and certain personnel not defined as an employee per Section 50.1000(8), RSMo. The Fund was created by an act of the legislature and was effective August 28, 1994. The general administration and the responsibility for the proper operation of the fund and the investment of the fund are vested in a board of directors of nine persons.

B. Pension Benefits

Beginning January 1, 1997, employees attaining the age of sixty-two years may retire with full benefits with eight or more years of creditable service. The monthly benefit for County Employees is determined by selecting the highest benefit calculated using three different prescribed formulas (flat-dollar formula, targeted replacement ratio formula, and prior plan's formula). A death benefit of $10,000 will be paid to the designated beneficiary of every active member upon his or her death.

Upon termination of employment, any member who is vested is entitled to a deferred annuity, payable at age sixty-two. Early retirement at age fifty-five with reduced benefit is allowed for the law enforcement, all other departments in the county the age is sixty.

Any member with less than eight years of creditable service forfeits all rights in the fund but will be paid his or her accumulated contributions.

The County Employees' Retirement Fund issues audited financial statements. Copies of these statements may be obtained form the Board of Directors of CERF by writing to CERF, P.O. Box 2271, 2121 Schotthill Road, Jefferson City, MO 65101, or by calling 1-573-632-9203.

V. COUNTY EMPLOYEES' RETIREMENT FUND (CERF) (Concluded)

C. Funding Policy

In accordance with State Statutes, the Plan is funded through various fees collected by counties and remitted to the CERF. Eligible employees hired before February 2002 have an option to contribute 2% of their annual salary, while employees hired after February 2002 are required to contribute 4% of their annual salary in order to participate in the CERF. During 2010 and 2009, the County collected and remitted to CERF, employee contributions of approximately $119,276.86 and $107,007.73, respectively, for the years then ended.

VI. PROSECUTING ATTORNEY RETIREMENT FUND

In accordance with state statute Chapter 56.807 RSMo, the County contributes monthly to the Missouri Office of Prosecution Services for deposit to the credit of the Missouri Prosecuting Attorneys and Circuit Attorney Retirement System Fund. Once remitted, the State of Missouri is responsible for administration of this plan. The County has contributed $2,244 and $2,244, respectively, for the years ended December 31, 2010 and 2009.

VII. POST EMPLOYMENT BENEFITS

The County does provide post-employment benefits including, as mandated, the Consolidated Omnibus Budget Reconciliation Act (COBRA). The requirements established by COBRA are fully funded by employees who elect coverage under the Act, and no direct costs are incurred by the County. Retirees may remain on the health insurance plan until they are Medicare eligible. If an employee has over 25 years of service with the County, the County will continue to pay the same portion of health insurance that they paid before the person retired, until the person becomes Medicare eligible.

VIII. CLAIMS COMMITMENTS AND CONTINGENCIES

A. Litigation

The County is involved in pending litigation at December 31, 2010.

B. Compensated Absences

The County provides employees with up to two weeks of paid vacation based upon the number of years of continuous service. Vacation days do not carry forward if they are unused. Upon termination from county employment, an employee is reimbursed for any unused vacation days. Employees accrue one sick day per month. The county allows employees to carry forward six days a year to a maximum of thirty days. Upon termination from county employment, an employee is reimbursed for half of unused sick leave ,except if the employee has not worked in the county for ten years. These have not been subjected to auditing procedures.

VIII. CLAIMS COMMITMENTS AND CONTINGENCIES (Concluded)

C. Federal and State Assisted Programs

The County has received proceeds from several federal and state grants. Periodic audits of these grants are required and certain costs may be questioned as inappropriate expenditures under the grant agreements. Such audits could result in the refund of grant monies to the grantor agencies. Management believes that any required refunds, if determined necessary, will be immaterial. No provision has been made in the accompanying financial statements for the potential refund of grant monies.

IX. OTHER RETIREMENT PLAN

Henry County does not participate in the Missouri Local Government Employees' Retirement System. Contributions to a voluntary plan are paid by a voluntary deduction from employees' salary. These contributions qualify under the Internal Revenue Code and are tax exempt. These contributions are then remitted to Pepco who administers the 457 Plan. Employee contributions were $1,440.00 and $1,440.00 for the years 2010 and 2009, respectively.

X. RISK MANAGEMENT

The County is exposed to various risks of losses related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees; and natural disasters, and has established a risk management strategy that attempts to minimize losses and the carrying costs of insurance. There have been no significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years.

The County is also a member of the Missouri Rural Services Workers Compensation Insurance Trust. The County purchases workers' compensation insurance through this Fund, a non-profit corporation established for the purpose of providing insurance coverage for Missouri counties. The Fund is self-insured up to $1,000,000 per occurrence and is reinsured up to the statutory limit through excess insurance.

XI. ACCOUNTING CHANGE

For the years ended December 31, 2010 and December 31, 2009, the County has elected to change its accounting method from a modified cash basis to the regulatory basis of accounting. This basis recognizes assets, liabilities, fund balance, receipts, and disbursements when they result from cash transactions with a provision for investments and settlements pending (if applicable). The regulatory basis differs from the accounting principles generally accepted in the United States of America and is described in Note I of the notes to the financial statements.

XII. SUBSEQUENT EVENTS

There were no subsequent events to report as of December 31, 2010.

SUPPLEMENTARY SCHEDULES AND AUDITOR'S REPORT

STATE COMPLIANCE SECTION

SCHEDULE OF STATE FINDINGS

A. For the year ended December 31, 2010, funds that had actual expenditures exceed those budgeted include: pa bad check, drug abuse resistance, corp of engineers, federal grant, sheriff special project, inmate security and victims advocate.

B. For the year ended December 31, 2009, funds that had actual expenditures exceed those budgeted include: letf, prosecuting attorney's delinquent tax, victims of domestic violence, drug abuse resistance, corp of engineers, federal grant, sheriff special project and inmate security.

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the County Commission
The County of Henry, Missouri

We have audited the financial statements of the County of Henry ("County"), Missouri, as of and for the years ended December 31, 2010 and December 31, 2009, and have issued our report thereon dated September 15, 2011. The financial statements were prepared using accounting practices prescribed or permitted by Missouri law, which differ from accounting principles generally accepted in the United States of America. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the County's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the County's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the County's internal control over financial reporting.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over financial reporting that might be deficiencies, significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above. However, we identified certain deficiencies in internal control over financial reporting, described in the accompanying schedule of findings and questioned costs that we consider to be significant deficiencies in internal control over financial reporting. (FS 10/09-01, FS 10/09-02, FS 10/09-03 and FS 10/09-04) A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the County's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

We noted certain matters that we reported to management of the County in a separate letter dated September 15, 2011.

The County's responses to the findings identified in our audit are described in the accompanying schedule of findings and questioned costs. We did not audit the County's responses and, accordingly, we express no opinion on them.

This report is intended solely for the information and use of the County Commission, County Officeholders, Missouri State Auditor, the Federal awarding agencies and pass-through entities and is not to be and should not be used by anyone other than those specified parties.

REPORT ON COMPLIANCE WITH REQUIREMENTS THAT COULD HAVE A DIRECT AND MATERIAL EFFECT ON EACH MAJOR PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE IN ACCORDANCE WITH OMB CIRCULAR A-133

Independent Auditor's Report

To The County Commission
The County of Henry
Clinton, Missouri

Compliance

We have audited the County of Henry's ("County") compliance with the types of compliance requirements described in the OMB *Circular A-133 Compliance Supplement* that could have a direct and material effect on each of the County's major federal programs for the years ended December 31, 2010 and December 31, 2009. The County's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs. Compliance with the requirements of laws, regulations, contracts, and grants applicable to each of its major federal programs is the responsibility of the County's management. Our responsibility is to express an opinion on the County's compliance based on our audit.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations.* Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the County's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination of the County's compliance with those requirements.

In our opinion, the County complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the years ended December 31, 2010 and December 31, 2009. However, the results of our auditing procedures disclosed instances of noncompliance with those requirements, which are required to be reported in accordance with OMB Circular A-133 and which are described in the accompanying schedule of findings and questioned costs as items SA 10/09-01 and SA 10/09-02.

Internal Control Over Compliance

Management of the County is responsible for establishing and maintaining effective internal control over compliance with the requirements of laws, regulations, contracts, and grants applicable to federal programs. In planning and performing our audit, we considered the County's internal control over compliance with the requirements that could have a direct and material effect on a major federal program to determine the auditing procedures for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the County's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A material *weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be deficiencies, significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over compliance that we consider to be *material weaknesses*, as defined above. However, we identified certain deficiencies in internal control over compliance that we consider to be significant deficiencies as described in the accompanying schedule of findings and questioned costs as items: SA 10/09-01 and SA 10/09-02. A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe that a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Management's responses to the findings indentified in our audit are described in the accompany schedule of findings and questioned costs. We did not audit management's responses and, accordingly, we express no opinion on the responses.

This report is intended solely for the information and use of management, the County Commission, County Officeholders, Missouri State Auditor, others within the entity, other auditing agencies, and federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

NOTE 1 – BASIS OF PRESENTATION

A. Purpose of Schedule and Reporting Entity

The accompanying Schedule of Expenditures of Federal Awards has been prepared to comply with the requirements of OMB Circular A-133. This circular requires a schedule that provides total federal awards expended for each major program and the Catalog of Federal Domestic Assistance (CFDA) number or other identifying number when the CFDA information is not available.

The schedule includes all federal awards administered by Henry County, Missouri.

B. Basis of Presentation

OMB Circular A-133 includes these definitions, which govern the contents of the schedule:

*Federal financial assistanc*e means assistance that non-Federal entities receive or administer in the form of grants, loans, loan guarantees, property (including donated surplus property), cooperative agreements, interest subsidies, insurance, food commodities, direct appropriations, and other assistance, but does not include amounts received as reimbursement for services rendered to individuals.

Federal award means Federal financial assistance and Federal cost-reimbursement contracts that non-Federal entities receive directly from Federal awarding agencies or indirectly from pass-through entities. It does not include procurement contracts, under grants or contracts, used to buy goods or services from vendors.

Accordingly, the schedule includes expenditures of both cash and noncash awards.

C. Basis of Accounting

The schedule is presented on the regulatory basis of accounting, which recognizes amounts only when disbursed in cash.

NOTE 2 – SUBRECIPIENTS

The County provided no federal awards to subrecipients during the years ended December 31, 2010 and 2009.

THE COUNTY OF HENRY
CLINTON, MISSOURI
SCHEDULE OF FINDINGS AND QUESTIONED COSTS
YEARS ENDED DECEMBER 31, 2010 AND 2009

I. SUMMARY OF AUDITOR'S RESULTS

A. Financial Statements

1. Type of auditor's report issued: Unqualified - Regulatory Basis

2. Internal control over financial reporting:

a. Material weakness(es) identified?	2010 ___	Yes	X No
	2009 ___	Yes	X No
b. Significant deficiencies identified?	2010 X	Yes	___ None Reported
	2009 X	Yes	___ None Reported

3. Noncompliance material to financial statements noted?

	2010 ___	Yes	X No
	2009 ___	Yes	X No

B. Federal Awards

1. Internal control over major programs:

a. Material weakness(es) identified?	2010 ___	Yes	X No
	2009 ___	Yes	X No
b. Significant deficiencies identified?	2010 X	Yes	___ None Reported
	2009 X	Yes	___ None Reported

2. Type of auditor's report issued on compliance for major programs:

2010 - Unqualified

2009 - Unqualified

3. Any audit findings disclosed that are required to be reported in accordance with section 510 (a) of *Circular A-133*?

	2010 X	Yes	___ No
	2009 X	Yes	___ No

I. SUMMARY OF AUDITOR'S RESULTS (concluded)

B. Federal Awards (concluded)

4. Identification of major programs:

Year	CFDA Number(s)	Name of Federal Program or Cluster
2010/2009	15.226	Payment In Lieu of Taxes
2010/2009	20.205	Highway Planning and Construction
2010/2009	93.563	Child Support Enforcement

5. Dollar threshold used to distinguish between type A and type B programs: $ 300,000

6. Auditee qualified as low-risk auditee? 2010 ___ Yes X No

2009 ___ Yes X No

II. FINANCIAL STATEMENT FINDINGS

FS 10/09-01 Criteria: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, under Statement on Auditing Standards (SAS) No. 115, Communicating Internal Control Related Matters Identified in an Audit, which is effective for periods ending on or after December 15, 2009, conditions necessitating the entity's auditor to provide such assistance is at least indicative of a significant deficiency. SAS No. 115 supersedes SAS No. 112.

Condition: During the current year, auditors of the County assisted with the preparation of the financial statements and the notes to financial statements.

Context: During discussions with management, we noted that we will be assisting the County with the preparation of their audited financial statements and footnotes.

Effect: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, SAS 115 indicates that conditions necessitate the entity's auditor to provide such assistance is at least indicative of a significant deficiency in internal control over financial reporting.

Cause: Management did not prepare the financial statements or the notes to financial statements.

II. FINANCIAL STATEMENT FINDINGS (continued)

FS 10/09-01 Recommendation: Due to the changing standards, the County may wish to consider alternatives available that would eliminate this situation.

Views of responsible officials and planned corrective actions: The County is currently complying with all state statutes relating to the preparation of the financial statements with the preparation of the County's annual budget document and annual Financial Statement.

FS 10/09-02 Criteria: Statement on Auditing Standards (SAS) No. 115, *Communicating Internal Control Related Matters Identified in an Audit*, which is effective for periods ending on or after December 15, 2009, considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Condition: Documentation of the County's internal controls has not been prepared.

Context: During discussions with management, we noted that internal control documentation has not been prepared.

Effect: SAS 115 considers inadequate documentation of the components of internal control to be at least a significant deficiency. Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: The County did not prepare the required documentation.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Views of responsible officials and planned corrective actions: The County is currently complying with all state statutes relating to the preparation of the financial statements with the preparation of the County's annual budget document and annual Financial Statement. The County will consider the auditor's recommendation.

II. FINANCIAL STATEMENT FINDINGS (continued)

FS 10/09-03 Criteria: Antifraud programs and controls are the policies and procedures put in place by an organization to help ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Condition: During our audit, we noted there is no formal fraud risk assessment in place.

Context: During discussions with management, we noted there were no formal fraud risk assessments implemented.

Effect: Lack of an appropriate risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identified risks and mitigating controls.

Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze and manage these risks.

Views of responsible officials and planned corrective actions: The County is willing to review this recommendation with the state auditor and the contract auditor to determine various risk assessments.

FS 10/09-04 Criteria: There are normally twelve paid holidays per year. An employee who is regularly scheduled to work on a paid holiday is paid at his/her regular rate for the time actually worked and is entitled to not more than twelve hours of pay at time and half.

Condition: During our audit, we noted that the deputy sheriffs were being paid more than the salaries approved by the County Commissioners.

Context: During discussions with the Sheriff's office, we noted that deputy sheriffs were being paid more than the salaries approved by the County Commissioners.

Effect: The sheriff's office paid deputies an additional amount each pay period for holidays whether the deputies worked or not.

Cause: Management has not followed the procedures put in place by the County Commission.

Recommendation: We recommend that the County resolve this issue with the Sheriff's Office.

II. FINANCIAL STATEMENT FINDINGS (concluded)

Views of responsible officials and planned corrective actions: The County has begun to process paid holidays for the Sheriff's Department at a regular time rate.

III. FEDERAL AWARD FINDINGS AND QUESTIONED COSTS

The following findings, recommendations, and questioned costs are the results of the single audit of Henry County, Missouri for fiscal years ended December 31, 2010 and 2009. Each finding is referenced with a two-digit number representing the fiscal years audited, an "SA" to indicate that it is a single audit finding, and a sequential number. The findings are presented by federal program and are classified according to federal and state department, type of compliance requirement, category of internal control weakness, and category of noncompliance.

A. Category of Internal Control Weakness

If the finding represents a weakness in internal control, one of the following designations will appear:

1. Significant Deficiency: A significant deficiency in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

2. Material Weakness: A material weakness in internal control over compliance is a deficiency, or combination of deficiencies in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis.

B. Category of Noncompliance Findings

If the finding represents an instance of noncompliance, one of the following designations will appear:

1. Material Noncompliance: A material noncompliance finding is a finding related to a major federal program which discusses conditions representing noncompliance with federal laws, regulations, contracts, or grants, the effects of which have a material effect in relation to a type of compliance requirement or audit objective identified in OMB Circular A-133 *Compliance Supplement*.

2. Questioned Cost Finding: A questioned cost finding is a finding which discusses known or likely questioned costs that are greater than $10,000 for a type of compliance requirement, unless the conditions giving rise to the questioned costs are otherwise reported as a material noncompliance finding.

III. FEDERAL AWARD FINDINGS AND QUESTIONED COSTS (continued)

C. Federal Award Findings and Questioned Costs

SA 10/09-01	Federal Grantor:	U.S. Department of Interior	Department of Social Services
Other Information	Pass-Through Grantor:	N/A	Tri-County
Significant Deficiency	Federal CFDA Number:	15.226	93.563
	Program Title:	PILT - Payment in Lieu of Taxes	Child Support Enforcement

Information on the federal program: The Schedule of Expenditures of Federal Awards contained errors.

Criteria: OMB Circular A-133 requires the auditee to prepare the Schedule of Expenditures of Federal Awards.

Condition: Through auditing procedures, we were able to correct and support the amounts reported on the Schedule of Expenditures of Federal Awards (SEFA). Prior to these corrections, The Schedule of Expenditures of Federal Awards (SEFA) was prepared with incorrect financial information.

Questioned Costs: Not applicable

Context: During the audit of federal programs we discovered a number of errors related to the Schedule of Expenditures of Federal Awards (SEFA).

Effect: No control monitoring or control over federal expenditures reporting, as required by *Governmental Accounting and Financial Reporting Standards.*

Cause: Adequate emphasis was not placed of the preparation of the Schedule of Expenditures of Federal Awards (SEFA).

Recommendation: The County should implement procedures to ensure that the SEFA is prepared in accordance with federal requirements. The County should continue in its efforts to establish an accounting system that will capture grant transactions in a manner sufficient to readily report the necessary information required on the SEFA. The cost center listing that identifies federal expenditures should be defined and cross matched in a table that is updated monthly by a designee of the County Clerk's Office.

Views of responsible officials and planned corrective actions: The County will ensure that the Schedule of Expenditures of Federal Awards (SEFA) is correct.

III. FEDERAL AWARD FINDINGS AND QUESTIONED COSTS (concluded)

C. Federal Award Findings and Questioned Costs (concluded)

SA 10/09-02	Federal Grantor:	Department of Social Services
Other Information	Pass-Through Grantor:	Tri-County
Significant Deficiency	Federal CFDA Number:	93.563
	Program Title:	Child Support Enforcement

Information on the federal program: The County was not compliant with the requirements of the Child Support Enforcement program.

Criteria: The salaries reported in the Child Support Enforcement program exceeded the approved salaries set by the Commission. This was below $10,000 and was not considered to be a material weakness, but is a significant deficiency.

Condition: Through correspondence with the County we became aware that the spending and reporting guidelines of the Child Support Enforcement program were not being met.

Questioned Costs: Not applicable

Context: We discovered the above issues during the audit of this program.

Effect: The County is non-compliant with the guidelines of this program. This may cause the County to be ineligible to participate in this program for future years.

Cause: The County had approved set salaries for the Child Support Enforcement program but they were not followed.

Recommendation: The County should contact the administrator of the program to ensure compliance with the budget.

Views of responsible officials and planned corrective actions: The County will ensure that the requirements of this program are met for future years.

THE COUNTY OF HENRY
CLINTON, MISSOURI
SUMMARY SCHEDULE OF PRIOR YEAR FINDINGS AND QUESTIONED COSTS
YEARS ENDED DECEMBER 31, 2010 AND 2009

I. PRIOR YEAR FINANCIAL STATEMENT FINDINGS

07/08-01

Criteria: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, under Statement on Auditing Standards (SAS) No. 112, Communicating Internal Control Related Matters in an Audit, which is effective for periods ending on or after December 15, 2006, conditions necessitating the entity's auditor to provide such assistance is at least indicative of a significant deficiency.

Condition: During the current year, auditors of the County assisted with the preparation of the financial statements and the notes to financial statements.

Effect: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, SAS 112 indicates that conditions necessitate the entity's auditor to provide such assistance is at least indicative of a significant deficiency in internal control over financial reporting.

Cause: Due to the short time frame for the implementation of the new SAS requirements, management did not prepare the financial statements or the notes to financial statements.

Recommendation: Due to the changing standards, the County may wish to consider alternatives available that would eliminate this situation.

Management's Response: The County is currently complying with all state statutes relating to the preparation of the financial statements with the preparation of the county's annual budget document and annual financial statement. The county was not aware of new SAS requirements and questions if county governments of our size are required to comply with SAS standards.

Auditor's Evaluation: The County has not implemented appropriate corrective action in the current year being audited. See financial statement finding FS 10/09-01.

07/08-02

Criteria: Statement on Auditing Standards (SAS) No. 112, *Communicating Internal Control Related Matters in an Audit*, which is effective for periods ending on or after December 15, 2006, considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Condition: Documentation of the County's internal controls has not been prepared.

Effect: The new SAS 112 considers inadequate documentation of the components of internal control to be at least a significant deficiency. Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: Due to the short time frame for the implementation of the new SAS requirements, the County did not prepare the required documentation.

I. PRIOR YEAR FINANCIAL STATEMENT FINDINGS (Continued)

07/08-02 Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Management's Response: The County is willing to review this recommendation with the state auditor and the contract auditor to further understand the COSO internal controls. The county was not aware of new SAS requirements and questions if county governments of our size are required to comply with SAS standards.

Auditor's Evaluation: The County has not implemented appropriate corrective action in the current year being audited. See financial statement finding FS 10/09-02.

07/08-03 Criteria: Antifraud programs and controls are the policies and procedures put in place by an organization to help ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Condition: During our audit, we noted there is no formal fraud risk assessment in place.

Effect: Lack of an appropriate risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identified risks and mitigating controls.

Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze and manage these risks.

Management Response: The County is willing to review this recommendation with the state auditor and the contract auditor to determine various risk assessments.

Auditor's Evaluation: The County has not implemented appropriate corrective action in the current year being audited. See financial statement finding FS 10/09-3.

I. PRIOR YEAR FINANCIAL STATEMENT FINDINGS (Concluded)

07/08-04

Criteria: The Sheriff operates a commissary and inmate account for inmates.

Condition: During our audit, we noted the Sheriff used monies deposited into the inmate and commissary account to pay operating expenses of his office and bank reconciliations are not being prepared on a timely basis. Supporting documentation was not retained for numerous purchases.

Effect: Lack of appropriate supporting documentation, untimely bank reconciliations and transactions that do not appear to be prudent or necessary use of public or inmate funds are indicative of a significant deficiency in internal control over financial reporting.

Cause: The Sheriff has not retained supporting documentation for various expenditures, prepared untimely bank reconciliations and has made purchases that do not appear to be prudent or necessary use of public or inmate funds.

Recommendation: Checks submitted for signature should, in every case, be accompanied by the supporting invoices which should be initialed to reflect final approval for payment. Bank reconciliations should be prepared on a timely basis. Not reconciling the accounts on a monthly basis means that errors or other problems might not be recognized and resolved on a timely basis. The inmate and commissary account should only be used for related expenditures, not office operating expenditures.

Management's Response: The Sheriff has begun to implement procedures going forward to obtain proper documentation for check disbursements, to prepare timely bank reconciliations and to disburse payments out of the proper accounts.

Auditor's Evaluation: The County has implemented appropriate corrective action in the current year being audited.

THE COUNTY OF HENRY
CLINTON, MISSOURI
SUMMARY SCHEDULE OF PRIOR YEAR FINDINGS AND QUESTIONED COSTS
YEARS ENDED DECEMBER 31, 2010 AND 2009

II. PRIOR YEAR FEDERAL AWARD FINDINGS

FINDING NUMBER	TYPE OF FINDING / QUESTIONED COSTS	FINDINGS AND RECOMMENDATIONS
SA 07/08-1	Other Information: Significant Deficiency	**Findings:** Weakness in Control Over Expenditures In Compliance with Single Audit Requirements. The County did not properly maintain separate expense accounts to account for federal expenditures. To prepare the Schedule of Expenditures of Federal Awards (SEFA) report, the County used revenues instead of expenditures. Because the program is reimbursement in nature, revenues equal expenditures. **Recommendation:** The County should track all federal expenditures in the general ledger system by adding a grant code at the end of the account code. **Agency Response:** The County agrees with this finding. **Auditor's Evaluation:** This finding has been resolved by the County.

II. PRIOR YEAR FEDERAL AWARD FINDINGS (Continued)

FINDING NUMBER	TYPE OF FINDING / QUESTIONED COSTS	FINDINGS AND RECOMMENDATIONS
SA 07/08-2	Other Information: Significant Deficiency Procurement and Suspension and Debarment	**Findings:** Required contracting procedures were not followed. The County does not have procedures in place to ensure that it does not contract with prohibited parties in administering federal funds. As a result, there is an increased risk of federal funds being spent in violation of grant requirements. The Commissioners did not check the Excluded Parties List System maintained by the General Services Administration to verify that parties it contracted with were not on the prohibited list. However, we did not note any instances where the County actually contracted with prohibited parties. The OMB Circular A-133 Compliance Supplement and 41 CFR 105-71.135 prohibit entities from contracting with parties that are on the prohibited list. **Recommendation:** The County should implement procedures to ensure that parties they contract with are not on the prohibited list. **Agency Response:** The County agrees with this finding. **Auditor's Evaluation:** This finding has been resolved by the County.

II. PRIOR YEAR FEDERAL AWARD FINDINGS (Continued)

FINDING NUMBER	TYPE OF FINDING / QUESTIONED COSTS	FINDINGS AND RECOMMENDATIONS
SA 07/08-3	Other Information: Significant Deficiency	**Findings:** The Schedule of Expenditures of Federal Awards contained errors. Controls were not in place to ensure that the Schedule of Expenditures of Federal Awards (SEFA) was prepared in accordance with federal requirements. The OMB Circular A-133 requires that the SEFA provide total federal awards expended for each individual federal program. It states that the determination of when an award is expended should be based on when the activity related to the award occurs, such as when the expenditure takes place. The Schedule of Expenditures of Federal Awards (SEFA) was prepared with various errors. These errors are described below: 1. The SEFA schedule contained several incorrect CFDA numbers for federal programs. 2. Expenditures listed on the SEFA schedule submitted to the State Auditor's Office were incorrect. Revenue was used to prepare the SEFA instead of expenditures. Actual expenditures were not agreed to the general ledger. A revised SEFA was submitted to the State Auditor's Office, containing corrections for all errors described.

II. PRIOR YEAR FEDERAL AWARD FINDINGS (Concluded)

FINDING NUMBER	TYPE OF FINDING / QUESTIONED COSTS	FINDINGS AND RECOMMENDATIONS
		Recommendation: The County should implement procedures to ensure that the SEFA is prepared in accordance with federal requirements. The County should continue in its efforts to establish an accounting system that will capture grant transactions in a manner sufficient to readily report the necessary information required on the SEFA. The cost center listing that identifies federal expenditures should be defined and cross matched in a table that is updated monthly by a designee of the County Clerk's Office. **Agency Response:** The County agrees with this finding. **Auditor's Evaluation:** The County has not implemented appropriate corrective action in the current year being audited. See SA 10/09-01.

Daniel Jones
& Associates
CERTIFIED PUBLIC ACCOUNTANTS

MEMBERS OF
MISSOURI SOCIETY OF CPA'S
AMERICAN INSTITUTE OF CPA'S

To the Board of Commissioners
County of Henry

In planning and performing our audit of the financial statements of the County of Henry (County) as of and for the years ended December 31, 2010 and 2009, in accordance with auditing standards generally accepted in the United States of America, we considered the County's internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the County's internal control. Accordingly, we do not express an opinion on the effectiveness of the County's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be significant deficiencies or material weaknesses and, therefore, there can be no assurance that all such deficiencies have been identified. However, as discussed below, we identified certain deficiencies in internal control that we consider to be significant deficiencies.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency or combination of deficiencies in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. We did not identify any deficiencies in internal control that we consider to be material weaknesses.

A significant deficiency, is a deficiency or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the deficiencies in the County's internal control to be significant deficiencies as noted in section I.

Our comments concerning internal control and other material and significant matters are presented as follows:

I. Deficiencies Considered to be Significant
II. Changes Impacting Governmental Organizations
III. Information Required by Professional Standards

County of Henry's management has provided written responses to the comments in this report that were identified in our audit. These responses have not been subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on them.

This communication is intended solely for the information and use of the County Commission, County Officeholders, Missouri State Auditor and others within the County, and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

Daniel Jones & Associates

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT

FS 10/09-01

Criteria: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, under Statement on Auditing Standards (SAS) No. 115, Communicating Internal Control Related Matters Identified in an Audit, which is effective for periods ending on or after December 15, 2009, conditions necessitating the entity's auditor to provide such assistance is at least indicative of a significant deficiency. SAS No. 115 supersedes SAS No. 112.

Condition: During the current year, auditors of the County assisted with the preparation of the financial statements and the notes to financial statements.

Context: During discussions with management, we noted that we will be assisting the County with the preparation of their audited financial statements and footnotes.

Effect: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, SAS 115 indicates that conditions necessitate the entity's auditor to provide such assistance is at least indicative of a significant deficiency in internal control over financial reporting.

Cause: Management did not prepare the financial statements or the notes to financial statements.

Recommendation: Due to the changing standards, the County may wish to consider alternatives available that would eliminate this situation.

Views of responsible officials and planned corrective actions: The County is currently complying with all state statutes relating to the preparation of the financial statements with the preparation of the County's annual budget document and annual Financial Statement.

FS 10/09-02

Criteria: Statement on Auditing Standards (SAS) No. 115, *Communicating Internal Control Related Matters Identified in an Audit*, which is effective for periods ending on or after December 15, 2009, considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Condition: Documentation of the County's internal controls has not been prepared.

Context: During discussions with management, we noted that internal control documentation has not been prepared.

Effect: SAS 115 considers inadequate documentation of the components of internal control to be at least a significant deficiency. Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: The County did not prepare the required documentation.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT (continued)

Views of responsible officials and planned corrective actions: The County is currently complying with all state statutes relating to the preparation of the financial statements with the preparation of the County's annual budget document and annual Financial Statement. The County will consider the auditor's recommendation.

FS 10/09-03 Criteria: Antifraud programs and controls are the policies and procedures put in place by an organization to help ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Condition: During our audit, we noted there is no formal fraud risk assessment in place.

Context: During discussions with management, we noted there were no formal fraud risk assessments implemented.

Effect: Lack of an appropriate risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identified risks and mitigating controls.

Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze and manage these risks.

Views of responsible officials and planned corrective actions: The County is willing to review this recommendation with the state auditor and the contract auditor to determine various risk assessments.

FS 10/09-04 Criteria: There are normally twelve paid holidays per year. An employee who is regularly scheduled to work on a paid holiday is paid at his/her regular rate for the time actually worked and is entitled to not more than twelve hours of pay at time and half.

Condition: During our audit, we noted that the deputy sheriffs were being paid more than the salaries approved by the County Commissioners.

Context: During discussions with the Sheriff's office, we noted that deputy sheriffs were being paid more than the salaries approved by the County Commissioners.

Effect: The sheriff's office paid deputies an additional amount each pay period for holidays whether the deputies worked or not.

Cause: Management has not followed the procedures put in place by the County Commission.

Recommendation: We recommend that the County resolve this issue with the Sheriff's Office.

Views of responsible officials and planned corrective actions: The County has begun to process paid holidays for the Sheriff's Department at a regular time rate.

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT (continued)

Federal Award Findings and Questioned Costs

SA 10/09-01	Federal Grantor:	U.S. Department of Interior	Department of Social Services
Other Information	Pass-Through Grantor:	N/A	Tri-County
Significant Deficiency	Federal CFDA Number:	15.226	93.563
	Program Title:	PILT - Payment in Lieu of Taxes	Child Support Enforcement

Information on the federal program: The Schedule of Expenditures of Federal Awards contained errors.

Criteria: OMB Circular A-133 requires the auditee to prepare the Schedule of Expenditures of Federal Awards.

Condition: Through auditing procedures, we were able to correct and support the amounts reported on the Schedule of Expenditures of Federal Awards (SEFA). Prior to these corrections, The Schedule of Expenditures of Federal Awards (SEFA) was prepared with incorrect financial information.

Questioned Costs: Not applicable

Context: During the audit of federal programs we discovered a number of errors related to the Schedule of Expenditures of Federal Awards (SEFA).

Effect: No control monitoring or control over federal expenditures reporting, as required by *Governmental Accounting and Financial Reporting Standards.*

Cause: Adequate emphasis was not placed of the preparation of the Schedule of Expenditures of Federal Awards (SEFA).

Recommendation: The County should implement procedures to ensure that the SEFA is prepared in accordance with federal requirements. The County should continue in its efforts to establish an accounting system that will capture grant transactions in a manner sufficient to readily report the necessary information required on the SEFA. The cost center listing that identifies federal expenditures should be defined and cross matched in a table that is updated monthly by a designee of the County Clerk's Office.

Views of responsible officials and planned corrective actions: The County will ensure that the Schedule of Expenditures of Federal Awards (SEFA) is correct.

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT (concluded)

SA 10/09-02	Federal Grantor:	Department of Social Services
Other Information	Pass-Through Grantor:	Tri-County
Significant Deficiency	Federal CFDA Number:	93.563
	Program Title:	Child Support Enforcement

Information on the federal program: The County was not compliant with the requirements of the Child Support Enforcement program.

Criteria: The salaries reported in the Child Support Enforcement program exceeded the approved salaries set by the Commission. This was below $10,000 and was not considered to be a material weakness, but is a significant deficiency.

Condition: Through correspondence with the County we became aware that the spending and reporting guidelines of the Child Support Enforcement program were not being met.

Questioned Costs: Not applicable

Context: We discovered the above issues during the audit of this program.

Effect: The County is non-compliant with the guidelines of this program. This may cause the County to be ineligible to participate in this program for future years.

Cause: The County had approved set salaries for the Child Support Enforcement program but they were not followed.

Recommendation: The County should contact the administrator of the program to ensure compliance with the budget.

Views of responsible officials and planned corrective actions: The County will ensure that the requirements of this program are met for future years.

II. CHANGES IMPACTING GOVERNMENTAL ORGANIZATIONS

Governments frequently establish governmental audit requirements for entities to undergo an audit of their compliance with applicable compliance requirements. To address such governmental audit requirements, the Auditing Standards Board has issued Statement on Auditing Standards (SAS) No. 117, *Compliance Audits*, which supersedes SAS No. 74, *Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistanc*e. SAS No. 117 was primarily developed in response to the results of a federal study on the quality of audits performed under Office of Management and Budget Circular A-133, *Audits of States, Local Governments and Non-Profit Organizations* (also referred to as single audits), which showed that improvements were needed in many areas.

SAS No. 117 establishes standards and provides guidance on performing and reporting (in accordance with GAAS, *Government Auditing Standards*, and a governmental audit requirement that requires an auditor to express an opinion on compliance) on an audit of an entity's compliance with applicable compliance requirements of a governmental audit requirement. Examples of such engagements include single audits and audits performed under the U.S. Department of Housing and Urban Development (HUD) *Consolidated Audit Guide for Audits of HUD Programs.*

II. CHANGES IMPACTING GOVERNMENTAL ORGANIZATIONS (concluded)

SAS No. 117 updates SAS No. 74 to reflect changes in the compliance audit environment and incorporates the risk assessment standards. It requires the auditor to adapt and apply the AU sections of AICPA *Professional Standards* to a compliance audit and provides guidance on how to do so. It identifies the AU sections that are not applicable to a compliance audit, defines terms related to compliance audits and used in the SAS, and identifies the elements to be included in an auditor's report on a compliance audit. The SAS is effective for compliance audits for fiscal periods ending on or after June 15, 2010 with earlier application permitted.

III. INFORMATION REQUIRED BY PROFESSIONAL STANDARDS

Our Responsibilities under U.S. Generally Accepted Auditing Standards

As stated in our engagement letter dated April 25, 2011, our responsibility, as described by professional standards, is to express an opinion about whether the financial statements prepared by management with your oversight are fairly presented, in all material respects, in conformity with the regulatory basis of accounting. Our audit of the financial statements does not relieve you or management of your responsibilities.

In planning and performing our audit, we considered County of Henry's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinions on the financial statements and not to provide assurance on the internal control over financial reporting. We also considered internal control over compliance with requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance.

As part of obtaining reasonable assurance about whether the County's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit.

Planned Scope and Timing of the Audit

We performed the audit according to the planned scope and timing previously communicated to you in our meeting about planning matters on April 25, 2011.

Significant Audit Findings

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by the County of Henry are described in Note I to the financial statements. As described in Note X for the years ended December 31, 2010, and December 31, 2009, the County has elected to change its accounting method from a modified cash basis to the regulatory basis of accounting. This basis recognizes assets, liabilities, fund balance, receipts, and disbursements when they result from cash transactions with a provision for investments and settlements pending (if applicable). The regulatory basis differs from the accounting principles generally accepted in the United States of America and is described in Note I of the Notes to the financial statements. The new method of accounting presentation was implemented to conform with Missouri law. We noted no transactions entered into by the governmental unit during the year for which there is a lack of authoritative guidance or consensus. All significant transactions have been recognized in the financial statements in the proper period.

III. INFORMATION REQUIRED BY PROFESSIONAL STANDARDS (concluded)

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected.

The disclosures in the financial statements are neutral, consistent and clear. Certain financial statement disclosures are particularly sensitive because of their significance to financial statement users.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are trivial, and communicate them to the appropriate level of management. Management has corrected all such misstatements. In addition, none of the misstatements detected as a result of audit procedures and corrected by management were material, either individually or in the aggregate, to the financial statements taken as a whole.

Disagreements with Management

For purposes of this letter, professional standards define a disagreement with management as a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated September 15, 2011.

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the governmental unit's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards with management each year prior to retention as the governmental unit's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition to our retention.

During our testing we noted late fees on credit card statements. This was not considered to be a significant deficiency or a material weakness, but we consider it to be necessary to communicate to management.

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Lawrence County, Missouri

The Office of the State Auditor has contracted for an audit of the county's financial statements for the 2 years ended December 31, 2010, through the state Office of Administration, Division of Purchasing and Materials Management. A copy of this audit, performed by Cook & Hamlin, LLC, Certified Public Accountants, is attached.

INDEPENDENT AUDITORS' REPORT

To the County Commission and
Officeholders of Lawrence County, Missouri

We have audited the accompanying financial statements of the governmental activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of Lawrence County, Missouri, as of and for the years ended December 31, 2010 and 2009, which collectively comprise the County's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the County's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

As discussed in Note 1, Lawrence County, Missouri prepares its financial statements on the cash basis, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

In our opinion the financial statements referred to above present fairly, in all material respects, the respective financial position - cash basis of the governmental activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of Lawrence County, Missouri, as of December 31, 2010 and 2009, and the respective changes in financial position - cash basis, thereof for the years then ended in conformity with the basis of accounting described in Note 1.

In accordance with *Government Auditing Standards*, we have also issued our report dated July 15, 2011, on our consideration of Lawrence County, Missouri's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of

that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

Accounting principles generally accepted in the United States of America require that the budgetary comparison information on pages 33 through 75 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Lawrence County, Missouri has not presented the Management Discussion and Analysis (MD&A) that the Governmental Accounting Standards Board has determined is necessary to supplement, although not required to be a part of, the basic financial statements.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise Lawrence County, Missouri's financial statements as a whole. The combining and individual nonmajor fund financial statements are presented for purposes of additional analysis and are not a required part of the financial statements. The accompanying Schedule of Expenditures of Federal Awards is presented for purposes of additional analysis as required by U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, and is also not a required part of the financial statements of Lawrence County, Missouri. The combining and individual nonmajor fund financial statements and the Schedule of Expenditures of Federal Awards are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the County Commission and
Officeholders of Lawrence County, Missouri

We have audited the financial statements of the governmental activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of Lawrence County, Missouri as of and for the years ended December 31, 2010 and 2009, which collectively comprise Lawrence County, Missouri's basic financial statements and have issued our report thereon dated July 15, 2011 which was modified because the financial statements are prepared on the cash basis, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered Lawrence County, Missouri's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Lawrence County, Missouri's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of Lawrence County, Missouri's internal control over financial reporting.

Our consideration of internal control over financial reporting was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control over financial reporting that might be significant deficiencies, or material weaknesses and therefore, there can be no assurance that all deficiencies, significant deficiencies, or material weaknesses have been identified. However, as discussed below, we identified a certain deficiency in internal control over financial reporting that we consider to be a material weakness and other deficiencies that we consider to be significant deficiencies.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. We consider the deficiency described in the accompanying Schedule of Findings and Questioned Costs as item 10-1 to be a material weakness.

A *significant deficiency* is a deficiency, or combination of control deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the deficiencies described in the accompanying Schedule of Findings and Questioned Costs as items 10-2 and 10-3 to be significant deficiencies.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether Lawrence County, Missouri's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed an instance of noncompliance or other matters that is required to be reported under *Government Auditing Standards* and which is described in the accompanying Schedule of Findings and Questioned Costs as finding number 10-3.

Lawrence County, Missouri's responses to the findings identified in our audit are described in the accompanying Schedule of Findings and Questioned Costs. We did not audit Lawrence County, Missouri's responses and, accordingly, we express no opinion on them.

This report is intended solely for the information and use of the County Commission and Officeholders, and federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

LAWRENCE COUNTY, MISSOURI

NOTES TO THE BASIC FINANCIAL STATEMENTS

December 31, 2010 and 2009

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

As discussed further in Note 1.B, these financial statements are presented on the cash basis of accounting. This basis of accounting differs from accounting principles generally accepted in the United States of America (GAAP). Generally accepted accounting principles include all relevant Governmental Accounting Standards Board (GASB) pronouncements. In the government-wide financial statements and the fund financial statements for the proprietary funds, Financial Accounting Standards Board (FASB) pronouncements and Accounting Principles Board (APB) opinions issued on or before November 30, 1989, have been applied, to the extent they are applicable to the cash basis of accounting, unless those pronouncements conflict with or contradict GASB pronouncements, in which case GASB prevails.

A. Financial Reporting Entity:

The County's financial reporting entity is composed of the following:

Primary Government:	Lawrence County, Missouri

In determining the financial reporting entity, the County complies with the provisions of GASB Statement No. 14, *The Financial Reporting Entity.*

The County's reporting entity includes the County's governing board and the operations of all related organizations for which the County exercises financial oversight. Oversight responsibility is derived from the governmental unit's authority and includes, but is not limited to, financial interdependency, selection of governing authority, designation of management, ability to significantly influence operations and accountability for fiscal matters.

Component units are legally separate organizations for which the elected officials of the primary government are financially accountable. Financial accountable means the primary government is accountable for the component unit and the primary government is able to impose its will or the component unit may provide financial benefits or impose a burden on the primary government. In addition, component units can be other organizations for which the nature and significance of their relationship with the primary government are such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete.

The County is governed by a three member county commission and is a county of the 3rd class. As required by accounting principles generally accepted by the United States of America, the County has evaluated the above criteria to determine whether any other

entity meets the definition of a component unit and must be included in these financial statements. The component units discussed below are included in the County's reporting entity because of the significance of their operational or financial relationships with the County.

Developmentally Disabled Board

The Developmentally Disabled Board, which is governed by a board of directors appointed by the County Commission, provides disability services to the residents of Lawrence County. The Developmentally Disabled Board is included in the financial statements of the County as a component unit due to its financial relationship with the County.

Senior Services Board

The Senior Services Board, which is governed by a board of directors appointed by the County Commission, provides senior services for Lawrence County residents over the age of fifty-nine. The Senior Services Board is included in the financial statements of the County as a component unit due to its financial relationship with the County.

B. Basis of Presentation:

Government-Wide Financial Statements

The Statement of Net Assets and Statement of Activities display information about the reporting government as a whole. These statements include all funds of the County except for fiduciary funds. The statements distinguish between governmental and business-type activities. Governmental activities generally are financed through taxes, intergovernmental revenues, and other non-exchange revenues. Business-type activities are financed in whole or in part by fees charged to external parties for goods or services. For the years ended December 31, 2010 and 2009, the County had only governmental activities.

Fund Financial Statements

Fund financial statements of the reporting entity are organized into funds, each of which is considered to be a separate accounting entity. Each fund is accounted for by providing a separate set of self-balancing accounts that constitutes its assets, liabilities, fund equity, revenues, and expenditures/expenses. Funds are organized into two major categories: governmental and proprietary. The County also has fiduciary funds. An emphasis is placed on major funds within the governmental category. A fund is considered major if it is the primary operating fund of the County or meets the following criteria:

1. Total assets, liabilities, revenues, or expenditures/expenses of that individual governmental fund are at least 10 percent of the corresponding total for all funds of that category or type, and

2. Total assets, liabilities, revenues, or expenditures/expenses of the individual governmental fund are at least 5 percent of the corresponding total for all governmental funds.

The funds of the financial reporting entity are described below:

Governmental Funds

General Revenue Fund - The General Revenue Fund is the primary operating fund of the County and is always classified as a major fund. It is used to account for all activities except those legally or administratively required to be accounted for in other funds.

Special Revenue Funds - Special Revenue Funds are used to account for the proceeds of specific revenue sources that are either legally restricted to expenditures for specified purposes or designated to finance particular functions or activities of the County. The reporting entity includes the following Special Revenue Funds, which are reported as major funds:

Fund	Description
Special Road and Bridge Fund	This Fund as presented is used to account for the proceeds of specific revenue sources that are legally restricted to expenditures for road and bridge purposes.
Assessment Fund	This fund as presented was established as a result of Section 137.750, RSMo. The fund is used to account for all transactions surrounding the normal operating assessing function.
Judicial Sales Tax Fund	The Judicial Sales Tax Fund is used to account for the transactions arising from the receipts and disbursements of the County's Judicial Sales Tax.

Capital Improvements Fund is a major fund in 2010 and a nonmajor fund in 2009.

Capital Improvements Fund	The Capital Improvements Fund is used to account for the resources designated for capital improvements.

The reporting entity also includes the following Special Revenue Funds which are reported as nonmajor funds:

Fund	Description
Common Road I Fund	Accounts for resources restricted for highway and road improvements.

Fund	Description
Common Road II Fund	Accounts for resources restricted for highway and road improvements.
Prosecuting Attorney Bad Check Fund	Accounts for revenues and expenditures paid for recovering bad checks.
Sheriff Special Fund	Accounts for fees collected by the Sheriff's Department. The use of the proceeds is restricted to Sheriff's department.
Law Enforcement Restitution Fund	Accounts for revenues received and expenditures paid for the investigation, prevention and interventions of narcotics as set out in Section 50.550 and 50.565, RSMo.
Prosecuting Attorney Training Fund	This fund as presented is used to account for all transactions resulting from an increase of $1.00 in court costs for criminal law violations as set out in Section 56.765, RSMo. The use of these proceeds is restricted to the payment of training expenses for prosecuting attorneys.
Law Enforcement Training Fund	This fund as presented is used to account for all transactions resulting from an increase of $2.00 in court costs for criminal law violations as set out in Section 590.140, RSMo. The use of these proceeds is restricted to the payment of training expenses for law enforcement personnel.
911 Emergency Fund	This fund as presented is used to account for the receipts and disbursements to provide emergency telephone service. This fund was established under Section 190.305, RSMo.
Domestic Violence Fund	This fund as presented is used to account for all transactions resulting from an increase of $5.00 for a marriage license and $10.00 for a decree of dissolution of marriage as set out in Section 455.205, RSMo. The use of these proceeds is restricted to providing financial assistance to shelters for victims of domestic violence.
Inmate Security Fund	This fund as presented is used to account for all transactions resulting from an increase of $2.00

Fund	Description
	in court costs for criminal law violations as set out in Section 488.5026, RSMo. The use of these proceeds is restricted to the payment of biometric verification systems.
Election Services Fund	This fund as presented is used to account for the receipt of the "proportional costs" of conducting an election when a question or candidate is submitted to a vote by two or more political subdivisions as set out in Section 115.065, RSMo. This fund is used for training programs and to purchase additional supplies or equipment to improve the conduct of elections.
Collector's Tax Maintenance Fund	This fund as presented is used to account for the two-sevenths of the 7 percent fee charged by the Collector for collection of delinquent and back taxes as set out in Section 52.290, RSMo. This fund is to be used for additional administration and operation costs for the office of the collector.
Recorders User Fee Fund	This fund as presented is used to account for the fifty percent retainage of the $4.00 user's fees to be charged by the recorder as set out in Section 59.319, RSMo. This fund is to be used for record storage, microfilming and preservation.
TIF Escrow Fund	This fund is presented to hold amounts of disputed tax collection in regards to the TIF district.
HPRP Fund	Accounts for grant revenues received by the County on behalf of a local entity in the capacity of grant sponsor. All grant revenues are turned over to the intended sub-recipients to carry out the intended purpose of the grant.

Capital Project Funds – Capital Project Funds are used to account for resources restricted for the acquisition or construction of specific capital projects or items. The reporting entity includes the following Capital Project Fund that is reported as a major fund in 2009 and nonmajor in 2010:

Fund	Description
Justice Center Capital Projects Fund	The Justice Center Capital Projects Fund is used to account for the financial transactions occurring in the process of construction of a new justice center.

Debt Service Funds – Debt Service Funds are used to account for the accumulation of resources for, and the repayment of, general long-term debt principal and interest. The reporting entity includes the following Debt Service Fund that is reported as a major fund in 2010 and nonmajor in 2009:

Fund	Description
Debt Service Fund	Accounts for the accumulation of resources for, and the payment of, general long-term debt principal and interest.

Fiduciary Fund Types (not included in government-wide statements)

Agency funds account for miscellaneous assets held by the County for other funds, governmental units, and individuals. The agency funds are custodial in nature and do not involve measurement of results of operations.

Measurement Focus and Basis of Accounting

Measurement focus is a term used to describe "how" transactions are recorded within the various financial statements. Basis of accounting refers to "when" transactions are recorded regardless of the measurement focus applied.

Measurement Focus

In the government-wide Statement of Net Assets and the Statement of Activities, both governmental and business-type activities are presented using the economic resources measurement focus, within the limitations of the cash basis of accounting, as defined below.

In the fund financial statements, the "current financial resources" measurement focus or the "economic resources" measurement focus, as applied to the cash basis of accounting, is used as appropriate.

All governmental funds utilize a "current financial resources" measurement focus. Only current financial assets and liabilities are generally included on their balance sheets. Their operating statements present sources and uses of available spendable financial resources during a given period. These funds use fund balance as their measure of available spendable financial resources at the end of the period.

Basis of Accounting

In the government-wide Statement of Net Assets and Statement of Activities and the fund financial statements, governmental, business-type, fiduciary activities are presented using a cash basis of accounting. This basis recognizes assets, liabilities, net assets/fund equity, revenues, and expenditure/expenses when they result from cash transactions. This basis is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

As a result of the use of this cash basis of accounting, certain assets and their related revenues (such as accounts receivable and revenue for billed or provided services not yet collected) and certain liabilities and their related expenses (such as accounts payable and expenses for goods or services received but not yet paid, and accrued expenses and liabilities) are not recorded in these financial statements.

Cash and Cash Equivalents

Section 110.270, RSMo, based on Article IV, Section 15, Missouri Constitution, authorizes counties to place their funds, either outright or by repurchase agreement, in the U.S. Treasury and agency obligations. In addition, Section 30.950, RSMo, requires political subdivisions with authority to invest in instruments other than depository accounts at financial institutions to adopt a written investment policy. Among other things, the policy is to commit a political subdivision to the principles of safety, liquidity, and yield (in that order) when managing public funds and to prohibit purchase of derivatives (either directly or through repurchase agreements), use of leveraging (through either reverse repurchase agreements or other methods), and use of public funds for speculation. The County has not adopted such a policy.

Cash and cash equivalents include both deposits and short-term investments. Investments are considered short-term when original maturities are less than three months. For the purposes of these disclosures, deposits with financial institutions are demand, time, and savings accounts, including certificates of deposit and negotiable order of withdrawal accounts, in banks, savings institutions, and credit unions, and short-term U.S. Treasury bills.

Equity Classification

Government-Wide Statements - Equity is classified as net assets and displayed in two components:

1. Restricted net assets - Consists of net assets with constraints placed on the use either by (1) external groups such as creditors, grantors, contributors, or laws and regulations of other governments, or (2) law through constitutional provisions or enabling legislation.

2. Unrestricted net assets - All other net assets that do not meet the definition of "restricted".

It is the County's policy to first use restricted net assets prior to the use of unrestricted net assets when an expense is incurred for purposes for which both restricted and unrestricted net assets are available.

Fund Financial Statements - Governmental fund equity is classified as fund balance.

C. Revenues, Expenditures, and Expenses:

Program Revenues

In the Statement of Activities, cash basis revenues that are derived directly from each activity or from parties outside the County's taxpayers are reported as program revenues. The County has the following program revenues in each activity:

Revenue	Source
Judicial and Court Related	Various fees, fines and costs.
Public Safety	Law enforcement fines and fees, and prosecuting attorney collections and fees.
Transportation	Grants for construction and operation of roads and bridges in the county.
Health and Welfare	Grants for operation of the public health center.
General County Government	Public officials fees.

All other governmental revenues are reported as general. All taxes are classified as general revenue even if restricted for a specific purpose.

D. Internal and Interfund Balances and Activities:

In the process of aggregating the financial information for the government-wide Statement of Net Assets and Statement of Activities, some amounts reported as interfund activity and balances in the fund financial statements have been eliminated or reclassified.

Fund Financial Statements

Interfund activity, if any, within and among the governmental fund categories is reported as follows in the fund financial statements:

1. Interfund reimbursements - Repayments from funds responsible for certain expenditures/expenses to the funds that initially paid for them are not reported as reimbursements but as adjustments to expenditures/expenses in the respective funds.

2. Interfund transfers - Flow of assets from one fund to another where repayment is not expected are reported as transfers in and out.

Government-Wide Financial Statements

Interfund activity and balances, if any, are eliminated or reclassified in the government-wide financial statements. Amounts reported as interfund transfers in the fund financial statements are eliminated in the government-wide Statement of Activities except for the net amount of transfers between governmental and business-type activities, which are reported as Transfers-Internal Activities. The effects of interfund services between funds, if any, are not eliminated in the Statement of Activities.

E. Inventories and Capital Assets:

Inventories include office equipment, road and vehicle maintenance supplies, and fuel. Capital assets consist of land, buildings, furniture, equipment, vehicles, and infrastructure such as roads and bridges. Both inventories and capital assets are recorded as disbursement when they are purchased or constructed.

F. Long-Term Debt:

Consistent with the cash basis of accounting, long-term debt is not reported in the government-wide or fund financial statements. Proceeds from debt issuances are reported when received, and payments of principal and interest are reported when disbursements are made.

G. Estimates:

The preparation of financial statements in conformity with generally accepted accounting principles required management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

H. Risk of Loss:

The County protects itself from risk of loss by purchasing commercial insurance for property damage and liability risks. The County does not self-insure its risk.

I. Compensated Absences:

The accrued vacation time payable is not recorded in the financial statements since the cash basis of accounting is employed. Although the possibility that all employees will terminate in the upcoming year is remote, management estimates of the potential liability at December 31, 2010 and 2009 would have been $89,973 and $116,829, respectively.

2. CASH AND INVESTMENTS

At December 31, 2010 and 2009, the reported amount of the County's deposits was $15,044,059 and $16,013,467, respectively. The bank balance for the years ended 2010 and 2009 was $14,761,574 and $15,551,361, respectively.

Reconciliation of government-wide Statement of Net Assets to the cash footnote:

	2010	2009
Cash and Cash Equivalents	$ 4,096,518	$ 4,946,095
Agency Funds	10,947,541	11,067,372
	$15,044,059	$16,013,467

Custodial credit risk is the risk that in the event of a bank failure, a government's deposits may not be returned to it. The County's deposit policy for custodial credit risk requires compliance with the provisions of state law. County policy further requires that all securities that serve as collateral against the deposits of a depository institution must be held in safekeeping at a non-affiliated custodial facility. Of the bank balance $1,006,397 and $1,632,219 was covered by federal depository insurance and $13,755,177 and $13,919,142 was covered by collateral held by the County's safekeeping agent in the County's name for the years ended December 31, 2010 and 2009, respectively.

State law requires collateralization of all deposits with federal depository insurance; bonds and other obligations of the U.S. Treasury, U.S. agencies or instrumentalities of the State of Missouri; bonds of any city having a population of not less than two thousand, county, school district, or special road district of the State of Missouri; bonds of any state, tax anticipation notes issued by any first class county, or a surety bond having an aggregate value at least equal to the amount of the deposits.

The County's investments at December 31, 2010 and 2009 are as follows:

	December 31, 2010	
Investment Type	Maturity	Amount
Certificates of Deposit	3/18/2012	$1,000
	10/30/2012	1,000
	5/22/2012	1,500
		$3,500

	December 31, 2009	
Investment Type	Maturity	Amount
Certificates of Deposit	1/07/2010	$500,000
	3/18/2010	275,000
	3/18/2012	1,000
	10/30/2012	1,000
	5/22/2012	1,500
U.S. Government Agency Obligations Federal Home Loan Bank	3/11/2016	696,223
		$1,474,723

Certificates of deposit are classified as investments but are considered deposits for custodial risk determination. State statues require that the County's deposits be collateralized in the name of the County by the trust department of a bank that does not hold the collateralized deposits. As of December 31, 2010 and 2009, all certificates of deposit are entirely insured or collateralized with securities.

The County holds investments in U.S. Government agency obligations. These investments are stated at fair market value.

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value to changes in market interest rates. The County has no formal investment policy regarding interest rate risk.

The County has an investment policy that limits its investment choices other than the limitation of state law as follows:

Direct obligations of the U.S. Government, its agencies and instrumentalities to which the full faith and credit of the U.S. Government is pledged, or obligations to the payment of which the full faith and credit of the State is pledged.

The County places a limit on the amounts it may invest in any one issuer. The County had no concentration of credit risk for the years ended December 31, 2010 and 2009.

3. ASSESSED VALUATION, TAX LEVY, AND LEGAL DEBT MARGIN

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on November 1 and are due and payable on or before December 31. Taxes paid after December 31 are subject to penalties. The County bills and collects its own property taxes and also taxes for most other local governments.

The 2010 and 2009 assessed valuation of the tangible taxable property (excluding railroad and utilities) and the tax levies per $100 assessed valuation of that property were as follows:

	2010	2009
ASSESSED VALUATION		
Real Estate	$305,174,766	$298,120,009
Personal Property	97,992,126	99,000,929
	$403,166,892	$397,120,938
TAX LEVY		
General Revenue Fund	$ .1483	$.1226

The legal debt margin is computed as follows:

Constitutional debt limit	$20,158,345	$19,856,047
General obligation bonds payable	-	-
Legal Debt Margin	$20,158,345	$19,856,047

Under Article VI, Section 26(b) and (c), Missouri Constitution, the County, by a vote of its qualified electors voting therein, may incur indebtedness for any purposes authorized by law of the County or by any general law of the State of Missouri. The borrowings authorized by this section shall not exceed five percent of the value of the taxable tangible property in the County.

4. RETIREMENT PLAN

1. Local Government Employees Retirement System (LAGERS)

A. Plan Description:

Lawrence County participates in the Missouri Local Government Employees Retirement System (LAGERS), an agent multiple-employer public employee retirement system that acts as a common investment and administrative agent for local government entities in Missouri.

LAGERS is a defined benefit pension plan which provides retirement, disability, and death benefits to plan members and beneficiaries. LAGERS was created and is governed by statute, Section RSMo 70.600 – 70.755. As such, it is the system's responsibility to administer the law in accordance with the expressed intent of the General Assembly. The plan is qualified under the Internal Revenue Code Section 401(a) and it is tax exempt.

The Missouri Local Government Employees Retirement System issues a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained by writing to LAGERS, P.O. Box 1665, Jefferson City, MO 65102 or by calling 1-800-447-4334.

B. Funding Status:

Lawrence County's full-time employees contribute 4 percent of their gross pay to the pension plan. The June 30th statutorily required contribution rates are 5.1 percent (general) and 2.1 percent (police) of annual covered payroll. The contribution requirements of plan members are determined by the governing body of the political subdivision. The contribution provisions of the political subdivision are established by state statute.

C. Annual Pension Cost (APC) and Net Pension Obligation (NPO):

The subdivision's annual pension cost and net pension obligation for the current year were as follows:

Annual required contribution	$108,123
Interest on net pension obligation	-0-
Adjustment to annual required contribution	-0-
Annual pension cost	$108,123
Actual contributions	92,553
Increase (Decrease) in NPO	15,570
NPO beginning of year	-0-
NPO end of year	$ 15,570

The annual required contribution (ARC) was determined as part of February 29, 2008 and February 28, 2009 annual actuarial valuations using the entry age actuarial cost method. The actuarial assumptions included: (a) a rate of return on the investment of present and future assets of 7.5 percent per year, compounded annually, (b) projected salary increases of 4.0 percent per year, compounded annually, attributable to inflation, (c) additional projected salary increases ranging from 0.0 percent to 6.0 percent per year, depending on age and division, attributable to seniority/merit, (d) pre-retirement mortality based on the RP-2000 Combined Healthy Table set back 0 years for men and 0 years for women and (e) post-retirement mortality based on the 1971 Group Annuity Mortality table for males projected to 2000 setback 1 year for men and 7 years for women. The actuarial value of assets was determined using techniques that smooth the effects of short-term volatility in the market value of investments over a five-year period. The unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on an open basis. The amortization period as of February 29, 2008 was 15 years for the general division and 15 years for the police division. The amortization period as of February 28, 2009 was 30 years for the general division and 4 years for the police division.

THREE-YEAR TREND INFORMATION

Fiscal Year Ending	Annual Pension Cost (APC)	Percentage of APC Contributed	Net Pension Obligation
6/30/2008	$87,366	100%	$-0-
6/30/2009	78,136	100%	-0-
6/30/2010	108,123	85.6%	15,570

2. County Employees' Retirement Fund (CERF)

A. Plan Description:

CERF was established by an act of the Missouri General Assembly effective August 28, 1994. Laws governing the retirement fund are found in Sections 50.1000-50.1300 of the Missouri Revised Statutes (RSMo). The Board of Directors consists of eleven members, nine of whom are county employee participants. Two members, who have no beneficiary interest in CERF, are appointed by the Governor of Missouri. The Board of Directors has the authority to adopt rules and regulations for administering the system.

CERF is a mandatory cost-sharing multiple employer retirement system for each county in the state of Missouri, except any city not within a county (which excludes the City of St. Louis) and counties of the first classification with a charter form of government. CERF covers county elective or appointive officers or employees whose position requires the actual performance of duties not less than 1,000 hours per year; including employees of circuit courts located in a first class, non-charter county which is not participating in the Local Government Employees Retirement System (LAGERS); and does not cover circuit clerks, deputy circuit clerks, county prosecuting attorneys, and county sheriffs. Until January 1, 2000, employees hired before January 1, 2000 could opt out of the system. CERF is a defined benefit plan providing retirement and death benefits to its members. All benefits vest after 8 years of creditable service. Employees who retire on or after age 62 are entitled to an allowance for life based on the form of payment selected. The normal form of payment is a single life annuity.

Optional joint and survivor annuity and 10-year certain and life annuity payments are also offered to members in order to provide benefits to a named survivor annuitant after their death. Employees who have a minimum of 8 years of creditable service may retire with an early retirement benefit and receive a reduced allowance after attaining age 55.

Annual cost-of-living adjustments, not to exceed 1 percent, are provided for eligible retirees and survivor annuitants, up to a maximum of 50 percent of the initial benefit which the member received upon retirement. Benefit provisions are fixed by state statutes and may be amended only by action of the Missouri Legislature. Administrative expenses for the operation of CERF are paid out of the funds of the system.

The County Employees' Retirement Fund issues audited financial statements. Copies of these statements may be obtained from the Board of Directors of CERF by writing to CERF, P.O. Box 2271, Jefferson City, MO 65102-2271, or by calling 1-573-632-9203.

B. Contributions:

Prior to January 1, 2003, participating county employees, except for those who participated in LAGERS, were required to make contributions equal to 2 percent of gross compensation. Effective January 1, 2003, in addition to the prior contributions requirements, participating county employees hired on or after February 25, 2002 are required to make contributions of 4 percent if they are in a LAGERS county and contributions of 6 percent if they are in a non-LAGERS county. If an employee leaves covered employment before attaining 8 years of creditable service, accumulated employee contributions are refunded to the employee. The contribution rate is set by state statute and may be amended only by action of the Missouri Legislature. During 2010 and 2009, the County collected and remitted to CERF, employee contributions of approximately $171,387 and $169,530, respectively, for the years then ended.

5. LONG-TERM DEBT

On April 10, 2007, the County issued $7,040,000 in Series 2007 Certificates of Participation for the purpose of financing the construction, furnishings, and equipment for the new Justice Building to house the courts, jury rooms, prosecuting attorney, circuit clerk, and associated administrative space for the County Sheriff. The Certificates of Participation bear interest at various rates ranging from 3.6 percent to 3.8 percent with principal payments due April 1 and interest payments due April 1 and October 1 each year. The Series 2007 Certificates of Participation were retired during the year ended December 31, 2010.

On March 11, 2010, the County issued $4,945,000 in Series 2010 Certificates of Participation for the purpose of providing funds prepay, in advance of their maturities, $5,465,000 principal component of the County's $7,040,000 Insured Leased Certificates of Participation, Series 2007, that had been sold to pay the costs of the construction, equipping and furnishing of a new County courts building. The Certificates of Participation bear interest at various rates ranging from 1.0 percent to 3.0 percent with principal payments due April 1 and interest payments due April 1 and October 1 each year. The Series 2007 Certificates of Participation were due as following for the year ended December 31, 2010:

Year Ended	Amount Due		
December 31,	Principal	Interest	Total
2011	$ 925,000	$ 93,420	$ 1,018,420
2012	900,000	82,045	982,045
2013	930,000	65,995	995,995
2014	940,000	45,650	985,650
2015	965,000	21,578	986,578
2016	285,000	4,275	289,275
	$ 4,945,000	$ 312,963	$ 5,257,963

The following is the changes in long-term debt for the years ending December 31, 2010 and 2009:

	Balance December 31, 2008	Additions	Retirements	Balance December 31, 2009	Additions	Retirements	Balance December 31, 2010
Series 2007							
Lease COPs	$ 7,040,000	$ -	$ 775,000	$ 6,265,000	$ -	$ 6,265,000	$ -
Series 2010							
Lease COPs	-	-	-	-	4,945,000	-	4,945,000
	$ 7,040,000	$ -	$ 775,000	$ 6,265,000	$ 4,945,000	$ 6,265,000	$ 4,945,000

6. INTERFUND TRANSFERS

Interfund transfers for the years ended December 31, 2010 and 2009, consisted of the following:

	Transfers In (Out)	
	2010	2009
General Revenue Fund	$ (580,471)	$ (41,947)
Special Road and Bridge Fund	(530,646)	(519,655)
Assessment Fund	-0-	(4,000)
Judicial Sales Tax Fund	(784,588)	(1,010,990)
Capital Improvements Fund	550,000	40,000
Justice Center Capital Projects Fund	(820,160)	(34,898)
Debt Service Fund	1,595,403	1,020,795
Common Road I Fund	291,730	291,602
Common Road II Fund	213,265	213,169
Sheriff Special Fund	(3,375)	(2,936)
911 Emergency Fund	50,000	50,000
Collector's Tax Maintenance Fund	-0-	(36,000)
TIF Escrow Fund	20,647	34,860
HPRP Fund	(1,805)	-0-
	$ -0-	$ -0-

Transfers are used to (1) move receipts from the fund that statue or budget requires to collect them to the fund that statue or budget requires to disburse them, and (2) use unrestricted receipts in the General Fund to finance various programs accounted for in other funds in accordance with budgetary authorizations.

7. RISK MANAGMENT

The County is exposed to risk of loss due to property damage or theft, employee health or actions, and liability to the general public. The County seeks to overcome these risks through the purchase of commercial insurance. There has been no reduction in insurance compared to the previous year. The County has not settled claims resulting from these risks that exceeded its commercial coverage in any of the past three fiscal years.

The County is insured under a retrospectively rated policy for workers' compensation coverage. The initial premium may be adjusted based on actual experience. Adjustments in premiums are recorded when paid or received. During the year ended December 31, 2010 and 2009, there were no significant adjustments in premiums based on actual experience.

8. CONTINGENT LIABILITIES

The County is a defendant in a lawsuit. Although the outcome of this lawsuit is not presently determinable, in the opinion of the County's counsel the resolution of these matters may be in excess of $50,000 and continues to increase. At December 31, 2010, the County has $98,026 set aside for this lawsuit settlement.
